In order to determine whether the use of standardized test scores as a criterion for admission was discriminatory toward applicants over 40 years of age, an investigation was made of 72 students enrolled in an associate degree nursing program at Alvin Junior College (Texas) during the fall 1974 term. The class was divided into three age groups—20-29, 30-39, and 40 or older—and four hypotheses were tested. (1) The American College Test scores proved to be significantly higher in the younger groups than in the older group. (2) The mean test scores on the National League for Nursing tests at the end of the course did not differ significantly among the age groups. (3) The final grades of the course were slightly higher in the 20-29 age group than in the older groups. However, the final grades of the older students were adversely affected because all the test grades for the course were averaged. Grades for the older groups generally improved as the course progressed. (4) Evaluations of clinical performance made by hospital instructors showed that older students were rated higher in performance, attitude, and attendance. Since older students make more progress and increase skill in test-taking after getting "back into training," the use of test scores as an entrance requirement would seem to be discriminatory. **Values and the Process of Education: A Comparison of the Values of Junior College Freshmen and Faculty in Puerto Rico and on the Mainland.**

Pub Date Sep 75

Note—32p.; Ed.D. Practicum, Nova University  
EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage  
Descriptors—American Culture, \*College Faculty, Cultural Factors, Group Norms, \*Junior Colleges, \*Junior College Students, Personal Values, \*Puerto Rican Culture, Religious Factors, Social Values, Teaching Methods, \*Values  
Identifiers—Puerto Rico, Rokeach Value Survey

In order to measure the cultural, institutional, and personal values of students and faculty at three California junior colleges (urban, suburban, and rural), the Rokeach Value Survey was administered to over 1,500 subjects in 1968. This study compares the data generated in the California survey to data generated by administering a Spanish language version of the same survey to 76 faculty and 86 students at a private urban junior college in Puerto Rico in 1975. The traditional Hispanic deference values of obedience and politeness are more important to the Puerto Rican students and faculty than to their Californian counterparts, who placed a higher value on freedom and independent action. In contrast to the California respondents' rankings, the welfare values in Puerto Rico (a comfortable life, sense of accomplishment, ambition, capability) are disvalued in relation to the deference values. The high rank given to salvation in Puerto Rico reflects traditional values. Comparing Puerto Rican rankings to those of an American sample in the same economic group reveals that culture, not economics, is the differentiating factor. The implications the results carry for the importation of teaching strategies from the mainland are analyzed, and a series of recommendations for adapting teaching methods to Puerto Rico are presented. This selective abstract bibliography prepared by ERIC Clearinghouse on Early Childhood Education is a guide to recent ERIC documents on bilingual education of children. Citations have been divided into four sections: (1) selected ethnic groups (Spanish speaking, native Americans, Chinese, Portuguese and Filipino); (2) migrants; (3) second language learning; and (4) general (bibliographies, legislation, media, multicultural research, teacher training). Citations included are from "Resources in Education (RIE)," January 1974 through March 1975, and from "Current Index to Journals in Education (CIJE)," August 1971 through October 1974. There are 116 abstracts from "RIE" and 74 citations from "CIJE." Descriptor (subject index) terms are included for all citations. (GO)

This document examines existing program models and methods aimed at promoting parental

involvement in early child development and education. Included are discussions of issues, research evidence and evaluation techniques pertaining to parent involvement. Descriptions of specific programs show how involvement can be developed through such channels as home visitation, parent group meetings, group care arrangements, community resources, and television programming. Suggestions are made for measuring parent change as a result of involvement programs. Problems often encountered when working with parents and possible solutions to these problems are discussed in detail. Available bibliographies, audiovisual materials, and curriculum guides for parents and those who work with parents are described. (BRT)

Descriptors—Achievement Gains, \*Comparative Analysis, \*Compensatory Education Programs, \*Curriculum Evaluation, Data Analysis, Demography, \*Early Childhood Education, Longitudinal Studies, \*Program Evaluation, Race, Tables (Data)

Identifiers—\*Project Head Start

This preliminary report evaluates the second year, 1970-71, of Head Start Planned Variation (HSPV), covering research methodology, description of the models, characteristics of the children, classrooms and sites, estimated overall effects of the Head Start experience, differences in the effects of PV and comparison classrooms, and short term effects of 11 Head Start program models. An attempt is made to answer the questions: (1) What are the short term effects of a Head Start experience on children? (2) Are there discernible differences between the effects on children of a HSPV experience and a conventional Head Start experience? (3) Do PV models differ in their effects on Head Start children? Five outcome measures were used: three measures of cognitive achievement, one of general intelligence, and one of motor control. Major findings indicated that: the Head Start experience substantially increased children's test scores on all five outcome measures; that children who had prior preschool experience gained less overall than children whose first year of preschool was in Head Start in 1970-71; and that there seemed to be no consistent differences among Mexican American, black, and white children in their Head Start gains on the five outcome measures. No differences in effects were found between the HSPV programs and the comparison Head Start programs. (GO)

Descriptors—\*Classroom Observation Techniques, \*Comparative Analysis, \*Compensatory Education Programs, Data Analysis, \*Early Childhood Education, Longitudinal Studies, Program Effectiveness, \*Program Evaluation, Teacher Evaluation

Identifiers—\*Project Head Start

This study reports an attempt to measure implementation of Head Start Planned Variation, a national experiment designed to compare the relative effectiveness of 12 education models. The report first gives the background of the ex-

periment, describes the problem of attempting to assess effectiveness without first measuring implementation, and reviews research on implementation. The process of designing instruments is outlined, and 10 of the models and their instruments are described. Methodological problems are discussed, data analyses are presented, and alternative strategies for the evaluation of implementation are suggested. The final chapter contains a summary and conclusions. It is suggested that the ideal design for the study of implementation has two components: (1) an adequate description of the intervention with input from all members of the training staff as well as the sponsor; and (2) an adequate evaluation of implementation, performing primarily a formative function. Implementation checklists and figures on interobserver agreement are included in the appendices. (GO)

 Identifiers—\*Project Head Start

This report on model implementation during the third year (1971-72) of the Head Start Planned Variation experiment concentrates on the development of measures of implementation. Measures are examined individually in terms of design and use, strengths and weaknesses, and findings obtained, and agreement among raters on the extent of implementation is discussed. A comparative analysis of consultant checklists, sponsor checklists, sponsor overall ratings, teacher perceptions, and sponsor ratings is presented. Proposals to improve implementation measures include a contractual agreement between evaluators and those responsible for treatment implementation, field testing of implementation measures prior to their use, and systematic training of raters. The report concludes that substantial problems remain with implementation measurement, that some models may never fit into a quantified, easily observable measure, and that there may always be an element of subjectivity in assessing the extent to which a program is implemented. Appendices comprise site to site variation in levels of implementation and the 1971-72 implementation measures. (GO)

 Descriptors—Behavior Rating Scales, \*Early Childhood, \*Goal Orientation, \*Persistence, \*Personality Development, \*Sex Differences, Statistical Analysis  
 Identifiers—Barriers

This study proposes to (1) explore the responses of boys and girls at three age levels to several different barrier situations; (2) assess the personality correlates associated with barrier behavior; (3) evaluate covariance differences between the sexes; and (4) determine the relationship between barrier behaviors and sex-role typing. A total of five barrier tests were administered at ages 3.5, 4.5, and 5.5 years. A central measure, the barrier intensity score (BI), was obtained by an observer who rated the intensity of the child's efforts to overcome the barrier. A personality characterization of each child was obtained from sets of teacher ratings. Results show

an absence of sex differences in means and sigmas of BI scores; however, reliable differences in the correlational patterns associated with BI as a function of sex suggest that instrumental behavior in response to barriers is moderated by different psychological structures in boys and girls at age 4. These findings imply that analysis of covariance is essential in the evaluation of sex differences in barrier research. (GO)

 Descriptors—\*Adjustment Problems, \*Child Rearing, Comparative Analysis, Emotional Adjustment, \*Family Life, Interpersonal Relationship, Middle Class Parents, \*One Parent Family, Parent Attitudes, Parent Child Relationship, \*Parent Role, Psychological Patterns  
 Identifiers—\*Divorce

An investigation of changes in functioning of mothers and fathers following divorce is presented in this paper. Subjects were 24 white middle class boys and 24 girls and their divorced parents, from homes in which custody had been granted to the mother, and the same number of children and parents from intact homes. A multimethod approach, including interviews, observations, diary records, and personality measures, was used to assess parent characteristics, child characteristics, and family interaction. Parents and children were administered these measures at two months, one year, and two years following divorce. Results show that when a father leaves the home following divorce, the family system is in a state of disequilibrium. Disorganization and disrupted family functioning seem to peak at one year and be stabilizing by two years following the divorce. Stresses in family functioning following divorce are reflected not only in parent-child relations but in changes in life-style, emotional distress, and changes in attitudes toward the self of the divorced couple. It is suggested that these changes in the parents may be mediating factors in changes in the child's behavior. (Author/BRT)

**Sociability and Social Sensitivity: Characteristics of the Stranger.**

Pub Date 4 Apr 75  
 Note—39p.; Paper presented at the Annual Meeting of the Eastern Psychological Association (New York, N.Y., April 4, 1975) and the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 11, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
 Descriptors—\*Infant Behavior, \*Interpersonal Competence, Longitudinal Studies, Mothers, \*Parent Child Relationship, Sex Differences, \*Social Behavior, Social Development, \*Stranger Reactions

Identifiers—\*Experimenter Characteristics  
 This paper reports an 18-month investigation of the differential effects of social context (i.e., characteristics of people in the child's immediate environment) on infants' positive social behavior. The social behaviors of 14 children from 1 to 2-1/2 years of age were observed at home and in a laboratory playroom. The social context was varied along three broad categories of stranger characteristics: familiarity to the child, personal qualities of the individual, and type of behavior performed by the stranger. Data were analyzed by sex of infant, by the degree to which infants demonstrated social competence with their mothers, and by infants' familiarity with the observed situation, as well as by characteristics of the strangers. Results were interpreted to illustrate the need for experimenters to take into account characteristics and behaviors of testers and observers in assessing infant social development. In addition, it was suggested that by the time children are 14 months old, and increasingly over the next year and a half, they spontaneously initiate positive social behavior and are appropriately responsive to adults whom they have never met before. **New Options in Assessing Moral Judgment and Criteria for Evaluating Validity.**  
 Pub Date 10 Apr 75

Note—16p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
 Descriptors—\*Comparative Analysis, Data Analysis, Data Collection, \*Human Development, \*Moral Development, Scoring Formulas, \*Test Construction, \*Test Interpretation, Test Validity

Identifiers—\*Defining Issues Test, Kohlberg (L)  
 This paper describes the rationale for the Defining Issues Test (DIT), an objective test of moral judgment which attempts to improve upon three aspects of Kohlberg's research: data collection, categorization of moral judgments (the scoring system), and method of indexing a subject's progress in a developmental sequence. In each case, the way in which the DIT overcomes problems in the Kohlberg system is described and explained. In the DIT, the subject is given a moral dilemma and asked to classify his own thoughts. Results of the DIT show subjects to be more advanced and to display more principled thinking than would be expected from Kohlberg's data. This discrepancy is explained in terms of differences between the DIT task and Kohlberg's task. It is thought that the latter may seriously underestimate people's recognition and discrimination of principled thinking. In addition, it is argued that an accurate system for indexing an individual's development must go beyond stage typing (the categorization of the individual in terms of one developmental stage). A theory of decalage is called for, to describe the interplay of variables related to uneven acquisition of characteristics associated with a given stage. For the present, it is suggested that moral judgment data be preserved for later reanalysis, and that various indices be examined for best fit with the empirical properties expected of the construct moral judgment. Appended are two tables: (1) the DIT format, and (2) major validity questions and comparison of findings with Kohlberg's Test and DIT. (GO)

**The Development of Propositional Reasoning: Conceptual Issues, and Suggestion of a Perspective for Empirical Research.**

Pub Date Apr 75  
 Note—13p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
 Descriptors—\*Abstract Reasoning, Adolescence, \*Childhood, \*Cognitive Processes, Developmental Tasks, Linguistic Competence, \*Logical Thinking, \*State of the Art Reviews  
 Identifiers—Formal Operations, \*Piaget (Jean)

This theoretical paper reevaluates the Piagetian tradition in the study of propositional reasoning. Piaget's assertion that children's logic, prior to the stage of formal operations, is structurally adequate for dealing with objects and their properties, but is inadequate for fully competent propositional reasoning, is challenged on three grounds: (1) the data base from which Piaget's theory about formal reasoning has been developed comes from a scientific task domain with its specific task requirement and associated psychological factors; (2) the theory cannot, a priori, be extended to other propositional task domains, and empirical support for generalizing it has not been provided; (3) findings from adult studies show that adults tend to rely on empiric (rather than propositional) reason whenever it is possible to do so. Therefore, there are interesting similarities between child and adult reasoning which the Piagetian outlook has de-emphasized. A linguistically oriented view on the development of propositional reasoning is proposed, based on the idea that acquiring propositional competence is an achievement of the same nature as acquiring competence in grammar or syntax. The theoretical and methodological consequences of this view are examined. (GO)

Identifiers—\*Competence, \*HOME Scale, \*White (Robert)

This longitudinal study attempted to assess how environmental factors affect the development of competence, as defined by White, by delineating in detail the everyday environmental transactions of a group of children from age 1 to 3. The key questions of this research were: (1) Are certain experiences encountered by the young child in his everyday life more important to his intellectual development than others? (2) If so, does the source of these experiences matter? and (3) Is the question of timing important? A total of 23 children were observed repeatedly in their homes and neighborhoods and the observations coded using the HOME Scale. Results confirmed that (1) the class of observed experiences, classified a priori were intellectually valuable to the child, (2) it does not matter how the child's intellectual experiences are derived, and (3) different sources of intellectually valuable experiences become important at different periods in the child's life. It was found that child-person interaction correlates highly with test performance at age 3, modeling becomes important at age 2, and self-directed intellectual experiences become important at age 2 1/2. Investigation of experimental antecedents of the child's spontaneous expression of intellectual competence yielded results which duplicated the findings for tested intellectual competence, with the exchange between child and interactor being most highly related to the child's later intellectual competence. Aspects of the interactive situation and interactor role are discussed in terms of the critical role early interactive experiences play in the child's intellectual development. (GO)

**Utility of Interactional Strategies in the Study of Formal Operations Reasoning.**

Pub Date Apr 75

Note—16p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Abstract Reasoning, \*Adolescence, \*Childhood, \*Cognitive Development, \*Comparative Analysis, \*Interaction, \*Logical Thinking, \*Methods, \*Research Methodology, \*Test Interpretation, \*Validity

Identifiers—\*Interactional Strategies

This paper argues in favor of using interactional strategies in the study of formal operations reasoning. Interactional designs allow a convergent approach to specifying processes underlying the interaction of variables. In contrast, current methodologies contain two inherent disadvantages: they have limited utility in specifying the processes underlying development, and their results are difficult to interpret. Interactional strategies were used in the design of two experiments on the development of formal operations competencies. The results of these experiments suggest that applying interactional strategies to the study of formal operations growth allows direct comparison between the strengths of existing age-related performance differences and the strengths of the experimentally manipulated treatments. This research design may also reveal catching up and readiness interactions that could result in new interpretations for developmental

differences, allowing precise statements as to the nature of the interaction of maturational and experiential factors which determine formal operations development. (GO)

Identifiers—\*Piaget (Jean)

This investigation examined strategic and semantic aspects of the answers given by preschool children to class inclusion problems. The Piagetian logical formalism for class inclusion was contrasted with a new, problem processing formalism in three experiments. In experiment 1, it was found that 48 nursery school subjects nearly always performed better on percept inclusion than on concept inclusion. This result supports problem processing formalism and contradicts logical formalism. Experiment 2 used 11 of the same subjects to investigate three questions: whether the children's counting strategies would produce the same response patterns as in experiment 1, whether the answer "the same number" (essential to any correct coextensive comparison) was available in their response repertoire, and whether expected responses to coextensive problems in concept and in percept sets would be obtained. Results offered consistent experimental support for SCAN and MATCH components of the problem processing model. Experiment 3 utilized 48 new subjects and a design which crossed four categories with four problem types, to clarify the reasons for the difference observed between the difficulty of percept and concept problems. Interpretations of the results are discussed in terms of the children's semantic strategies and counting strategies. The general conclusion offered is that problem-solving strategies, not logical deficits, are the source of young children's inclusion of errors. (GO)

**Test Anxiety and Off-Task Behavior in Evaluative Situations.**

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Pub Date 13 Apr 75

Grant—OEG-0-72-0882

Note—12p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Anxiety, \*Attention, \*Span, \*Evaluation, \*Individual Characteristics, \*Intermediate Grades, \*Parent Attitudes, \*Parent Influence, \*Performance Factors, \*Problem Solving, \*Task Performance, \*Teaching Methods, \*Testing

An experiment was performed to assess if, and how, attention to a problem solving task varies with anxiety level. It was hypothesized that high anxious children would glance away from a task more often than less anxious children, in light of research literature which suggests that high anxious children are inattentive to tasks in order to avoid evaluation. Subjects were 48 fourth and fifth graders. The children were videotaped through a one-way mirror while they performed timed anagram tasks in the presence of a male experimenter working on a similar task. Results showed that less anxious children performed better at the anagram task than anxious children. High anxious children also were observed to engage in significantly more off-task behavior and more glancing away from their task than less anxious children. Research on family interaction patterns associated with high and low levels of anxiety and distractibility in fourth and fifth graders is discussed in view of the results of this study. It is suggested that parents of highly distractible and

anxious children may be teaching their children to respond to problem-solving situations with task-inappropriate and dependent behavior, at the expense of task performance. (BRT)

**Individual Differences in Affect.**

Spons Agency—Public Health Service (DHEW), Washington, D.C.

Pub Date Apr 75

Note—18p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Affective Behavior, \*Emotional Development, \*Heart Rate, \*Individual Differences, \*Infancy, \*Nature Nurture Controversy, \*Physical Characteristics

This paper argues that infants' affect patterns are innate and are meaningful indicators of individual differences in internal state. Videotapes of seven infants' faces were coded using an ethogram; the movement of the eyebrow, eye direction, eye openness, mouth shape, mouth position, lip position, and tongue protrusion were assessed independently. Nearly the whole range of facial movements was observed during the neonatal period, thus indicating that all the movements generally called smile, frown, angry grimace, excitement, boredom, sorrow, joy and shame are possible from at least the second or third week of life. Electrocardiogram data were recorded simultaneously with videotaping of the infants' faces during periods when the infants were attending to novel stimuli and were habituating to these stimuli. Analysis of these data revealed substantial co-occurrence of facial change and heart rate change, which suggests that observed infant affect is a reflection of the infants' internal state rather than a random patterning waiting to be organized. **Children's Processing of Social Information from Televised Dramatic Programs.**

Spons Agency—National Inst. of Mental Health (DHEW), Bethesda, Md.

Pub Date 11 Apr 75

Note—13p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 11, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Age Differences, \*Children, \*Complexity Level, \*Comprehension Development, \*Elementary School Students, \*Grade 2, \*Grade 8, \*Recall (Psychological), \*Social Influences, \*Television Research, \*Television Viewing

This study examined how children of different ages process social information from dramatic television programs. Second and eighth graders were shown edited versions of a television program that differed in complexity and the difficulty of inferring causal connections between the scenes. In addition, the scenes in half of the showings were kept in the original narrative sequence while in the other half they were randomly ordered. After watching one of the four versions of the program, each child was asked to answer multiple choice questions about discrete scenes in the show and the causal relationships among scenes. The results showed that second graders were poorer at answering inference questions than eighth graders. However, second graders who had watched one of the simple versions of the program did better than those who had seen a complex version, regardless of whether the simple version was ordered or jumbled. Eighth graders did best when the scenes in the program were ordered, regardless of the amount of information in the program. It was concluded that with increased age, there is an increased "straining for meaning" in television viewing. (Author/JMB)

**Investigation of the Regulatory Power of the Impulsive and Meaningful Aspects of Speech.**

Spons Agency—Fonds National de la Recherche Scientifique, Brussels (Belgium).

Pub Date Apr 75

Note—16p.; Paper presented at the Biennial Meeting of the Society for Research in Child

Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Behavioral Science Research, Behavior Development, \*Behavior Patterns, \*Behavior Theories, \*Early Childhood Education, \*Motor Development, Perceptual Motor Coordination, Preschool Children, Primary Grades, Reactive Behavior, Research Methodology, \*Speech, Stimulus Behavior, Visual Stimuli

**Identifiers**—Luria (A R), \*Verbal Regulation

Partial and methodologically questionable replications of the Luria experiments on the child's verbal regulation of his motor behavior have led to results and conclusions contradictory to Luria's findings. An error in the methodology of two of these replications is discussed as the reason for a new investigation of Luria's hypothesis. Several experiments performed with children between 3 and 8 years of age are reported here. In general, data tend to support the hypothesis of a regulatory effect of the rhythmic aspect of speech over the simultaneous motor behavior of children from 3 1/2 years of age on. However, the results did not confirm predictions derived from the part of Luria's hypothesis concerning the possible regulatory function of the meaningful aspect of speech. (Author/ED)

**Descriptors**—\*Creativity, \*Goal Orientation, \*Imagination, \*Intelligence Level, Intelligence Tests, \*Kindergarten Children, Research Methodology

**Identifiers**—\*Imaginary Companions

This study attempted to assess directly whether children who had had an imaginary companion were significantly different from those who had not, in intelligence, creativity, and waiting ability, each of which had been identified in previous research as an important correlate of this phenomenon. A total of 84 children participated in this study, half of whom had been identified as having an imaginary companion and half of whom had been identified as not having one. The two groups had an equal number of boys and girls, did not differ significantly in subjects' age (average 5 years 9 months) or socioeconomic status (predominantly middle class), and were matched to ensure equal numbers of only children, first borns, and later borns. Each child was tested at home in his own room with the Peabody Picture Vocabulary Test to measure intelligence, the Uses Task and Abstract Patterns Task to measure creativity, and a modification of Singer's (1961) waiting ability task. There were no significant differences between the two groups on any of the three measures. Discrepancies between the findings of this study and those of the other studies cited in this paper were attributed to methodological differences. (Author/JMB)

**Descriptors**—\*Cognitive Development, Cognitive Processes, Developmental Psychology, \*Language Development, Logic, Logical Thinking, \*Models, \*Preschool Education, \*Psycholinguistics, Thought Processes

This paper presents a system for describing and categorizing various theories of language and thinking. Within this system, theories are described in terms of their position on three basic issues: (1) the direction of dependency between language and cognition, (2) the necessity of that dependency, and (3) the level of specificity at which the dependency is believed to operate. In addition, a theory may stipulate that these relationships are stable or varying over time. It is suggested that this descriptive system might be used to compare the positions of two theorists, to compare changes over time in a given theorist's stated position, or to determine the level of proof adequate for testing a given theoretical statement. **Knowing the Question to an Answer: The Later Development of Question-Answer Relationships.**

Pub Date Apr 75

Note—19p.; Paper presented at the Annual Meeting of the American Education Research Association (Washington, D.C., March 30-April 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Abstract Reasoning, \*Adolescents, \*Children, \*Cognitive Development, \*Concept Formation, Cross Sectional Studies, \*Linguistics

**Identifiers**—\*Question Answer Reciprocity

This study examined children's development of the concept of the reciprocal relationship of question and answer by asking subjects to form questions to fit given answers and to form answers for given questions. A total of 72 children (18 per grades 1, 4, 7, and 10) participated in the study. Each child was tested individually on two tasks (the formation of questions and the formation of answers) and with two presentation modes (verbal context alone and verbal context in combination with pictures). The results showed significant effects for grade, task, mode of presentation, and interaction of grade and task. Children in all grades formed more correct answers than questions. While question means increased over grade level, answer means did not. It was concluded that (1) the task of question formation is a more demanding measure of the concept of question-answer reciprocity than is answer formation; (2) expression of the concept of question-answer reciprocity increases over the age period encompassed in this study; and (3) the levels of question formation and answer formation eventually converge for most subjects, indicating a fully abstract understanding of the reciprocal relationship. This booklet describes and evaluates an experimental home teaching program based on Piagetian developmental theory. The project was designed to stimulate infants' cognitive development and help mothers become more effective teachers of their children. Sixty-five infants, primarily from low socioeconomic status homes, were enrolled in the program at 3, 7, or 11 months of age, following administration of the Bayley Scales of Infant Development. Subjects were divided into three groups. Infants and mothers in the experimental group had weekly sessions (60-90 minutes each for a period of 16 months) with professional teachers experienced in early education or in working with parents and infants. Formally sequenced sets of informal infant play activities, individualized by the teacher to each mother child pair, were used in these sessions. The second group of mothers and infants had similar sessions conducted by college students and teacher aides rather than professionals. No formal curriculum was followed in these sessions; home visitors planned their activities autonomously. The first and second groups of infants were tested every four months along with a third group designated as controls. Experimental group children were found to perform at significantly higher levels on intelligence tests and showed greater linguistic skill than children from either of the other two groups. Other findings are reported. (BRT)

**Identifiers**—\*Appalachia, Appalachian Regional Commission, Black Appalachian Commission

This booklet describes the changing economic conditions in Appalachia and the improved social services for children. According to statistics reported in 1969 nearly 43 percent of all children under 6 in Appalachia were categorized as poor and likely to require some special services, while only 5 percent were receiving such services. The Appalachian Regional Commission has concentrated its efforts on job training, transportation, and upgrading the quality of education in Appalachia. Several Appalachian programs are described briefly, including day care centers which offer child development services such as parent counseling, health and medical services, family planning, and pre- and postnatal care, and home-based outreach programs available for families of nonworking mothers who receive public assistance. Also described is the Black Appalachian Commission, which gathers information about the black population in Appalachia, identifies community problems, and mobilizes available resources. (Author/BRT)

This group facilitator manual which forms the basis of a package of materials (including a handbook and media presentation) is designed for use with child care councils, policy advisory committees, and child advocacy groups which want to become more effective in developing programs for children. The manual is divided into two major sections. The first section briefly reviews the concepts and principles used in the handbook; that is, the need, approach, theory, and planning process which underlie the package. Information related to the processes of group dynamics is reviewed. The second section reviews the individual steps and decisions found in the handbook including twelve questions through which the group defines itself, its goals, decisions, actions, and follow-up evaluation. For each of these questions, the facilitator is provided guidelines on what to watch and keep in mind, the semantics involved, plus other considerations. Brief sections are also included on the use of the transparencies and slide show. (ED)

This handbook is a general planning tool for child development groups that want to be more effective than they are. It is designed to help a group determine (1) its reasons for existence; (2) its aspirations for improving child development programs in the community; (3) its limitations; (4) what steps it needs to take to achieve its goals; (5) who will carry out its initial project; and (6) the schedule of action necessary. The handbook also offers guidance in group self-evaluation, so that the group can determine (1) if the planned project is being carried out; (2) if it is being carried out to the group's satisfaction; and (3) upon completion, if the project fulfilled the group's initial expectations and if the group should continue to proceed with further projects. **Identifiers—**\*Project Head Start

This review of the activities of eight Head Start grantees during the 1973-74 program year incorporates for each topic the study findings, recommendations to the Department of Health, Education and Welfare (HEW), and comments from HEW in response to recommendations. Topics include excerpts of Head Start (e.g., available services, children's educational gains, parent participation), services provided to the handicapped, and problems in administration. Grantees were found to be marginally successful in facilitating parent participation, and it is recommended that alternative means of involving parents be developed. Examination of services provided to handicapped children by the Office of Child Development and Head Start grantees indicated that Head Start programs lack the professional staff, training, facilities, and equipment needed to serve the severely handicapped. It is recommended that this situation be remedied and that professional confirmation of classification of handicapped children be obtained to avoid misclassification. Administrative problems discussed include low enrollment, low average daily attendance and service to ineligible families. These problems are said to continue because of inadequate monitoring of grantees by the regional offices. Appendices to the report give information from selected studies relating to the impact of Head Start and comments from HEW pertaining to the draft report by the General Accounting Office entitled "Assessment of Project Head Start." **Perceptual, Cognitive, and Affective Perspective Taking and Empathy in Kindergarten through Third-Grade Children.**

Pub Date Apr 75

Note—25p.; A condensed version of this paper was presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Affective Behavior, Behavior Patterns, Cognitive Development, \*Emotional Development, \*Empathy, \*Identification (Psychological), Perceptual Development, \*Primary Education, Psychological Patterns, Sex Differences, Social Development, Social Science Research

**Identifiers—**Perspective Taking

The development of perceptual, cognitive, and affective perspective taking and empathy was investigated in 96 kindergarten through third-grade children. Cognitive perspective taking was found to increase between second and third grades. Affective perspective taking, in situations controlling their own affective responses to story characters, decreased with grade level. Perceptual perspective taking showed no grade changes, and empathy was curvilinearly related to grade level. Males were found to be better perceptual and affective perspective takers than females. Task intercorrelations were low and nonsignificant, supporting the view that perspective taking and empathy are multidimensional social-cognitive constructs. (Author/BRT)

Prenatal and infant nutritional needs and eating patterns are described and illustrated (in picture-book style) in this brief story about a mother and her infant son. Balanced diets, vitamin supplements, breast feeding, weaning, and infant food preparation are discussed. Mothers are encouraged to breast feed because it is cheaper and "the best food for babies." Tips for mothers who must deal with children's pleas for snack foods are given. The final section of the booklet presents abstracts of research concerning prenatal nutrition, the effects of maternal smoking on babies, breast feeding, infant feeding, infant obesity, infant tooth decay, and food faddism. Descriptors—Child Rearing, \*Elementary Education, Family Environment, Intelligence Level, Locus of Control, \*Parent Attitudes, Parent Child Relationship, \*Parent Influence, Parent Role, \*Personality Development, Social Development, \*Socialization  
Identifiers—\*West Germany

Family socialization patterns were examined from the viewpoint of the child and the parent in terms of parental socialization practices, attitudes, and goals. Questionnaires were developed and used to collect data on the parents of about 1,300 families and the children (7-13 years old) of approximately 400 families in West Germany. Results of studies using the questionnaires showed that there is a very complex relationship between the parents' concept of the child's personality and the parents' self-perceived parental attitudes. Specific childrearing attitudes seem to be related to general personality characteristics of the parents. Child-perceived maternal attitudes appear to be more strongly related to the child's intelligence than child-perceived paternal attitudes. However, perceived paternal goals seem to be of higher value than perceived maternal goals in predicting the child's intelligence. Another study analyzed children's internal vs. external control orientation and its parental antecedents. Future research is anticipated which will examine parental socialization behavior and children's personalities, and intervention programs to change certain aspects of parental behavior are planned. Descriptors—\*Compensatory Education Programs, Economic Disadvantage, \*Experimental Programs, Home Programs, \*Home Visits, Infants, Longitudinal Studies, Parent Education, \*Parent Participation, Parent Role, Parent School Relationship, Preschool Children, Preschool Curriculum, \*Preschool Education, Teacher Role

Identifiers—High Scope Educational Research Foundation

This paper reviews the concept of parent involvement in preschool intervention programs and presents experimental data relevant to the effectiveness of several preschool and home-based teaching programs for economically disadvantaged children. The range of current assumptions about parents is summarized as: (1) parents need to be taught how to be parents; (2) parents know what they need and can operate their own programs; and (3) parents and educators can become resources for each other. Several experimental home teaching programs conducted by the High/Scope Foundation and based on the

third assumption are described briefly: (1) the Ypsilanti-Perry Preschool Project, a preschool combined with weekly home visits; (2) the Ypsilanti Home Teaching Project, a 4-month program of weekly home visits; (3) the Ypsilanti-Carnegie Infant Education Project, in which educators or untrained women visited homes weekly for a 16-month period; and (4) a comparison of three preschool curricula combined with weekly home visits. Longitudinal data from several of these studies is already available, while data from other projects is still being analyzed. In general, it has been concluded thus far that the combination of preschool with home-based components yields impressive immediate and long-term results. Implications and considerations for preschool educators are discussed. (ED)

The Development of Altruistic Motivation.

Pub Date 10 Apr 75

Note—11p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Altruism, \*Child Development, Children, \*Cognitive Development, Emotional Response, \*Empathy, Infants, \*Motivation  
Identifiers—\*Concept of Other Sympathy

This paper attempts to tie empathy to the individual's development of a cognitive sense of the other, and thus to lay the groundwork for a stage analysis of the development of altruistic motivation. The first stage proposed in this scheme is empathic distress, the involuntary experiencing of another person's painful emotional state. Empathic distress results from the infant's complete fusion of self and other, so that he cannot distinguish another person's distress from his own and thus responds to it as though it were his own. The second stage, sympathetic distress, is divided into three levels. The first level occurs when the child knows that others are separate physical entities but does not realize that they have thoughts and feelings different from his own. At this level, the child can sense the distress of others, and tries to comfort them in the same way he himself likes to be comforted. The second level occurs when the child becomes aware of others as sources of thoughts and feelings in their own right and tries to find means of comforting them that are suited to their individual situations. The final level occurs when the child can be sympathetic to the overall life situation of a person or class of people. (Author)

Analyses of Teaching Young Children.

Pub Date May 73

Note—85p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Beliefs, Communication (Thought Transfer), \*Componential Analysis, \*Early Childhood Education, Parents, \*Teacher Behavior, Teachers, \*Teaching, Teaching Methods, Teaching Models

Identifiers—\*Parents as Teachers

Many analyses are presented which attempt to examine the teaching of young children by teachers and parents. Teaching is comprehensively defined as behavior which influences someone's learning or development. The analysis of teaching is considered in light of the factor of efficiency of communication. Analyses are arranged on an operability dimension beginning with high- and low-inference analyses of beliefs about teaching, then moving to high- and low-inference analyses of teaching behaviors and examples of reduction methods for the latter. Implications for research and practice are suggested. (Author/JMB)

The Status of Kindergartens.

Mississippi Univ., University. Bureau of Educational Research.

Pub Date Nov 73

Note—13p.

Journal Cit—Research in Education (University of Mississippi); v7 n1 Nov 1973

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Affective Behavior, Cognitive Development, Educational Diagnosis, Full State

Funding, \*Kindergarten, \*Program Costs, Social Development, \*State Aid, \*State Legislation, \*State of the Art Reviews, Transitional Classes

Identifiers—\*Mississippi

This paper attempts to analyze current research on kindergartens, to assess kindergartens' contribution to public school education, and to provide Mississippi legislators and educators with a basis for making decisions concerning a state supported kindergarten program. A chart summarizing legislation relating to kindergarten in the 50 states (through 1972) is presented. At the time of the report Mississippi was one of five states having no state-supported kindergarten program. Research is cited to show the cost-benefit of kindergarten programs and the benefits of preschool education in cognitive, affective, and health areas. Criticisms of preschool education and counterarguments are reviewed, and it is concluded that research to date supports the importance of early childhood education, especially kindergarten. Figures are given for low kindergarten attendance and high drop-out rates in Mississippi schools, and suggestions are made for initiating and implementing a kindergarten program in the state. The operating costs of three alternative programs are examined, and the practical issues of facilities, curriculum, transportation, and personnel are discussed. (GO)

Descriptors—Behavioral Objectives, Child Development, Cognitive Objectives, \*Curriculum Development, \*Curriculum Research, Discovery Learning, \*Early Childhood Education, \*Experimental Curriculum, Intellectual Development, Intervention, Poverty Research, \*Preschool Programs, Programed Instruction, Teaching Techniques

Identifiers—Montessori (Maria), Piaget (Jean)

This book is a collection of papers on curriculum development in early childhood education. In Chapter 1, Bruner examines what is known about the effects of poverty on child development in Western culture, considers whether modern developmental theories aid in understanding the impact of culture (and specifically) poverty on children's growth, and discusses the implications of his findings for public policy. In Chapter 2, Blank presents 12 techniques that teachers can use when a child makes a wrong response. In Chapters 8 and 10-13, several curriculum specialists offer an updating and extension of their earlier conceptualization. Included are Nimnicht's responsive educational system, Robison's CHILD curriculum, Engleman and Bereiter's academic preschool, Karnes' ameliorative curriculum, and Miller and Camp's program based on the Gray/Klaus Early Training Project. Six of the remaining chapters deal with developing curricula for preschool children, ages 3-6: Nedler describes her developmental process approach to curriculum design, Kamii and Hooper present two different applications of Piagetian theory, Weikart reports on the Unit Based Curriculum; Banta comments on Montessori curriculum, and Whitney and Parker provide an account of their Discovery Program. In two other chapters, Aaronson and Palmer discuss curricula designed for children between 15 and 36 months of age. (JMB)

Descriptors—\*Cognitive Development, \*Cognitive Measurement, Cognitive Tests, \*Early Childhood Education, \*Freehand Drawing, Predictive Validity, \*Realism, Test Reliability, Test Validity

**Identifiers—Decentering, Developmental Stages, \*Piaget (Jean)**

In a pilot study of children's drawings of "a house with a tree behind it," Piagetian sequence (scribbling, fortuitous realism, failed realism, intellectual realism, and visual realism) was tentatively supported. Children's strategies in decentering from intellectual to visual realism were noted. The study reported in this paper was undertaken to investigate: (1) the developmental sequence in House-Tree task; (2) its relationship with Stanford Binet, Peabody, and four Piagetian measures; and (3) synchronous development among these measures. Data from 49 subjects aged, 3 1/2-6 1/2 years, were used for analysis. Developmental sequence for House-Tree task and relationship among these measures was confirmed. Some evidence for synchronous development at a younger age level was found. The House-Tree task, because of its simplicity, ease, and economy in administering and scoring, has potential for assessing the cognitive development of young children. (Author/ED)

**Descriptors—\*Adults, Attitudes, Attitude Tests, \*Child Care Centers, Educational Methods, Evaluation, Project Training Methods, \*Special Libraries, \*Toys, \*Volunteer Training**

**Identifiers—\*Toy Lending Library**

This study was generated to design, implement, and evaluate a model to train Junior Service League volunteers to operate a toy lending library for use with young children in local day care centers. Each volunteer attended six 3-hour training sessions organized on a performance-based format and taught by the authors. Pre- and post-testing was done on the volunteers' skill in introducing educational toys and the volunteers' attitudes toward day care centers. The instruments used were Glen Nimnicht's Pre-Post Episode Instrument and the Semantic Differential on Attitude toward Child Care Centers, developed by one of the authors. The findings indicated that there was no significant pre-post difference on the Nimnicht instrument. The results of the semantic differential analysis showed only slight changes in 11 of the 18 concepts, negative changes in 5 of the concepts, and positive changes in only 2 concepts. Although the statistical data showed little significance, community reception and interest indicated that the study was valuable. (Author/JMB)

This illustrated booklet describes jobs and career opportunities available in day care centers, nursery schools, kindergartens, and family day care homes. Important personality characteristics of child care workers (e.g., liking children, being able to take responsibility) and academic preparation for child care careers are discussed. Basic tasks performed by typical day care workers are outlined along with various types of day care, staff positions in day care centers, and salary ranges. A table listing both recommended and required qualifications for federal agency jobs is included. (BRT)

**Descriptors—Child Care Workers, Child Development, Cultural Pluralism, \*Day Care Programs, \*Day Care Services, Delivery Systems, Family Involvement, Financial Policy, \*Policy Formation, Political Issues, \*Reference Materials**

This collection of selected readings on day care issues was compiled to provide a more manageable compendium of resources for national policy makers. The selections included date from 1970 to 1972 and were drawn from a wide variety of federally sponsored studies. The readings are organized into six chapters: (1) Day Care as a National Priority, (2) The Purpose of Day Care, (3) A Delivery System for Day Care Services, (4) The Forms and Components of Day Care, (5) The Adults Who Provide Day Care, and (6) Family Involvement in Day Care. A brief listing of other sources available is presented at the end of each chapter. (JMB)

**Identifiers—\*West Germany**

This paper describes a series of experiments and research paradigms designed to investigate language development, specifically semantic, syntactic, and communicative development in children. Included are discussions of two studies of semantic development which examined developmental changes of word meanings. Also discussed are three studies of communicative development which investigated how explicit or inferred alternatives affect the way preschoolers, first and second graders construct messages in communication situations. In addition, a study which examined children's ability to construct persuasive messages, and a study which investigated the development of empathy in children are described. (BRT)

**Identifiers—\*Community Coordinated Child Care, Maryland (Baltimore)**

This booklet offers guidelines on developing, operating and regulating child care programs for school-age children (ages 6-12) whose parents cannot care for them before and after school. The physical, social, cognitive and personal needs of the school-age child are reviewed. Elements essential to the development of a flexible, child-centered program are outlined: (1) the involvement of parents and use of existing community

resources; (2) provision of activities and projects which meet children's developmental needs (sample activities are listed); (3) design of an effective physical setting; and (4) organization and development of the staff. Several types of school-age child care programs are described: (1) in-home care, (2) family home-based care, and (3) group-based care (in the home, in expanded preschool centers, in community-based school-age day care centers, or in school-based programs). The advantages and disadvantages of each type are given. (ED)

**Effects of Instructions and Stimulus Representation on Children's Selective Learning.**

Pub Date Apr 75

Note—8p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—Attention, \*Cognitive Development, \*Comparative Analysis, \*Elementary School Students, \*Incidental Learning, Mediation Theory, \*Memory, Pictorial Stimuli, Recall (Psychological)**

Developmental selective learning processes of elementary school age children were investigated using two types of incidental learning methodologies. The purposes of this study were to: (1) compare the effects of the two types of incidental learning paradigms, and (2) determine the influence of different kinds of stimulus relationships on children's performance at two developmental levels. Eight pairs of colored pictures were presented in each experimental condition. Incidental instructions were varied with respect to the absence vs. presence of a concurrent intentional task. Within both instructional conditions, pairs of stimuli were either conceptual, perceptual, or unrelated. Results showed that selective learning patterns of both younger and older children were significantly modified by type of incidental instruction and type of stimuli presented. Developmental differences were obtained with respect to amount of retention. Instructions omitting a concurrent intentional task were more effective with older children; instructions including a concurrent intentional task were more effective for young children. (Author/GO)

**Descriptors**—Discipline, Educational Games, \*Elementary Education, Family Health, Homework, \*Parent Child Relationship, \*Parent School Relationship, Parent Teacher Conferences, \*Parent Teacher Cooperation, \*Teacher Developed Materials, Television Viewing, Travel, Working Parents

This handbook was designed to help teachers promote parent-home involvement in children's learning by providing them with specific techniques and materials to use in working with parents. The handbook begins with a general article discussing why parent-home involvement is important in the educational process and goes on to present 10 tips for parents on how to cooperate with the school and 10 thoughts for teachers on the school child at home. Specific guidelines and send-home sheets are provided on such topics as encouraging self-reliance, children as individuals, work for children at home, health, discipline, television viewing, home games, family travel, preparing home study centers, homework, conferences, and working mothers. **Identifiers**—Play Schools Association

This booklet describes the guidelines, activities, and problems of a program designed to facilitate parent participation in a day care center. The program revolves around a weekly parent visit (the "Family Hour") during which parents are encouraged to relax, enjoy themselves and observe the children at play. Benefits to parents and staff are outlined and guidelines for implementing the parent participation plan, writing invitations, choosing a suitable time, and other practical ideas are discussed. Suggested activities for the parent group include storytelling, trip planning and puppet and theater making. The booklet concludes with a look at some of the problems, pitfalls, and adverse reactions and the retrospective recommendations, evaluations, and comments of staff members involved in the "Family Hour." **Descriptors**—Academic Achievement, \*Child Rearing, Delinquency, Drug Abuse, \*Economic Factors, Economic Status, \*Family (Sociological Unit), Public Policy, Racial Factors, Research Methodology, \*Social Change, Social Status, Unwed Mothers, \*Urbanization, Working Parents

**Identifiers**—\*Divorce

This paper documents the social changes that have taken place in the American family during the last quarter century and suggests that these changes have created the need for new directions in both public policy and developmental research. The general trend reveals progressive fragmentation and isolation of the family in its child rearing role, as evidenced by more working mothers, more single-parent families, a decline in academic performance, and a rise in the rates of child homicide, suicide, drug use, and juvenile delinquency. It appears that the critical factor in these trends is not race, but the conditions under which the family lives. Changes are occurring more rapidly among younger families with younger children: Cross-sectional differences in the well-being of families are strongly linked with economic status, but the longitudinal trends seem to be a function of increasing urbanization. It ap-

pears that the destructive effect of these changes derives from the progressive segregation by age in American society, resulting in the isolation of children from those responsible for their care. The key to correcting these problems is seen in the development of support systems for families and in research which studies development in context. (Author/JMB)

**The Effect of Preschool Kindergarten Attendance on the Cognitive Development of Children of Above Average Intelligence. Summary of an Investigation.**

Pub Date May 75

Note—12p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Academic Achievement, \*Cognitive Development, \*Cognitive Measurement, \*Early Childhood Education, Gifted, Intelligence Differences, Intelligence Level, Longitudinal Studies, \*Preschool Evaluation, \*Preschool Programs

**Identifiers**—\*Australia

This study attempted to determine whether attendance at a traditional preschool resulted in significant cognitive gains for young children over a 3-year period. The experimental group consisted of 59 children at four preschools. Each was matched with a nonattender on such variables as age, sex, intelligence, and family characteristics. The mean Stanford-Binet IQ was approximately 119. Testing was done before the experimental group began preschool, at the end of their preschool year, at the end of kindergarten, and at the end of first grade. The Stanford-Binet (S-B) and the Peabody Picture Vocabulary Test (PPVT) were the main instruments used in the testing. These were supplemented by tests on reading, mathematics, spelling, and Piagetian concept attainment. The results indicated: (1) significant differences between the two groups on the S-B at the end of preschool, kindergarten, and first grade, with the experimental mean higher than the control; (2) significant PPVT increases by the experimental group but not by the control group; (3) no significant difference between groups on the Piagetian test of operativity at the end of kindergarten, but a significant difference in favor of experimental children by the end of first grade; and (4) no significant differences between the two groups on tests of school performance. **Identifiers**—Alabama (Mobile), \*Project Head Start

This teacher's manual presents lesson plans and recipes designed for use with preschool children, discusses the need for early nutrition education, and offers suggestions for conducting cooking activities in the classroom. Specific ideas are provided to involve handicapped children in cooking experiences. Nutrition education in the preschool is emphasized as a good way to help children form good food habits and healthy attitudes toward different kinds of foods early in life. Preferred locations for the cooking center in the preschool as well as suggestions about necessary furniture, equipment, and utensils are given. A list of children's books that can be related to cooking experiences is included. Nine illustrated recipes are provided, including recipes for chili, succotash, and Chinese egg drop soup. Each recipe lists ingredients, materials, procedure, and preparatory tasks for the teacher. Lesson plans accompany each recipe include: (1) basic developmental concepts involved (e.g., counting and measuring, fine motor coordination); (2) lists of words and phrases to use during preparation (e.g., ingredient); (3) ways to introduce and prepare the recipes; (4) suggested expansion activities (e.g., discovering the sources and uses of heat); and (5) forms for evaluating each cooking experience. Descriptors—Child Development, \*Child Development Centers, Day Care Programs, \*Early Childhood Education, \*Elementary School Role, Elementary Schools, Family Involvement, \*Preschool Programs, \*Program Development, Staff Improvement, Staff Meetings

Identifiers—\*Developmental Continuity

This paper describes a child development project implemented in an attempt to demonstrate that a full range of child development services can be centered in an elementary school. Child development services are defined as a broad array of support systems to children and their families which facilitate the children's progression through life—their acquisition of the competences and attitudes which enable them to feel of consequence to themselves and others. The major components of the project described and discussed are: (1) establishment of an early childhood education program for children six months of age and older, use of empty classrooms in the project school; (2) reorganization of the entire school into an extended day school, open from 6:45 a.m. to 5:15 p.m.; (3) development of a framework of cooperation between a university and the local school district for supervision of the project; (4) involvement of the families of enrolled children in all aspects of the project; (5) encouragement of positive researcher/teacher relations by requiring all researchers to spend some time working directly with the children; (6) establishment of a health program for the school (later terminated); (7) revision of the student teaching experience for senior interns to feature a developmental approach; and (8) creation of a viable staff development program. The Perception of Deviance and Disorder: A Developmental Perspective.

Pub Date Apr 75

Note—19p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Adolescents, Aggression, Anti Social Behavior, Behavior Standards, \*Elementary School Students, Group Norms, \*Identification, Interviews, \*Peer Groups, \*Socially Deviant Behavior, Social Maturity

Identifiers—\*Attribution Studies

A total of 20 boys and girls from grades 1, 4, 7, and 11 were interviewed on the topic of deviant behavior among their peers. They were also asked to make deviance judgments on two story characters whose behaviors exemplified qualities that typically evoke an attribution of psychological disorder on the part of adult judges. One story described loss of control and aggression, the other a distorted and paranoid perception of social reality. The pattern of reaction to the stories was consistent with age-related shifts in the basis for deviant status. First graders generally failed to think in terms of group norms; the transition from the middle grades to adolescence was marked by greater emphasis on social consensus, both in psychological perspective and group behavior. Identifiers—\*California (Santa Barbara), Chicanos

Designed primarily for low-income Mexican American families, the program's goals were to: expand the mother's skill and knowledge of child rearing practices and their daily use; develop her self-confidence and perceived ability to influence her child's development; increase her skills in dealing with her institutional environment; nurture her involvement with and responsibility for the program; and expand her human relations skills and preventive mental health practices in dealing with her own and her family's needs and emotions. To best achieve these goals, a 3-faceted approach was initiated: a program for mothers, a children's program, and a service component. From January 1972 to June 1974, 126 mothers and 250 children participated in the program. The program was evaluated to identify the participants' social and demographic characteristics, their utilization of existing community resources, their attitudes toward the program, and the program's impact on the mothers' child rearing repertoire and self concepts. Some data were collected on a comparison group, consisting of mothers whose children participated in the 1972-73 and 1973-74 Headstart Program. Overall, it was found that mothers increased their participation and sense of responsibility at the Centro, had better resources and skills to solve their problems, and valued their child's and their own learning process. This report discusses the program's goals, progress, and evaluation. (NQ)

Identifiers—BIA, \*Bureau of Indian Affairs

Tracing the history of American Indian education from the coming of the white man to the present day, this position paper presents evaluations and recommendations from an Indian point of view. Among the major topic divisions are: (1) Historical Background; (2) Government Support of Early Indian Education; (3) Early Education Falls Short of Its Goals; (4) Civil War Marks the Turning Point in Improved Education; (5) Successful Indian Operated Schools; (6) The Treaty Period; (7) The Allotment Act; (8) Education, Coercion, and Religious Persecution; (9) The Meriam Report; (10) The Indian Reorganization Act; (11) World War II: A Period of Retrogression; (12) Federal Funds That Support Indian Education in Public Schools (Impact Aid, the Johnson O'Malley Act, and Title I funds); (13) Public Schools Have Failed Indians; (14) Special Subcommittee Hearings on Indian Education: 1967-69 United States Senate; (15-17) The Failure of Federal Schools: Historical Development, Evaluation, and Recommendations (Bureau of Indian Affairs, Boarding Schools, Day Schools, etc.). Emphasizing the racial, religious, and instructional inequities found in the Federal Schools, the latter part of this paper focuses on the cause-effect relationship of poor, insensitive education and poor mental health as manifest in Indian student drug abuse, criminality, low achievement rates, cultural conflicts, and general unhappiness. Descriptors—\*American Indians, Cultural Traits, \*Federal Aid, \*History, Nonreservation American Indians, Preservation, Reservations (Indian), \*Social Structure, Tribes, \*Typology

Identifiers—\*United States (East)

Identification of social and cultural commonalities among American Indians of the eastern U.S. reveal 4 geographical areas—(1) the eastern seaboard (the largest group in both number of distinct groups and population); (2) the inland area; (3) Louisiana (a combination of inland and seaboard characteristics); (4) the eastern Great Lakes area (Michigan and Indiana). Further typological identification provides the following categories: (1) Tribals (preservation of ancestral continuity via extensive use of the language); (2) Tribals in Transition (experiencing social change); (3) "Ideologized" Tribes (preservation of aboriginal traits via modern reinterpretation); (4) Resurgent Peoples (population resurgence); (5) Reconstituted Peoples (intertribal amalgams); (6) Displaced Peoples (communities formed in response to social isolation); and (7) City Indians (farthest removed from ancestral ways). Presenting six position papers, this publication is the second in a series of five volumes on American Indian education. Papers are titled as follows: (1) "The Theory of Indian Controlled Schools" (Indian control of education is perceived as the basis for a cultural renewal process in which the problems of contemporary identity and purpose are resolved); (2) "A Theory of Vocational-Technical Career Education" (vocational training models are considered in terms of the ongoing developments in non-Indian America and the progressive developments in Indian communities); (3) "Testing, Evaluation, and the Indian Education Act of 1972" (testing criteria, particularly the criterion-referenced test, are proposed for use in Indian education); (4) "Early Childhood Education Program Models" (drawing upon a longitudinal study of the "Follow Through" program, numerous models of early childhood education are considered); (5) "A New Curriculum Design for Native American Schools" (consideration is given to a curriculum designed to emphasize tribal history, culture, traditions, and the immediate community environment); (6) "Perspective on Manpower Planning" (consideration is given to a philosophy of educational manpower planning that emphasizes innovative programs designed by Indian communities to promote both interculturalism and pride in heritage). **Identifiers—\*Indianization**

American Indian rejection of the assimilation process coupled with recent positive Office of Educational Opportunity (OEO) experiences have given birth to new Indian ideologies which encompass regeneration of the internal forces in the Indian community. Local control of education provides the key to regenerative action and total development, because people are necessary for development of institutions, and institutions contribute to the development of people. Community controlled schools can provide a focal point for community recovery through involvement. Involvement gives meaning to existence, and involvement in a movement to recover cultural values in an Indian community can lead to recovery of religious values which, in turn, will promote the social intercourse and solidarity necessary for development and self-actualization. Community control of education can effectively promote social change from within, as educational control can provide: (1) immediacy of contact between the young and old; (2) a mechanism for the Indian professional who would root himself in the environment and explore the wisdom of tribal perspectives via modern techniques; (3) a forum for cultural expansion and creativity; (4) employment at the local level; and (5) control of Federal monies which could be used as a lever to promote Indian development and capital. **Identifiers—\*Indianization**

Current dropout and unemployment rates among American Indians suggest that educational needs of virtually all Indians can best be met through occupationally oriented education programs that are designed to meet specific Indian needs. In recognition of both individual and societal needs, Indian education must direct itself toward provision for every student at all levels to acquire skills which will enable him to make a livelihood regardless of the level at which he leaves the educational system. A comprehensive career and vocational-technical education should include a sequentially developed program offering career orientation, exploration, and preparation which is structured around the basic subjects of grades 1-12. Elementary education should provide information relative to job roles and requirements. Junior high schools should provide exploration of specific job clusters via hands-on experiences and field observations. Senior high schools should provide specialization via the following options: (1) intensive job preparation for entry into the world of work; (2) preparation for post secondary occupational education; (3) preparation for 4-year college entry. Program development should include consideration of: guidance counseling; curriculum laboratories; systematic evaluation; and manpower development, delivery systems, placement, and follow-up. (JC)

**Identifiers—\*Indian Education Act 1972, Indianization**

The history of testing and evaluation in Indian education has been less than satisfactory since achievement and intelligence testing instruments traditionally have been norm-referenced, rather than criterion-referenced, and have not accounted for cultural differences. The Indian Education Act of 1972 provides for Indian involvement in the evaluation of Federal Indian education programs. Sound testing and evaluation procedures should make provision for validity, reliability, and practicality, while useful program evaluations should include: (1) tangible criteria; (2) accurate and relevant information; (3) an evaluation plan; (4) a program description; (5) able and cooperative people; and (6) use of and reports of the results. Issues critical to policy information under the Act should include consideration of: (1) pluralism; (2) multilingualism; (3) poverty; and (4) cultural differences. Position statements on the evaluation of Indian education programs are proposed as follows: (1) the authority for external evaluation should be exercised by local Indian communities; (2) use of norm-referenced standardized achievement and IQ tests should be discouraged; (3) an evaluation review panel should be organized to review projects and applications for adequacy of evaluation plans and degree of community participation in evaluation. Descriptors—\*American Indians, Cultural Differences, \*Early Childhood Education, Economically Disadvantaged, \*Evaluation Criteria, \*Models, \*Policy Formation, Program Evaluation

**Identifiers—Indianization, \*Planned Variation, Project Follow Through**

Drawing heavily upon the experiences of the Stanford Research Institute (SRI) and its experience in a longitudinal evaluation of the national "Follow Through" program (a program devised to provide developmental and educational services for poor children), this paper is written in reference to the development of early childhood education models for American Indian children. The 1st section presents: (1) a review of the "planned variation" concept wherein different educational improvement models are tried out in various situations; (2) discussion of dilemmas that characterize any major demonstration of quasi-experiment in a natural setting; and (3) a conceptual model for program evaluation which emphasizes categorization of evaluation issues and foci for evaluation activities. Opening with questions relative to the effectiveness, attractiveness, and appropriateness of instructional models, section 3 presents: (1) descriptions of several models drawn directly from SRI technical reports, and (2) discussion of findings that appear to be acceptably dependable for policy guidance (approaches which have shown either most consistent positive effects or effects of substantial magnitude in some application). The final section presents a preview of work in progress which shows promise of yielding generalizations from which "new" models might be synthesized or older models refined. (JC)

**Identifiers—\*Indianization**

The goals of planning for innovation and reform of American Indian schools should include a culturally based and child oriented curriculum. The curriculum design should be based on the assumptions that it will provide: (1) motivation and interest for the youth it serves; (2) children with the capacity to learn how to learn; (3) an individually based grading and evaluation system; (4) an environmental orientation; and (5) total integration wherein teachers participate in the planning function. Utilizing input from the total Indian community, a first priority should be development of culturally based materials which emphasize learning by doing, psychomotor association, symbolic association, dramatization, trials, and art. In keeping with an environmental orientation, curriculum design should stress: (1) the protection of life, health, and living; (2) the securing of a living; (3) the expression of emotions and beliefs; and (4) the ability to work in groups and the development of social responsibility. Utilizing teachers, parents,

youth, tribal and community officials, and others as representatives, a curriculum committee should be established to: (1) oversee all curriculum projects; (2) set goals and priorities; (3) review and approve curriculum plans; (4) advise the school board of community participation; and (5) evaluate the curriculum. Identifiers—\*Indianization

Among the philosophical premises which should undergird manpower planning and training for American Indian elementary and secondary education are: (1) opportunity to alleviate educational disadvantage; (2) realization that prior attempts to design programs for Indians have been fragmented or unworkable; (3) realization of the right to determine one's own destiny based on knowledge of and access to alternatives; (4) realization of man's increasing interdependence and the necessity for higher levels of tolerance; (5) the necessity for opportunities to dramatically increase Indian personnel competencies in leadership positions at all levels; (6) the necessity for a massive manpower development program for people working with Indian children; (7) development of programs for Indian people at institutions which have the capability of providing innovations for specific Indian needs. Indian education should include: (1) schools which provide cultural pride, extensive counseling, career education, behavioral models of both interculturalism and pride in heritage, and community based education; (2) teacher preparation programs emphasizing skills in development of instructional objectives, indepth cultural studies, individualized programs, and utilization of community resources; and (3) research and training programs for non-school personnel. As the third volume in a five volume series of position papers on American Indian education, this publication presents eleven position papers on special programs. Papers are titled as follows: (1) "A Vision: The Warrior-Scholar-Community Activist, The End Product of Indian Studies"; (2) "The Relation of Indian Studies to the University Structure"; (3) "The Importance of Indian Studies to Interracial Understanding"; (4) "Vocational and Technical Education Training Model for Indian Groups"; (5) "An Indian View of Vocational-Technical Education"; (6) "The Need for Consumer Education Among Indians"; (7) and (8) "Training Needs of Indian Parent Ad-

visory Committees" (two different articles on the same topic); (9) "Health Education"; (10) and (11) "A Variation Plan for Indian Communities". A major theme running throughout these papers is that of Indian control of Indian destiny as relative to all aspects of Indian education. Major consideration is also given to the importance of the relationship between economic development and educational development in the various Indian communities (urban, rural, reservation, etc.) (JC)

Identifiers—\*Native American Studies, Warrior Scholars

American Indian Studies as developed in institutions of higher education should be designed to produce a new type of person—a warrior-scholar, community activist who not only understands the various worlds in which the Indian must live but is actively involved in improving these worlds via bicultural participation in a pluralistic society. The development of Indian Studies should include courses for undergraduates, graduates, and summer institutes taught by Indian teachers or non-Indian professionals who have been sensitized to the Indian perspective. An informal survey of the kinds of courses most successful in American Indian Studies reveals a need for courses in: (1) general nationwide history; (2) culture as expressed via language; (3) the urban Indian; (4) regionalized history; (5) literature and oral traditions; (6) ethno-science; (7) Native women; (8) music; (9) art; (10) dance; (11) penal institutions; (12) community development; (13) the reservation Indian; (14) religion and philosophy; (15) contemporary issues; (16) an historical perspective on Indian education; (17) research and analysis of critical issues affecting the American Indian; and (18) direct independent study. Graduate programs utilizing these kinds of courses should be practical and field based to assure emergence of the warrior-scholar. (JC)

Identifiers—\*Equal Employment Opportunity Act 1972

Since American Indians have been traditionally stereotyped by educational textbooks and commercial media, it is no wonder that the majority of the U.S. population has very little real knowledge of Native American religion, philosophy, art, music, or general cultural traditions. Within mainstream institutions, this lack of

knowledge and/or interest seriously impedes implementation of the Equal Employment Opportunity Act of 1972 (EEO), for EEO does not adequately clarify what constitutes Indian identity nor does it account for the established white middle class employment standards applied to Indian applicants. Responses to a questionnaire recently administered to professionals in the Federal system and the private sector clearly illustrate a preponderance of casual, superficial attitudes toward Indians. For example, among the 5 educators who responded to the questionnaire, only 1 perceived a need for Indian Studies. It is evident that no matter how important the EEO Act is, it cannot undo decades of academic injustice and that it is only through change in our educational institutions (K-college) that we can begin to mitigate the stereotypes and the middle class standards applied to Indians. Ethnic studies courses are needed now, but eventually the study of Indian culture must be expanded into the traditional academic fields. (JC)

Descriptors—\*American Indians, Boarding Schools, Career Education, \*Educational Quality, Elementary Secondary Education, \*Evaluation, Guidance Counseling, Higher Education, Historical Reviews, \*Relevance (Education), \*Vocational Education

Identifiers—BIA, \*Bureau of Indian Affairs

Traditionally vocational education has served minority groups and has, consequently, suffered from financial neglect. Since numerous non-minority citizens will never attend college, it is in the interest of all society to improve vocational education. In 1963 the Bureau of Indian Affairs (BIA) established a policy of prevocational education for American Indians, emphasizing academic courses in the 9th grade and 'exploratory' shop courses in the 10th-12th grades. Falling short of their goals, BIA schools showed a 40 percent dropout rate with only 28 percent of the graduates going on to college in 1967. A recent evaluation of Federal boarding schools indicates inadequacies in academic programming, guidance counseling, vocational equipment, and prevocational training. However, successful Indian operated post-secondary schools are beginning to emerge. Improvement in the quality of Indian vocational education calls for: (1) an increase in BIA funding; (2) better information dissemination on grants, fellowships, etc.; (3) more financial support for existing and emerging Indian community colleges; (4) Federal allocations for Indian recruitment and counseling; (5) an all Indian vocational research/development section in the U.S. Office of Education Regions; (6) reservation based courses and workshops for adults; (7) Indian involvement in the National Vocational Education Advisory Council. **Document Not Available from EDRS**

Descriptors—\*American Indians, Community Involvement, \*Consumer Education, Credit (Finance), \*Cultural Differences, \*Economically Disadvantaged, Family Attitudes, Family

Income, Policy Formation, Program Development, \*Reservations (Indian)

Identifiers—\*Indianization, Trading Posts

Since the standard approach to consumer education is based upon the economic situation of the average American and since the degree of American Indian reservation poverty is substantially greater than that of other groups, it is clear that there is a need for Indian oriented consumer education. Based upon a long established credit system, reservation economics traditionally have centered on the trading post. Dependent upon and exploited by white traders, reservation Indians have been subject to patronization by the traders who, serving as liaisons to the outside world, have controlled Indian communications, including Federal checks and employment opportunities. As a landlord leasing out Indian lands to local non-Indians, the reservation Indian has been the recipient of an annual lump sum which has proliferated a "boom or bust" economy, often putting the Indian in the position of having to borrow from his lessee. The extended family of the reservation Indian contributes to the boom or bust economy, for a man is expected to share whatever he has, whenever he has it, with his extended family. Indian reservation consumer education should: (1) be part of a long range, comprehensive economic development strategy; (2) utilize community and tribal organizations as delivery mechanisms; (3) utilize existing local programs and resources; and (4) include community involvement. Since Title IV of the Indian Education Act of 1972 stipulates organization of parent advisory committees for input in program development and since Federal aid to American Indian education has been misused and mismanaged in the past, it is essential that parent advisory committees be trained to effectively utilize legislation affecting Indian education. Indian parents need to be thoroughly acquainted with the Johnson O'Malley Act of 1934, Title I of the Elementary and Secondary Education Act of 1965, and Title IV of the Indian Education Act of 1972 if they are to effectively serve as advisory committee members. Generally, Indian parents do not understand their rights, the kinds of information they should have access to, or how they might organize to be effective. Having tried a variety of parent training methods, the Coalition of Indian Controlled School Boards has found that sending a specialist into the home where he can meet informally with small groups has produced the best results. Generally, the specialist presents an historical review of the laws; itemizes the areas in which parents should be involved; and details legal rights relative to program operations and expenditures. Development of a statewide organization of parent advisory committees to plan for use of Johnson O'Malley funds and to produce a legislative handbook on Indian education is recommended. (JC)

Identifiers—Elementary and Secondary Education Act Title I, ESEA Title I, IEA Title IV, Indian Education Act Title IV

Having been accused of being "rubber stamp" committees and having experienced racial hostilities and cultural frustrations in other programs, the American Indian parent advisory committees established under Title IV of the Indian Education Act of 1972 need training. Urban training programs for advisory committee parents should be developed with the following considerations in mind: (1) no one school usually serves all Indians; (2) numerous Indian parents cannot afford the expense of traveling across town to meetings; (3) an outreach effort on the part of school officials is needed to convince parents that they are wanted for input into Title IV program efforts; (4) school personnel will be ineffective unless they work on an equal basis with Indian parents in program development; (5) constructive relationships must be built upon mutual understanding between parents and educators; (6) factional groups in urban communities range from very conservative to militant. Specific training program suggestions include: (1) repeated clarification of Title IV regulations; (2) explanation of the valuable relationship between short- and long-range goals; (3) a major emphasis on basic school functions; (4) thorough explanation of the art of teaching as relative to different child rearing practices. Rural training programs should emphasize alleviation of high turnover rates. (JC)

Descriptors—\*American Indians, \*Community Involvement, \*Cultural Awareness, Cultural Differences, \*Health Education, \*Program Development, Self Actualization

Identifiers—Community Health Representatives, \*Lakota Tuberculosis and Health Association

Formed in 1953 when tuberculosis was running rampant among the Cheyenne River Sioux, the South Dakota TB Association became exemplary of the kind of response to be elicited from the American Indian grass roots when the need is Indian defined and the solution is Indian designed. Success of the Cheyenne River organization in combating TB brought about formation of the Lakota Tuberculosis Control Conference, a statewide health organization composed of 7 Sioux reservations. Assuming other health responsibilities and expanding beyond state boundaries, this organization changed its name in 1958 to the Lakota TB and Health Association and was formally chartered in 1968 when it adopted a constitution and by-laws. The Lakota TB and Health Association then became instrumental in creating the Community Health Representative (CHR) programs, programs administered under the Indian Health Service which provide training for Indian liaisons between the hospitals and the communities. CHR's have become indispensable to the Indian community, for as bilingual interpreters of doctor and patient information, they help bridge the gap between Indian cultural traditions and modern health education. Today 18 tribes are members of the Lakota TB and Health Association, and it is only via these kinds of community-based, Indian organized programs that Indian health education can be effective. (JC)

Since American Indians are extremely diverse in their social and cultural situations and are widely scattered geographically, any set of educational prescriptions must be flexible, allowing for variations among individuals, tribes, and regions, as well as among occupational and social class positions. Local representation and control coupled with careful monitoring via research, investigation, and evaluation are needed to prevent waste of Federal funds and to meet the educational demands of Indian diversity. Program provisions for tribal traditional Indians living in a rural enclave should include: (1) parental school board representation; (2) specifically tailored bilingual and bicultural curricula; (3) reservation based training programs for teachers and adults; (4) counseling for boys via physical education programs; (5) elimination of mass boarding facilities for elementary school children; and (6) use of innovative small residential systems for secondary education. Provisions for middle class rural Indians should be directed toward preservation of cultural ties and successful college experiences, while urban Indian education should be directed toward exploring educational alternatives via use of Indian centers, existing boarding schools, or reservation facilities. Options of graduate and vocational training should be provided for Indian adults. (JC)

Government officials must recognize the fact that the diversity among American Indian peoples necessitates Indian control of Indian educational programs. A recent study points out that distributing educational dollars in a manner that will permit greater participation by the beneficiaries increases their opportunities for success. Indian educational programs should be planned in conjunction with the economic programs of a given community. Since the key to designing relevant adult programs is the adaptability of the project to community needs, a reservation based adult vocational program should be designed to meet existing as well as developing labor markets. The Coalition of Indian Controlled School Boards has provided an exemplary teacher training program wherein diversity is handled with a limited amount of funds via community designed program priorities and delivery mechanisms. Among the commonalities which permit a general educational framework are development of language, tribal history, Indianized staff, and reservation based early childhood and college programs.

Urban Indian communities should work toward development of Indian oriented programs in the public school system (remedial, tutorial, diagnostic, and cultural) or toward development of alternative schools which meet specific Indian needs. (JC)

Identifiers—\*Minnesota, Ward Concept

It is important to remember that American Indians are citizens of both the nation and the state in which they reside and are entitled, therefore, to share in all privileges of such citizenship. The 1924 Citizenship Act was meant to pave the way for gradual termination of Federal responsibility for Indians. However, in Minnesota Public Law (PL) 280 (1953) served to confuse rather than clarify the responsibility issue, for while State jurisdiction over law and order was established, total responsibility was subject to misinterpretation since under Federal treaty Indian land and property were not taxable. The State and Indians

interpreted PL 280 as an affirmation of Federal responsibility, but Federal officials interpreted it as the final step in full State responsibility. Since the Bureau of Indian Affairs continues to provide services to Minnesota's reservations, Indians perceive their educational needs as a Federal responsibility, thus enhancing the "ward" concept and contributing to public conviction that Indian educational and welfare services are Federal responsibilities. Since at this date Minnesota has neither the resources nor the stability to assume responsibility for its Indian citizens, Indians are demanding continued Federal commitment. However, total responsibility lies with the Indian people and the State and Federal governments. (JC)

Descriptors—\*American Indians, Equalization Aid, Federal Government, Land Acquisition, \*Legal Responsibility, \*Nonreservation American Indians, Politics, Program Design, \*Recognition, \*State Federal Aid, State Government, Treaties, Tribes

Identifiers—BIA, Bureau of Indian Affairs, \*Texas, Tiguas

The Tiguas of El Paso, Texas; the Coshattas of Louisiana; and the Tortugas of Las Cruces, New Mexico share a common background in that they represent American Indian tribes who, having lost their land base, have been abandoned by the Bureau of Indian Affairs (BIA) and have experienced recent circumstances of poverty. Since Indian rights stem from their original ownership of land, the BIA generally takes the position that it will not assume responsibility for an Indian group without a land base. However, Title 25 of the U.S. Code (Section 334) states that equal treatment should be afforded all Indians regardless of place of residence. Due to recent efforts on the part of the Tiguas, the Texas State Legislature has assumed full legal responsibility for these El Paso Indians. While the Coshattas and the Tortugas have not been as successful, the Tiguas have provided a precedent and a blueprint for recognition of tribes without a land base. Recognition is a relationship between a unit of government (State or Federal) and a tribe, wherein the government provides services for the tribe which are not provided for the general public. A suggested blueprint for recognition involves procurement of: (1) an anthropologist to document tribal history; (2) an attorney to accept responsibility for coordinating the effort; and (3) an effective public relations man. Identifiers—BIA, Bureau of Indian Affairs, Elementary Secondary Education Act Title I, ESEA Title I, IEA Title IV, Indian Education Act Title IV, Johnson O Malley Act, JOM

An overwhelming confusion caused by lack of knowledge exists among the general public, American Indian parents, and even Indian school boards concerning the rules, purposes, and regulations of the myriad pieces of legislation dealing with Indian education. Such confusion is used by school administrators to perpetuate the power in Bureau of Indian Affairs (BIA) Schools and by public school districts to mask their misuse of Indian monies. Federal responsibility for the education of all Indian children is based on: (1) treaty obligations; (2) general citizenship obligations; and (3) the practicality of providing via education for a better society. As of 1970, some 300,000 Indian students were enrolled in schools (BIA regular, BIA contract, mission, community, off-reservation and on-reservation public schools). Funds appropriated for Indians under the Johnson O'Malley Act, the Elementary and Secondary Education Act, and the Indian Education Act have repeatedly been used for other than specifically Indian needs. Recommendations for legislative and/or bureaucratic revision will not accomplish anything until control of Indian education is given to Indians and until all monies appropriated for Indian education are funded through a single governmental agency subject to uniform regulations and a monitoring system to assure Indian use of funds. Descriptors—\*American Indians, \*Educational Finance, Educational Needs, Elementary Secondary Education, Equalization Aid, \*Federal Aid, \*Models, Problems, Resource Allocations, \*State Aid

Current problems in educational finance center on revenue sources, equalization of educational opportunities, efficiency, and adequacy. As of 1972, the percentages of revenue received from Federal, State, and local sources for public schools were: 7.1 percent, 40.9 percent, and 52 percent respectively. Since consolidation of certain categorical Federal aid programs seems to be a trend, perhaps an effective use of Federal funds would be to combine categorical programs into general aid under a plan comparable to one of the following: (1) a national foundation program providing a minimum educational level for all children equalized according to the ability of the states; (2) flat grants with no required local or state effort to be used as a general purpose grant; (3) equal grants but requiring each local and state government to provide a certain effort. When looking at finance models, American Indians should consider the sources of revenue, the special educational needs of Indian students, and equalization. The following are models which may be considered: (1) Complete Local Support; (2) Flat Grant; (3) Equalization; (4) Full State (Federal) Support; and (5) Full Support (State or Federal). The latter model would prove most feasible for Indians, as it would incorporate cost differentials for students of different needs yet would not make education dependent upon the wealth of the district. Since over 200 million Federal dollars are disbursed annually for American Indian education under Bureau of Indian Affairs (BIA), Elementary Secondary Education Act Title I, Indian Education Act Title IV, and Johnson O'Malley programs, it is difficult to understand the dismal state of Indian education. However, factors contributing to abuse of Federal funds have been identified as: (1) use of compensatory funds for backward budget building; (2) use of compensatory funds to buy equipment for general use; (3) open enrollment of target programs; (4) use of target funds for administrative overhead; (5) legal diversion of target funds by manipulation of allocation formulas; (6) lack of regulation enforcement by State Departments of Education; (7) manipulation and intimidation of Parent Advisory Committees (PAC); (8) Federal laxity in regulatory enforcement. The following steps should be taken to dispel abuse of Federal funds: (1) utilize Indian personnel in program administration; (2) assemble a staff under the Deputy Commissioner for Indian Education that will insist State Educational Agencies do their jobs; (3) assure State officials that comparability and participation reports are prerequisite to receipt of Federal funds; (4) expand the role of the Indian National Advisory Council to include evaluation of BIA programs; (5) consolidate PAC's into a powerful body to serve as a constant community counterweight. **Identifiers**—BIA, \*Bureau of Indian Affairs

Some 22,000 American Indian students requested assistance for higher education from the Bureau of Indian Affairs (BIA) in 1973, but the BIA only had funds for 11,395 students. While funds theoretically were available from other sources, only 3,000 out of 12,000 eligible students were able to benefit from them. A cooperative agreement between the U.S. Office of Education, the BIA, and the Office of U.S. Civil Rights is pending release. The agreement is designed to eliminate discrimination against Indian students seeking financial aid from other available Federal sources and is directed toward the educational institutions as recipients of Federal funds, placing them under contractual compliance procedures and making it their responsibility to serve all races without discrimination. A proposed draft was produced in January of 1974 by the U.S. Office of Civil Rights, which if adopted will bring about clarification of college responsibilities in this matter. The directive states: (1) that funds provided under the Basic Educational Opportunity Grant or other Federal programs are to be made available to all eligible Indian applicants on an equal basis without regard to their eligibility for assistance through programs operated by the BIA; and (2) that the level of Indian need is not to be projected as lower than that of non-Indians. **Document Not Available from EDRS**

**Descriptors**—\*American Indians, \*Educational Responsibility, \*Federal Government, Historical Reviews, \*Legal Responsibility, School District Autonomy, \*Treaties, Tribes

In view of prior treaties and recent laws, American Indian affairs seem to fluctuate between two different problems—the extent of Federal control “over” Indians and the extent of Federal responsibility “to” Indians. Since treaty interpretations often come years after ratification, it is necessary that a treaty be liberally construed to the end that Indians retain the benefits conferred at the time the treaty was made. Given the trusteeship position of the U.S. government, there is no way that it can stand back and pretend it must deal with the tribes on a basis of equal responsibility for all citizens. Moreover, since treaties were made between tribes and the nation, there is a trust responsibility inherent in all government agencies, not just the Department of Interior. It is necessary to survey numerous treaties to determine the future probabilities of the treaty rights issue as it may arise in the field of education. While extensive research is needed to document responsibility to individual tribes, a brief survey of treaties reveals the following kinds of Federal educational obligations: (1) perpetual services; (2) implied perpetual services; (3) long-term services, subject to Presidential termination; (4) transfer of land for services or funds; (5) tribal educational funds upon ratification; (6) the right to Indian controlled schools. **Identifiers**—\*Indianization

Those concerned with American Indian education must recognize the value inherent in revitalization of the fundamental Indian “life” principles. To this end, a critical examination of present Indian bilingual and bicultural programs is sorely needed. To provide a favorable climate for valid research in the evaluation of special programs, highest priority must be given to consideration of: (1) the educability of Indian youth; (2) the misconception of an either/or proposition relative to academic and bilingual education; (3) the lack of a solid foundation in communicative and computational skills as the greatest deterrent to Indian educability; (4) the rigid definitions applied to compensatory program allocations. In response to a felt need for better evaluation of special Indian education programs, the following methodologies are proposed: (1) the systems approach; (2) cost benefit analyses; (3) use of community leader, teacher, and student consultants; (4) periodic self evaluations by school staff and administrators. Recommendations for future bilingual/bicultural programs include research to: (1) develop an accurate picture of the status of such programs; (2) determine the standards of bilingual/bicultural educators; (3) explore the problems of student motivation; (4) evaluate demonstration projects in Indian education resource development and training. **Identifiers**—\*American Indian Higher Education Consortium, Dakota Community Colleges, Navajo Community College

With the emergence of reservation based community colleges (th Navajo Community College and the Dakota Community Colleges), the American Indian people, as decision makers in these institutions, are providing Indians with the technical skills and cultural knowledge necessary for self-determination. Confronted with limited numbers of accredited Indian personnel, a limited budget, and limited technical assistance, these Indian institutions are embracing an educational philosophy which emphasizes the kind of occupational, general, and cultural education that will help to solve reservation problems. Major issues confronting Indian community colleges in the future will be: (1) the monetary and social problems of the reservations (2) recruitment of substantial numbers of Indian faculty; (3) deter-

mination of the tribal-Federal relationship and the Federal role in Indian self-determination; (4) development of an accrediting agency to deal with the legal and cultural standards of tribal institutions and programs, particularly occupational and cultural programs; (5) careful consideration of the effects of the assimilation, the cultural knowledge, and the bilingual/bicultural philosophies of education; (6) the effectiveness of the American Indian Higher Education Consortium in dealing with Federal agencies and the national academic community. Identifiers—BIA, Bureau of Indian Affairs, \*San Quentin Prison

Prompted by embarrassment and frustration in dealing with American Indian prisoners, San Quentin officials decided in the early 60's to secure outside help. Under guidance by an outside sponsor, a visitation program was established which, in turn, led to organization of the American Indian Cultural Group (AICG). Motivated by pride and embarrassment at its limited knowledge, the AICG requested informative materials on Indian culture which led to supportive sponsorship by the United Bay Area Council of American Indian Affairs and ultimately a "Joint Statement of Principles of Cooperation" between the Bureau of Indian Affairs (BIA) and the California State Department of Corrections. This Joint Statement called for employment assistance, vocational training, and college scholarships. Though the ensuing program produced impressive results, it dissipated after 6 semesters, and today San Quentin has a 90 percent Indian recidivism rate. There are decided parallels between the practices of the BIA and the prison systems, as both are responsible for the collective dependency of the Indian. As there are also few differences between the enforced coercive dependency of the prison/reservation systems and the collective interdependency of tribal ways, the Indian convict must be encouraged to think for himself via appropriate educational programs such as that instituted at San Quentin. Identifiers—Fort Yuma Hydroponic Farming System, Lumni Indian Aquaculture Project, Pyramid Lake Paiute Projects

Recently American Indians have experienced an unprecedented renaissance in community spirit. Capitalizing upon this spirit, Indian economic development should be directed toward

particular community needs, utilizing Indian leadership to determine needed training and development programs. There is no question but that the majority of Indian reservations have adequate resources for self-support. The problem lies in combining a community's natural and human resources with its cultural strengths to promote a cohesive effort. Educational reorientation is vital to this process, for education must be related to community economic development efforts. Recent examples of innovative Indian economic development programs which have met individualized tribal needs include: (1) the Fort Yuma Reservation's hydroponic farming system; (2) the Lumni Indian Aquaculture Project; and (3) the Pyramid Lake Paiute Project. One of the most promising projects yet to be explored by the reservations is that of a modern food production system which utilizes tribally owned energy resources, since such a system would increase jobs and income far beyond that derived from selling fuel on a royalty basis. By utilizing resource pools and cooperative marketing programs, several tribes could compete with non-Indian food production and thus contribute to U.S. food and energy conservation. (JC)

Identifiers—\*Indianization

Due to the Federal relocation programs, American Indian migration to urban areas has intensified over the past 20 years. The Indian who moves from the reservation to the city encounters an alien culture and, consequently, experiences immense difficulties in securing employment, housing, health services, and fair, unprejudiced treatment from law enforcement and other city/county officials. Although the Federal government has publicly recognized its failure to promote Indian assimilation via relocation, the pressures to integrate have been perpetuated by the urban educational institutions. Among the many adjustment problems encountered by urban Indian elementary and secondary students are: (1) cultural differences; (2) alien learning styles; (3) language differences; (4) parental transiency; (5) economically imposed truancy; (6) norm oriented teaching materials; and (7) prejudicial attitudes on the part of school personnel. Suggested means for "Indianizing" the standard urban school include: (1) promoting Indian visibility via parent organizations; (2) providing curriculum flexibility to include the Indian view point; (3) utilizing teaching materials relevant to Indians; (4) utilizing small group and self-directed instruction techniques; and (5) retraining and sensitizing non-Indian school personnel to accept cultural differences. ment, \*Cultural Pluralism, \*Educational Objectives, Futures (of Society), Management Development, \*Models, \*Self Actualization, Social Change, Vocational Development

Identifiers—\*Educational Goals

American Indian education needs a framework in which to sequence and prioritize objectives. Broad goals must be translated into specific product, process, and consequence objectives, which realistically consider the future in terms of promoting adaptation to change. A future oriented framework for consideration might be a power inclusion model which depicts a progression from separatism to pluralism and which delineates a multi-cultural society as its major goal. In such a model, separatism acts as a process objective, while power inclusion acts to include all in freedom of choice, self-determination, and self-control. Given the goal of a multi-cultural society in which the whole becomes more than the sum of the parts though the parts are still identifiable, specific Indian education objectives should include consideration of: (1) Indian education as a discipline; (2) action oriented research; (3) educational management by objectives; (4) funding for development of middle management; (5) career education in conjunction with personal and community development; (6) a reemphasis on vocational opportunities; (7) provisions (monetary) for married students in higher education; (8) individualized and self-paced instruction techniques; and (9) long term funding systems. From 1940 to 1970, the United States was characterized by both rapid population growth and rapid urbanization. However, in the 1970's, both of these trends have diminished. A decline in the birth rate has brought lower overall growth—with the decline being the greatest in the major metropolitan areas. There is firm evidence of shift in population distribution toward the non-metro areas and small cities. This document discusses the economic and social condition of rural America in the 1970's. In order to encompass a broader spectrum of areas lying outside of metropolitan America, and to present post-1970 data available only on a metro-nonmetro basis, the focus is chiefly on nonmetro people and places. The metro-nonmetro residence categories are based on delineations of Standard Metropolitan Statistical Areas. Data are presented with this metro-nonmetro dichotomy, and comparisons are drawn between the two types of areas. Some marked metro-nonmetro and regional characteristics are highlighted for the United States as a whole. Topics discussed are: population settlement patterns, employment, income, education, health resources, local governments, and housing. (Author/NO)

**Support for "Liberal" Development Policies among Community Elites in a Rural Region of Wisconsin.**

Wisconsin Univ., Madison. Coll. of Agricultural and Life Sciences.; Wisconsin Univ., Madison, Univ. Extension.

Spons Agency—Bureau of Higher Education (DHEW/OE), Washington, D.C.; Rural Development Service (DOA), Washington, D.C.

Pub Date Aug 75

Note—43p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, Calif., August 21-24, 1975)

**Descriptors**—Change Strategies, Community Attitudes, \*Community Leaders, \*Community Support, Delivery Systems, Economic Development, Government Role, \*Policy, \*Rural Areas, \*Rural Development, Socioeconomic Influences

**Identifiers**—\*Wisconsin

The study analyzed support patterns for two predominant "liberal" development strategies ("growth centers" and the consolidation of government services) among elites from communities in a largely underdeveloped rural region of Wisconsin. Analytic focus was twofold: (1) to assess overall levels of support among community elites, and (2) to compare the magnitude of elite support, where possible, with that of a random sample of residents from the same region. The social and ideological bases of community elite support for liberal development policies were also examined and relevant comparisons made with 231 community elites in 32 communities ranging in size from approximately 1,000 to 50,000 residents. Respondents were chosen by a combination of the "positional" and "reputational" methods of selecting community leadership. Data on growth center policy preferences among a random sample of four Northwest Wisconsin counties, bordering that of the community elites, were collected during the summer of 1973. Some findings were: community elites and non-elites in the Northwest region were divided on the policy of implementing growth centers; elites strongly favored consolidation of service delivery by community and county governments; and growth centers were more favored by community elites and low income, nonfarm families. **Identifiers**—\*Tennessee

The study's purpose was to determine the degree to which homogeneous rural youths living in an economically impoverished region might be vulnerable to anomia, powerlessness, and deviance given varying levels of perceived limitations in opportunity and self-ability. Comparative data relative to earlier studies in rural areas was also provided. Analysis was conducted in accordance with a specially constructed multi-causal social psychological model which provided a plausible causal argument to link the influence of structural factors and adolescents' deviant behavior through 8 social psychological and associational variables. These variables were: deviation-proneness, anomia, powerlessness, perceptions of opportunity and ability limitations, peer-group ties, parental education, and father's occupation. A structured questionnaire was administered in 1974 to 1,074 seniors (605 males and 469 females) from 9 high schools located in the Upper Cumberland Region of middle Tennessee. All respondents were white, Protestant, and living in a poor rural area. Some findings were: adolescents who perceived that the structural and personal means for their achievements were limited tended to experience greater senses of anomia and powerlessness and consequently become more deviance-prone; and the effect of peer-group ties toward deviance-proneness was highly significant, especially for males. **Identifiers**—\*Mexico, United States

The essay explores the extent to which poverty exists among the residents of the U.S.-Mexico Borderlands. The sequence followed in this analysis is an initial clarification of some conceptual perspectives surrounding the problem followed by a survey of current economic conditions and growth potential for the Borderlands region. Following a brief overview of the salient factors associated with Borderlands poverty and those most closely associated with the economic activity of the region, the 3 dimensions of poverty in the Borderlands are outlined. These are: (1) "real" (or absolute) poverty, based upon arbitrary economic criteria; (2) "regulated" poverty, the differential rates of poverty existing among the dominant and minority segments of the Borderlands population; and (3) "relative" poverty which results from the use of varied, non-economic criteria for determining the degree of economic well-being. **Identifiers**—\*Iowa

The study's objectives were to: (1) compare differences in social-psychological behavior between 1948 high school graduates in central Iowa who migrated and those who remained in their home areas; (2) examine social behavior which may have resulted from the migration experience; (3) examine migration behavior in relation to occupational mobility over one's father's occupational status; and (4) examine migration in relation to occupational mobility within a segment of one's lifetime. Data were obtained from a longitudinal study of 144 high school seniors who graduated in 1948 from 9 rural high schools in Iowa. Completed in 1948, the original study obtained data on the students' background characteristics, migration intentions, educational and occupational aspirations, and attitudes toward farming. Data obtained in the follow-up studies, conducted in 1956 and 1967, concerned occupational and educational attainments, migration performance, occupational and educational aspirations for their children, and their attitudes about the Iowa Area Vocational Schools. Utilizing the 1948, 1956, and 1967 data, this study tested various hypotheses. Among the findings were: (1) migrants changed jobs significantly more frequently than non-migrants; and (2) the expected differences in occupational prestige between migrants and non-migrants were, on the whole, not significant. **The Change in the Quality of Life of Country Families in the Cumberland Mountains of Eastern Kentucky, 1960 to 1973.**

**Pub Date** Aug 75

**Note**—18p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, Calif., August 21-24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Academic Achievement, Comparative Analysis, \*Economic Factors, Family Income, \*Life Style, \*Living Standards, Rural Economics, \*Rural Family, Socioeconomic Influences

**Identifiers**—Cumberland Mountains, Kentucky, \*Quality of Life

The study examined the changes in the quality of life of country families in four eastern Ken-

tucky counties between 1960 and 1973. Since quality of life is an abstract concept, the changes were assessed with respect to income, occupation, and level of living. The aim was to assess the changes in both objective and subjective terms as the families in the country areas of the Cumberland Mountains saw them when surveyed in the late spring and early summer of 1973. Surveys were conducted in 1961 and 1973. In 1961, inter-family differences were examined. Families were classified by family life cycle stage: working age families without children (head under 60 years); families with young children (oldest child under 10); families with adolescent aged children (oldest child 17 or younger); families with mature children at home (oldest child 18 or older); and older families without children (head aged 60 or older). In 1973, 317 families living in the country in the same counties surveyed in 1961, and for the most part in the same sample segments, were surveyed. Some findings were: (1) levels of living as indicated by household possessions improved dramatically in 1973; (2) median family income nearly doubled between 1960 and 1972; and (3) despite the improvement in income and levels of living, mountain families still lagged behind those elsewhere in income, education, and levels of living. **Descriptors**—\*Agricultural Laborers, Economic Factors, \*Employment, Farm Labor, \*Income, Labor Economics, \*Migrant Workers, Statistical Data, \*Wages

**Identifiers**—\*New York (Wayne County)

The hourly wages of migrants in Wayne County, New York in 1968 were higher than state or Federal legal requirements. However, for many migrant workers, the irregularity of migrant employment made it less profitable over the harvest than a steady job at the lower legal rates. Moreover, a person who could be employed at a steady job as a nonagricultural laborer in Florida (the home state of many Wayne migrants) would be better off doing so than coming to Wayne as a migrant. This was true because his potential hourly wages, regularity of employment, and, consequently, total earnings were likely to be less in Wayne. This report provides information on the income migrants earned in Wayne County, New York in 1968. A discussion of some of the easily committed errors in the measurement and interpretation of the earnings of these workers is also provided. (Author/NQ)

**The Concept of Mothercraft as Related to Infant Health in Urban and Rural Settings.**

**Pub Date** 24 Aug 75

**Note**—26p.; Paper presented at the Annual Meeting of the Rural Sociological Society (San Francisco, Calif., August 24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Child Care, \*Health, Infants, \*Mother Attitudes, Parental Background, \*Parent Child Relationship, Rural Areas, \*Rural Urban Differences, Social Integration, Sociocultural Patterns, Urban Areas

**Identifiers**—\*Wisconsin

The concept of "mothercraft" can be influenced by the sociocultural environment and the individual mother and her attributes. This study examined the differences in mothering between those who live in urban areas and those who live in rural areas. Although the study drew on work currently in progress on the relationship between mothering and infant health, the focus was on the mother's characteristics and her social setting. Both an urban and rural sample were chosen, using the resources of the City of Milwaukee Department of Health and the county public health nurses of 4 Wisconsin non-metropolitan counties. The nurses selected families with whom they had had some prior contact, who had had a baby within the past 3 months, and where the mothers were willing to be inter-

viewed about themselves and their baby's health. Data were obtained through interviews with 101 mothers in Milwaukee and 47 in the rural areas and from the nurses' observations and evaluations. Some findings were: there was more of a tendency to have "traditional" family patterns such as being married, going to church, and running a home with more regular schedules for the baby's eating and sleeping patterns in rural areas; the rural nurses evaluated their mothers higher on quality of mothercraft than did the urban nurses; and there were no differences in the utilization of medical services. Identifiers—Elementary Secondary Education Act Title I, ESEA Title I, \*Pennsylvania

Approved under the Migratory Amendment to the 1965 Elementary and Secondary Education Act's Title I, 10 educational programs, designed to allow flexibility in the placement of children as they progressed, were implemented in Pennsylvania during 1974. The 928 children participating in these migrant programs were identified and recruited by social workers, local ministers, project staffs, and the Pennsylvania Council of Farm Workers. School records were used to identify 5-year migrants (those remaining in the state for 5 years). In many programs, children were grouped by needs; and classrooms were ungraded. Bilingual teachers were employed so that they could identify cultural and social needs. In-service training was conducted by each program for all staff prior to its opening, and weekly staff meetings were held for program development and problem solving. A post-session was held to evaluate the programs. Program evaluation was conducted through weekly visits by 4 monitors and at least one by the assistant coordinator, who used evaluative criteria based on the 11 national goals for migrant education. To varying degrees, the 10 projects met the needs of the participating children. This 1974 report presents the evaluation summaries of the: State, individual projects, 11 national goals for migrant education, and Reading is Fundamental Program. (NQ)

Descriptors—\*Bilingualism, English, Followup Studies, Grade 10, High School Students, \*Language Patterns, \*Language Usage, \*Mexican Americans, Oral Communication, \*Rural Youth, Social Dialects, Spanish, Standard Spoken Usage

Identifiers—\*Texas

Based on a 1967 survey of Mexican American high school sophomores conducted in the "border region" of South Texas, this 1973 follow-up study examined the extent to which: (1) historical changes had occurred in the use of Spanish and English by Mexican American boys and girls over the 6-year study period, and (2) the variations in 1973 language usage patterns by

sex and situational context were similar or different for oral speech, writing, and reading. The historical changes were examined in reference to (1) oral speech with parents in the home, with neighborhood friends, and with school friends outside of class; and (2) language utilized for mass media such as radio, newspaper, and magazines. In 1967, interviews were conducted in 7 schools located in the counties of Dimmit, Maverick, Starr, and Zapata. In 1973, 2 of the schools were deleted from the 1967 data set due to lack of cooperation. Both years identical questionnaires were given to all high school sophomores (341 in 1967 and 379 in 1973) present on the day of the study. The 1973 questionnaire contained an extended section on language, reading, and writing patterns. Some findings were: females read more magazines and newspapers in Spanish than males; and in 1973, boys indicated use of Spanish more frequently in all settings than girls, and for both, the frequency of Spanish used decreased from the home setting to the neighborhood, and then to the school setting. Descriptors—\*Data Collection, Decision Making, Definitions, \*Federal Government, Group Dynamics, Information Systems, \*Management Information Systems, Policy Formation, Role Perception, \*Socioeconomic Influences, \*Spanish Culture, Statistical Data

In a technologically advanced society, many of the dialogues take place within the "management information system," or as a result of the "hard data" acquired through such a system, rather than in a public forum. The absence of the Hispanic American from that type of systems dialogue can and does place unnecessary disadvantages on Hispanic Americans in the nation's public affairs. This report focuses on the importance of the management information systems and discusses the extent of confusion surrounding the issue of Hispanic American interests and definitions. Intended to aid in defining the problem of information systems as they pertain to Hispanic Americans, the report's objectives are to: (1) bring about an increased awareness of the extent of the problem, and (2) provide a better understanding of its implications on the future economic, social, and cultural development of Hispanic Americans. The operations of the Office of Management and Budget (OMB) are reviewed. An elaboration of how OMB has used its delegated authority to provide direction to the issue of racial/ethnic data policies is provided. An assessment of three major statistical services systems in the Department of Health, Education, and Welfare illustrates the extent of lack of direction provided by OMB on statistical policies. Identifiers—\*Choctaws, Mississippi

The Choctaw Adult Education Program was designed to give the adults access to an educational program in their own communities. It was based on the concept that equal emphasis would be placed on the delivery of effective client services and the development of professionals from among the program's client population. Initially, learning centers were established in the 4 largest Choctaw communities. Each center was open for two, 3-hour flexibly scheduled evening sessions per week. However, due to the initial response, evening classes were opened in 2 other communities and day classes were also established in the 4 larger communities. Commercially made work-texts were used due to the adult's preference for them. However, when the adults were ready, teacher-made materials were used. Individual student gains were evaluated through analysis of nationally standardized general ability measures, observations, affective measures, teacher records, and questionnaires. The program's progress was evaluated via formal and informal gestures, mostly informal. This volume describes the project's history, intent, design, staff training, demonstration functions, and results. The appendices cover: students' educational level; reasons for level of schooling completed, for attending class, and for withdrawal; sources of information about adult education; and attendance fluctuations. Identifiers—\*Choctaws, Mississippi

Commercial materials were used extensively by the Choctaw Adult Education Program. Instructional Materials were, however, developed to meet specified needs which were not dealt with to the staff and students' satisfaction in the available commercial materials. Instructional units which were amenable to the students' interest, needs, and culture were developed. Teacher-made materials were not used until the teacher felt quite certain that an appropriate level of readiness existed among the students. These lessons were designed so that they could be adapted to any group within the classes and could be presented by either the paraprofessionals or professionals on the staff. Once a unit was prepared, its contents were presented to the entire staff via an in-service training session so that each staff member could disseminate the information as he chose. Four teacher-made units are given in this volume: (1) Food Buying, (2) Nutrition Micro Courses, (3) Taste Party, and (4) Money Management. Also included are a listing of commercial materials used and sample forms of the recruiter's survey, student folder information, attendance sheets, and certificates of the General Educational Development (GED), 8th

grade, and driver's education. A description of the GED test and how it may be administered locally is provided. (NQ)

The Development of an Instrument for Evaluating Residential Outdoor Education Centres in Canada.

Pub Date Apr 74

Note—158p.; MS Thesis, Calgary University, Calgary, Alberta

EDRS Price MF-\$0.76 HC-\$8.24 Plus Postage

Descriptors—\*Evaluation Methods, \*Literature Reviews, Masters Theses, \*Measurement Instruments, Objectives, \*Outdoor Education, Program Content, \*Residential Centers, Residential Programs

Identifiers—\*Canada

The study's purpose was to develop a valid instrument for evaluating residential outdoor education centres in Canada. Using published and unpublished literature, a preliminary instrument consisting of 206 criteria was constructed. Twenty-five recognized Canadian experts in residential outdoor education were randomly selected from 3 subsample areas (the Maritimes, Quebec-Ontario, and Western Canada); these were asked to act as jurors. To validate the preliminary instrument, the jurors were sent a copy of the instrument with instructions to rate each criterion on a 7-point scale: essential, very desirable, desirable, acceptable, questionable, unacceptable, not feasible, and an eighth scale, not applicable. Twenty jurors (80 percent of the total number) responded. Of the 206 criteria, 3 were excluded because their average ratings were lower than the required 4.0 and 1 because of the jurors' comments. The overall average rating of the 202 criteria retained in the instrument was 6.0 or very desirable. The final instrument was given a 6-point scale which included: met completely, great degree, moderate degree, small degree, not met to any degree, and not applicable. In addition, the average rating received from jurors for each criterion was included immediately following that criterion in the body of the instrument. (Author/NQ)

Identifiers—\*American Indian Education

Legislation pertaining to American Indian affairs is highly dependent upon the events and movements of history. No purified legal theory such as contract law or the law of damages emerges from the field of Indian law. While some of the legal theory must come from the ratified treaties, statutes, and case law defining the relationship of the United States and the Indian tribes, a great deal of the legal theory must come in tracing developments of a continuing nature in the actions of the U.S. in fulfilling its legal obligations about which no doubt whatsoever exists. This paper presents: (1) a chronology of the Federal-Indian relationship; (2) an analysis of treaty responsibility for education of Indians; (3) a chronology of delegation of legal responsibility of the U.S. to government departments and agencies; and (4) interpretation of the legal responsibility of the Federal government in the field of Indian education. Some historical developments which were relevant in determining the Federal government's legal obligations in Indian education are traced. Discussion of the development of Federal policy in the field of Indian affairs deals specifically with the gradual merger of 2 different forms of obligations—treaty rights and the general concern for Indian welfare as seen in statutory law. Happiness Is Bilingual Education for the Children in the San Luis Valley Schools, School Year 1973-74.

San Luis Valley Board of Cooperative Services, Alamosa, Colo.

Pub Date 74

Note—29p.; In Spanish and English

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Biculturalism, \*Bilingual Education, English (Second Language), Language Development, \*Mexican Americans, \*Non English Speaking, Parent Participation, \*Primary Grades, \*Program Evaluation

Identifiers—\*Colorado, San Luis Valley Schools

The San Luis Valley Bilingual Bicultural Program was begun in 10 schools at the kindergarten level. Each year the next higher grade was to be implemented until the program was in existence from K-4. During 1972-73, there were 1,092 kindergarten and first grade children and 86 teaching staff participating in the program. Its primary goal was bilingual education (successful educational achievement using two languages proficiently, but acknowledging English as the basic language of instruction). Components considered essential in order to meet the children's needs were: (1) the basic concepts taught in the child's home language; (2) language development provided in the second language; (3) development of self-image, success, and positive identity of his culture; and (4) subject matter and concepts taught in both languages. The Tests of Basic Experiences Levels K-L were administered to 325 students (137 in kindergarten and 188 in first grade) in September and again in April of the 1972-73 school year. Pretest scores were used to determine the strengths and weaknesses of both individual students and the total class. Post-test scores were used to determine the children's progress throughout the school year. Findings showed that all activities scheduled and conducted as prescribed for the year were successfully achieved. (NQ)

Characteristics of Federally Funded Rural Community Mental Health Centers in 1971. Statistical Note 101.

National Inst. of Mental Health (DHEW), Rockville, Md. Center for Studies of Child and Family Mental Health.

Report No—DHEW-ADM-74-6; NIMH-SN-101

Pub Date Mar 74

Note—36p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Employment Patterns, Expenditures, \*Federal Programs, Financial Support, Health Facilities, Health Personnel, \*Health Services, \*Mental Health Clinics, \*Rural Areas, Rural Urban Differences, Staff Utilization, \*Statistical Data

Characteristics of 295 federally funded rural community mental health centers (CMHC) in 1971 were documented by examining differentials relating to various utilization indices and funding, expenditure, and staffing patterns. The centers were classified according to: (1) rural—a center serving a catchment area consisting exclusively of rural counties; (2) nonrural—a center serving a catchment area containing no rural county; and (3) part rural—a center serving a mixed catchment area with one or more rural and one or more nonrural counties. The rurality classification of catchment areas, and consequently of the community mental health centers serving them, was made on the basis of metropolitan influence and population concentration (i.e., community size). There were distinct contrasts in utilization patterns at federally funded CMHC's in rural, part rural, and nonrural locations. Contrasts were especially marked as between rural and nonrural facilities, with part rural facilities often falling between the two extremes and thus suggesting the possibility of a continuum in utilization of CMHC services according to rurality. Rural CMHC's received relatively more funding from governmental sources and less from receipts from services than did either part rural or nonrural centers; there were differences in expenditure patterns as well. Identifiers—\*Chicano Mobile Institutes

The Chicano Mobile Institute's (CMI) goal for fiscal year (FY) 1973-74 was to: improve the quality and equality of education and to meet the needs of Chicano students in public and private institutions of higher learning throughout the participating states. Its objectives were to: (1) prepare personnel in higher education who are concerned with the needs of students from low income and ethnically different families; (2) identify and document problem areas affecting Chicanos at the higher education level of the educational process; (3) identify proven and innovative solutions to the problems; and (4) effect the implementation of the proven solutions by decision-making bodies in the educational process. The National Advisory Board for Chicano Mobile Institutes, state coordinators, project director, and staff met at the National Evaluation Conference (held at Ghost Ranch, Abiquiu, New Mexico) to assess and write this final report for CMI FY 1973-74. This final report consists of the individual state report summaries for Arizona, Colorado, Nevada, New Mexico, Texas, and California. These reports are intended to give the most salient recommendations and suggested solutions to the Chicano student's problems which were the actual outcome of the CMI held in each of the respective states. Descriptors—Academic Achievement, Age, \*American Indians, Caucasians, Comparative Analysis, \*Employment Statistics, \*Equal Opportunities (Jobs), Labor Force, \*Labor Market, Mexican Americans, Minority Groups, Negroes, Occupational Mobility, Puerto Ricans, Sex Discrimination, Socioeconomic Background, Spanish Americans, \*Spanish Culture, Working Women

Identifiers—\*Americans of Spanish Origin

Participation and status achievements of Spanish origin persons and American Indians in the labor market were evaluated relative to the participation of whites. An ultimate aim was to identify factors contributing to intergroup differences and to determine whether participation differences reflect discrimination. Factors examined were age, sex, education, job training, marital status, fertility, and family size. Within the labor market context, inequalities and discrimination were examined in terms of labor force participation, occupational achievement and mobility, and earnings from wages and salaries. Data were derived from the United States census' Public Use Sample files for 1970. The sample consisted of all persons 14 to 69 years of age who were not residents of institutions nor enrolled in school in 1970. Evidence led to 4 general conclusions: (1) color-ethnic-sex inequalities in status permeated the labor market; (2) Spanish origin, American Indian, and black men were discriminated against in their labor force participation, occupational achievement, mobility, and earnings; (3) women in these minority groups, along with white women, were subjected to severe discrimination, the magnitude of which was far greater than that experienced by minority men; and (4) inequalities among women in the labor market were comparatively small and the status of minority women was not consistently inferior to that of white women. Document Not Available from EDRS

Descriptors—Academic Rank (Professional), Alternative Schools, \*Authors, \*Composition (Literary), Educational Alternatives, Higher Education, Literary Perspective, Majority Attitudes, \*Mass Media, \*Mexican Americans, \*Political Attitudes, Political Science Identifiers—\*Chicanos

The Chicanos' political experience is defined as "their thought, activity, and organization directed toward securing an equitable and meaningful allocation of values from a politico-governmental system controlled by the dominant population, the challenges to that system, as well as alternative forms of action and security taken to offset the denial of political access and governmental output." This book discusses the way that academic colonialism has affected the study of the Chicano political experience and the response that this is occasioning. Other topics include: the manner in which the exclusionary system operates with respect to the Chicano group, the actions being taken by Chicanos to challenge this existing situation, and the research perspective being provided from the standpoint of the subordinate group. Exclusionary practices in the publishing and media outlets are at times examined in the broader context since they impact commonly on the distribution of information about the Chicano experience in general. Likewise, the Chicano responses presented are not limited to those occurring within "political science" but include also the development of Chicano Studies and alternative schools as outgrowths of past insensitivity in all disciplines. Goals of the New Mexico Chicano Mobile Institutes were to: improve the quality and equality of education to meet the needs of Chicano students in public and private institutions of higher learning throughout the State; and prepare personnel in higher education to meet the needs of students, from low income and ethnic minority families, attending all public and private schools in the State. Persons identified as having some influence on the education of Chicanos in New Mexico were invited to participate in two 2-day institutes. Since participants had to pay for their own expenses, they were asked to participate through correspondence if unable to attend. Of the 158 persons identified, 62 did not respond, 59 corresponded by mail, and 38 actually participated. The first institute identified, defined, organized, and documented all problem areas affecting Chicanos at all educational levels. The second reviewed the problems identified in the first institute, then identified, defined, and related proven innovative solutions to the problems. Both institutes were conducted in a very successful manner. A synopsis of both institutes is given in this paper. Also included are: a list of all people responsible for education in the State; analysis of statewide testing; pupil enrollment by school district; and summaries of four Civil Rights reports pertaining to education in the Southwest. Identifiers—\*Connecticut, Connecticut Migratory Childrens Program, Elementary Secondary Education Act Title I, ESEA Title I

The Connecticut Migratory Children's Program (CMCP), funded under the 1965 Elementary Secondary Education Act Title I, aims to provide migrant children with: (1) the opportunity to improve communications skills necessary for dealing with various situations; (2) preschool and kindergarten experiences geared to each child's psychological and physical development that will help him to function successfully; (3) specially designed programs in the academic disciplines that will increase each child's ability to function at a level equal to his potential; (4) specially designed activities which will increase each child's social growth, positive self-concept, and foster his ability to function in groups; and (5) programs that will improve each child's academic and vocational skills and give him exposure to prevocational orientation. It also aims to implement programs, using Federal, State, and local resources, to improve mutual understanding and appreciation of cultural differences among children. CMCP operates (1) multipurpose resource centers which are operated throughout the year, and (2) summer enrichment programs, including a special program developed for children who are employed during the summer to harvest tobacco. Purpose of both programs is to supplement, but not supplant, the migrant child's educational opportunities, and to coordinate the health, cultural, social, and educational services. (NQ)

Identifiers—\*Arizona

The Arizona Commission of Indian Affairs 1974-75 Annual Report is issued to inform the Governor, State Legislature, and tribal governments of the proceedings, transactions, findings, and recommendations made by the commission. Included are: (1) a list of commission members, (2) a map showing the Indian reservations in Arizona, (3) a table listing population and acreage, (4) a list of commission meetings held in 1974-75, (5) a brief summary of projects completed, (6) a publications list, (7) a commission "highlights" report, and (8) a budget report. Also included is a brief profile of the Colorado River Indian tribes (Mohaves, Hopis, Chemehuevis, and Navajos), which outlines their history and origin; size and location; tribal government; employment and economic development projects (agricultural, recreational-tourism, etc.); local, State, and federally funded education, health, and welfare projects; and other tribal activities. The appendices include four resolutions; "Endorsement of Indian Counseling Comprehensive Study"; "Supporting Indian-Tribal Council"; "Recommendation That Dr. George E. Bock Be Appointed Director of the Arizona Department of Health Services"; and "Recommendation the Approval of BIA (Bureau of Indian Affairs) Project N-15(7) 1 (The Leupp Bridge Across the Little Colorado River)". A brief summary concludes the document. (AH)

Descriptors—\*Beginning Teachers, \*Career Planning, Doctoral Theses, Educational Research, Higher Education, \*Males, Mathematics Teachers, \*Predictor Variables, Science Teachers, Secondary School Teachers, \*Teacher Characteristics

Identifiers—English Teachers, Research Reports, Social Studies Teachers

The purpose of this paper was to discover if certain personal and social factors are related to selected career pattern features of male teachers in specified subject areas. The population of the study included 1212 male beginning teachers certified to teach mathematics, science, social studies, or English. Questionnaires were mailed to each. A total of 713 participants responded. Besides personal data and subject specialization, information related to career alternatives, factors involved in selection of first teaching assignment, and alternatives for further study beyond the bachelor's degree was sought. Data were dichotomized, with mathematics and science (MS) teachers composing one group and social studies and English (SSE) teachers composing the other. MS and SSE teachers, regardless of employment status, placed relatively high and almost equal priority on being located close to a college or university in selecting their first position. No significant differences were found concerning expectancy to pursue careers as classroom teachers or eventually seek positions at a college or university. (Author/EB)

Descriptors—\*Achievement, \*Chemistry, Chemistry Teachers, Doctoral Theses, Educational Research, \*Inservice Teacher Education, Institutes (Training Programs), \*Predictor Variables, Science Education, Secondary Education, \*Secondary School Science, Teacher Qualifications

Identifiers—California Mental Maturity Test, Cooperative Science Test in Chemistry, \*National Science Foundation, NSF, Research Reports

The purpose of this study was to investigate several variables related to teacher preparation and cognitive achievement of high school chemistry students. The teacher population consisted of 35 teachers. Twenty-three hundred student scores on the Cooperative Science Test in Chemistry were collected and categorized for relevant data. Two hundred students were utilized in the Study. The American Chemical Society-National Science Teachers Association Cooperative Examination (ACS-NSTA examination) was administered to the students. Intelligence scores on the California Mental Maturity Test were obtained. Analyses of variance were performed. The findings concerning institute participation were significant at the .001 level. Students of teachers who have had National Science Foundation institute participation achieve at significantly higher levels of performance, according to this study. The findings relating student achievement and chemistry con-

tent background of teachers were significant at levels higher than .001. No significant differences in achievement were noted when students were stratified according to sex, but it was shown that tenth-grade students achieved at a higher level than eleventh-grade students and then, in turn, higher than twelfth-grade students. The findings seem to indicate a need for additional research to determine the optimum year for chemistry instruction as well as the undergraduate preparation of chemistry teachers. (Author/EB)

Identifiers—\*Harvard Project Physics, HPP, Research Reports

In order to study the mechanism of student interest in a physical science course when the majority of students were interested in fields other than science, a system of measuring instruments was applied for detection of significant differences between two teaching methods used for this course. The study utilized the measured responses of 105 university physical science students on The Eysenck Personality Inventory, The Personal Opinion Survey, The Harvard Project Physics Film Loop Tests, and on the multiple opportunities presented for extra class time use of experimental equipment designated for gain of knowledge in physical science. Random assignment resulted in 73 students in the traditional course and 32 students in the Harvard Project Physics (HPP) course. It was concluded that no significant differences were evidenced relating to personality dimensions. The HPP mean scores for attitudinal attributes, rigidity, need for order and need for achievement were higher than the same scores for the traditional group. The total mean scores of seven tested attitudinal attributes were computed to be of no statistical significant difference. A positive type of motivation was indicated with use of HPP film loops. It was recommended that more teachers acquire training in teaching HPP since students react favorably to the course. (Author/EB)

Factors Responsible for the Non-Election of Physics by Eligible Secondary School Students in Alabama.

Pub Date 72

Note—211p.; Ed.D. Dissertation, University of Alabama

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 72-17,105, MF \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Doctoral Theses, \*Educational Research, \*Enrollment Influences, \*Physics, \*Predictor Variables, \*Science Education, \*Secondary Education, \*Secondary School Science, \*Student Behavior, \*Student Characteristics

Identifiers—\*Alabama, Research Reports

A sample of 400 students who had not taken physics and who were currently enrolled in Algebra II or a higher level mathematics course was selected for this study to determine possible factors that might have influenced their decision not to take physics. A data gathering instrument, consisting of the Student Questionnaire and the Questionnaire for Principals, provided items which served as variables and which were factor analyzed. Appropriate labels seemed to be: Intellectual Characteristics, Scientific Interest, School Factors, Peer Influence, and Influence of Family and Friends. Step-wise discriminant analysis, a multivariate technique, was used. Conclusions

made concerning some of these factors as affecting physics enrollment included: (1) peer influence, more than any other factor, seemed to be more responsible for students' decisions regarding the election of physics; (2) scientific interest seemed to exert considerable influence; and (3) students' decisions appeared to be only moderately influenced by the intellectual characteristics of the students. This was probably due to the fact that the students in the sample were generally academically above-average and had somewhat similar backgrounds in mathematics. (Author/EB)

Descriptors—\*College Science, \*Doctoral Theses, \*Educational Research, \*Higher Education, \*Land Grant Universities, \*Negro Students, \*Predictor Variables, \*Science Education, \*Statistical Analysis, \*Student Attitudes, \*Student Characteristics

Identifiers—Research Reports

The purpose of this study was to identify some of the characteristics of Negro college students who majored in science in comparison to those who were non-majors. The science majors were sub-divided into pure science and applied science groups for some analyses. Twelve variables were investigated: (1) ACT composite scores, (2) ACT science scores, (3) grade point averages, (4) high school science activity, (5) attitude toward science, (6) percentage of white students in high school, (7) high school influence, (8) family influence, (9) college influence, (10) socioeconomic status, (11) number of siblings, and (12) ordinal position among siblings. The instrument used was a questionnaire of free choice items. The population consisted of all students in predominantly Negro land-grant colleges and universities. Analyses of variance, Pearson Product Moment Correlations, a t-test, and percentages were ascertained. Findings and conclusions indicated that pure science majors, applied science majors, and non-science major were found to differ significantly on each of the measures of academic ability and achievement. Applied science majors were similar to non-science majors. Family influence showed significant differences between all three groups. Science majors with 3.00 and above were found to have a more favorable attitude toward science. All the subjects tended to be the youngest among six children. (Author/EB)

Identifiers—BSCS Achievement Tests, Research Reports, Wisconsin Inventory of Science Processes

The study involved 525 high school biology students and their teachers and was an attempt to determine the effect of teacher attitude toward biology on the students' attitude toward biology. The degree of understanding of science was also analyzed. A 65-item inventory was developed to measure attitude toward biology. The Wisconsin Inventory of Science Processes was used to measure understanding of science. The Biological Sciences Curriculum Study (BSCS) Achievement

Tests 1 and 2 were used to measure student achievement. A profile analysis technique was developed to match each student with his teacher on the basis of his stated attitude toward biology and on his understanding of science. The data collected permitted generalizations to be made with the Silcoxon matched-pairs signed-ranks test at the 0.05 level of significance. Some of these generalizations were: (1) the student's attitude can be changed significantly to an attitude profile more congruent with that of his teacher; and (2) the profile level can be modified to agree more closely with the profile level of his teacher. The results of the study indicate that students, in general, do tend to adopt an attitude toward biology which is similar to that of their teacher, but there is little or no relationship to achievement in biology. Identifiers—Physical Science Study Committee, PSSC, Research Reports

The purpose of this study was to develop and evaluate a series of simulation dialogs utilizing certain computer capabilities. The series of simulations produced in the study parallel the fundamental, inductive experiments developed by the Physical Science Study Committee (PSSC) through which students generalize Newton's Second Law. Students learned the concepts using two simulation modes and participated in one of the following groups: Group I (Experimental) - these students interacted only with the film loops developed in the study and with the computer interactive dialogs; Group II (Experimental) - these students did not have access to computer terminals and interacted with the film loops and

with simulated data and problem sheets and their teachers; Group III (Control) - these students studied the same concepts as students in the experimental groups, but they interacted with their teachers and with real laboratory materials (PSSC). Data collected in the study showed that learning was significantly higher in Group I than in the other two groups, and that learning was significantly lower in Group III than in the other two groups. Students in Group III spent more time in instructional activities than the students in the other two groups—8.3 times as long as Group I and 3.2 times as long as Group II. (Author/MLH)

Descriptors—\*Chemistry, \*College Science, Doctoral Theses, Education, Educational Research, Higher Education, \*Individualized Instruction, Science Education, \*Systems Approach, \*Teaching Methods

Identifiers—Research Reports

Five randomly selected experimental groups of twenty-four general college chemistry students participated in this study. Four of the five groups received a version of the systems approach treatment, which consisted of group orientation, individualized learning, small group seminars and unit tests. The fifth group was administered the traditional lecture treatment. Group 1 received the standard systems approach treatment. Group 2 received the systems approach treatment plus pretesting on unit objectives. Group 3 received the systems approach treatment plus four learning theory lectures. Group 4 received the systems approach treatment plus criterion evaluation of unit tests. Group 5 received the lecture treatment in place of the systems approach treatment. All treatment groups used the same unit and course objectives, laboratory exercises, text materials, unit tests and final tests. Both final and unit tests were used as measures of achievement. A two-factor analysis of variance revealed that students in the groups receiving the systems approach treatment performed significantly higher than students in the lecture treatment group. Significant interaction between treatment and scholastic ability (SCAT) and treatment and prior academic performance (High School Rank) existed for Group 4 and Group 5 with respect to unit test achievement. (Author/MLH)

Crater, Harold L., Jr.

The Identification of Factors Influencing College Students' Attitudes toward Radioactivity.

Pub Date 72

Note—106p.; Ph.D. Dissertation, The University of Texas at Austin

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 73-7537, MF \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Attitudes, Attitude Tests, \*College Students, Doctoral Theses, Educational Research, Higher Education, \*Nuclear Physics, Radiation, Science Education, \*Scientific Attitudes, Statistical Analysis, \*Student Attitudes

Identifiers—Attitude Toward Radioactivity Scale, \*Radioactivity, Research Reports, Student Descriptor Sheet, Test on Understanding Radioactivity

The two basic questions considered in this study were: (1) What attitudes do college students hold toward radioactivity? and (2) What are some characteristics associated with the college students who hold the more favorable attitudes toward radioactivity? The sample studied included 1,205 mostly undergraduate students at the University of Texas at Austin from whom data were collected using three instruments developed for the study: the Attitude Toward Radioactivity Scale, the Test on Understanding Radioactivity, and the Student Descriptor Sheet. Seven hypotheses predicted no relationship would

exist between a college student's attitude toward radioactivity and (1) understanding of radioactivity; (2) grade level; (3) subject major; (4) grade point average; (5) the number of high school science courses taken; (6) the number of semester hours of college science studied; and (7) political leanings. Using correlation methods, analysis of variance, and multiple range techniques, it was found that only hypothesis 4, expressing no relationship between a student's grade point average and attitude toward radioactivity, was accepted. Rejection of the other six hypotheses at or beyond the .01 level showed those characteristics to be associated with the college students who hold the more favorable attitudes toward radioactivity. Lauridsen, La Monte Irvy

An Investigation of the Effects of ISCS Level One on Selected Affective Variables of Students.

Pub Date 72

Note—149p.; Ed.D. Dissertation, University of Kansas

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 73-11,833, MF \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*Affective Behavior, Doctoral Theses, Educational Research, \*Instruction, Junior High Schools, \*Science Course Improvement Project, Science Education, \*Scientific Attitudes, Secondary School Science, \*Student Attitudes

Identifiers—Intermediate Science Curriculum Study, ISCS, Research Reports

The study was designed to assess the effects of Intermediate Science Curriculum Study (ISCS) Level One in terms of (1) fostering positive growth in the scientific attitudes associated with the nature of scientific laws, the limitations of science, and the desirability of science as a vocation; (2) enhancing the self-reliance level; and (3) elevating the relative ranking given by students to science as compared to other subjects. Responses were collected from more than 650 seventh-grade students in 15 ISCS Level One classrooms. Two hundred non-ISCS seventh-grade students formed the control group. Discriminant analysis revealed that the ISCS group experienced significantly greater positive increase in the attitude associated with the nature of scientific laws than did the non-ISCS group. Both groups experienced a slight, but not significant, increase in the attitude associated with the limitations of science. Both groups ranked science lower, but not significantly, in the preferential ranking of classroom subjects. Both groups experienced a slight increase in self-reliance. (Author/PS)

Document Not Available from EDRS

Descriptors—\*Academic Achievement, \*Audiovisual Instruction, Comparative Analysis, Doctoral Theses, Educational Research, Grade 8, \*Instruction, Junior High Schools, \*Reading Ability, Retention Studies, Science Education, \*Secondary School Science, Student Testing, Teaching Methods

Identifiers—Intermediate Science Curriculum Study, ISCS, Research Reports

The purpose of the study was to compare the achievement, retention, and time to complete the required sequence of activities, of eighth-grade science students receiving instructions by means of audio tapes with those receiving the same instructions by use of printed materials. The sample was formed of 72 students designated as below average, or above average in reading ability and randomly assigned to two groups. The experimental group received instruction for chapters one through five of the Intermediate Science Curriculum

Study (ISCS) Level II by use of audio tapes. The control group used the printed materials. After completing each chapter, a chapter self-test and a chapter test were administered. After the completion of all five chapters, a unit achievement test was administered. Three weeks later, an achievement retention test was administered. The analysis of data revealed that the sum of the means of the experimental group was significantly higher than the sum of the means of the control group on the chapter tests, self-tests, unit test, and retention test. The students of above average reading ability obtained higher achievement and retention by using printed materials. (Author/PS)

Analysis and Evaluation of Science Teaching in the Nigerian Secondary Schools.

Pub Date 73

Note—213p.; Ph.D. Dissertation, Fordham University

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 73-16,056, MF-\$7.00, Xerography-\$15.00)

Document Not Available from EDRS

Descriptors—\*Curriculum, \*Developing Nations, Doctoral Theses, Educational Research, Instruction, International Education, \*National Surveys, \*Science Education, Secondary Education, \*Secondary School Science

Identifiers—\*Nigeria, Research Reports

This survey was conducted to determine the status of the following aspects of science curriculum in the twelve states of Nigeria: (1) time allocation, (2) teaching methods, (3) textbooks, (4) syllabi, (5) teaching aids, and (6) evaluation procedures. A questionnaire was developed for this purpose. The sample consisted of 294 secondary schools, representatively chosen from the 588 secondary schools in Nigeria. The analysis of data revealed that one-ninth of the weekly class time was allotted for science teaching. All or nearly all children were studying science. The curriculum leaned heavily toward a teacher-oriented teaching program. The West African School Certificate Examination exerted a major influence in the adoption of teacher-centered, authoritarian teaching methods. Foreign produced textbooks were used in a great majority of the schools. Pupils' lack of adequate experience in primary school, inadequate equipment, and concentration on factual examinations were perceived as serious difficulties in teaching science effectively. Recommendations were made for improvement of the science education. (Author/PS)

The Relationship Between the Ability to Apply Certain of the Principles of Dynamics to New Situations and the Discrepancy Measured Between High School Male Students' Concept of Self and Their Ideal Self.

Pub Date 73

Note—105p.; Ph.D. Dissertation, New York University

Available from—University Microfilms, 300 North Zeeb Road, Ann Arbor, Michigan 48106 (Order No. 73-19,454, MF-\$7.50, Xerography-\$15.00)

Document Not Available from EDRS

Descriptors—\*Academic Achievement, Doctoral Theses, Educational Research, Learning, \*Mathematical Concepts, Problem Solving, Science Education, \*Scientific Concepts, Secondary Education, \*Secondary School Science, \*Self Concept, Student Characteristics

Identifiers—Research Reports

This investigation was performed to test the hypothesis that male high school students of high discrepancy score on self-concept would be less able to apply principles of dynamics to new situations than male high school students of low discrepancy score. The discrepancy score was the difference between self-concept and ideal self as calculated with the Bill's High School Index of Adjustment and Values. The ability to apply principles of dynamics was determined by the score on a test constructed for this purpose. The relation between the ability to apply dynamics was found to correlate moderately with IQ; the discrepancy score was found to have virtually no correlation with IQ. (Author/PS)

This is a report of the development of four self-study units in physics for college nonscience majors. The topics of the units are Waves and Sound, The Radiant Energy of Sunlight, Infrared Radiation, and Acceleration. Each unit includes an inexpensive, portable kit; a student manual containing all requisite background information, self-test, directions for the experiment and questions; and a teacher's guide with answers to the questions in the manual, a list of learning objectives and a quiz. Student attitudes and study procedures were determined by means of questionnaires and personal interviews. Student learning outcomes were assessed from quizzes, interviews, and student reports. The data showed that most students achieved the important learning objectives. Significant differences were found between quiz scores of students using the units and an equivalent control group. **Document Not Available from EDRS****Descriptors**—Doctoral Theses, \*Educational History, \*Educational Problems, Educational Research, \*Historical Reviews, \*Science Education, \*Science History**Identifiers**—\*Newfoundland, Research Reports

Reported is a study of the history of science education in the province of Newfoundland, Canada. Science education was examined within the context of the educational system and in relation to social and cultural development. Causes for current problems in science education, such as declining enrollment in science, acute shortage of qualified science teachers, and general paucity of facilities, were examined from a historical perspective. Restrictive policies against settlement, religious antagonisms, and exploitation by outside interests were largely responsible for duplication of schools with untrained teachers, generally impoverished facilities, and a rigid, narrow curriculum. Differential grading patterns for males and females encouraged employment of more female teachers with no science background. In the twentieth century societal needs affected school curriculum, and science curriculum included the study of hygiene, nature study, and navigation. Causes for science teacher shortages and lack of scientific literacy were also examined. Recommendations for improvement of science education in the province are made based on understanding the origins of present problems. (Author/PS)

The purpose of this project was to determine what the availability of educational data in the state department of education is and what strategies can be applied to improve state data systems and make the best use of them in making national and state educational decisions. The project involved two major activities: the design and implementation of a survey to determine the extent and consistency of data collected by the states as well as the frequency and source of data collection and a study of results of the survey in order to make recommendations for improved data gathering and utilization. Results indicated the available data in state data banks would not be useful in determining training needs of teachers or teacher competency. There was little correlation between kinds of data collected and problems related to science teachers and teaching. Some of the recommendations made were for the upgrading of state data banks to collect information which will be useful in making educational policy decisions. A survey form which could be used to collect data on science teachers employed in the 50 states is also included in the project report. (Author/BR)

This guide is a list of available environmental education materials from the Project I-C-E Resource Materials Center. A one-page guide explaining procedures for using the Resource Center services is provided. It contains the service charges for shipping and handling, check-out periods, those who may use the resources, ordering instructions, procedures for returning materials, and users' liability. The bibliographic listing of environmental education resources is subdivided into five areas: Films, Filmstrips, Kits, Simulation Games, and Books and Booklets. The section on printed materials is arranged alphabetically with call numbers. Each of the other areas is organized in numerical order, and most contain a listing of new materials. A brief description for the films and filmstrips, along with the grade level, is given. The kits contain a series of lessons in such topics as pollution, ecology, pesticides, environmental quality, water resources, urban problems, environmental awareness, etc. They are briefly described with grade level indicated. Along with the printed material, there is usually an accompanying teacher and student manual and/or films, filmstrips, records, slides, charts, tapes, etc. The section on simulation games contains the purposes of each game, a brief explanation of the procedures, and appropriate grade levels for its use. This document contains a selection of materials focusing on man acting to know, preserve, and improve his environment. The booklet is divided into three parts. Part one presents a listing of objectives. They reflect a need for all to become aware of the problems that plague our environment. Furthermore, they indicate that the ecological improvement of the earth is the responsibility of each and every member of society. The second section is a description of eleven class projects which are to be adapted and used in the appropriate grade level, kindergarten through twelve. Relevant topics include environmental laws that could be submitted to the state legislature, a conservation fair, an advertising campaign for endangered species, a map of your locality with its environmental problems and proposed solutions, and "ecopornography." Part three, the most extensive, is a directory of resources. Provided are a brief description, cost information, and grade level for films, filmstrips, printed materials, literature, units, texts, periodicals, songs, and games. (BP)

**An Overview of Environmental Attitudes, Values, and Ethics: A Symposium.**

Pub Date 12 Aug 74

Note—58p.; Symposium presented at the Annual Conference of the Conservation Education Association (SUNY College of Environmental Science and Forestry, Syracuse, New York, August 12, 1974)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage****Descriptors**—\*Attitudes, Cultural Context, Culture Conflict, \*Environment, \*Environmental

Education, Ethical Values, Human Dignity, Psychology, Religion, \*Social Environment, Social Influences, Social Values, Symposia, \*Values

This series of symposium papers examines the phenomena of environmental attitudes, values, and ethics from a psychological, philosophical/religious, and Western religion perspective. The psychological view is examined from three standpoints: the internalist position, explaining behavior from events within the individual; the interactionist position, emphasizing interaction between an individual and the environment; and the externalist position, accounting behavior in terms of events outside of the individual. Illustrations are provided from observations of environmentalists and educators. The author provides suggestions for incorporating these perspectives in environmental education programs. The subscriber of the religious viewpoint believes the environmental crisis to be one of man's understanding of himself. She realizes a need for institutional change, but emphasizes its origin with a self-reform, which can be affected through the schools. The proponent of the Judeo-Christian ethic examines the relationship between God and human beings. This position states that God still owns and controls earth and will do so with or without us; that justice is the priority in achieving harmony with our ecological niche; and that human values are our potential for positive action. The second section of this document presents a series of questions and reports responses of the panelists. (BP)

Oahu, Hawaii's Water Supply: 1848-2020 A.D.

Pub Date Jul 75

Note—370p.; Ph.D. Dissertation, Walden University

EDRS Price MF-\$0.76 HC-\$18.40 Plus Postage

Descriptors—\*Conservation (Environment), Doctoral Theses, \*Ecological Factors, Environment, \*Natural Resources, Recycling, Resource Materials, \*Water Pollution Control, \*Water Resources

Identifiers—Hawaii, Research Reports

Demand projections indicate that Oahu's natural ground water supply will be fully developed by the year 2000. Supplementary water resources will need to be developed in keeping with the growth of the economy and population. The author, chairman of the Honolulu Board of Water Supply, authoritatively discusses types of ground water in Hawaii, and areas of interest in water development throughout the Islands. This is followed by an in-depth historical accounting of Oahu's water supply system. The present water resources, population, land use situation, and projects for the future are examined. The Board of Water Supply, which has amply provided Oahu with high quality water, has carried out its responsibilities inefficiently. Management, in terms of utilizing computer technology, is indicated to deal with increasing problems. The issue of whether to combine water supply operations with sewerage functions is presented. Institutional responses to water supply needs, desalination, water recycling and treatment, and energy are other topics thoroughly treated. Although technological innovations can be used to increase supply, specific development projects, conservation measures, and institutional reform are recommended to meet Oahu's water supply needs beyond the year 2020. An extensive bibliography of published and unpublished materials is included. (BP)

Due to the great increase in technical knowledge and improvement in procedures, this second edition has been prepared to update existing information. Air pollution legislation is reviewed. Sources of air pollution are examined extensively. They are treated in terms of natural sources, man-made sources, metropolitan regional emissions, emission rates from fuels, incinerators, internal combustion engines, and industrial processes. The effects of air pollution on humans, animals, vegetation, and the economy are dealt with. In each section, specific pollutants and symptoms associated with their intake are discussed. Community air pollution surveys are instituted to determine the sources and effects of air pollution. Control agency programming is established. The text also deals with sampling, analysis, and meteorological aspects of air pollution. The subject is treated in great detail, and intends to provide the kind of information required for the evaluation of air pollution problems. A comprehensive bibliography is included. (BP)

This study contains a statistical consolidation of information reflecting many of the trends and patterns becoming evident in high school aviation courses conducted across the country. For purposes of this report the term aviation relates to all courses including both aviation and space. The information reported is considered to be of value for the planning, development and operation of individual aviation and/or space education programs. The report represents the fourth major compilation of statistical data and is presented for the 1974-75 school year. Within this report is a current list of all General Aviation Manufacturers Association (GAMA) member organizations. School information, showing percentages of aviation programs as a function of school population, is presented as well as descriptive information related to a typical aviation teacher. Academic background and aeronautical qualifications of teachers are presented. Course information given includes description of program designs, course titles, course classification, content and field trips as well as student flight orientation experiences and evaluation procedures. Descriptors—Curriculum Guides, \*Ecological Factors, Elementary Secondary Education, \*Environmental Education, \*Instructional Materials, Interdisciplinary Approach, Mathematical Concepts, Natural Resources, \*Pollution, Population Trends, \*Problem Solving, Student Projects, Teaching Guides

This sourcebook is an example of how environmental concepts can be introduced into various areas of the school curriculum. Included are a series of problems, projects, and exercises for students in grades four through ten. They are concerned primarily with pollution, population, individual needs, industrial needs, and consumption, on both a community and national scale. Each of the activities presents a particular problem, and students are asked to utilize their computational skills and/or suggest alternatives. The various problems and exercises aim to challenge students' problem-solving abilities in dealing with whole numbers, rational numbers, real numbers, percent and proportion, measurement, statistical measures, and graphs. Through genera-

tion of projects, students examine problems and suggest ways to improve environmental conditions. (BP)

Descriptors—Air Pollution Control, \*Ecological Factors, Environment, \*Environmental Education, \*Learning Activities, Recycling, Resource Units, Science Education, \*Science Units, Teaching Guides, \*Unit Plan, Waste Disposal, Water Pollution Control, Water Resources

This text focuses upon ecology and environmental science. It provides a thorough introduction to these areas, as well as the dimension of practical application to the classroom situation. The introductory section deals with the need to become aware of environmental problems, as well as presenting a brief summary of the succeeding chapters. The topics treated include the spaceship earth concept, ecological principles, water quality control, solid waste disposal, recycling and resource recovery, air quality control, noise pollution, environmental impact statements, and environmental law. There are two chapters devoted to each of these nine areas. The first chapter presents an extensive description of the environmental problem; the second chapter is a comprehensive teaching unit, broken down into seven sections. There is a brief introduction to each topic, stressing its importance, followed by the objectives of the unit. The content, activities, and experiments are given, and the units are divided into basic and advanced sections; the former appropriate for junior high school; the latter intended for senior high school and undergraduate college curricula. The evaluation area presents possible objective and essay questions. A detailed account of relevant sources, including books, periodicals, pamphlets, films, filmstrips, and games, is listed at the end of each unit. (BP)

Identifiers—Oregon

This document has been prepared to encourage teachers in Oregon to plan environmental trips with their classes. It is organized into three major sections—Awareness in a Living Environment, Teaching and Planning Resources, and Directory of Overnight Sites in Oregon. Using a series of questions as guidelines, children become aware of their environment by looking, listening, and touching. Change, cycles, microhabitats, and interdependence are other topics designed to stimulate inquiry and increase environmental awareness. The second part of this publication is arranged in five subsections. The first section is a listing of agencies that will provide free pamphlets, booklets, maps, guides, films, and slide presentations upon request. Section two presents a bibliography of instructional materials. The third area contains a glossary of terms, which might be helpful in discussing environmental issues. Tips on planning trips are included in the fourth subsection. The fifth area is a listing of suggested items to take on a trip. Part three provides a listing of non-commercial camps available through agencies, church organizations, or private owners. The camps are listed within each of the eleven area divisions of Oregon, and by county within each division. Location, accommodations, and contacts for camps are included. (BP)

Descriptors—Ecology, \*Elementary Secondary Education, Environment, \*Environmental Education, \*Instructional Materials, Interdisciplinary Approach, Learning Activities, Natural Resources, Problem Solving, \*Science Education, Student Projects, \*Teaching Guides

This handbook has been designed as a teaching resource to be used in the development of student attitudes and competencies, reflecting an awareness of the environment, and a motivation to work toward solutions to its problems. Listed activities are to be adapted to the abilities and interests of students, school locale, and teaching situation. Suggested exercises consist of air, noise pollution, soil, rocks, minerals, ecosystems, trees, plants, marine and freshwater life, animals, population, energy, pesticides, land use, watershed management, private enterprise, student needs and perceptions, and solid waste. Each of the activities or encounters has objectives stated in behavioral terms. The rationale for each undertaking is identified, with needed materials and appropriate terminology. The environmental topics are divided into activities which call for some particular action on the part of students (i.e., observation, collection, identification, comparison, discussion, etc.). Appraisal activities are suggested for teachers to determine the extent of learning which has occurred. The encounters have been made as flexible as possible to give them the greatest utility. They are designed to be implemented in one or more of the curricular areas, and suggestions for integration are provided. Printed and audiovisual materials are also listed. (BP)

Descriptors—\*Algorithms, Cognitive Processes, Elementary Secondary Education, Instruction, \*Learning, Learning Theories, \*Literature Reviews, \*Mathematics Education, Memory, \*Research, Teaching Methods

Identifiers—\*Algorithmic Learning

This volume contains a series of papers on algorithmic learning. Included are six reviews of research pertaining to various aspects of algorithmic learning, six reports of pilot experiments in this area, a theoretical discussion of "The Conditions for Algorithmic Imagination," and an annotated bibliography. All the papers assume a common definition of algorithmic learning as "the process of developing and/or applying methods or procedures, i.e., algorithms, with the goal of learning-how-to-learn." A common definition of algorithm is also used. Topics covered by literature reviews include algorithmic processes for cognition, algorithms and hierarchies, conceptual bases for the learning of algorithms, interference with the learning of algorithms, algorithmic problem solving, and algorithms and mental computations. Research papers report on studies related to algebra (3), arithmetic (2) and the use of desk calculators (1). The authors conclude that there are many open researchable questions in the area of algorithmic learning. (SD)

**Activities. A Collection of Things to Do at the Environmental Learning Center, Isabella, Minnesota.**

Environmental Learning Center, Isabella, Minn.

Pub Date [75]

Note—119p.; Occasional marginal legibility

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Curriculum Guides, \*Elementary Secondary Education, \*Environmental Education, \*Instructional Materials, Learning Activities, Natural Resources, Outdoor Education, Resident Camp Programs, \*Science Education, Student Projects, \*Teaching Guides

A collection of activities used successfully at the Environmental Learning Center in Isabella, Minnesota, are contained in this guide. Areas of study are perception and communication, mapping, weather, snow, soil, aquatics, trees, and animals. Within these areas is a number of related activities, each to be adapted to the appropriate grade level. The exercises contain a brief description with a statement of purpose. Equipment checklists indicate what the center furnishes, and what you are expected to provide. Procedures explain specifically how to go about each activity. A series of discussion questions serve as a follow up to the exercises. The lessons provide a degree of flexibility, so that they can be used when designing a resident program, or modified to accommodate individual or group needs. A number of the activities suggest the use of activity cards which can be reproduced from the lesson sample. Notebooks are also indicated as being important in most areas. Included in the appendix is a detailed account of available equipment at the center, including those items for camping, recreation, measuring, optics, astronomy, terrestrial needs, aquatic needs, test kits, and audiovisual aids. The bibliography contains a collection of materials used to develop environmentally oriented lessons. (BP)

Descriptors—\*Activity Learning, Classroom Games, \*Games, Game Theory, Junior High Schools, \*Mathematical Enrichment, Mathematics Education, Problem Solving, Secondary Education, \*Secondary School Mathematics

Identifiers—\*POE Game

This paper describes in detail the paper-and-pencil POE (Pelham Odd 'R Even) game, in which units of space are the allocated resources. The game is designed to provide an introduction to the rule structure common to the games of EQUATIONS, WFF 'N PROOF, and ON-SENTS & NON-SENTS. Techniques of playing POE, including goals, solutions, moves, scoring and variations of the game, are included. (JBW)

**Instructional Gaming as a Means to Achieve Skill in Selecting Ideas Relevant for Solving a Problem.**

Pub Date [74]

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Activity Learning, Classroom Games, Decision Making, \*Games, Game Theory, Junior High Schools, Mathematical Enrichment, Mathematics, \*Problem Solving, \*Research, Secondary Education, \*Secondary School Mathematics

Identifiers—\*Instructional Math Play Kits

Two pilot studies investigated the effects of using Instructional Math Play (IMP) Kits, pamphlets with which individuals may play the mathematical game EQUATIONS against a computer program. Twenty-nine junior high students in a high-ability mathematics class completed varying numbers of the kits in five 48-minute sessions during a two-week period; ten selected junior high school mathematics teachers worked through the entire series during a two-and-one-half month period. Pre- and post-tests were designed to evaluate subjects' ability (1) to detect the relevance of a particular idea for solving a problem, and (2) to evaluate a mathematical expression involving that idea. Both groups made significant increases. A significant amount of "unencountered learning" was noted. It was suggested that significant effects may be anticipated with less competent subjects than those involved in the pilot study. (Author/JBW)

**Identifiers**—EQUATIONS Game, Research Reports

This study focuses on the affective dimension of learning as influenced by a learning environment organized around instructional gaming. Experimental and control classes of seventh- and eighth-grade students taught by the same teachers for both semesters participated in the 1972-73 study. The experimental learning environment contained three components in addition to regular mathematics instruction: (1) the mathematics game EQUATIONS; (2) a twice-a-week tournament; and (3) the organization of the classes into teams. The student absentee rates were selected as the measure of students' attitudes toward the learning environments. Results indicated: (1) the mean absentee rate in nongame classes was significantly higher than in game classes; (2) the mean absentee rate of students switched from first term game classes to second term nongame classes was significantly greater in the second term; (3) the evidence for a carryover effect of participation in a games class for one term in lessening absenteeism in a nongame class in the second term was tenuous. **Identifiers**—\*EQUATIONS Game

This paper directs attention to the use of the EQUATIONS game as a research tool to study certain kinds of mathematical behavior, for example, the kinds of mathematical problems which players prefer to consider and to force their opponents to consider. Mathematical equations that meet certain game rule constraints constitute a problem space. A resource is a component of these equations, i.e., digits and operations symbols. Allocating resources is performed by a player's move within the well defined limits of game rules which may have the effect of altering the problem space. In this paper, forms of the mathematics game EQUATIONS are described and analyzed. Player strategy is analyzed, and the relevance of that analysis to the study of mathematical behavior is discussed. **Identifiers**—Research Reports

In February and May 1973, experimental forms of the mathematics game EQUATIONS were used in two seventh-grade classes which had been participating twice a week in EQUATIONS tournaments since the previous September. The purpose of the experimental games was to gain information as to the kinds of mathematical ideas players choose to concern themselves with during

the course of playing EQUATIONS. The study addressed two questions: (1) What is the change in the proportion of games in which simpler solutions are extinguished before the more advanced solutions? and (2) What is the change in the proportion of students correctly using solutions with more advanced concepts to sustain the burden of proof? The analysis indicated that as students acquired more advanced mathematical concepts they were willing to apply them in the classroom tournament setting. An increase also occurred in the proportion of players correctly using the more advanced concepts when previous plays of the game allowed it. (Author/JBW)

**Identifiers**—Research Reports

A survey was conducted with 104 seventh-grade students in four classrooms participating in EQUATIONS tournaments. The tournaments had been taking place on a weekly-basis for several weeks. The study compares four basic pedagogical assumptions behind the tournament structure with student opinion of the tournaments. Student responses to the survey were analyzed in the form of frequency and percents of alternate responses and with chi square tests. It was concluded that students view their place in the tournament hierarchy as reflecting their ability, but they are willing to meet stiffer competition. They view winning as being under their control. The assumptions behind tournament structure for EQUATIONS appear to be consistent with student opinions of the EQUATIONS tournament. (Author/JBW)

**Descriptors**—\*Activity Learning, Classroom Games, \*Games, Junior High Schools, Mathematical Enrichment, Mathematics, Mathematics Instruction, Middle Schools, \*Problem Solving, \*Research, \*Secondary School Mathematics

**Identifiers**—Michigan (Detroit), Pelham Middle School, Research Reports

Performance of 237 students in ten eighth-grade mathematics classes was assessed to measure their ability to solve (1) problems which involve only computation, and (2) problems which involve computation and recognition of the relevance of a particular mathematical idea indispensable to the solution of the problem. Pretest and/or posttest data were collected for five different sets of experimental conditions represented in the ten classes. The effects of the various sets of experimental conditions were measured by two different forms of two specially constructed tests. The study provides strong support for the proposition that skills in applying mathematical ideas can be improved by learning procedures that are rich in opportunities for application at appropriate levels of complexity for each student. The notions of topological equivalence for one-, two-, and three-dimensional figures, as well as for graphs and networks, are developed for classroom use with children between the ages of three and ten. Properties of open and closed curves are also examined. This manual, addressed to the teacher, describes several activities related to each concept to be introduced. In order to implement this material, the teacher would need plastic clay, colored beads, and wire or pipe cleaners for each student. (SD)

**Descriptors**—Activity Learning, Higher Education, Instructional Materials, Laboratory Procedures, \*Mathematics Education, \*Measurement, \*Metric System, State Departments of Education, \*Teacher Education, Teaching Guides, \*Teaching Methods

This handbook, prepared in field-test version, is intended to provide in-service teachers with "guidance in the development of the basic concepts of measurement." The basic assumption on which this guidance is based is that "hands-on" experience is the most appropriate method of teaching metric measurement. An additional premise is that students should learn to think in the metric system, and not to convert from the English to the metric system. The handbook is divided into five sections. After the rationale for teaching the metric system is presented in part one, a variety of activities for teachers' use in developing pre-measurement and measurement skills is described in part two. Section three is designed to aid in the planning and conducting of metric workshops, and section four, on implementation, describes materials needed. A glossary of terms and a bibliography comprise section five. (SD)

This curriculum guide was developed for low achievers and students needing special programs in first-grade mathematics. Modeled after the "Science—A Process Approach" curriculum, the program consists of an integrated series of learning activities. Master worksheets for recommended activities are included in the guide. The curriculum is divided into ten units. The first unit deals with the concept of numerosity and with the first three (whole) numbers. Subsequent units each deal with a single whole number. Activities involve printing the numeral as well as associating the numeral with appropriate sets. A list of objectives and pre- and post-tests are provided for each unit. (SD)

This report describes a 1972-73 field test regarding the development of procedures and materials for training coordinators to implement the Developing Mathematical Processes (DMP) program. DMP is a research-based, elementary school mathematics program under development at the Wisconsin Research and Development Center for Cognitive Learning. To conduct this field test, school district coordinators who would use the developmental edition of DMP Levels 1-4 (K-2) were identified, trained, and followed throughout the year. Information was also gathered from teachers on the usability of DMP materials and is included in this report. A brief summary of the 1973 and 1974 training programs for coordinators and the process of revising the Coordinators Manual are included. Changes in procedures and materials are suggested throughout the report. (Author/JBW)

**Report on a Study to Determine the Effect of Knowledge of Recursive Definitions upon Subsequent Application of the Principle of Mathematical Induction.**

North Carolina State Univ., Raleigh. Dept. of Mathematics and Science Education.

Pub Date Jun 73

Note—61p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—Achievement, Analysis of Variance, Comparative Analysis, \*Inductive Methods, \*Instruction, \*Learning, Mathematics Education, Number Concepts, Programed Instruction, \*Research, Secondary Education, \*Secondary School Mathematics

**Identifiers**—\*Principle of Mathematical Induction, Research Reports

The objective of the study was to determine the effect which a unit dealing with recursive definitions would have on students' achievement in applying the principle of mathematical induction (PMI). Twenty-four secondary school students were randomly assigned to control and experimental groups. Students in the control group studied programmed units of the PMI program first and then programmed units on the recursive definition program. This procedure was reversed by the experimental group. Data were obtained from a posttest and a subsequent retention test. A 2 x 2 analysis of variance was used to analyze data. Changes in score were analyzed using "t" tests. The study indicates that it makes little difference whether a unit on recursive definitions precedes or follows a unit on the PMI. (Author/JBW)

**Identifiers**—Research Reports

This work is one of a series of monographs on the improvement of engineering education. This particular study was designed to determine: (1)

the extent of individual engineers' involvement in continuing education; (2) factors pertaining to job success; and (3) what relationships may exist between the two. The population surveyed included all persons with a bachelor's or higher degree in engineering who were working in an engineering area. Data were obtained by means of a questionnaire. Six factors related to an engineer's success were chosen as dependent variables: (1) years with present company; (2) present job satisfaction; (3) salary increases and promotions; (4) salary with respect to age; (5) salary with respect to job responsibilities; and (6) salary with respect to age and job responsibilities. A list of independent variables were chosen to indicate two types of continuing education: those types which can be measured by participation in programs, and other types which are highly individualized and cannot be measured by participation in programs. Chi square statistics revealed 21 significant relationships between the dependent and independent variables; these findings are discussed at length in the report. Also included are the questionnaire, accompanied by its cover letter, and complete tabulations of individual questionnaire item results. (MLH)

This book was written for the instructor who is interested in improving and enriching his teaching by the use of devices that are readily available and can be afforded by most colleges and universities. The chapters describe a variety of teaching aids and how they can be used in education, and give information on how one can prepare his own audio and visual materials in a variety of formats. Representative costs are provided whenever possible. Each of the chapters has been written by one or two people who are thoroughly familiar with and highly experienced in the teaching aid described. The book includes the following topics: chalkwork, overhead transparencies, uses and abuses of slides in teaching, audio tape cassettes, use of television for presentation, pocket calculators, computers, and microforms in education. This document serves as a supplement to the 1972 directory of research, teaching, and training institutions in demography in the region of the Economic Commission for Asia and the Far East. Classified alphabetically by country, each institution's name address, person in charge, official title, first year of research/teaching in demography, professional staff, research projects, curricula, and publications are given. Professional staff data include the individual's sex, year of birth, subject

profession, main courses taught, mother tongue, and other languages known. The research projects are defined by title, director(s), completion data, aim and area of research. Publications stemming from the research are given. The area of curricula specifies the existence of an international exchange program, language(s) used in teaching demography, entrance requirements, diploma offered, related courses and hours. The introductory index provides an alphabetical listing of the countries and teaching institutions for which information has been provided. Directory reference numbers beside each institution indicate where items have been added or amended. New entries are indicated with an asterisk beside the reference numbers. An additional index provides amendments of institutions for which sufficient information was not available or whose programs had not begun. (BP)

Descriptors—Bibliographies, Demography, \*Directories, Environmental Education, \*Foreign Countries, Indexes (Locators), \*Information Retrieval, \*Periodicals, \*Population Education, Resource Materials  
Identifiers—Asia, Far East

This publication has been prepared for government personnel, research workers, librarians/documentalists, teachers, and students. Contained within the directory are materials published in the Economic and Social Commission for Asia and the Pacific (ESCAP) region on population-related topics. The publication is arranged in four sections. The user's guide contains 21 keys, explaining the organization of the directory. A country index and subject index are included as a cross reference to the alphabetical title listing. The former is arranged alphabetically by country, with percentage, type of available population materials, and periodical entry numbers. Topics within the subject index are population projections, ecology, family planning, labor force, migration, mortality, population problems in legislation, rural population, urbanization, and vital statistics. Countries and accompanying entry numbers are found under each heading. The main section of the directory is the alphabetical title listing. Data elements for each title include the type, form, city, year, and language of publication, International Standard Serial Number (ISSN), periodicity, subscription address, pages, circulation, price, distribution, and microfilm availability. This directory serves as a resource in searching for literature, and establishing a program for systematic acquisition of materials. (BP)

The ASEP Bibliography. Australian Science Education Project, Toorak, Victoria.

Pub Date 75

Note—62p.

Available from—Curriculum Development Centre, 450 St. Kilda Road, Melbourne, Victoria 3004, AUSTRALIA

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Bibliographies, Curriculum, Information Sources, Instructional Materials, \*Library Material Selection, Science Course Improvement Project, Science Education, \*Science Materials, Secondary Education, \*Secondary School Science  
Identifiers—\*Australian Science Education Project (ASEP)

This bibliography includes science materials which related to curricula produced by the Australian Science Education Project (ASEP). ASEP has developed 41 separate science units for junior secondary students, 6 service booklets, and a

comprehensive handbook for teachers called "A Guide to ASEP." The purpose of the bibliography is twofold: to help libraries determine reference needs resulting from the introduction of ASEP materials into schools, and to provide teachers who are using ASEP materials with a comprehensive reference list so that they can identify their own library needs. It is also hoped that such a bibliography will be useful to other teachers who are developing their own junior science materials. The entries in the bibliography are organized according to the subject content of the 41 ASEP science units and include science books, sourcebooks, journal articles, and non-ASEP curriculum materials. Descriptors—Achievement, \*Annotated Bibliographies, \*Curriculum, \*Elementary School Science, Instruction, Learning, Science Course Improvement Project, \*Science Courses, \*Science Curriculum, Science Education, Teacher Education

This bibliography relates the various experimental studies done in elementary school science. Every attempt was made to provide a bibliography that is as comprehensive as possible. Only a selected number of the publications put out by the projects themselves are listed. Bibliographical information is provided for obtaining a continuous source of information for any project included. The address of each project headquarters is found at the beginning of each section. Where there are commercial publishers of the materials, these addresses are also given. The publication also presents a general section which includes publications relating to the new science in a general way but which cannot be grouped under any specific program. The section is divided into seven categories: (1) curriculum; (2) environmental education; (3) science and other subjects; (4) psychological foundations; (5) teacher education; (6) teaching ideas; and (7) miscellaneous (research, facilities, implementation, etc.). Situation Report [—Fiji, Indonesia, Israel, and Philippines].

International Planned Parenthood Federation, London (England).

Pub Date Apr 75

Note—31p.; Contains broken type; best copy available

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Community Information Services, \*Consultation Programs, Contraception, Demography, \*Family Planning, Foreign Countries, \*Information Services, International Programs, Population Education, Population Growth, \*Population Trends, Programs, Referral, Resource Materials, Social Welfare, \*Statistical Data

This is a series of four situation reports prepared by the International Planned Parenthood Federation for informational and consultative purposes. The countries reported on are Fiji, Indonesia, Israel, and the Philippines. Some of the latest statistical figures for each country are listed. They are area, population and growth rate, birth, death, and infant mortality rate, fertile women (15-44), population under 15, urban population, gross national product per capita per growth rate, and population per doctor and per hospital bed. Other general information presented concerns the ethnic groups, language, religion, economy, communications/education, and medical services of the four countries. A more detailed account is provided on the topic of family planning. Goals of the organization, legislation, associations and addresses, services, education research, and special projects are reported. Sources encompassing references and foreign assistance are also mentioned. (BP)

Identifiers—\*Sea Grant Program

This publication is designed to provide guidelines for future program management decisions and is based on data from three sources: research into the nature and development of emerging training programs and supply/demand relationship for technician occupations in the marine sciences; site visits with directors and staff of such training programs and with employers of their graduates; and workshops to allow and observe interaction between professionals closely associated with marine technician training. Four recommendations are presented, following an assessment of the data. Appendices include bibliographical data related to training program director workshops and marine technician training programs. Samples of training program curricula are presented. References are included. (Author/EB)

Identifiers—\*National Science Foundation, NSF  
Presented is a report that includes condensations of papers presented on interdisciplinary curricula, evaluation and dissemination and of the reactions to these papers. The full papers and reactions are in the appendix. The report also includes the highlights of discussion sessions at which small groups reported. The final section summarizes the recommendations on future directions for pre-college science education that were made by small discussion groups and presented by a panel in the final session of a meeting of curriculum developers. The meeting was arranged by the staff of the Materials and Instruction Development Section of the Division of Pre-College Education in Science of the National

Science Foundation. Papers presented related to such topics as: (1) Science, Schooling and Society: The Search for an Integrated Curriculum; (2) Pragmatism--The Key to Changing Schools in the Seventies; and (3) Value Systems, Approaches, and Accountability (a reaction to another author's paper on evaluation and curriculum development). Identifiers—National Science Foundation, NSF

In 1972 and 1974, the Bureau of the Census, with support of the National Science Foundation, conducted surveys of 50,000 scientists and engineers. The sample represented 1.4 million individuals who had been identified as scientists or engineers on the basis of a set of criteria which included occupation, personal identification, and major subject of highest degree. For this study, topics surveyed included: areas of major interest, sources of funding for projects, level of highest degree, and amount of supplementary training. (CP)

Presented are data taken from a forthcoming report, An Analysis of Federal Research and Development (R&D) Funding by Function, Fiscal Years 1969-76. The 14 function categories were chosen to make visible the most important R&D objectives in the 1976 budget. Data are additive to 100 percent, and thus each program appears only under a function that embraces its primary purpose and not under headings that relate to secondary purposes. Among the 14 functions those that reflect noted increases are national defense, space, energy, and the education function. Both tabulated and descriptive data are presented. Other functions listed and discussed include: the health function, registering a 12 percent decline; the environment function, which is having one of its highest growth rates; science and technology, showing study growth; natural resources; and transportation and communication. The two largest programs making up four-fifths of the function total are NSF's Scientific Research Project Support and ERDA's physical research program. (Author/EB)

Identifiers—National Science Foundation, NSF

Presented is a summary of the Research and Development (R&D) expenditures of state public institutions for the fiscal year 1973. A comparison is presented in graph form of these expenditures for the fiscal years 1964, 1968, and 1973. A review, with comparison figures, is given related to distribution of R&D expenditures of state government agencies and state universities and colleges, by character of work (basic research, applied research, and development) and by field of science (life sciences, engineering, social sciences, physical sciences, and others). A table showing the distribution of R&D expenditures of state public institutions as compared with other state indicators (population, personal income, and total state government general expenditures) for fiscal year 1973 is presented. Other tables show comparison of R&D expenditures by state and performer, by state and source of funds, by state and character of work, and by state and field of science. (EB)

Identifiers—Georgia (Athens), University of Georgia

This is one of a series of publications designed to describe the development, evaluation and implementation of a model teacher education program for the preparation of elementary teachers. The method of program development described was introduced at the University of Houston, Texas, in 1969-70, but modified to fit the needs of the teacher education program at the University of Georgia. The philosophy, the developmental stages (including a master flow chart for prospective primary teachers), and objectives are presented. Reinforcement skills are suggested and described. Student reactions to, and evaluations of, the course are included. (EB)

**Need for In-Service and Pre-Service Metric Education.**

Pub Date 75

Note—16p.

#### EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Educational Needs, Elementary Secondary Education, Inservice Education, \*Mathematics Education, Mathematics Teachers, Measurement, \*Metric System, \*Research, Surveys, \*Teacher Education

Identifiers—Nevada, Research Reports

Two questionnaires were given to a random sample of rural and urban elementary and secondary teachers as well as to mathematics methods students at the University of Nevada. The questionnaires were used to determine (1) the need for inservice and preservice metric education and (2) the present knowledge of the metric system of Nevada teachers. The data indicated: (1) a need for inservice metric workshops for both rural and metropolitan elementary levels, (2) the need is not as great for workshops at junior and senior high levels, (3) elementary mathematics methods students are not adequately prepared in the metric system, and (4) secondary mathematics methods students and junior and senior high teachers are more adequately prepared in the metric system than their elementary counterparts. This paper suggests a workshop for secondary teachers and recommends that a more relevant and comprehensive questionnaire be prepared to verify the need for a workshop. (JBW)

**Metric Education in Mathematics Methods Classes.**

Pub Date 75

Note—4p.

#### EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Educational Needs, \*Elementary School Mathematics, \*Higher Education, Mathematics Education, Measurement, \*Methods Courses, \*Metric System, Preservice Education, Research, \*Teacher Education

Identifiers—Research Reports

A pre-test on knowledge of the metric system was administered to elementary mathematics methods classes at the University of Nevada at the beginning of the 1975 Spring Semester. A one-hour lesson was prepared and taught regarding metric length, weight, volume, and temperature. At the end of the semester the original test was given as the post-test. This paper gives the

results of both tests and concludes that, even though not significant, improved knowledge was noted in the areas surveyed. It is stated that more than one hour may be needed to teach metrication to future elementary teachers, but one hour is valuable. (JBW)

Identifiers—Elementary Secondary Education Act Title I, ESEA Title I

This guide describes activities and materials which can be used in a mathematics laboratory approach to a basic mathematics program for grades 1-6. One-hundred thirteen activities pertaining to measurement concepts are described in terms of purpose, suggested grade levels, materials needed, and procedures. Some specific concepts include: linear measurement (33 activities), area and volume (31 activities), weight measurement (31 activities), time measurement (18 activities), estimation, inequalities, equalities, graphing, comparisons, circumference, scale drawing, applications, similarity, non standard units, measure, counting, surface area, weight, density, indirect area measure, cost calculations, conservation, recording data, problem solving, time continuum, directionality, shadows and time relationships. Most activities utilize the English system of measurement, but many can be adapted to the metric system. The guide concludes with a list of selected manipulative materials for mathematics laboratory use. (JBW)

**Title I Individualized Mathematics Program, Grades 4-8, Final Evaluation Report.**

Memphis City School System, Tenn.

Pub Date 75

Note—71p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Educational Research, \*Elementary School Mathematics, Elementary Secondary Education, Individualized Instruction, \*Individualized Programs, \*Junior High Schools, \*Program Evaluation, \*Research, Secondary School Mathematics

Identifiers—Research Reports, Title I Individualized Mathematics Program

This report evaluates the 1974-75 experimental individualized mathematics program operated as a supplementary activity within the Memphis City Schools curriculum for grades 4-8. This is a compensatory program to meet the needs of students residing in areas where socio-economic condi-

tions contribute to low achievement. From the 4,700 students, random samples were selected for the experimental and control groups. The project staff consisted of one project director, one resource teacher, 104 Title I teachers, and one clerk-typist. The assessment procedures utilized in evaluating the program were based upon process and product evaluation. The process evaluation gave qualitative evidence about the program based upon responses to questionnaires by project teachers and principals, classroom teachers, and parents. Additional qualitative evidence was obtained from a workshop for teachers. Product evaluation was obtained by measuring three performance objectives via the Metropolitan Achievement Test, The Attitude Inventory, and Individual Progress Reports. The report draws the conclusion that all grades achieved two of three objectives set and that students, parents, project teachers, classroom teachers, and principals were very supportive of the program. **Verbal Mediators in Mathematics for Transfer of Learning. Technical Report No. 3.**

Texas Univ., Austin. Mathematics Education Center.

Report No.—TR-3

Pub Date 14 Oct 74

Note—17p.; Occasional marginal legibility; Part of Ph.D. Dissertation, University of Texas, Austin

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Generalization, Junior High School Students, \*Mathematical Concepts, Number Concepts, Programed Instruction, \*Research, Secondary Education, \*Secondary School Mathematics, Specialization, \*Transfer of Training, \*Verbal Communication

Identifiers—Modular Arithmetic, Research Reports

Junior high school students (N=104) were given instruction using programed booklets on modular addition. Twelve conditions of verbal mediation were randomly assigned to students. Conditions were defined by presence or absence of introductory discussion (2 levels), number of worked examples (2 levels), and type of rule (3 levels: specific, general, none). After instruction, subjects were tested for three types of transfer: specialization, generalization, and reasoning by analogy. The use of a concrete model as introductory was found to have a significant (p less than .05) facilitating effects on specialization and a less-pronounced effect on generalization. For all three levels of transfer, the groups given specific or general rules performed better than those given no rule. Limitations of the study and suggestions for further research are discussed. **Higher Order Rule Characterization of Heuristics for Compass and Straight Edge Constructions in Geometry.**

Pub Date Apr 75

Note—29p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975); Best copy available; Occasional marginal legibility

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Algorithms, Artificial Intelligence, \*Cognitive Processes, \*Geometry, Information Processing, \*Mathematics Education, \*Problem Solving, \*Research, Secondary Education, Thought Processes

Identifiers—\*Geometric Constructions, Polya (George)

The research reported in this paper was designed to analyze the incidence of use of higher-order rules by students solving geometric construction problems. A carefully selected set of construction problems was subjected to rigorous a priori analysis by mathematics educators to determine what basic and second-order rules might be used by able high school students in their solution. Categories of problems analyzed include: patterns of two loci, patterns of similar figures, combined two loci and similar figures, patterns of auxiliary figures, and patterns of loci, similar figures, and auxiliary figures. The analysis was successful in making more precise the heuristic approach of George Polya. Overall, the

viability of this method of analysis was demonstrated. The authors cite some limitations of the study and future directions for their work. (SD)

Descriptors—Achievement, Analysis of Variance, Attitudes, Doctoral Theses, Elementary Education, \*Elementary School Mathematics, \*Instruction, Objectives, \*Programed Tutoring, \*Research, \*Tutoring

Identifiers—Research Reports

This study was concerned with the effect of programmed tutoring on first-graders' achievement in mathematics and attitudes toward mathematics. Subjects were selected using total scores on the Metropolitan Readiness Tests and assigned to one of three treatment groups. Children in the tutored groups received 15 minutes of individualized instruction each school day from October through May in addition to regular classroom mathematics instruction. Children in the control group received only the regular classroom instruction. Instruction of students in the programmed tutoring treatment group was controlled by a set of operational programs; the directed tutoring group received instruction involving learning activities. At the end of May each child was tested with three posttest achievement measures and an attitude measure. Data were analyzed in a two-factor ANOVA design. Directed tutoring in combination with classroom instruction was found to be more effective than either of the other treatments. There was no significant difference in the effects of the other two treatments. (Author/SD)

**Test Factors, Instructional Programs, and Socio-Cultural-Economic Factors Related to Mathematics Achievement of Chicano Students: A Review of the Literature. SMESG Working Paper No. 10.**

Stanford Univ., Calif. School Mathematics Study Group.

Report No.—SMESG-WP-10

Pub Date Mar 75

Note—33p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Achievement, \*Annotated Bibliographies, Elementary Secondary Education, Instructional Programs, \*Mathematics Education, Minority Groups, \*Research Reviews (Publications), Socioeconomic Status, \*Spanish Americans, Spanish Speaking, Tests

Identifiers—\*Chicano Students, SMESG, Stanford Mathematics Education Study Group

The purpose of this paper is to identify patterns of performance which might yield insight into findings concerning mathematics achievement of Chicano students. The Chicano student populations of these studies were identified and restricted by the following criteria: Spanish surname, of Mexican descent, language (bilingual, Spanish-English; monolingual, Spanish), geographic area (southwestern and western United States). The majority of Chicano students in the studies were from backgrounds of low socioeconomic status. This paper summarizes the general results of the literature reviewed and concludes with an annotated bibliography. The review of the studies is organized according to three major constructs: (1) Tests, (2) Instructional Programs, and (3) Socio-Cultural-Economic Conditions. Section 1 contains three subsections: (a) Mental Ability Profiles, (b) Language and Cultural Factors in Tests, and (c) Reliability and Predictability of Mental Ability and Achievement Tests. Section 2 contains three subsections: (a) Bilingual Programs, (b) Teacher-Student Interactions, and (c) Special Programs. The studies are cross-referenced under appropriate subsection; thus the results of one study may be included under more than one topic. (Author/SD)

Identifiers—\*Nevada, Research Reports

This bulletin contains a summary of enrollment figures from the fifth through tenth months of the 1974-75 school year for 17 Nevada school districts. Statistics are given for certified personnel (male and female) regarding age, prior out-of-state experience, highest degree held, salary ranges by degree held, states where highest degrees were earned, and area of assignment for new teachers. The bulletin concludes with a table summary of 17 Nevada school district budgets for 1975-76 in terms of assessed valuation, numbers of special education program units, tax rate operation, tax rate debt service, and general fund receipts and expenditures. Descriptors—Doctoral Theses, Educational Research, \*Field Experience Programs, \*Followup Studies, Higher Education, \*Program Evaluation, Science Education, \*Science Teachers, \*Teacher Education

Identifiers—Research Reports

The purpose of this study was to follow up teacher graduates of a preservice field-based program after one to five years of teaching. Field-based activities in the program involved actual teaching for a period ranging from one to five quarters, organized at different levels—elementary, junior high, and senior high schools, and in different settings—urban and suburban. The sample was composed of 86 graduates employed as full-time science teachers in Ohio during 1974-75. Preservice data included each subject's score on Science Classroom Activity Checklist: Teacher's Perception (SCAL: TP), grade point average (preprofessional, professional, and cumulative). Inservice scores were collected by administering instruments to the teachers, their students, and administrators. Data analysis showed no significant difference in changes of teachers' views regarding the appropriate type of classroom activities. No significant differences were found in the type of activities implemented by teachers with one to five years of teaching experience. Administrators' views regarding science teaching and support given to science teachers was a strong independent predictor variable. It appeared that the views of the graduates toward inquiry-oriented teaching and the use of such activities in the classroom remained stable five years after graduation. (Author)

This report details the departmental sources and recipients of Federal support to colleges and universities in fiscal year 1974. The \$4,463 million allocated represents a 17 percent increase from fiscal year 1973. The Department of Health, Education, and Welfare was the largest source of

Federal funds, with \$3,234 million, or 72 percent of the total. Funds for academic science, representing 61 percent of all funding, rose by 11 percent increase. The report contains several other statements concerning funding divisions, including a listing of 100 universities and colleges receiving the largest amounts of Federal funding in 1974. (CP)

Identifiers—\*Developing Mathematical Processes, DMP, Research Reports

A continuation of the field test of Developing Mathematical Processes (DMP) was conducted in eight schools. Four were multiunit schools located in settings ranging from small town to large city; the remaining schools were conventionally organized and located in large urban areas. The purpose of the field test was (1) to determine the effectiveness of the instructional program in terms of student achievement, and (2) to document the usability of the program. The field test focused on the third level of the program. The results indicated a mastery level of approximately 81 percent on the specific objectives of the program. Overall performance was retarded by poor results in one topic. On the latter portions of the program, maintenance of the mastery level reached a level of 83 percent. The data on standardized test achievement did not conclusively favor either DMP or its conventional counterparts. The field test established that (1) teachers will expend the effort to attend frequent inservice meetings, to prepare instructional materials, and to plan for the several instructional modes in the program; and (2) students will enthusiastically participate in the learning activities. On the basis of the data gathered in the field test, DMP was demonstrated to be a viable program for second-grade children. (Author/SD)

Identifiers—\*Developing Mathematical Processes, DMP, Research Reports

The purpose of this study was to assess the usefulness of the elementary mathematics program Developing Mathematical Processes (DMP) for educable mentally retarded (EMR) students. The subjects of this study were 10 children from an intact class designated EMR. The children ranged in age from 7 to 12 years. The 1972 Developmental Edition of the DMP program was used in this trial, which encompassed three months. Placement into the program was guided by the data from the program's placement inventories supplemented extensively by teacher judgment. Selected topics and activities from Levels 1, 2, and 3 were used in the course of instruction. The test data attested to the appropriateness and effectiveness of the DMP materials for these subjects; the objectives of each topic attempted were mastered with few exceptions. Children's interest was evidenced by a general willingness to begin new activities and by their maintaining appropriate behavior. The teacher's evaluation of these materials was very positive, but inadequacies were cited in the placement processes. The most important single factor in the opinion of the teacher of these children was that every student experienced success at his own pace and level. (Author/SD)

Descriptors—Artificial Intelligence, Computers, \*Information Processing, \*Learning, \*Mathematics Education, Memory, \*Problem Solving, \*Research, Thought Processes

In this paper, Simon describes contemporary information processing approaches to the study of learning and thinking, and discusses the relevance of these studies to the distinction between rote and meaningful learning. Before defining the basic terminology of information processing research, he provides a brief literature review, describing some of the results in the study of capacity and search times for short-term and long-term memory. He then describes the basic methods by which the computer simulates mental activity, and the "thinking-aloud" methods by which human problem solving and computer problem solving are compared in the laboratory. Illustrating his theses with discussion of six types of problems (Katona's matchstick problem, towers of Hanoi, geometry proofs, algebra word problems, understanding instructions, and chemical thermodynamics), Simon describes various approaches to problem solving, and weighs the relative merits of each in terms of memory load, generalizability, and transfer. He distinguishes between the notions of problem solutions as a sequence of states or a sequence of operations. Other issues discussed include the importance of the semantic content of a problem or class of problems and of the schemata available to the problem solver. (SD)

Presented is a paper on many developments in the training and retraining of school biology teachers. The author analyzes teacher education in the biological sciences on an international basis to find similarities in approaches. The need to develop in teachers an awareness of the importance of retraining, and the problem of evaluation of retraining programs are other main topics discussed by the author. An extensive (272 item) bibliography is included. (CP)

This report is the third in a series of annual studies directed to institutions granting Ph.D. degrees in science in the United States and to their medical school components. Both Ph.D. and masters students are included in the 354-institution survey. Information gathered reveals that fall 1974 graduate science enrollment in institutions of higher education granting science and engineering Ph.D.'s increased almost 6 percent over the previous year; the number of women enrolled increased by 13 percent, while men enrolled increased only 3 percent. Other segments of the study cite trends in financial support, enrollment by level and area of study, and postdoctoral study. (CP)

A programed sequence for teaching students to solve word problems was developed using a combination of the information processing and structural variables approaches. Students using the sequence proceeded individually through mastery of a sequence of objectives. In order to evaluate the program, fourth and fifth graders were randomly selected from classes; the remaining students in these classes served as controls. All students were given the appropriate level of the Stanford Achievement Test as a pretest. During the 11 weeks that experimental subjects completed the Word Problem Program, control subjects received regular mathematics instruction. The computation and applications sections of the Stanford Achievement Test served as posttests. Both fourth- and fifth-grade experimental groups scored higher on their respective applications posttests than the comparable control groups. (SD)

**The Effects of Social Comparison, Contingency of Reward, and Age of Subject on Self-reinforcement, Self-confidence, and Task Persistence.**

Pub Date 75

Note—25p.; A paper prepared for the Annual Meeting of the American Educational Research Association (Washington, D. C., April 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Behavioral Science Research, Educational Sociology, Elementary Education, Interaction Process Analysis, Negative Reinforcement, Positive Reinforcement, Preschool Education, Rewards, \*Self Concept, Self Reward, Social Influences, \*Social Psychology, \*Social Reinforcement, Socioeconomic Influences, \*Task Performance

The present study evaluates the immediate effects of an experimentally manipulated social comparison on the subsequent behavior of lower socioeconomic status black children four to five and seven to eight years of age. The effects of four conditions of social comparison are measured with respect to the children's self-reinforcement, self-confidence, and task persistence. Also evaluated are the effects of contingent versus noncontingent reward in the social comparison situation. The results indicate that positive social comparison yielded more self-reinforcement than negative social comparison. Younger children displayed more self-confidence than older children. This finding closely resembles the effects of repeated failure experiences on children and lends support to the contention that the social comparison process is related to the dimension of success and failure. It appears that the effects of an experimentally manipulated social comparison are somewhat different for children from black, lower socioeconomic status than for white children from similar backgrounds. The purpose of this Bicentennial handbook is to assist teachers, supervisors, and others in the preparation of programs that will encourage participation in Bicentennial activities while also developing significant knowledge, skills, abilities, attitudes, and appreciations in the educational process. The handbook contains a compilation of numerous historic and cultural resources pertinent to Bicentennial themes, as well as suggested steps for developing a documentary program with respect to local communities, ethnic and national experiences, businesses and industry, recreational programs and facilities, and the American society (past, present, and future). The first part of the document includes a guide to developing community markers, information on how and where to begin the research process, descriptions of places to go and see, a list of periodicals, techniques of oral history, and suggestions for visual experiences. The second part of the handbook lists activities for classrooms, including Bicentennial games, walking tours, individual school histories, museums, and early childhood Bicentennial activities. Several appendices which list community and historical landmarks in the New York City area conclude the document. (Author/JR)

Descriptors—\*Colonial History (United States), \*Curriculum Development, Educational Resources, Elementary Secondary Education, Instructional Materials, Learning Activities, Lesson Plans, Models, Questioning Techniques, Resource Guides, Revolutionary War (United States), \*Social Studies, \*Social Studies Units, \*United States History

Identifiers—\*Bicentennial

Prepared for elementary and secondary social studies teachers, this volume presents four exemplary learning activities for teaching about the Bicentennial. Each activity explores a recurring theme in the United States' Development—dedication to a cause, humor, frontiers, and loyalty. Lesson 1 concerns George Washington and the problems he encountered during the Revolution. Lesson 2 contains representative examples of American humor. Lesson 3 deals with the idea of conquering frontiers as evidenced in the life of a noted 19th-century American astronomer. The last lesson deals with roles played by the Japanese Americans while serving the Allied cause during World War II, raising the question of conflicting loyalties. Each lesson plan presents the intended student audience, suggested time, materials, questions, concepts and objectives, teaching suggestions, references, and additional materials. The materials can be used as presented or as models for teachers developing their own similar activities for the Bicentennial. (Author/JR)

Descriptors—City Demography, City Planning, \*Geographic Concepts, Geographic Regions, \*Geography Instruction, Higher Education, \*Human Geography, Integration Studies, Land Use, Resource Materials, Urban Areas, Urban Environment, \*Urbanization, Urban Studies

This resource paper on urban geography is part of a series designed to supplement undergraduate geography courses. It sets forth some of the principles of urban geography with special reference to form development and land uses within cities. Chapter one examines the legal, administrative, population, density, and functional definitions of a city. Chapter two describes world patterns of urban growth throughout history and in the

United States. Chapter three examines theories of urban centralization and decentralization including the gravity and potential models, concentric zonal model, wedge or sector model, multiple nuclei model, and site rentals and transport costs theories. Chapter four reviews the changing patterns of urban growth including the era of mass transportation dominance, the era of the automobile, and the spatial forms of urban growth. Chapter five examines theories behind metropolitan expansion, intermetropolitan coalescence, and urban regional planning. Chapter six reviews the spatial patterns of integration and segregation in the inner city emphasizing the neighborhood school, mobility, and processes of integration. (Author/DE)

Descriptors—City Planning, Developing Nations, \*Economic Development, Economics, Geographic Concepts, Geographic Regions, \*Geography, Geography Instruction, Higher Education, \*Human Geography, Land Use, Resource Allocations, \*Resource Materials, \*Urbanization, Urban Studies

This resource paper on economic geography is part of a series designed to supplement undergraduate geography courses. It interprets regional economic development in terms of geographic spatial patterns of production, income, and physical or economic distance. Chapter two outlines some selected characteristics of spatial disparities of economic development at the regional and interurban levels in the United States and in developing countries. Chapter three briefly discusses two major theories of spatial development. The export-base theory explains the development of a region through external demand for its natural resources. The sector theory explains development through the specialization of agricultural activities and the formation of an intraregional transport system which permits the exchange of products. Chapter four reviews several models of differential mobility to explain in conceptual terms the emergence of the urban-regional structure in the United States. Chapter five analyzes selected flow of variables such as labor, capital, innovation, and decision-making power between developing and developed nations. Chapter six suggests five alternative national strategies of urban development. (Author/DE)

Identifiers—\*Geography Curriculum Project

The increasingly important role of transportation and its environmental impact is given major emphasis in this curriculum unit for secondary students. Four purposes of this unit are to describe and show (1) the historical development of transportation in America; (2) the effect of

current transportation practices upon the environment; (3) some transportation practices which could result in a healthier environment; and (4) the expected effect on the environment of transportation being developed for the future. A model summarizes the main ideas related to each of the purposes. A list of important concepts precedes the chapters. Individual chapters include (1) model of unit-transportation and the environment; (2) transportation network development; (3) early transport routes in America; (4) the railroad and its impact upon American transportation; (5) the role of motor vehicles in American transportation; (6) the impact of air travel upon American transportation; (7) transportation-related pollution; (8) the impact of transportation upon urban congestion; (9) transportation land requirements; (10) efficient use of existing facilities; (11) direct government control; (12) urban rapid transit; and (13) transport modes of the future. Cognitive Structures, Political Environment, and Increased Political Awareness in Children: A Developmental Approach.

Pub Date Mar 75

Note—31p.; Paper presented at Annual Meeting of the Western Political Science Association (Seattle, Washington, March 20-22, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Changing Attitudes, \*Cognitive Development, Cognitive Measurement, Current Events, Elementary Secondary Education, Longitudinal Studies, Political Attitudes, Political Influences, \*Political Science, \*Political Socialization, Research Design, \*Research Methodology, Speeches, \*Student Attitudes

Identifiers—Ozarks

A conceptual framework and a unique data collection technique are proposed as a means for studying the relationship between cognitive structure and political awareness in children. Most researchers have dealt with cognitive development and political socialization research by examining children in different grade levels at one point in time. However, in this study, the same children are interviewed at three different points in time: pre-Watergate, during Watergate, and post-Nixon. The sample population included two urban school districts and six rural school districts, representing two contiguous counties located in the geographical region commonly known as the Ozarks. The project required the administration of interviews to students in the third, sixth, and ninth grades followed by a second set of interviews with the same students as fourth, seventh, and tenth graders and a third set of interviews with the these students as fifth, eighth, and eleventh graders. This study represents an attempt at longitudinal research on the acquisition of political orientations by children and suggests a key technique for determining whether childhood orientations have any effect on adult political actions. Racial Consciousness, Activism and Socialization: Black Youth. Professional Paper No. 4.

California Univ., Los Angeles. Afro-American Studies Center.

Pub Date 75

Note—36p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Activism, African American Studies, Civil Rights, Community Influence, Higher Education, \*Negro Youth, \*Political Influences, Political Socialization, \*Racial Attitudes, Racial Discrimination, Racism, Research Projects, Social Action, \*Socialization, Social Science Research

The primary objective of this research is to explore whether black student activism can be presumed to indicate a relative lack of socialization among activists. Contrary to the popular belief which argues that widespread challenges to established authority and dominant groups should be seen as an index of social disorganization among the disadvantaged, the theory presented argues that sustained periods of collective activity such as demonstrations are indicators of intense socialization and organization building. The research was conducted in a large all-black public Chicago high school. The strategy was to select an array of school organizations and attempt to

interview each available member. Two race-focused organizations, the Afro-American History Club (AAH) and a group termed the Militant organization, were the primary focus of the study. Through interviews, the author sought to specify how the social environment and activities of students in the two groups differ from that of other students. It was found that significant similarities exist between students in the AAH and Militant samples in their exposure to race-conscious interactions and writings; in this respect, they both differ markedly from nonrace students. In conclusion, it may be presumed that black student activism indicates positive political socialization among members of race-conscious groups. (Author/JR)

Identifiers—\*King (Martin Luther Jr)

Developed in honor of Dr. Martin Luther King, Jr., this is a short collection of suggested activities to teach black awareness in the elementary and secondary grades through King's philosophy. An introductory biographical sketch of King and an article about his accomplishments are provided. Activities are divided into grade-level ranges for the following areas: exploratory activities, developmental activities, music, dramatic plays, language arts, arithmetic, and culminating activities. An example of a music activity for grades 3-7 is to play recordings of spirituals such as "Go Down Moses" and have pupils interpret the words. An example of a language arts activity for upper grades is to have pupils write original poems around themes of bravery, courage, unity, and brotherhood. Suggestions for evaluation are included. Appendix A contains a list of some of King's speeches and quotations, an excerpt of "I Have a Dream," and parts of his letter from a Birmingham jail in 1963. Appendix B contains the words of some freedom songs. (Author/ND)

Identifiers—\*England

The educational policy of the British Labor Party stresses the provision of quality education regardless of social class background. In a time of downward economic spiral, the Labor Party is committed to education for social justice through the redistribution of resources and research priorities, as well as the reorganization of the educational system. Budget decisions have redistributed funds from elite British universities to the comprehensive secondary schools and vocational col-

leges. Postsecondary reorganization involves efforts to merge the patch quilt of polytechnical schools, colleges of education, and colleges of further education under a single local authority. At the secondary level, comprehensive schools and semiprivate, direct grant schools are being merged to provide a strong alternative to expensive and exclusive private schools. Research and development funds are being shifted from open-ended cultural and scientific support to programmatic research designed to rescue a beleaguered political economy. More money is being infused into trade union projects, workers' economic cooperatives, adult education programs, and vocational training. The belief is that worker incentives are critical to economic productivity and recovery. (Author/DE)

Descriptors—Community Education, Educational Facilities, \*Educational Programs, Educational Research, \*Exhibits, \*Learning Theories, \*Literature Reviews, \*Museums, School Role, Visual Learning

The role of museums in educational programs is described in this study and literature review. It collects, describes, and evaluates the museum's acceptance, use, and impact of psychological learning theories within educational programs. The study reports that most museums can give only a portion of their time, space, and imagination to educational programs. Throughout the literature review, a number of guiding principles point out psychological learning theories which museums use to provide exceptional learning experiences within their own institutions. The guiding principles which museums use include (1) the recognition of relevancy between museum visits and school experiences; (2) the use of visual objects as perceptual materials to reinforce learning; (3) the promotion of activity, discovery, and inquiry as useful techniques in developing and refining discriminatory skills; (4) the acceptance and utilization of organized experiences which facilitate learning and retrieval; and (5) the recognition of the value of stimuli and feedback as part of an exhibit to enable visitors to respond and attend to the exhibit as a learning experience. This guide, designed for teachers and community leaders attempting to answer questions being raised about population and population trends or developing population study programs, contains a selective list of information sources and written audiovisual resource materials. The resource guide is divided into five areas. The first group lists over 40 entries, including private organizations, public agencies, and universities. The second area lists teacher resources, including background and theory materials, curriculum and study guides, reference guides, newsletters and periodicals, and readings. The third area looks at both teacher and student resources, including curriculum and study guides, data, reference guides, and readings. Student resources include all of the above including texts. The final area, audiovisual aids and activities, presents charts, films, and games. Over 125 entries are included in the resource sections. (Author/JR)

 Identifiers—Africa, Latin America

The purpose of this monograph is to present  
 some recent trends on current issues that should  
 be taught in elementary social studies courses. It  
 is designed to provide information for teachers  
 who wish to make their social studies programs  
 more relevant to the times. The topics under con-  
 sideration have been selected because they are  
 relatively new to most elementary programs and  
 include women, law, ethnic studies, international  
 education/global education, American studies,  
 urban problems, environmental problems, Latin  
 America, and Africa. Most of the materials and  
 ideas for this publication are taken from the jour-  
 nals, yearbooks, and bulletins of the National  
 Council for the Social Studies (NCSS). Each sec-  
 tion contains a discussion of the need for study-  
 ing a particular issue, some background informa-  
 tion needed by the teacher to understand recent  
 thinking about the issue, concepts that are signifi-  
 cant in teaching and learning about the topic, and  
 practical activities for children in an elementary  
 school. (Author/DE)

Identifiers—\*International Cooperation

A descriptive overview of international,  
 cooperative research efforts is provided. Transna-  
 tional collaborative research consists of those ac-  
 tivities that bring scholars of different countries  
 together to work on the same or common  
 research problems that cannot be addressed as ef-  
 fectively by an individual nation. This report of-  
 fers a sampling of programs and projects in  
 progress during 1973 and 1974. Topic areas  
 under examination include agriculture, develop-  
 ment, atomic energy, commerce, environment,  
 health, education, space, and the humanities. Six  
 major advantages and six limitations to current  
 transnational collaborative research are listed. To  
 improve further research it is recommended that  
 all interested public and private agencies be in-  
 formed of the potential values of this research;  
 flexibility be provided in programs and budgets to  
 encourage sound proposals; and case studies of  
 allegedly successful and unsuccessful projects be  
 accumulated, analyzed, and shared with the re-  
 levant research community. (Author/DE)

This volume is one of a series intended to pro-  
 vide a comparative view of the education systems  
 of all Organization for Economic Cooperation  
 and Development (OECD) Member countries. It  
 complements an OECD handbook entitled  
 Methods and Statistical Needs for Educational  
 Planning (see ED 023 171). The document is  
 based on the need to establish a conversation key  
 for member countries so that published national  
 data can be readily converted on the basis of a  
 standardized system, as proposed in the hand-  
 book. The purposes are to assist OECD Member  
 countries in the development of their educational  
 statistics and to provide a basis for the collection  
 of internationally comparable statistics on educa-  
 tional systems and programs. In this volume, the  
 educational systems of Australia, Luxembourg,  
 and Switzerland are classified by type of educa-  
 tion or institution: Preprimary, Primary, General  
 Secondary, Technical Secondary, Teacher Train-  
 ing, and Higher Education. The information  
 requirements, qualifications conferred, organiza-  
 tion of studies on a full-time or part-time basis,  
 and other information of possible interest are  
 presented. A glossary of terms used in the OECD  
 classification is provided. (Author/JR)

 Studies, Health Services, Higher Education, In-  
 terdisciplinary Approach, Legal Aid, Legal  
 Problems, Mental Health, \*Program Evalua-  
 tion, \*Research Projects, \*Social Problems,  
 Student Projects

This project is a prototype study which in-  
 vestigates the interaction of graduate students  
 from different disciplinary backgrounds and dif-  
 ferent educational institutions in exploring social  
 and public policy issues related to children. The  
 results and evaluation of the research program  
 are presented in this document. Divided into  
 three teams, the students examined three social  
 issues in relation to child development: (1) legal  
 problems of providing medical care to minors;  
 (2) treatment of children in state mental health  
 facilities; and (3) advocacy and lobbying for chil-  
 dren. Three reports from these student teams fol-  
 low the explanation of the study. The report con-  
 cludes that small and delimited research projects  
 can profitably and successfully be completed by  
 small teams of graduate students provided that  
 the scope of the research is carefully delineated  
 and established in advance, the groups are small  
 and the tasks well structured, and the projects are  
 closely supervised by staff. (Author/JR)

 Teaching Techniques

In this age of ethnic awareness, the United  
 Federation of Teachers has created this publica-  
 tion to help teachers enlighten secondary students  
 on the contributions of Jewish Americans. The  
 book stresses the accomplishment of American  
 Jews in the context of a broader understanding of  
 the nature of ethnicity. Designed to supplement  
 existing social studies curricula, the book can also  
 be used in combination with similar units on  
 other minority groups. Three major areas are ex-  
 amined: (1) Jewish Migration to America; (2)  
 The Development of the Jewish Community in  
 New York; and (3) Jews in the American Labor  
 Movement. Each section contains an introduc-  
 tion, goals of the unit, an illustrated narrative,  
 and study questions and activities. A glossary and  
 a selected bibliography conclude the document.

The "Insights" newsletter, published eight  
 times during the academic year, is intended for  
 elementary teachers interested in open education.  
 The newsletter includes descriptions of actual  
 classroom projects, discussions of teaching  
 techniques, and sources of curriculum and profes-  
 sional materials. This issue treats the topic human  
 relations and contains four articles: Human Re-  
 lations; Grading Children; Four Strategies to En-  
 courage Evaluative Input from Children; Solving  
 Moral Dilemmas; and The Human Development  
 Program—An Affective Education Activity. Dur-  
 ing the Bicentennial year, "Insights" will also  
 carry listings of materials which might be helpful  
 to teachers. (Author/RM)

Descriptors—\*Educational Research, Higher  
 Education, Literature Reviews, Moral Develop-  
 ment, \*Moral Values, \*Research Methodology,  
 \*Teacher Education, \*Values

Included in this document are 11 summaries of  
 studies which update the research in values edu-  
 cation. Many of the studies have been completed  
 in the last few years and are published or soon to  
 be published. The "new" research involves more  
 sophisticated methodology, larger populations,  
 and greater emphasis on values clarification  
 strategies. The research is divided into three sec-  
 tions. Outcomes of values clarification with stu-  
 dents and other target populations comprise the  
 first section. The second section lists research in-  
 volving outcomes of teacher training in values  
 clarification. The third section presents  
 methodological developments aimed primarily at  
 studies which contribute some new management  
 tool or approach for the study of a particular  
 variable related to values clarification.

**Descriptors**—Curriculum Guides, \*Elective Subjects, Humanistic Education, Human Relations, Individual Development, Learning Activities, Motivation, Perception, Personality, \*Psychology, \*Schedule Modules, Secondary Education, Social Influences, \*Social Sciences, Teaching Techniques

The main focus of this secondary-level psychology course is that of enhancing student interest in and understanding of psychological concepts, principles, and hypotheses through exploration of their relationship to current and arresting topics and problems, including problems of individual development and interpersonal relations. The curriculum guide begins with a prerequisite introductory unit. Specific units following the introduction include (1) perception, (2) motivation, (3) learning, (4) thinking, (5) developmental aspects, (6) personality, and (7) social influences. Within each of the major unit topics are several subtopics. The course revolves around a module system of instruction covering one or several lessons. Each module contains the central principle, key terms, instructional objectives, activities, normal-abnormal continuum, evaluation exercises, and references. A bibliography concludes the guide which lists the books referred to in the lessons and activities. (Author/JR)

**Identifiers**—\*Quinmester Program

This curriculum guide provides students with the opportunity to study human behavior, ways in which conflict originates, processes by which it escalates, and the alternative methods of dealing with it. The unit is not intended to be static or permanent in nature but an ongoing educational process that will help students become aware of human needs and how they can try to meet these needs with nonviolent alternatives. Each section may be used independently so that priority concepts can be stressed according to allocated time. In eight chapters, the guide presents activities for defining behavior; identifies basic human psychological needs; provides values clarification activities; defines the causes and effects of functional and dysfunctional behavior; analyzes the philosophy, proponents, and application of non-violence; examines the attitudes and processes for making changes nonviolently; and provides an appendix of suggested audiovisual and printed materials for teacher and student. **Age and Educational Selectivity among Migration and Human Capital Flows in the West.**  
Pub Date 1 May 75

Note—24p.; Paper presented at the Annual Meeting of the Western Social Science Association (17th, Denver, Colorado, May 1-3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Age, Economics, \*Educational Economics, \*Human Capital, Human Resources, \*Migration, Migration Patterns, \*Mobility, Population Distribution, Population Trends, \*Public Education, Social Science Research

**Identifiers**—United States (West)

This paper quantifies and analyzes the total flows of human capital moving in and out of the West over time as a result of interregional migration. Particular emphasis is placed on analyzing the "age-education" interaction effect of migration on flows of human capital. Migration was highly selective of the young and/or highly educated adult. Age, education, race, and sex characteristics of migrants moving in and out of the Western divisions were determined from cen-

sus data. The detailed flows were multiplied by the appropriate value of human capital (discounted earnings approach) and were then summed to determine the effects of age and education on flows of human capital. Results of the study indicate that (1) the "age-education" interaction effect is highly significant; (2) the West experienced a large increase in human capital as a result of the large net in-migration of adults from the Midwest; (3) more recently, this flow has decreased somewhat; (4) the West has been experiencing a large gain in black human capital from both the southern and northern states; and (5) a significant portion of the economic growth in the West appears, consequently, to have been subsidized by other regions, especially the Midwest. These rather large flows of human capital imply that the other regions are underinvesting in education, especially higher education. (Author)

**Descriptors**—Achievement Rating, Comparative Analysis, Curriculum Research, \*Educational Research, English, Grades (Scholastic), High School Students, Learning Motivation, Mathematics, \*Perception, Rural Urban Differences, Secondary Education, Social Influences, \*Social Studies, \*Student Attitudes, Student Evaluation, Success Factors

Students in eight urban and three suburban high schools were asked for their perceptions of social studies, mathematics, and English. Although most students thought that learning all three subjects was important, they believed that learning social studies was less important than learning mathematics and English. The majority thought that their grade in social studies was more important than learning the subject. The students felt that their parents, counselors, and friends supported these views. Fewer than one-third of the urban students were high on measures of articulation between social studies and future occupations. Social studies teachers were generally perceived as little different from other teachers on affective measures and only slightly higher as interested in students as people. Social studies was perceived as being easier than mathematics, a finding which tends to be reflected in students' grades. Problem areas for teachers of social studies are noted, and suggestions for dealing with them are offered. (Author/ND)

**Current Social Issues: The Public's View. Findings from a Series of National Surveys, Spring 1975.**

Institute of Life Insurance, New York, N.Y.

Pub Date 75

Note—28p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Consumer Economics, Family Life, Futures (of Society), \*National Surveys, \*Public Affairs Education, \*Public Opinion, Sex Role, \*Social Attitudes, \*Social Problems, Social Science Research, Statistical Analysis, Surveys

The findings of this national survey of public attitudes are the second in a series of reports reflecting important trends in American society. The survey is one of a number made on behalf of the life insurance business by the Institute of Life Insurance. Data for the survey were collected in personal interviews with 1,500 to 3,000 adults. Scientific procedures were followed to make the samples representative of the United States population 18 years old and over. Findings report the public's view on new attitudes toward the family, changes in traditional sex roles, people's orientation toward the present versus the future, feelings of personal control or lack of control, consumerism, civil rights, birth control, gun control, marijuana legalization, and communal living. The findings are reported in statistical percentage charts, along with brief narratives which analyze and interpret the data. (Author/JR)

**Descriptors**—African History, Civil War (United States), Curriculum Guides, \*Ethnic Groups, Instructional Materials, \*Minority Groups, \*Negroes, Race Relations, Secondary Education, Social Studies, \*Social Studies Units, \*United States History

Prepared for senior high students at Montgomery County Public Schools, Rockville, Maryland, this curriculum guide focuses on the black experience in America, beginning with the roots of African heritage and extending to modern day events. The unit tells the story of the black American from his viewpoint, adding dimension to both American history and black history. The primary purpose of the course is to introduce students to the individuals, forces, and events that make up the experiences of the black people in America. Following an introduction describing the African background, the guide presents sections on the role of the blacks in the New World until Emancipation in 1863, Reconstruction to World War II, and the Black Revolution. Supplementary materials are included throughout the unit of study including a bibliography and listings of film and nonprint resources useful for a course on black studies. (Author/JR)

**Descriptors**—Civil Rights, \*Equal Opportunities (Jobs), Family Life, Family Structure, \*Feminism, Sex Discrimination, \*Sex Role, Sex Stereotypes, Social Attitudes, Sociology, Womens Education, \*Womens Studies, \*Working Women

Recent changes in the social and economic roles of women are examined. These changes affect the lives of the largest single group in the United States and have resulted from a movement aimed not only at increased access to society's resources and power, but also at a redefinition of the identity of American women. Topics reviewed include women in the labor force, entry into male-dominated occupations and professions, competence and criteria, consequences of women's movement on professional and occupational practice, apprenticeship, minority women, women and education, women and money, women and politics, changes in the family structure, fertility, changing living arrangements, pressures on the family, and child care. The emphasis of this report is on economic changes because it is an important area in defining women's equality. Access to occupational opportunities has given women significant leverage in politics, as well as in the home. Their attitudes toward work have stimulated new versions about marriage and family life. **Descriptors**—\*Discovery Learning, Discovery Processes, Educational History, Educational Philosophy, Educational Theories, Elementary Secondary Education, \*Inquiry Training, Learning Processes, \*Learning Theories, Progressive Education, Questioning Techniques, \*Social Studies, \*Teaching Methods

The writings of 33 authors in either curriculum theory or social studies are analyzed to determine whether each author supports structure-discovery views, reflective-inquiry views, or expresses views that tend to reflect both positions or neither position regarding the new approaches to teaching social studies. The structure-discovery method is designed to teach substantive concepts and

procedures from the knowledge structure of a specific discipline. Students, through problem solving, hypothesis testing, or some other involvement, determine the concepts or generalizations for themselves. The reflective-inquiry method is designed to develop each student's ability to make decisions about personal and societal problems. The "content" to be studied is not predetermined but is comprised of data needed to investigate the problem and make decisions about it. Reflective-inquiry emphasizes student values analysis, reflection, and classification in order to make a decision on a specific societal problem. Thirteen writers in the sample favor the structure-discovery approach; twelve favor the reflective-inquiry approach; while eight are inconsistent between the two approaches. Although some of the authors' views may have changed since completion of the study in 1971 and more materials have been recently written, the descriptions of positions can help teachers to conceptualize social studies teaching alternatives. The Community as Textbook. Fastback 64.

Phi Delta Kappa, Bloomington, Ind.

Pub Date 75

Note—32p.

Available from—Phi Delta Kappa Educational Foundation, 8th and Union, Box 789, Bloomington, Indiana 47401 (\$0.50 per copy, any 8 titles \$4.00)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Adult Education, Class Activities, Community Cooperation, Community Programs, Community Recreation Programs, \*Community Resources, \*Continuous Learning, Educational Alternatives, Educational Innovation, Elementary Secondary Education, Field Experience Programs, \*School Community Programs, \*School Community Relationship. Suggestions on how community resources can be organized and made available for both formal education activities and residents of a community are provided. Six categories of community resource learning experiences are examined, consisting of study strips, resource persons, community services, community resource maps, community surveys, and camping (outdoor education). Each activity is nonbook in character and usually takes place outside of the formal classroom situation. Most effective use of these resources requires advanced planning and a formalized use sequence including selection of the resource, preliminary arrangements, teacher-student planning and preparation, student experience with the resource, checking and follow-up, and evaluation. Full and proper use of community resources depends upon adequate administrative support. Funds should be allocated for the production, periodic updating, and distribution of community resource directories. Not only students but also community residents with leisure time can take advantage of these local resources to continue their education. The author suggests that all agencies in a community cooperate in publicizing their resources and helping people to explore them. (Author/DE)

The author provides 79 short maxims on the nature of contemporary education. An aphorism is defined as a short pithy statement of truth as perceived by the author. As an introduction, 12 characteristics of aphorisms, a short historical survey of aphorisms, and examples by well-known writers are provided. Aphorisms, usually brief, may use words interestingly, may capture penetrating perceptions in a down-to-earth

manner, and are often biographical inspirational, cynical, depressing, upsetting, tragic, humorous, hortatory, and inconsistent. Frequently aphorisms may confuse a situation more than clarify it and may be void of meaning. (Author/DE)

Identifiers—Autogenic Therapy, \*Biofeedback, Bulgarian Suggestopedia, Hypnedia, Transcendental Meditation, Yoga

This booklet cites evidence indicating that intelligence can be trained, given a physiologically normal student and an intensely persistent tutor. Methodologies for increasing mental efficiency have in common the principle of coordination of physical and mental processes, whether achieved by simple relaxation training, brain polarization, or biofeedback. Successful evidence and short descriptions of the processes are provided for transcendental meditation, yoga, hypnedia, Bulgarian suggestopedia, autogenic therapy, progressive relaxation, and biofeedback. Current applications of biofeedback, descriptions of biofeedback instruments, and suggestions for a hypothetical biofeedback learning center using relatively inexpensive biofeedback equipment are provided. Also included are a source and price list of biofeedback instruments and a list of recommended reading. (Author/DE)

Social System of River City High School Senior

Class: Socio-economic Status (SES).

Pub Date [75]

Note—12p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Curricular Activities, Grades (Scholastic), \*High School Students, Peer Groups, Secondary Education, Sex Differences, \*Social Behavior, \*Social Science Research, Social Sciences, Social Structure, \*Social Systems, Socioeconomic Background, Socioeconomic Influences, \*Socioeconomic Status

The goal of this study was to investigate the relationship between an adolescent's socioeconomic status (SES) and selected variables of the sub-subsystems of the River City High School senior class social system during the 1974-75 academic year. Variables for study were selected from each of the three sub-subsystems of the senior class social system: grade point average of the subjects was selected from the formal sub-subsystem; amount of cocurricular activities participated in by the subjects was selected from the semiformal sub-subsystem; such family and community characteristics as sex, SES, and residence (town or farm) of the best friend of the subjects were selected from the informal sub-subsystem. Although more variables showed significant correlations with SES for girls than for boys, the boys showed higher correlations on those variables that did reach significance. It was concluded that the social behavior of adolescents in the sub-subsystems of the River City High School senior class social system appears to be related functionally to the positions their families occupy in the social structure of the community. Interests of Upper Elementary Students in Human Geography and Their Perceptions of Effective Learning Environments.

Pub Date 2 May 75

Note—15p.; Paper presented at Annual Conference of the Rocky Mountain Social Science Association (17th, Denver, Colorado, May 1-3, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Cognitive Ability, Ecology, Educational Environment, \*Educational Research, Elementary Education, Field Trips, Geography, \*Geography Instruction, \*Human Geography, \*Inquiry Training, Perception, Social Sciences, Social Studies, \*Student Interests

Students' interests are assessed in human geography and in the man-land orientation (how people have adjusted and adapted their environment). The major problems investigated are to determine which areas of human geography are of most interest to upper elementary students, and to assess the perceptions of these students regarding the best place to learn about those areas of interest. The test sample was composed of 30 students each from fourth, fifth, and sixth grades of a lower middle income, urban elementary school. A questionnaire consisting of 32 inquiry questions derived from "Focus on Man: Social Studies for Utah Schools," a prospectus published by the Utah State Board of Education, was used because it is inquiry oriented, focuses on the human aspects of geography, and is the basic reference for social studies in Utah elementary schools. It was concluded that the man-land approach is appropriate for geographic inquiry in the upper elementary school grades. Recommendations for teaching the man-land approach to geography for upper elementary students are given. (Author/ND)

Teaching About the Law.

Pub Date 75

Note—354p.

Available from—The W. H. Anderson Company, 646 Main Street, Cincinnati, Ohio 45201 (\$9.95)

Document Not Available from EDRS

Descriptors—Audiovisual Aids, Case Studies, Community Resources, \*Curriculum Development, Elementary Secondary Education, Evaluation, Instructional Innovation, Instructional Materials, \*Law Instruction, Laws, Learning Activities, Projects, \*Resource Guides, Simulation, \*Social Studies, Teacher Education, \*Teaching Techniques, Values. Identifiers—Legal Education

The practitioner-oriented book provides objectives and goals, learning activities, resources, teaching techniques, and other sources helpful for K-12 teachers developing, planning, and implementing law education programs in the social studies classroom. The first chapter examines the role of the law and society, goals for instruction, and law for the layman. The second chapter defines good citizenship as a primary concern in law education and compares the traditional citizen courses to the new direction. A variety of selected curriculum materials for law studies are described in the third chapter, followed by a presentation of audiovisual resources in the fourth chapter. Community resources which may be used by teachers to enrich law studies are incorporated into chapter five. Legal reference materials are discussed in chapter six. Chapters one through ten focus on the following teaching strategies: the case study approach; value clarification strategies; simulation, role playing, and gaming; and evaluation strategies. In the eleventh chapter, ways to incorporate a law program into the school curriculum are examined. The last chapter describes models for training and development of qualified law studies instructors. (Author/JR)

Descriptors—Academic Achievement, \*Birth Rate, \*Demography, \*Education, Educational Opportunities, Family Management, \*Family Planning, Marriage, National Surveys, Parental Aspiration, Parent Education, Population Trends, \*Social Science Research, Socioeconomic Influences

This report summarizes the most important findings in a study designed to investigate the linkages between education and fertility in the

United States. The data base for this investigation is the National Longitudinal Survey (NLS) of women aged 30 through 44 by the Bureau of Census. The basic hypothesis is that education will affect fertility and that fertility and marriage decisions will affect educational choice. Results indicate that a woman marrying and having her first child at age 16 will complete 3.5 fewer years education than a woman who never marries. Educational choice is significantly affected by the individual's socioeconomic status—as reflected in parents' education and occupation—and by attitudes towards housework and child care activities. The total cost of children, both explicit and implicit, varies not only with family size, but also with the timing of family formation. It is apparent that if child births are delayed until the mother has completed her formal education, then the foregone education costs of fertility will be minimal. (Author/DE)

Descriptors—\*College Curriculum, Educational Programs, Field Experience Programs, Higher Education, \*Internship Programs, Learning Experience, \*Political Science, Practicums, Program Design, \*Program Development, Program Evaluation, Teaching Methods

The purpose of this paper is to assist interested faculty members in designing, developing, and evaluating political internships so as to produce the best learning experience possible. Political internship is a program developed to teach college students about politics and government by exposing them to a "real world" political experience. It can also assist future graduates in developing contacts and references useful in the job market. Three issues that are addressed include (1) the concept of political internship, (2) the role that internship plays in a contemporary political science curriculum, and (3) some of the important questions that should be raised in developing or evaluating internship programs. Recommendations are given for dealing with these concerns. Emphasized is recognition that the internship program complement and enhance the classroom experience rather than merely be a job training program. (Author/ND)

Descriptors—\*Anthropology, \*Cross Cultural Studies, \*Cultural Awareness, Cultural Context, Cultural Differences, Culture, \*Global Approach, Grade 9, Inquiry Training, Secondary Education, Social Studies, \*Social Studies Units, Teaching Guides, World History

The purpose of this teaching guide on anthropology for ninth-grade students is to provide them with an opportunity to study perception, disparate societies, and the similarities and dissimilarities that exist among societies. The content material is world history used to illustrate general historical problems and processes and approached from the viewpoint of cultural anthropology. As a course of study, the guide proposes an inquiry-conceptual approach to the investigation of significant topics. It develops modes and processes of inquiry along with concepts that are useful in reflectively studying issues in the closed areas of culture. Nine units comprise the instructional episodes of this guide: Perception: To Understand Is to Invent; Origins of Humanness; Emergence of Complex Societies; Rise and Transformation of Civilization as a Model of Cultural Change; Medieval Civilizations: Europe, Islam, and Africa; Rise of the West; The Industrial Revolution as a Strategy of Adaptation; Conflict and Consensus in Complex Societies; and Impact of Complex Societies on Traditional Ones. Each unit is one- to five-weeks long. (Author/ND)

**Response of Church Related Adults to the Film, "Parable."**

Pub Date 75

Note—13p.; Paper presented at the International Convention of the Religious Education Association (Philadelphia, Pennsylvania, November 23-26, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—Adults, Affective Tests, Allegory, Beliefs, Christianity, \*Emotional Response, \*Films, Post Testing, Religion, \*Religious Education, Religious Factors, \*Social Science Research

The purpose of this study was to investigate response to the film, "Parable," a 20-minute color film which depicts a clown in a circus setting and which has no dialog but evokes strong emotional/affective reactions. Postviewing reactions to the film by 141 adults from age 20 to 70 of United Methodist churches in southern Indiana were researched. Although the film is more frequently shown to youth, adults were queried because it was felt that adult theological belief systems are more fully developed. The study attempts to describe their reactions and relate the reactions to patterns of theological belief. Theological belief was measured by having participants complete Lee's (1965) Religious Belief Inventory before they watched the film. Emotional/affective reactions were measured by (1) previewing and postviewing completion of Buros' Multiple Affect Adjective Check List (1972), and (2) postfilm semantic differential responses to 11 film-related stimuli. Despite the film being subject to various interpretations, it was concluded that most people who are conversant with the Christian tradition see the film as an obvious allegory in which the clown represents Jesus Christ and the circus represents the world. (The film "Parable" is available from the Council of Churches of the City of New York, 475 Riverside Drive, Suite 456, New York, N. Y. 10027.) (Author/ND)

Identifiers—\*Environmental Education Project, ESEA Title III

Human population growth and the implications of increasing population on the well-being of men and nations is examined in this twelfth grade curriculum guide which is part of a series for grades 4 through 12. The primary functions of the unit are to introduce the student to reasons for population growth, results of overextended populations, and solutions to overpopulation. Consideration is also given to political and sociological problems which arise as adjuncts to the question of population. The component parts of this guide are: an overview of the unit, the major concepts in the unit, behavioral objectives, daily schedule, lesson plans for classroom activities, a pretest for the unit, and student and teacher evaluation forms. The unit requires three weeks to complete, and is structured around 15 student-centered activities which include films, survey questionnaires, filmstrips, student readings, discussion activities, data analysis, and role playing. Trends in secondary-level behavioral science curriculum development, informational background, and strategies for teaching behavioral science concepts are provided in this book. Chapters one through three define the behavioral sciences and examine their changing role and status in social studies education. Chapters four through six develop instructional strategies that teach significant behavioral science themes in the secondary social studies. At the conclusion of each major theme, there is a set of assumptions for student inquiry which have been developed to aid teachers in motivating reflective inquiry in their classroom discussion of these topics. Each assumption is designed to promote critical analysis through data gathering and interpretation. The behavioral science themes under examination include futuristics, birth control and family planning, genetic manipulation, euthanasia, environmental pollution, nourishment, psychological trauma, alcohol and drug abuse, sex, murder, suicide, alienation, divorce, juvenile delinquency, prison reform, and mental illness. Descriptors—Birth Rate, Census Figures, \*Demography, \*Futures (of Society), National Demography, \*Negro Population Trends, \*Population Growth, \*Population Trends, Racial Composition, Social Science Research, Statistical Studies

This report presents population projections of the United States by age, sex, and the components of population changes, births, deaths, and net immigration. These projections are shown annually by race—white and black—from 1975 to 2000 and in less detail for the total population from 2000 to 2050. In 1974, the population of the United States, including Armed Forces overseas, was about 212 million and had increased by 0.7 percent during the preceding year. While the total population has increased throughout American history, the rate of growth has undergone a long-term decline with the only major interruption being due to the baby boom following World War II. Projecting for three different fertility rates, the report suggests that the population will continue to grow throughout the remainder of the twentieth century at rates which could fall below the current low rate and which are unlikely to reach the relatively high rate of the 1950s. The black population is projected to grow at a higher rate than the white population because it has a younger age structure and higher fertility rates. (Author/DE)

This volume contains a selection of 43 papers submitted in advance to the World Future Society's Second General Assembly. Papers were selected for their general interest and relevance to the theme of the meeting—a look at the prospects for mankind during the final quarter of the 20th century. Authors include Roy Amara, Lester Brown, Jay W. Forrester, Willis Harman, Herman Kahn, John Platt, Robert Theobald, and others. Articles present and examine new dimensions of the future and problems that the world is facing; goals for the global society; the world community and its future; problems and possible consequences of politics, democracy, and economic alternatives; social inventions, women as futurists, and futures studies; intimate relationships, sex, and the future; the future of art and design; criminal justice and the law, and its relation to the future; and forecasting and possible new policies. **Identifiers**—India

One of several World Affairs Guides, this booklet focuses on India as a region to be included in any K-12 social studies curriculum plan. It is felt that modern students in the United States should know a great deal about other significant areas of the world. India is thought to be significant because of its rich history, cultural contributions, regional political influence, large population, potential power, and comparative value as a case study of development. The following sections are contained in the guide: The Importance of Studying India, Some Difficulties in Teaching About India, Background and Ideas to Stress, Curriculum Proposals and Methods, Resources for Studying India, and Addresses of Organizations and Publishers. Other guides on China, Japan, the USSR, and Africa cover the same or similar topics and follow the same format. The documents are available from the Teachers College Press. (Author/ND)

With upcoming global realities of interdependence in mind, this report attempts to usefully inform citizens, educators, and policy makers about worldwide educational issues. The result of a colloquy among representatives of a wide variety of educational interests and federal agency interests, the report provides recommendations for ways that colleges and universities might become more useful catalysts and partners. Recommendations include suggested actions by the federal government, state governments, educational institutions, and private foundations. Chapter one discusses the global setting, chapter two points to the national (U.S.) need for public understanding, and chapter three presents the national need for expert knowledge. Appendices relate specific occurrences and activities to the needs for understanding and knowledge. (Author/ND)

**Sex Differences in Social Behavior.**

Pub Date Apr 75

Note—9p.; Paper presented at the Midwest Regional Women's Studies Conference (Bloomington, Indiana, April 4-6, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Biological Influences, \*Child Development, Cultural Factors, Developmental Psychology, Nature Nurture Controversy, \*Sex Differences, Sex Discrimination, \*Sex Role,

\*Sex Stereotypes, Social Behavior, Social Influences, Socialization, Social Psychology, Social Science Research, Sociology, \*Womens Studies

Examining theories from a wide spectrum of disciplines, this paper categorizes research on sex differences in social behavior into four groups and examines the implications of each. The first category of research interprets sex differences as the result of anatomical differences which later affect psychological roles. The implication of this category is that sex differences are difficult if not impossible to change. The second category interprets sex differences as the result of group roles which an individual culture assigns to the different sexes. The implication of this category is that sex differences are minor and subject to change once a culture changes. The third category interprets sex differences as a process where the child develops gender identity as a part of a natural tendency to organize observations of the physical world. The fourth category interprets sex differences as the result of behavior reinforcement by parents and society. The implication of the last two categories is that sex differences can vary according to degree of sexism within a society. (Author/DE)

**A Study of the Relationship between Selected Non-music Major Eastern Kentucky University Students' High School Musical-Athletic Backgrounds and their Knowledge, Preferences, and Opinions of the Eastern Kentucky University Marching Band.**

Pub Date Feb 73

Note—70p.; Paper presented at the Annual Meeting of the Kentucky Music Educators Association (Owensboro, Kentucky, February 1973)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—\*Athletics, \*Bands (Music), College Students, Educational Research, Higher Education, Music, \*Music Activities, \*Music Appreciation, Music Techniques, Questionnaires, \*Student Attitudes

**Identifiers**—Eastern Kentucky University, Half-time Shows, Marching Bands

This study measures the knowledge, preferences, and opinions of Eastern Kentucky University football fans about their marching band and relates high school musical and/or athletic experience to those preferences. Data was obtained from a questionnaire distributed to a sample of the student body. The results indicate that people with musical backgrounds felt that the halftime show was more important than people with athletic backgrounds. People with musical and/or athletic backgrounds through that marching style was more important than musical style. Most people preferred precision drill to pageantry shows; popular music, jazz, and Broadway show tunes to marches, rock, and serious music; and felt that majorettes and flag carriers added to a halftime show, but did not claim to watch the flag routines. **Identifiers**—Interdependence

Designed for use in a secondary or undergraduate level course on global development, this case study examines the current crisis in the world food supply. The study is divided into three main parts, each dealing with a key question of world food supply: (1) What Is Hunger? (2) Why Is There Hunger? (3) What Is Being Done? Section 1 defines hunger in terms of nutrition, humanity, and development, providing a brief history of the food shortage. Section 2 analyzes the factors responsible for the present condition of the world food supply including the role of nature, the role of agricultural production, and the

role of government policy. Section 3 discusses research and relief programs and the United Nations World Food Conference. Also included in the study is an instruction guide which suggests techniques and resources giving greater depth of understanding to the issues. The guide contains a discussion of key teaching strategies, tips on methodology, suggestions on topics and questions for classroom discussion, and information on resource materials and organizations. The conference report of the Global Studies Workshop held in Amherst, Massachusetts, May 16-17, 1975 is presented. The workshop provided a meeting place for educators from both the secondary and college levels to share concerns, ideas, and techniques in the teaching of global studies. Two key questions were addressed throughout the workshop concerned with the goals of a global studies course and the issues, concepts, and problems which such a course should address. Four goals for global studies were identified along with recommendations and suggestions for further action. A short narrative is presented on the Amherst interpretations of the sessions, based on the group meetings. The document concludes with a selected list of references, curricula, films, and other resources useful in teaching global studies. A list of conference participants is included in the document. Identifiers—\*White Flight

The impact of school desegregation policy on community voting patterns and white flight in northern school districts is analyzed. Both voting behavior and white flight are considered two indicators of the success of school desegregation in achieving community social integration. School board elections, school tax referenda voting trends, and school racial composition data in the northern school districts over a 10-year period are examined. The results indicate that school desegregation increases voter turnout and dissent voting. While the increase in school board election turnout appears to be fairly permanent, the increase in dissent voting is only temporary. Therefore, in many communities school desegregation has more socially integrative characteristics than disintegrative with regard to voting behavior. In 86 northern school districts, school desegregation has little or no effect on white flight, as measured by the change in percentage of white students enrolled in public schools. Even in the two high desegregating school districts, white flight is minimal and temporary. While one cannot conclude that school

desegregation has increased social integration by the third year after a major desegregation plan, the opposite conclusion is not warranted either. (Author/DE)

Descriptors—\*Computer Assisted Instruction, Computer Oriented Programs, \*Demography, Educational Innovation, Futures (of Society), Global Approach, Higher Education, Instructional Media, \*Population Education, Population Growth, Population Trends, Secondary Education, \*Teaching Techniques, World Affairs, \*World Problems

Available on the University of Illinois PLATO IV Computer system, the Population Dynamic Group computer-aided instruction program for teaching population dynamics is described and explained. The computer-generated visual graphics enable fast and intuitive understanding of the dynamics of population and of the concepts and data of population. The basic program is a population projection model which can forecast the population of over 120 countries, based on either constant or changing 1970 demographic parameter assumptions. Basic data are 1970 total population, age composition categorized into 18 five-year intervals, period age specific fertility rates, and a cohort specific mortality rate schedule. Other programs in the series contribute additional parameters including economic development, educational development, food demand and supply, energy demand, labor force analysis, migration and urbanization, population history, and birth control use. These materials explain how to use the system; provide information on concepts, definition, and the program algorithms; and provide suggestions for the practical applications of the program. Identifiers—China, Indonesia, Islamic Countries

Six articles provide an overview of the problems of early marriage and/or adolescent pregnancy in both developed and developing nations. The first article reveals that social factors outweigh the biological in the reproduction process and reports that each year over 15 million babies are born to girls under 20, who become mothers too soon to achieve their full potential as educated active citizens and too soon to provide optimal care and support for their babies. The second article examines early marriage and pregnancy in traditional Islamic society. An expert on Chinese population policies, in the third article highlights the priority which the Chinese have given to raising the marriage age to increase female participation in national development and to reduce population. Sex and reproduction, which are constantly rising, among American teenage women are examined in the fourth article. The fifth article presents the problems of teenage pregnancies as high risks for infants. Marriage law reform in Indonesia is examined in the sixth article with respect to the struggle for equal rights for women. The last article presents the biological aspects of teenage pregnancy. Also included in the report are memorial tributes to William Draper by leaders in the international population field. (Author/JR)

Identifiers—Senesh (Lawrence), \*South Dakota

Endeavoring to reach a goal of economic literacy, this K-12 economic resource guide provides the teacher with a context, concepts, and content about the economics of American society and the study of economics in general. Its purpose is to shorten the amount of work and time that a teacher needs to spend on reading and locating material. Based upon Lawrence Senesh's conceptual framework, this resource guide presents eight economic units: Man and His Environment; Socialization of Man; Economic Society: A Social Institution; Economic System or Market; Consumption Function and the Product Market; The Production Function and the Factor Market; Modifications of the Market Mechanism; and Measuring and Determining the Performance of the Economic System: Growth and Stability. Each unit includes a description of the context, a list of economic concepts related to the topic, and detailed outlines of the content areas. Short histories of money and banking in appendices conclude the guide. (This guide is part of a series, SO 008 676 through SO 008 680.) (Author/ND)

Identifiers—\*Ecuador

This document summarizes the experiences and results of four years (1972-1975) of work in non-formal education in Ecuador. The project grew out of informal discussions in 1970 between several members of the Center for International Education at the University of Massachusetts and a group of Ecuadoreans and Americans in the USAID mission in Quito. These discussions led to the realization that both groups were dissatisfied with the focus on the formal educational system as the major vehicle for human development. The project is a series of subprojects linked together by a common staff and a corresponding similarity of basic philosophy concerning goals, staffing, and processes. Throughout the project are two general programmatic thrusts: creating and testing an approach to working with village facilitators, and adapting materials and methods to be used by the adult education staff of the Ministry of Education. Two objectives of the project were to create or redefine methodologies and processes within which might be produced a learning-growth relationship and to demonstrate

that these processes are valid as instruments for social change. Emphasis was on generating processes that foster the phenomenon of transformation rather than pure modernization. The document proceeds generally from a discussion of the conceptual framework and the philosophy toward a discussion of the more specific techniques and materials used, such as gaming and radio. Endo, Russell

**Multicultural Education and Asian Americans.**

Pub Date Oct 75

Note—26p.; Paper presented at the Annual Meeting of the Western Association of Asian Studies (Boulder, Colorado, 1975)

Available from—Russell Endo, Department of Sociology, University of Colorado, Boulder, Colorado 80302 (free)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Annotated Bibliographies, \*Asian Americans, Asian History, \*Asian Studies, Cultural Awareness, Cultural Education, Curriculum Development, Educational Resources, Elementary Secondary Education, \*Ethnic Stereotypes, \*Ethnic Studies, Instructional Materials, \*Minority Groups, Resource Guides, Social Studies, Stereotypes

Areas for reform in teaching Asian culture are discussed, and resources and bibliographies for existing curriculum are presented. The paper emphasizes that materials on Asian Americans need to be incorporated into school curricula to (a) counter existing inaccurate or derogatory prejudices or behaviors; (b) counter the inaccurate, incomplete, and stereotypical materials currently in school curricula; and (c) begin to remedy the general absence of materials and present accurate and balanced information on Asian-American history, culture, and contributions. The major portion of the paper provides a list of resource persons and organizations for Asian-American curriculum materials; resources for teaching, such as teaching guides, bibliographies, books, and audiovisuals; and a compilation of children's books in annotated form including grade level, author, and publisher. Descriptors—\*Census Figures, \*Demography, \*National Demography, National Surveys, Occupational Mobility, Population Distribution, \*Population Trends, Program Improvement, Residential Patterns, Social Characteristics, Social Factors, Sociocultural Patterns, \*Statistical Analysis, Subculture

An introduction to the methodological problems posed by underenumeration in the Census of Population and the extensive efforts and recommendations to solve these problems are provided. The efforts reported in this study center around five interrelated tasks: (1) a review of the state of knowledge about social conditions and attitudes that bear on the ability of government agencies to collect complete and accurate information from all elements of the population; (2) advice on research and experimental efforts leading to a better understanding of the reasons for incomplete coverage in the census; (3) recommendations of measures and procedures that will reduce or mitigate current deficiencies in coverage; (4) consideration of how the social costs associated with underenumeration might best be estimated along with the social benefits that might accrue from increased coverage; and (5) design of a continuing research program directed toward the reduction of underenumeration. The purpose of the document is to promote the exchange of information and the coordination and cooperation of activities in the field of educational research in Europe. This document is the third in a series of surveys, presenting information for September 1970 through September 1972. One-hundred and sixty-three research projects from 63 institutions, organizations, and individuals are reported in the document. Each listing includes the complete title, names of the researchers, status of the project, bibliographic references, background and aims of the research, subdivisions of the research, methods, size, starting date, total costs, and sources of finances. If the research is complete, main findings and implications as well as other information are reported. (Author/JR)

Identifiers—MACOS, Man A Course of Study, \*National Science Foundation

This report is a study of the science curriculum implementation policy of the National Science Foundation (NSF) with particular reference to "Man: A Course of Study" (MACOS). It includes the majority opinion of the ad hoc research group conducting the study and the minority opinion of one dissenting member. The majority views recommend that NSF continue precollege science curriculum activities, with the following changes: NSF and Congress responsibility for quality and content of curricula funded by NSF; creation of an ongoing needs assessment program to guide curriculum activities; addition of representative parents to curriculum reviewing and evaluating groups, especially for social science curriculum; complete and clearer policies in all NSF curriculum efforts; formal adoption of acknowledgment and disclaimer statements; and clear Congressional policy on royalty income and disposition. Regarding MACOS, the group recommends early phaseout and termination of MACOS implementation activities, renegotiation of publishing and royalty agreements, inclusion of acknowledgment and disclaimer clauses, insertion of cautionary statements to teachers, and encouragement of arranging parent previewing sessions and making the course optional. The minority view is that Congress should require NSF to discontinue its support of all course curriculum and development. (Author/ND)

Descriptors—Anthropology, Community Attitudes, \*Curriculum Development, \*Curriculum Evaluation, Curriculum Problems, Elementary Secondary Education, Evaluation Needs, Income, Moral Issues, Nature Nurture Controversy, \*Policy Formation, \*Program Administration, \*Projects, Social Sciences, Social Studies

Identifiers—MACOS, Man A Course of Study, \*National Science Foundation

In this report the Comptroller General of the General Accounting Office (GAO) examines National Science Foundation (NSF) policies, procedures, and practices for developing, evaluating, and implementing precollege science education projects and their specific applications to "Man: A Course of Study" (MACOS). The topics investigated in depth and reported on are development, evaluation, and implementation of MACOS, including the obtaining of a commercial publisher for MACOS and the Education Development Center's (EDC) administration of royalty income. A number of recommendations are made to insure that NSF officials and recipients of its funds follow sound business practices in administering science education projects. A major point is that the U.S. Congress may wish to tighten project administrative controls by requiring NSF to report on income produced from science education projects which it authorizes its grantees and contractors to use. The Congress could then consider such income when reviewing NSF appropriation requests. (Author/ND)

Identifiers—\*Geography Curriculum Project

The third in a series of geography bibliographies published by the Geography Curriculum Project, this bibliography provides an overview of work in the field of geographic education and research according to particular areas of interest from 1965 through July 1975. Three main sources were searched for entries: ERIC Data Base, "Dissertation Abstracts International," and the "Education Index." The chapters include: (1) history and philosophy; (2) curriculum—concepts, disciplines, structure, and urban geography; (3) method—inquiry, models, field work, games and simulation, maps, and media; (4) materials—analyses of texts, visuals, and geography projects; (5) evaluation—course, achievement, and awareness evaluation; and (6) teacher training—institutes, elementary, secondary, and college. Each entry contains the title, author, journal, pages, volume, and date. An author index concludes the document. (Author/JR)

Educational Model for Social Service Administration and Management. Summary Progress Report.

Oregon Univ., Eugene. Lila Acheson Wallace School of Community Service and Public Affairs.

Spons Agency—Social and Rehabilitation Service (DHEW), Washington, D.C.

Pub Date Sep 75

Note—82p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Administrator Education, Educational Innovation, Higher Education, Management Development, \*Management Education, \*Professional Continuing Education, Public Administration Education, Short Courses, Social Agencies, \*Social Services, Social Welfare, Social Work, \*Social Workers

This paper constitutes a summary progress report on a short-term training course designed to provide social work bachelor's degree practitioners with the knowledge and skills necessary for administrative and managerial positions. Increasingly, social work graduates have reported moving into social service administration and managerial positions without these skills. A survey, which gathered information from graduates over a three-year period, indicated a need for competence in the areas of middle management, organization, planning, financial management, personnel administration, program development, and evaluation. The intensive three-day training course was interdisciplinary in nature and designed to provide managerial skills that could be immediately useful to the participants on their jobs. Student evaluations of the course were positive which in turn has led to the incorporation of a similar course into the undergraduate academic curriculum. (Author/DE)

Note—11p.; Paper presented at the Midwest Regional Women's Studies Conference (Bloomington, Indiana, April 4-6, 1975)

Available from—Institute for Child Study, 10th and Bypass 46, Bloomington, Indiana 47401 (single copies free)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Child Development, Childhood Attitudes, \*Cognitive Development, Elementary Education, Imitation, Role Conflict, Sex Discrimination, \*Sex Role, \*Sex Stereotypes, Social Behavior, Social Development, \*Socialization, Social Science Research

Sex role development in children is based on the processes of social learning and cognitive development. According to social learning theory, the development and emergence of sex-typed behaviors and attitudes can be described by the same learning principles used to account for any other aspect of social behavior, generally principles related to reinforcement and imitation. The cognitive developmental approach adds that an important factor in sex role development is children's awareness of their own sex and their understanding that gender is a basically constant physical attribute. This research is about the effects of sex and vicarious reinforcement on imitation in first-grade children. The results indicate that children in pleasant settings observing non-sex-typed tasks with vicarious verbal reinforcement tend to imitate same-sex models. In threatening settings with vicarious verbal punishments between a male controller and a female model, children do not imitate the female since the male has ruled that she was wrong in the task. Further research under progress by the author is about the effect on children's attitudes of reversing the role in sex-stereotyped occupations in children's literature. (Author/DE)

Identifiers—\*Scotland

Over 35 educational research projects in Scotland are briefly described in this survey report which is an update of the research projects being performed in Scotland during 1970-72. A variety of research projects in general subject areas such as the teaching of reading, science, and English and foreign language are described. Other research projects examine such areas as assessment, handicapped, higher education, and vocational education. Among projects, there is very little overlap in areas researched. Two projects which illustrate the wide range of investigations are "A Logical Analysis of the Role of Hostel

Wardens" and "Courses for Craftsmen." Each project description is presented in outline format and includes: project name; organization or sponsoring institution; principal research; aim and objectives; methods of research; number of workers; time schedule; and financial source. A list of principal researchers, organizations, and descriptions concludes the document. (JR)

**African Socialism and Educational Practice. Draft.**  
Pub Date Sep 75

Note—83p.; Paper prepared for the Education Division of the Commonwealth Secretariat (London, England); Not available in hard copy due to marginal legibility of original document  
EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—African Culture, African History, Change Strategies, Colonialism, \*Comparative Education, Educational Administration, \*Educational Change, \*Educational Development, Educational Innovation, Educational Philosophy, \*Political Influences, Relevance (Education), Secondary Education, \*Socialism  
Identifiers—Africa, \*Zambia

The relationship between the secondary education system and wider political, economic, and sociocultural developments in Africa is examined. Special emphasis is given to the problems of political ideology and education in Zambia; but as Zambian socialist ideology and educational history show similarities to other African nations, the author's interpretations may be applied to other areas. Discussion focuses on the processes of ongoing decolonization in Africa's education systems by a movement from an oppressive, authoritarian system introduced by former colonial powers to a system emphasizing freedom and self-reliance. Chapter 1 analyzes the philosophy of educational innovation from the perspective of the teacher and from African socialism. Chapter 2 outlines key areas of change in order to make Zambian socialism work throughout the educational system. Chapter 3 examines the current neocolonial system of school management and provides a strategy for innovation in light of socialist objectives. Chapter 4 remarks on how the processes and conditions for the democratization of school management in general equally apply to the subsystem of classroom management. Chapter 5 provides a strategy for revising extracurricular activities to meet socialist goals. (Author/DE)

**Behavioral Implications of Ethnic Categories Among Northern Nigerian Schoolchildren.**  
Pub Date [74]

Note—53p.; Not available in hard copy due to marginal legibility of original document

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Anthropology, \*Behavior Patterns, Behavior Theories, \*Cognitive Processes, \*Ethnic Groups, Ethnic Relations, Ethnic Status, Ethnic Stereotypes, Ethnic Studies, \*Identification (Psychological), Role Perception, Social Science Research, Social Sciences, Socioeconomic Status

Identifiers—\*Nigeria

The major objective of this work is to test the heuristic value of the combination of certain aspects of cognitive theory and aspects stressing the social nature of ethnic groups and their boundary maintenance functions. The first section of the paper is a discussion of the cognitive theoretical approaches to anthropology of Goffman, Barth, Le Vine, and Goodenough that are combined and applied in this research. An extensive analysis of a case study follows that provides data on ethnic stereotyping and the cognitive dimensions of behavior. Questionnaires with open-ended responses were given to 121 children in grades 6 and 7 and secondary school in an ethnically heterogeneous area—Youri Division, Northwestern State, Nigeria. Their responses showed that ethnic groups are stereotypically ranked, reflecting well-understood rules for socioeconomic positions and rights, duties, and privileges of each ethnic group. The study concluded that members of an ethnic group see themselves as people who have access to a number of culturally defined social identities, the possession of which entitles them to certain rights and duties in interaction with members of other

groups. The last section investigates the usefulness of the combination of cognitive and behavioral approaches and suggests some implications for further theoretical development and research. Data obtained from the study are included as tables in the paper. (Author/ND)

Descriptors—Class Management, \*Classroom Observation Techniques, \*Classroom Techniques, Disadvantaged Youth, Elementary Education, \*Evaluation, Factor Analysis, \*Measurement, Student Development, Student Teacher Relationship, \*Teacher Behavior, Testing  
Identifiers—Florida, \*Project Follow Through

This report presents a portion of the evaluation of the planned variation of Project Follow Through, in which increased understanding of education which is functional for disadvantaged children has been a major concern. This segment of the evaluation has the following two objectives: (1) to describe in behavioral terms the differences among programs as observed in classrooms, and (2) to relate these dimensions to pupil growth. Observation was carried out in classrooms from each of seven programs and a comparison sample. Observers recorded such things as the teacher's classroom management techniques, expression of affect, the social-emotional nature, and the cognitive level of the interaction. Results were then factor analyzed, reduced to factor scores, and the factor scores tested for differences between programs by the multiple range test. The factor scores were also related to classroom mean pupil regressed gain which had been factored to identify different levels of complexity. Although there were inconsistencies, the linear relations between the classroom measures and pupil gain suggested that some factors, such as effective personal communication and intrinsic motivation, related to all levels of complexity, while others were specific to a certain level. In general, there seemed to be a trend that abstract growth was related to teaching that was less controlled and less focused but had some structure, while skill growth was related to more focus and structure, with concrete growth positively related to still more highly focused teacher behaviors and negatively related to extreme pupil freedom. Identifiers—\*American Association Colleges Teacher Education

Higher education, along with its national voice, the American Association of Colleges for Teacher Education (AACTE), has reached a critical point in teacher education and must deal

with a variety of important issues if collegiate-based teacher education is to continue. The major challenge that higher education faces is that of governance. Many constituencies in the education community, but particularly teacher organizations, are voicing legitimate interests in professional preparation—a matter which until recently was completely under the influence of college-based educators. Accreditation is the second major issue to which higher education and AACTE must respond. Accreditation has developed as a means of quality control in teacher education largely through the efforts of member institutions of AACTE. Currently, however, questions concerning who will set standards and what will be judged are increasing. A third major concern is collaboration. The sharing of governance in teacher education is an idea whose time has come, and collegiate institutions must ensure they are involved. Government relations is another important issue, and higher education must retain its place in teacher education by taking effective action at both state and federal levels to strengthen its power base. AACTE is responding forcefully at both levels. A fifth area of concern is continuing professional development, including supply and demand and governance of inservice education. (PB)

**An Evaluation of the Behavioral Aspect of the American Dental Association's "Learning About Your Oral Health" Teaching and Learning Program, Level 2.**

Pub Date Oct 75

Note—17p.; Paper presented before the Research Council at the Annual Meeting of the American School Health Association (49th, Denver, Colorado, October 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Dental Evaluation, \*Dental Health, Elementary Education, \*Health Programs, \*Scientific Research, Student Behavior

Identifiers—American Dental Association, \*Navy Plaque Index

The major purpose of this study was to assess the behavioral impact of the American Dental Association's (ADA) Teaching and Learning Program, Level 2. A second purpose was to determine the reliability of the Navy Plaque Index (NPI) when administered to a relatively large sample of elementary school students. The NPI, which has demonstrated validity and reliability over a seven-year period of use when utilized by one dentist on small samples of adults, was used for assessment purposes. It was administered by dentists to 16 randomly selected fifth grade elementary classes in a Midwest community. A pretest and posttest design, with experimental and control groups, was utilized in the study. The Navy Plaque Test was shown to be an unreliable measure of plaque indices in this case. Due to the unreliability of the instrument, the behavioral aspect of the ADA's program could not be evaluated. The investigators are presently in the process of conducting a post-post NPI measurement of the same subjects rerandomizing the dentists in order to distribute the variability of the plaque measures among the various treatment groups. This will provide an opportunity to determine (1) any experimental effects that might have resulted from the program and (2) which effects remain six months after the students were exposed to it. By using a measure of dental health status, this program could make an important contribution to the validation and evaluation of classroom health education experiences. (Author/BD)

Descriptors—\*Communicable Diseases, \*Disease Control, Health, \*Health Education, Public Health, Secondary Education, \*Sex Education, \*Venereal Diseases

This book is one in a series of contemporary topics in health science for students. The first chapter deals with the behavioral aspects of venereal disease and how the disease has been af-

fectured by our changing society. Chapter 2 discusses the magnitude of the problem, presenting various maps and charts. The history of venereal disease and the progress that has been made in its treatment are traced in chapter 3. Chapters 4 and 5 discuss the pathology of syphilis and gonorrhea. Other venereal diseases (chancre, lymphogranuloma venereum, granuloma inguinale) and venereally related diseases (non-specific urethritis, vaginitis, cystitis, venereal warts, herpes proies, pubic lice, and scabies) are described in chapters 6 and 7. Chapter eight deals with epidemiological control and describes various control programs. Chapter 9 discusses measures that can be taken to prevent venereal disease. The 30 most often asked questions about venereal disease and their answers are presented in chapter 10. Appendix A contains a summary chart of the various venereal diseases and Appendix B presents a sample test on syphilis and gonorrhea. The book also contains a glossary, index, and a number of photographs showing the various stages of syphilis and gonorrhea. (BD)

This booklet on open education contains seven articles. The first two articles describe the concept of openness and give a description of open education and how it is affected by American values. These articles also discuss some of the differences between open education and traditional education. The third article contains the author's reflections on the ways the ideas and practices associated with the British Infant Schools have accommodated themselves to, and been assimilated by the American educational field. The fourth and fifth articles contain case studies. They explore the success and failure of open education in a variety of settings. Specific details are given which enable the reader to draw his/her own conclusions about what might have been done in trying to achieve some of the goals set forward for open education. The last two articles discuss research on open education and tell where open education has been and where it is going. They state that research has indicated positive results in many aspects of open education, and that this provides a rationale for continued interest in the approach and a basis for further development of research in this area. This booklet describes how a group of doctoral candidates at Harvard established the Clinical School Collaborative and how they tried to shape their ideal into a reality. The group wanted to form an organization which did a better job in teaching students, training adults, and pursuing research than existing institutions. They held discussions in which they formed their ideas, and they wrote a proposal which they submitted to approximately 350 institutions and school districts. They received a number of enthusiastic answers and began to narrow down their choices.

The Portland, Oregon school district became their final choice. From the time of inception until the final choice was made, the membership of the group changed for various reasons. As group members came and went, the composition of the group altered accordingly, and became more routinized and hierarchical. A year after the idea was first conceived, four of the educators finally went to Portland to plan Adams High School which opened in September 1969. (RC)

**Identifiers—**\*Informal Learning

This pamphlet on informal learning is part of a series of booklets and monographs written in nontechnical language so that beginning teachers and the general public may gain a better understanding of educational problems. The first section of the booklet defines informal education, identifies its requirements and examines the underlying assumptions derived from these requirements. This section also deals with how the teacher can (1) improve his/her understanding of children, (2) change the way one views subject matter so that it becomes more relevant, (3) experience and appreciate processes in learning, (4) change perceptions of learning materials, and (5) present the guidelines for reorganizing the physical aspects of the classroom to facilitate informal learning. The second section deals with coping with new teaching roles and includes a discussion of the special responsibilities a teacher in an informal classroom assumes in order to further children's learning. These responsibilities include (1) creating appropriate conditions for learning, (2) relating to the children and guiding their learning, (3) challenging the children to learn and encouraging them to do more and better work, (4) asking critical questions, and (5) coping with behavior problems. The third section of the

booklet offers methods to facilitate an evaluation of learning and includes a discussion of record keeping, goals, and planning. The last section discusses teachers' relations with colleagues, parents, and administration, and the question of who effects change in informal learning. (Author)

**Descriptors—**\*Cross Age Teaching, Elementary Education, \*Peer Teaching, \*Social Experience, \*Socialization, Student Projects, Tutoring

The subject of this booklet is cross-age helping. It begins with a discussion of what cross-age helping is and why it is effective. Cross-age helping is described as a program where children teach or help other children. The older children help the younger children learn what the younger children want to know, and the younger children help the older children use their knowledge. The next section looks at some specific programs and tells what made them successful, and how they worked. There are descriptions of some summer programs and of a sixth grade to junior kindergarten program. The next section of the booklet lists some of the problems to watch out for when having older children helping younger children. The following section is a discussion of the key elements needed in an effective program. These basically concern attitudes of teachers and students involved and scheduling. The final section gives examples of other types of cross-age tutoring projects. A brief summary and references are included. (RC)

**Descriptors—**Audiovisual Instruction, Classroom Techniques, Individualized Instruction, \*Inquiry Training, Instructional Materials, \*Questioning Techniques, \*Teaching Guides, Teaching Methods, \*Teaching Techniques, Video Tape Recordings

This self-instructive workbook focuses upon teacher-initiated questioning strategies and the relationship of the strategies to students' thinking. It utilizes written materials, audiotapes, videotapes, and students in the classroom. The goals of the workbook are to enable the teacher to (1) identify and classify types of questions in terms of their potential effect on students' thinking; (2) use each type of question strategically so as to facilitate the development of students' thinking processes; and (3) assess themselves in terms of knowledge and ability related to questioning strategies. The workbook is supplemented by a program and support system which includes instruction, experiences for practice, and individual conferences. The guide defines types of teacher-initiated questions and types of written questions and explains how to make a statistical profile of scored questions. It also discusses the classification of questions from a transcript and questions from an audiotape. In addition, it helps the teacher in assessing questioning strategies, in relating types of questions to instructional goals, in sequencing questions strategically, and in matching types of questions to learning processes. It also provides a review of research on the use of questions in instruction and a bibliography. (BD)

Descriptors—\*Abstract Reasoning, \*Cognitive Ability, Independent Study, \*Skill Development, \*Student Ability, Teacher Education, Teaching Guides, \*Workbooks  
Identifiers—\*Propositional Abilities

This self-instructive workbook focuses on a set of propositional abilities related to learning. It utilizes written materials, manipulative materials, videotapes, and students, and is supplemented by a program and support system which includes instruction, teaching experiences for practice, discussions, and individual conferences. The three major goals of this workbook are to enable the teacher to: (1) use a clinical method to administer, at any grade level, diagnostic tasks related to propositional abilities; (2) identify the developmental level each student in the class has attained in terms of propositional abilities; and (3) select, from resources available, subject matter appropriate to identified levels of development. Propositional tasks are included which deal with various types of reasoning (probabilistic, disjunctive, combinational, propositional, deductive, and proportional). The workbook contains outlines for eight self-directed workshops some of which concern (1) developing the ability to administer propositional tasks, (2) administering propositional tasks to a student, (3) solving problems involving propositional abilities, and (4) reading about propositional abilities. There is also a section dealing with a review of some research on propositional abilities, a bibliography, and an appendix which gives examples of various types of problems related to propositional abilities. Descriptors—\*Educational Research, \*Evaluation, Independent Study, Information Retrieval, Information Sources, Research Methodology, \*Research Projects, \*Research Skills, Teacher Education, \*Workbooks

This self-instructive workbook focuses on ways in which the teacher can gather helpful information regarding activities with students. It is supplemented by a program and a support system that includes instruction, teaching experiences for practice, discussions, and individual conferences. The two major goals of the workbook are to enable teachers to (1) gather, within existing classroom settings, information which is manageable in amount and complexity and can be useful in better understanding their work with students; and (2) organize and articulate their information in a field study report that will have meaning for them or possibly for other interested persons. The teachers are asked at certain points in the workbook to write down their ideas and examine them before proceeding, in order to assess their own development for carrying out educational research. The workbook is divided into the following six sections: (1) evaluation and assessment of students' activities, (2) summary of observational plans, (3) methods for making observational records, (4) defining a field research project, (5) communicating research findings, and (6) self-checks and notes. It also includes suggestions for related reading to aid in writing research reports. (BD)

Effectiveness of Three Feedback Procedures in Developing Set Establishing Skill. Final Report. Texas Univ., El Paso.

Pub Date Nov 74

Note—74p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Feedback, \*Higher Education, \*Microteaching, Statistical Surveys, Student Teachers, \*Teacher Education, Teacher Education Curriculum, \*Teaching Skills, Video Tape Recordings

This study was designed to determine the effectiveness of three feedback procedures by determining the relationship between the feedback

SP 009 534

procedures and the development of competence in establishing set by the teacher-trainees as indicated by the group mean gain scores on the "Hernandez-Klingstedt Establishing Set Rating Form." The feedback procedures compared were as follows: (1) verbal and written prompting and cueing provided by peers and the supervising teacher (limited feedback procedure) coupled with viewing of a videotape of the teaching performance; (2) limited feedback procedure coupled with listening to an audiotape of the teaching performance; and (3) the limited feedback procedure itself. An additional purpose was to determine the relationship between the individual mean scores of students exposed to the three feedback procedures with age, sex, marital status, hours in education, total hours in college, and overall college grade-point average. Three groups, consisting of a total of 20 secondary education majors at the University of Texas at El Paso during the spring semester of 1973, were used in this study. It was concluded that there was no significant difference in the effectiveness of the three microteaching feedback procedures. Accordingly, as far as enhancing the attainment of the technical skill is concerned, it seems to make no significant difference which of the three feedback procedures is employed as a part of the instructional sequence. Specification and Examination of Assumptions, Theoretical Model, and Competencies: First Three Steps toward Systemic Improvement of a Teacher Education Program.

Pub Date 1 May 75

Note—44p.; Paper prepared for the Professional Development Center, Teacher Corps Project: Houston, Texas

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Higher Education, Instructional Systems, Models, Performance Criteria, Program Improvement, \*Systems Approach, \*Teacher Education, \*Teaching Models

This paper deals with the systems approach to educational program improvement, which is an approach that allows teacher educators to plan and direct change in a systematic and systemic way. Instead of having to deal with problems one at a time, a systems approach allows one to solve several problems at the same time. This paper focuses on the first three steps of the process—the specification and examination of assumptions, theoretical model, and competencies. The first section of the paper includes information related to terms associated with systems in general and assumptions in particular, the logical as well as the psychological value of assumptions, methods of identifying and grouping assumptions, and factors to be considered in assessing the acceptability and usability of assumptions. The second section deals with a theoretical model for teacher education, that is, a structural design of the conceptual and functional components of the total system. It discusses the following three major classes which are included in the concept of a theoretical model for teacher education: (1) professional bases, (2) professional actions, and (3) professional contexts. It also explains how one develops a theoretical model. The third section defines competencies and refers to them as the terminal objectives of a teacher education program. This section also includes a discussion of the seven basic approaches to the specification of program competencies, the operationalization of a competency statement, and how competencies should be sequenced and evaluated. Fidler, Merrie A.

The All-American Girls' Baseball League, 1943-1954.

Pub Date Apr 75

Note—29p.; Paper presented at the Annual Conference of the North American Society for Sport History (3rd, Boston, Massachusetts, April 16-19, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Athletics, \*Baseball, \*Females, \*Historical Reviews, Organizational Change, Recreational Activities, \*Women's Athletics  
Identifiers—Wrigley (Philip K)

This presentation provides an historical sketch of the All-American Girls' Baseball League (AAGBBL). The League was created in 1942 as the All-American Girls' Softball League, by Philip

K. Wrigley. He initiated the League as a non-profit organization governed by a board of three trustees. Mr. Wrigley's basic motivation for creating the AAGSBL was to organize substitute entertainment for men's professional baseball. In 1943, Mr. Wrigley began de-emphasizing the League's identity with softball and emphasizing its identity with baseball. The League was renamed the All-American Girls' Professional Ball League, but unofficially it was referred to as the AAGBBL. The League grew from its four original teams in 1943 to a maximum of ten teams in 1948. By 1954, it had dwindled down to five teams. The organizational structure of the League underwent three basic changes, all due to changes in administration. There were also both real and imagined problems with male managers and female players. To solve this, chaperones were hired. The League administrators maintained strict conduct rules for the players. The demise of the AAGBBL came after the 1954 season. Post-World War II social changes combined with intra-league changes to contribute to the League's demise. Many instructive lessons can be ascertained from the League's experience, however, for current and future application to women's professional sport. An appendix is attached which contains charts and tables on structure, salaries, and participants. (RC)

Note—140p.

Available from—National Association of Independent Schools, Four Liberty Square, Boston, Massachusetts 02109 (\$3.00)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—Behavior Patterns, \*Diagnostic Teaching, Diagnostic Tests, Educational Therapy, Elementary Education, Intelligence Tests, \*Learning Difficulties, \*Learning Disabilities, Parent Participation, Psychological Tests, \*Remedial Instruction, \*Underachievers

This notebook for teachers is the result of (1) a workshop held to discuss ways of working with children who do not respond in traditional ways to learning, despite their high IQ's and apparent abilities, and (2) a questionnaire which was sent to various schools inside and outside the United States designed to elicit specific information on what and how schools provide for children who have learning problems. The guide discusses solutions to various problems which might arise from the creation of a diagnostic program for these children in the school. The notebook also includes brief descriptions of several tests and evaluations which teachers may use with these children. The notebook then presents diagnostic reports written about four children who represent composite pictures of certain characteristics. The procedures followed for each child are the same and include referral by a teacher conference with the classroom teacher, diagnostic teacher, and administrator; and a conference with parents to let them know what has been done and what procedure has been suggested. The notebook presents various classroom techniques to be used by the teacher in order to sharpen children's receptive and expressive processes. It also contains a discussion of how children with learning problems differ from slow learners, and how to make this distinction by observation of their overt behavior. The notebook also includes guides for parents which contain activities and exercises for children to practice during the summer. The last section discusses methods of helping children follow directions. (BD)

**Evaluations of Instructional Experiences for Pre-Service Teachers of Reading.**

Pub Date 74

Note—29p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Behavioral Objectives, Higher Education, \*Performance Based Teacher Education, Performance Criteria, \*Preservice Education, \*Reading Instruction, \*Teacher Education, \*Teacher Education Curriculum

Identifiers—Texas

The purposes of this study were to determine (1) if the majority of Texas professors of reading agree on the value of 15 instructional experiences for preservice teachers of reading, (2) to what extent the 15 selected instructional activities are already required for prospective reading teachers, and (3) some of the basic competencies that college reading professors expect of beginning reading teachers. A questionnaire asked professors at colleges and universities to evaluate a variety of preservice learning activities by judging them according to their appropriateness and desirability. Data indicated which activities were considered most valuable and which were being implemented as requirements in preservice reading courses. By examining these preservice activities, the following list of eight competencies was compiled: (1) demonstrate knowledge of the basic skills of reading; (2) demonstrate evaluative skill in selecting instructional materials for the classroom; (3) demonstrate knowledge of a variety of instructional approaches; (4) be able to critically analyze microteaching sessions; (5) demonstrate skill in interviewing students regarding their achievement and interests; (6) demonstrate skill in administering and evaluating selected diagnostic reading tools; (7) demonstrate skill in conducting reading lessons with individuals, small groups, and large groups; and (8) demonstrate skill in using instructional and screening machines. **Functions and Mode of Operation of the Curriculum Development Centre.**

Curriculum Development Centre, Woden (Australia).

Pub Date 75

Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Curriculum Development, \*Curriculum Research, \*Curriculum Study Centers, Foreign Countries, Learning, Relevance (Education), \*Research and Development Centers, Teachers

Identifiers—\*Australia

The aim of the Curriculum Development Centre (CDC) of Australia is to foster curriculum and materials development from preschool to post-secondary levels. A broad concept of curriculum includes the totality of experience which a child undergoes during his schooling. Curriculum development under this definition is concerned with developing materials, practices, and organizations which affect this experience. The task of CDC is seen as being concerned with this development in areas such as resources, sequencing of learning activities, teacher-pupil interaction, organization of the learning situation, and the teacher's general approach to children and teaching. The proposed operations of the centre are defined in terms of the following six functions: (1) the conduct and support of projects; (2) the provision of a clearinghouse and information analysis service; (3) field development; (4) the provision of advisory, technical, and evaluative services; (5) the provision of opportunities for training in curriculum development skills; and (6) arrangements for the printing and marketing of materials. These functions are interdependent. Together they provide a framework for determining the services and leads that a national center can provide to schools and other curriculum agencies. The structure to carry out these functions envisages three branches which include the CDC Information Centre, the Curriculum Development and Research Branch, and the Administrative Branch. (RC)

**Will Your Teaching Survive the Seventies? Bulletin Special Workshop Report Edition No. 76.** International Schools Association, Geneva (Switzerland).

Pub Date Feb 75

Note—86p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Educational Development, Elementary Secondary Education, Futures (of Society), Humanistic Education, Human Relations, Interaction, \*Interdisciplinary Approach, \*International Organizations, Mathematics Education, \*Workshops

Identifiers—\*International Schools Association

This is a report on the International Schools Association (ISA) workshop which was intended

as a high-level conference concerned with new educational thinking in Britain and the U.S., and also as an interdisciplinary experience for participants. The report contains summaries of talks by the principal speakers and a list of the discussion groups. Many of the speakers stressed the need for "humanness" in all educational development and made a plea for community living, respect for others, the sharing of responsibility, and the nobility of work. Others expressed the need for a greater "exactness" in the approach to learning, indicating the importance of interaction, integration, and careful evaluation of progress made. Another speaker emphasized the philosophical nature of the educational process and demanded a transfer of knowledge by students to the outside world so that they might answer their own questions about "relevance" in a practical manner. One speaker showed the importance of a properly organized school situation. Another participant spoke of the organization planning, self-questioning, and honesty required in the teaching of mathematics. Finally, one of the participants demonstrated that "survival techniques" for education in the seventies were already being used in many schools. The report also contains an appendix which includes working and other bibliographies by some of the participants, books and sources for audiovisual methods of teaching, and commercially available curricula from the Learning Research and Development Center at the University of Pittsburgh. McGowan, Francis A., II.

**Teacher Observation and Evaluation: A Working Paper.**

Pub Date Nov 74

Note—12p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Classroom Observation Techniques, Effective Teaching, \*Evaluation, Evaluation Methods, \*Performance, Performance Criteria, \*Teacher Behavior, \*Teacher Evaluation, Teaching Quality

This paper discusses evaluating and observing teacher performance. It consists of three sections. The first section is an introduction, in which it is stated that most observations are used for the following two purposes: (1) the improvement of instruction, and (2) the provision of information to those who make personnel decisions in a school system. The second section is the major part of the paper. It is in the form of an outline and is a guide containing general descriptive examples of items that might be included in teacher observations. The major headings are (1) "the teaching process," (2) "non teacher-controlled factors which influence the teaching process," and (3) "special strengths of teachers." Subheadings under the teaching process include: "preparation," which lists topics to be discussed with the teacher; "delivery," which lists things to be observed in the classroom; and "observational evaluation," which lists things to be discussed in conference with the teacher. The second major heading includes the subheadings "physical factors," "scheduling," and "extracurricular activities and responsibilities." Each of these subheadings is broken down into items to be evaluated. The last major heading is divided into the subheadings "personal and professional," and each of these is broken down into characteristics to be observed. The last section of the paper is a summary which states that observation is a complex undertaking and many factors must be taken in account. (RC)

**The Origin and Philosophy of Club Sports.**

Pub Date 75

Note—7p.; Paper presented at the Annual Meeting of the American Alliance for Health, Physical Education, and Recreation (Atlantic City, New Jersey, March 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Athletic Programs, \*Athletics, \*Clubs, \*Exercise (Physiology), Higher Education, Intramural Athletic Programs, \*Physical Activities, \*Physical Education, Physical Fitness, Physical Recreation Programs

Perceptive historians recognize that club sports, defined as a group of people gathered to engage in competitive physical activity, are not, as many would have us believe, a product of modern times. Historically, there has always been a desire

on the part of people for sports participation. Several years ago a questionnaire was compiled and sent to universities, colleges, and junior colleges. Eighty percent of the respondents had sports clubs. People want to be active and play, and therefore there is a demand for club sports. No other area in a school's curriculum gets the voluntary participation of such a large percentage of the student body, faculty, staff, and community as does the health, physical education, recreation, and athletic complex. This participation takes the form of both active sports participation and spectator participation. If the opportunity for physical activity is provided to students, they will take care of the rest. It is now necessary to meet the challenges of providing these opportunities for physical activity. (RC)

Time Components of the Left Ventricle.  
Pub Date Mar 75

Note—20p.; Paper presented at the Annual Meeting of the American Alliance for Health, Physical Education, and Recreation (Atlantic City, New Jersey, March 1975); Not available in hard copy due to marginal reproducibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—\*Blood Circulation, \*Cardiovascular System, Heart Rate, \*Human Body, Physical Health, \*Physiology  
**Identifiers**—\*Left Ventricle

The purpose of this study was to examine the relationship of the time components of the left ventricle. Since one of the ways to investigate cardiac function is to analyze the time intervals between particular events of the cardiac cycle, various time intervals of systole and diastole of the left ventricle were measured from simultaneous recordings of the electrocardiogram, phonocardiogram, carotid pulse wave, and apex cardiogram. The relationship of the time components was determined by factor analysis. The results showed that the six nonoverlapping intervals, which included the (1) isovolumetric relaxation phase, (2) rapid filling phase, (3) slow filling phase, (4) electromechanical lag, (5) isovolumetric contraction phase, and (6) ejection phase, are relatively independent of each other and of cycle time (with the exception of the slow filling phase). They reflect the factors that account for the variance of all the time components of the left ventricle. These relationships among the intervals appear to be similar for different ages and sex. (RC)

*Steg, Doreen R.*  
Some Thoughts on Thinking in Competency-Based Education.

Pub Date 4 May 73

Note—30p.; Paper presented at Workshop on Competency Based Teacher Certification (Cornell University of the State of New York)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Behavioral Objectives, Cybernetics, Human Engineering, \*Learning Activities, Learning Processes, \*Performance Based Education, Performance Criteria, \*Teaching Models, Thought Processes, \*Training

This paper considers the possibility and desirability of competency-based education. It examines the present status of behavioral objectives and reviews a recent assessment of most empirical studies on behavioral objectives. It then presents a comparative consideration and assessment of the following teaching models: (1) the impression model, (2) the insight model, and (3) the rule following model. It also discusses a systems analysis of human behavior, specifically thinking. The paper then uses this analysis of learning activity and the examination of the distinctions which can be made between training and education to form some conclusions concerning competency-based education. These conclusions are: (1) a distinction can be made between learning as a training process and learning as new concept formation, (2) training is useful in the acquisition of skills, (3) machines must only present material that one is sure of so that the pupil is left the freedom essential for the formation of "art images", (4) knowledge is impossible without thinking, (5) thinking is futile without knowledge, (6) goals are to be used for focusing purposes only and not to

become the overriding concern in education, and (7) competency based criteria are only relevant to training if they are an outgrowth of the individual's own activity. An appendix is attached which contains a chart of the process of planned socio-technical change. (BD)

Professors, Students and Some Enduring Concerns in the West.

Pub Date 75

Note—26p.; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors**—College Faculty, College Students, Educational Philosophy, \*Education Majors, \*Higher Education, Professors, \*Schools of Education, \*Teacher Education, Teacher Educators, \*Teachers Colleges

This paper is divided into five sections, the first of which states the author's purpose for writing the paper as being to think through the experience he had as the instructor of a pilot class within the secondary education professional sequence at the Teachers College of Ball State University. The next section is a discussion of the methodology he used in preparing the paper. Section 3 is the largest section and discusses the tasks of schools of education. There is also a discussion of the types of people who have traditionally been attracted to teaching. In this section it is asserted that schools and colleges have been sending men and women into the world who no longer understand the creative principles of western society. The theme in the fourth section is that modern education is based on a denial that it is necessary or useful for the colleges and universities to transmit the classical culture of the west from one generation to the next. This section also notes that the university experience cannot and should not be an exact mirror of life. It is stated that real scholarship always moves in a realm where choices are more numerous and the possibilities more varied than they are practical. The final section emphasizes that teacher education must not allow itself to operate outside the perennial concerns of western civilization, and that those who teach in higher education must have some convictions about what is worth learning. De - Socializing School Instead of De - Schooling Society.

Pub Date Oct 75

Note—17p.; Paper presented at the National Convention of the American Educational Studies Association (San Francisco, California, October 30-November 2, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Authoritarianism, \*Educational Philosophy, \*Educational Sociology, Humanism, Humanistic Education, \*Humanization, Socialism, Totalitarianism

It is important to counteract the collectivist and totalitarian trend which is currently the source of our educational problems. These problems are due to the impersonal, institutionalized communication which results from totalitarianism and collectivism in education. There is now a new movement toward personalism which focuses on love, community, critical consciousness, radical re-thinking, and anarchy, and which characterizes a trend away from the impersonal, functional, totalitarian approach to life. This personalist philosophy which has arisen from a dissatisfaction with established institutions can be discussed in relation to the socio-economic realm, the political scene, science, philosophy and theology, and finally, American education, which has ignored the personalist movement. The first step of a plan to de-socialize American education would be to de-socialize schools (i.e., take them out of reach of political authorities). The second step is to de-socialize education—in other words, to organize the contents and direction of our educational efforts around concrete reality and not according to the pre-established ideology of sociology. The goal of education must not be to alienate man from his existential roots but to make him able to pursue happiness through desocializing and de-socializing our schools. (BD)

Educational Policy Studies: Quest for Consensus?  
Pub Date Oct 75

Note—14p.; Paper presented at the Annual Meeting of the American Educational Studies Association (San Francisco, California, October 30-November 2, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors**—Educational Administration, \*Educational Philosophy, \*Educational Policy, \*Educational Theories, Foundations of Education

The purpose of this paper is to discuss possible connections between philosophy of education and educational policy. Philosophy of education relates integrally to individual, institutional, and social contexts. Educational policy shares a similar, even more varied, context which often complicates the mixed questions asked by educational philosophers. The meaning one attaches to educational policy is in some way linked to those social perceptions and expectations which he/she brings to his/her policy considerations. Policy may mean different things to different people, partly depending on one's purpose and the social context which circumscribes that purpose. Through critical analysis of social and normative, as well as descriptive, issues, philosophy of education could perform a catalytic function for educational policy. Ultimately, preservation of philosophical perspective must be an implicit boundary condition for those educational philosophers deciding to enter the policy arena. While attempting to create ideational constructions at the behest of those who hold power, these philosophers may come perilously close to shattering that delicate intellectual barrier which separates their calling from that of political ideology. **Descriptors**—Administrator Role, \*Cross Cultural Studies, \*Cultural Education, \*Cultural Pluralism, Educational Problems, \*Performance Based Teacher Education, Teacher Education, Teacher Role

**Identifiers**—\*Multicultural Education

This book contains 17 articles, each by a different author, and addressed to those who wish to become informed about the relationship between multicultural education and competency-based teacher education (CBTE). In order to study the relationship between multicultural education and CBTE, a number of individuals actively engaged in either the study and/or implementation of multicultural education and CBTE were invited to respond to the following two questions: (1) What should be the role of the administrator, teacher, or university faculty member in assuring that competency-based teacher education includes multicultural education in its content?; and (2) From a(n) administrator's, teacher's, or university faculty member's point of view, what problems are you experiencing or do you foresee experiencing in regard to relating the concepts of multicultural education and competency-based teacher education? The first question provided the writers the opportunity to respond to the state of the art concerning the relationship of multicultural education and CBTE—especially at their local sites. The second question provided the writers the opportunity to discuss how they would envision the relationship of multicultural education and CBTE. The articles in this book are the responses to these questions. (RC)

Descriptors—Audiovisual Centers, Educational Alternatives, Educational Innovation, \*Information Centers, \*Instructional Materials Centers, \*Learning Laboratories, Library Facilities, \*Resource Centers, \*School Study Centers

This book is designed to give administrators and faculty a model to follow in developing and maintaining a Learning Center of any size at any educational level, from preschool to college. Basic to the Learning Center concept presented here are the following four services: (1) a multimedia library, (2) audiovisual services, (3) non-traditional services and learning activities, and (4) instructional development. In analyzing these elements, the author shows how they interact and reinforce each other to ensure that both process and product of learning will be responsive to individual needs. Independent studies, learning handicapped services, and tutorial programs are discussed. There is also a discussion of the special personnel needed to run a center effectively within or outside the formal educational system. The final chapters discuss how to manage change and develop personnel and instruction to accommodate constant growth. Existing Learning Centers are also surveyed to see how they have met their own goals and the needs of the communities they serve. Appendixes are included which present surveys of instructional techniques and facilities, a staffing model, and examples of management statements. (RC)

The VD Epidemic. How It Started, Where It's Going, and What to Do About It.

Pub Date 28 Apr 75

Note—160p.

Available from—Temple University Press, Philadelphia, Pennsylvania 19122 (\$10.00)

Document Not Available from EDRS

Descriptors—\*Communicable Diseases, Health, \*Health Education, Sex Education, \*Venereal Diseases

This book concerning the venereal disease epidemic is designed to do the following two things: (1) to give the general public straightforward, explicit information on this ancient disease; and (2) to transform the current mood of complacency into a demand that eradication programs be set in motion at once. This book is all-encompassing in scope and covers the symptoms, causes, incidence, and history of syphilis and gonorrhea. It clearly explains the aspects of detection and the methods of treatment, from early mercury and other heavy metal treatments to modern effective therapy through penicillin. The book uses case histories and anecdotes to emphasize key points such as the rapidity with which infection spreads, the difficulties faced by health workers in attempting to reach all likely victims, and the ignorance and hypocrisy which prevent the disease from being eradicated. There are photographs to supplement the descriptions of common symptoms and clinical effects. (BD)

Identifiers—\*Death Education

This guide is separated into the following four age groups: 5-6 years, 7-9 years, 10-12 years, and 13-18 years. Curriculum concepts and learning opportunities are presented more or less sequentially from the basic to the more difficult. Information at the beginning of each age-level section provides a brief summary of the general understanding of death by children at the developmental level. Various concepts are presented at each age level and are organized in the following manner: (1) learning opportunity, (2) objectives, (3) activities, and (4) notes to teacher. At the end of each age-level section, complete bibliographical information is given for resources that have been suggested under each concept. Many of the learning opportunities suggest the use of novels, short stories, poems, and plays. To help the teacher creatively integrate the numerous literary references an outline is included of various approaches in Appendices A and B. There is no provision for student assessment. Options are included under notes to the teacher. (BD)

Descriptors—Curriculum, \*Curriculum Guides, \*Elementary Education, Evaluation, \*Health Education, \*Health Guides, Health Programs, Instructional Media, Interdisciplinary Approach, Program Evaluation, Student Evaluation

This guide for teaching elementary school health education attempts to (1) depict the meaning of modern health education; (2) present principles of learning applied to health education; (3) propose a health curriculum based on valid criteria and suitable for use in the various grade levels of the elementary school; (4) explore the many possibilities for health educational media; (5) identify ways in which health might be taught in conjunction with other subject areas; and (6) point up certain innovations in providing desirable health learning experiences for children. Chapter one introduces the concept of the total school health program. In chapter two, a discussion of teaching and learning is presented in terms of an application to health education. Chapter three is designed to help the reader determine what to teach, and chapter four provides a number of media suitable for use in health teaching. Chapters five and six present suggestions for the elementary school health curriculum and explain what might be taught at the different grade levels. In chapter seven, many recommendations are made to show how teachers might deal with the sensitive areas of health education, such as alcohol, drugs, and sex. Chapter eight shows how teachers can capitalize on movement experiences of children in the development of health concepts. In chapter nine, a searching and systematic study of integration of health teaching has been made. The last chapter discusses evaluation with emphasis on ways and means of assessing pupil progress with respect to knowledge, attitudes, and behavior. (BD)

Greek Athletics in the Writings of the Greek Historians.

Pub Date Mar 75

Note—9p.; Paper presented at the Annual Convention of the American Alliance for Health, Physical Education, and Recreation (Atlantic City, New Jersey, March 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Athletes, \*Athletics, \*Greek Civilization, \*Historical Reviews, \*Physical Activities

The purpose of this study was to find out what Greek historians actually said about athletics during the centuries 700 B.C. to 400 A.D. To achieve this, the writings of Greek historians were systematically examined for words, phrases, sentences, and comments pertaining to or mentioning Greek athletics and athletes. These were recorded on separate cards, and eventually classified according to topic. Topics were then grouped under the following three headings: (1) the individual and athletics; (2) festivals; and (3) outgrowths of athletics. Concepts related to the role of athletics in Greek society were derived from these groupings of quotations and references. In relation to the first topic, it was found that the individual athlete in Greek society benefited from athletics both intrinsically and extrinsically through individual exercise and public honor. Concerning the second topic, it was found that attending festivals and athletic contests was a way of life for the Greek people (historians mentioned 37 different festivals and countless other athletic contests which were not given specific names). With regard to the third topic, it was found that almost everyone in the Greek world was affected by athletics, either directly or indirectly. For example, time was measured in Olympiads, locations were given in relation to athletic sites, and artists used athletes as models for their works. In conclusion, the author states that athletics and sport were integral to the thinking and concerns of Greek historians. (Author/BD)

Peters, Richard O.

Essays on the Nature and Structure of Teacher Education in America as Related to the Learning Process.

Pub Date Oct 75

Note—28p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Curriculum Development, Higher Education, Inservice Programs, Learning Processes, Resource Centers, \*Teacher Education, Teacher Participation, Teacher Role, \*Teaching Methods

This paper contains six essays concerning the relationship between teacher education and the

learning process. The first discusses various teacher training strategies at the university/college level and in inservice workshops. The second states that teachers should be freed from classroom chores to spend more time on curriculum development and team planning. The third essay focuses on utilizing environmental resource facilities in effective and cognitive learning processes. The fourth essay states that the formalized learning process consists of those activities related to the competencies of instruction and learning, and those that enhance and reinforce affective, cognitive, and motor skills development. It goes on to say that teachers must be trained in all these activities. The next essay discusses the teacher and curriculum instruction. It states that teacher trainees and experienced teachers must become involved in building school programs in order to develop the necessary skills and understandings related to this process. The final essay deals with the roles of the classroom teacher, and emphasizes that teacher training institutions have a responsibility to show their students all the ways these roles might be needed in a classroom situation. **A Study of Teacher Trainee Learning Styles and the Development of Competence.**

Pub Date Apr 75

Note—71p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., April 1975)

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors—**\*Learning Characteristics, Learning Processes, Learning Theories, Performance Based Teacher Education, \*Performance Criteria, \*Preservice Education, \*Teacher Education, Teacher Education Curriculum, \*Teaching Skills

This report presents the results of research undertaken to determine the individual learning styles of teacher trainees and to better understand the development of teacher competency, particularly as it relates to teacher trainee learning styles. The research was conducted over a nine-month period in the context of the regular Teachers College Preservice Program for Elementary Teachers at Columbia University. The research is divided into two studies. The first is a developmental study of teacher competency and the second a study of the influence of teacher trainee learning styles on the development of teacher competency. In the first study, models of teaching are described and three types of competencies (planning, teaching, and terminal) are identified. It is reported that practice increased the level of teaching competency in each model. In the second study, four learning styles are identified and tests are made to show the influence of trainee learning styles on response to training and on pupil outcomes (recall and concept attainment). It was found that, for all learning styles, level of competence varied with the complexity of the model, and that some styles are stronger in planning than in performance. (BD)

**Papers on Theoretical Issues in Health Education.** California Univ., Berkeley. School of Public Health.

Pub Date Sep 74

Note—245p.; Papers presented at the Dorothy Nyswander International Symposium (September 27-28, 1974)

**EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage**

**Descriptors—**Attitudes, Community Development, Group Dynamics, \*Health Education, Health Personnel, \*Health Programs, Human Development, Medicine, Social Change, Social Environment, \*Symposia, Theories

This document is a collection of 17 papers on theoretical issues in health education presented at the Dorothy Nyswander International Symposium. The introduction, entitled "Theory and Practice in Health Education: A Synthesis," attempts to highlight some of the features of these papers and their relevance for health education practice. The papers show a diversity in subject matter and scope and include such subjects as health education in the medical care setting, community organization, and educational diagnosis. Several papers examine various theoretical concepts and their applicability to health education practice. The papers emphasize people and the predominant position they play in decisions about their

own health actions. Another common characteristic of the papers is the emphasis on precision in the delineation and analysis of whatever aspects of health education are under consideration (defining health education, causes affecting the individual or group behavior, analysis of data, program planning and methods, evaluation, training, and administrative framework). Yet another characteristic of the papers is the emphasis on theory or the ways to use theory in the practical implementation of programs. (BD)

**Descriptors—**Inservice Teacher Education, Student Teachers, \*Supervision, \*Supervisors, \*Supervisory Activities, \*Supervisory Methods, \*Teacher Supervision

This monograph contains three papers on the subject of supervision. The first paper takes the view that supervision is one tier of the teaching profession. The author's model is based on the assumption that over a period of time one's teaching practice not only improves but also increases in dimension and scope. The stages of preparation, induction, and retention are presented as a collaborative process. The author then summarizes the features, results, and implications of her proposal and provides a description of the components of her model. The second paper views the role of the inservice supervisor, using five major assumptions about professional programs for teachers. The authors state that there is a direct relationship between what we believe about people and the kind of supervisory practice and inservice programs that will be developed. The last paper focuses on supervisory influence and suggests that attention be given to "direct" and "indirect" models and qualities. The five staged systemic organization of supervisory teaching which the authors describe is intended to facilitate the resolution of instructional problems which supervisors and clients identify. The authors report the findings of studies which question the supervisory system's effect on student teachers' performance. (RC)

**Identifiers—**England, Wales

Teachers' centers were developed in England and Wales, and although American educators have been quick to adopt words such as teacher center and resource center, they do not understand the basic of teachers' centers. In England and Wales, the centers are established in response to very subjective local teacher needs. Teachers' centers for primary teachers are the most common type, and they all serve both the social and professional needs of teachers. There are also technical and science centers for teachers, operated by specialists who are not teachers. Resource centers are like teachers' centers, except that the major emphasis is on the professional side as opposed to the social side of the teachers' lives. Miscellaneous centers include materials centers and centers which are very narrow in their interest and tend to be operated by one person. Establishment of professional centers has also been proposed. These centers would be similar to teachers' centers, but would be responsible for the supervision of the probationary

teacher. In America, the teachers' centers are for the teachers but are not under teacher control. Teachers may recommend, but they do not control the financial aspects, hire the center leader, or decide what materials and equipment are to be secured or who can use the center. If a free society is evolving, then American schools need the type of educational changes presently underway in England and Wales. (RC)

\*Questioning Techniques, \*Teacher Behavior, \*Teacher Response, \*Teaching Methods, \*Teaching Techniques

This report describes the results of an experiment on teacher structuring, soliciting, and reacting behavior. Four teachers each taught eight groups of sixth-grade students using eight different variations of the classroom recitation strategy. The eight variations differed in the amount and kind of structuring, soliciting, and reacting behavior used by the teachers. Classes that were asked more recall questions during the lesson (low soliciting) performed better on the achievement posttest than did classes that were asked more thought questions (high soliciting). Classes taught with a high level of structuring did slightly better than classes given little structuring. Classes that received praise for correct answers and reasons for the wrongness of an answer (high reacting) did slightly better than those classes given neutral feedback and no reason for an answer's being considered wrong (low teaching). Although the results of the study showed variations in the recitation strategy did not make a dramatic difference, they also did not show that the recitation strategy itself was a weak teaching approach. The results for student achievement and attitude showed that the effects of the teacher were sometimes greater than the effects attributable to the teaching variations. (Author/RC)

**Descriptors—**Instructional Materials, \*Learning, Learning Activities, \*Objectives, \*Post Testing, \*Pretesting, Teacher Workshops, \*Workbooks

**Identifiers—**\*Learning Modules

This collection of workshop materials demonstrates how to develop learning modules through examples, illustrations, explanations, case studies, comparisons diagnosis, and prognosis. For the projected workshop, a module is defined as a modularized learning activity package composed of objectives, pretest, learning environments, and posttest. The author states that the term "modularized" stresses the relationship to school philosophy, end product, level objectives, and curriculum. It is also stated that the most important thing is to start with a clear idea of what is desired as an end product. This end product must be translated into certain basic things that must be learned by the end of the program. The workshop should equip teachers with the skill to produce modules composed of objectives, pretest, learning environments, and posttest. (RC)

**The Kentucky Plan for Improving the Professional Performance of School Personnel: The State Overview.**

Pub Date 31 Oct 75

Note—15p.; Paper presented at the Kentucky Association of Teacher Educators (Richmond, Kentucky, October 31, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Educational Assessment, Inservice Teacher Education, Performance, Performance Criteria, School Personnel, \*Staff Improvement, \*State Boards of Education, \*State Departments of Education, \*State Programs, Teacher Improvement

Identifiers—\*Kentucky

In December 1973, the Committee to Improve Performance of School Personnel was established. The task of the Committee was to create an effective system of improving professional performance which could be put into practice in any school situation in Kentucky, a system which could be utilized with all professional staff members whether they be classroom teachers, administrators, or other professional personnel. A State Board Regulation was passed on September 10, 1975, which required each local board of education to provide for the involvement of every professional school employee in an individualized program of self-evaluation and performance improvement through the application of the Kentucky Plan. The Kentucky Plan is designed to assist in the development of a system tailored to the particular needs of a school district. For successful implementation of the Kentucky Plan, there must be harmony between participating parties in the development of local school district plans. The resources of the State Department of Education and the Educational Regions must be effectively utilizing to provide the necessary skills needed in a program of this magnitude. The Educational Region is designed to provide ancillary service to the local school districts under the approval of the State Department of Education. The Educational Region can be an effective delivery system in the implementation of the Kentucky Plan. Professional organizations and higher education must also be involved in its implementation. Hurewitz, Carol Hurewitz, Paul  
Teacher Characteristics and Their Relationship to Cognitive and/or Affective Learning in Elementary School.

Note—14p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Affective Behavior, \*Cognitive Development, \*Effective Teaching, Elementary Education, \*Elementary School Teachers, \*Learning, Self Esteem, Student Teacher Relationship, Student Teachers, Teacher Characteristics, Teacher Motivation

This study investigated 34 selected teacher characteristics that relate to cognitive and/or affective learning in elementary school. A questionnaire for identifying characteristics of effective teachers was developed and distributed to fifty graduating student teachers. Three questionnaires were excluded because they signified "None" on the questionnaire, indicating that no elementary teacher had significantly motivated them in a positive way. Each item on the questionnaire was given an affective, cognitive, or both cognitive and affective categorization. The Chi Square test for significance at the .05 level was used. Of the 34 items included in the study, 27 were found to be significant. It was found that all 47 students selected both affective and cognitive categories of influence. The study indicated that the motivating teachers were seen in a similar fashion by their individual pupils. The findings suggested a picture of a teacher who is confident about himself/herself and able to relate in a meaningful way to others by helping them to feel positive about themselves. (Author/RC)

Identifiers—\*New England Program in Teacher Education

This report discusses the impact of the New England Regional Commission (NERCOM) funds allocated by the New England Program in Teacher Education (NEPTE) on local programs where experimental approaches were designed to improve existing teacher education practices. Specifically, this report addresses the costs associated with various activities that make up a project cycle and lead to outputs by funded projects in terms of products and/or personnel resources (either used to do training or to serve as resources for other projects). The report discusses six staff Development Cooperatives funded by NEPTE from 1971-1974. It represents a first level analysis of the effect of dollars investment and utilization in the cooperatives. The dollars given to each cooperative are the project inputs. Two general categories—organizational, and training and product development—are used to discuss costs associated with a given project activity. What was produced by each cooperative represents the output of the project cycle. Outputs in this report may be either exportable products or personnel resources that were used or developed as a consequence of project operations. (RC)

Development of an Instrument to Evaluate the Knowledge of Elementary Teachers about Venereal Disease.

Note—15p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Communicable Diseases, \*Elementary School Teachers, Health, \*Health Education, Multiple Choice Tests, Sex Education, \*Test Construction, \*Venereal Diseases

Identifiers—\*Schmidt VD Knowledge Evaluator

The purpose of this study was to develop a valid, reliable test to measure the knowledge of elementary school teachers about venereal disease. Recommended scientific test construction procedures were carefully followed. These included the development of a content outline and a table of specification; submitting potential test items to a review panel; revision of items and initial administration of the test; item analysis, revision, and a second administration; and the item analysis and revision which resulted in the "Schmidt VD Knowledge Evaluator." This test consists of 45 multiple-choice items related primarily to syphilis and gonorrhea, with some items related to the other venereal diseases. Test construction procedures assure face validity, and the Kuder-Richardson formula estimates reliability to be 0.79. The instrument would be useful as a pretest and/or posttest for inservice programs, workshops, and seminars for teachers, school nur-

ses, or any similar group. (The "Schmidt VD Knowledge Evaluation" is included.) (Author)

Identifiers—Basketball, Rosenzweig Picture Frustration Study, Wrestling

This study was designed to investigate the effects of winning and losing competition upon the aggressive responses of intercollegiate basketball players and wrestlers. The Rosenzweig Picture-Frustration Study was administered to 32 Springfield College undergraduates (1) during a normal emotional state, (2) after winning a contest, and after losing a contest. A 2X3 factorial ANOVA with repeated measures across one factor was used to analyze the data. Following winning competition, the normal level of extrapunitive aggression was reduced significantly for basketball players ( $P$  less than .05). After losing, wrestlers showed a significant increase in extrapunitive aggression ( $P$  less than .05). For all subjects, extrapunitive aggression was higher during the normal state than it was following winning competition ( $P$  less than .01). It was concluded that losing competition may be a more frustrating experience for individual sport athletes than for team participants. In addition, winning competition has aggression reduction value to both types of participants. (Author)

Reynolds, Maynard C.

Changing Roles of Special Education Personnel.

Pub Date 73

Note—50p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Exceptional (Atypical), Handicapped, Normalization (Handicapped), \*Parent Associations, Regular Class Placement, Special Classes, \*Special Education, \*Special Education Teachers, \*Special Programs, Special Schools, Teacher Role, Teaching Methods

The "special" quality of special education is the body of knowledge, skills, and attitudes which are used in the education and training of exceptional school children. In practice, these children have been those who public school systems could not or would not teach. The history of education for exceptional children is a simple story of massive neglect, denial, and rejection. The first institutions organized for the blind, deaf, and retarded were residential. Some distinctive programs for exceptional children were organized in public day schools at the turn of the century. But it was not until after World War II that a remarkable surge of activities on behalf of handicapped children began. Currently the field of special education is negotiating a more integrated place for exceptional children in both the public schools and the communities in which they live. There are many new trends in special education taking place today. Since 1970, parents have returned to the courts as a means of promoting public action. Individualism and mainstreaming have both emerged as important trends in this decade. Lastly, a more open view of human capacities seems evident. Special education is in the early phases of a major transformation. An unusual set of opportunities challenges special educators to influence their future and that of the children they serve. (RC)

Education for Volunteer Teachers: A Report on the Project for the Advancement of Church Education (PACE) 1968-1970.

Arizona Experiment, Scottsdale.

Pub Date 71

Note—209p.

EDRS Price MF-\$0.76 HC-\$10.78 Plus Postage

Descriptors—Church Programs, \*Church Workers, \*Religious Education, Teacher Characteristics, \*Teacher Education, Teacher Im-

provement, \*Teacher Workshops, Teaching Skills, \*Volunteer Training

The purpose of the Project for the Advancement of Church Education (PACE) was (1) to test the hypothesis that INSTROTEACH workshops improve the competence of volunteer teachers, (2) to test the hypothesis that Learning Laboratory training improves the competence of volunteer teachers, and (3) to conduct studies on the correlation between teacher competency and selected teacher characteristics. The results of the research showed that the workshops are an effective means of improving teacher competence. The results also were sufficiently encouraging to suggest that the laboratory treatment could be developed further. The analysis of the correlated studies of the teachers in PACE suggested that INSTROTEACH may be in some degree a measure of teacher personality. The project staff also pursued the following objectives: (1) to conduct and report studies on laboratory student attendance, (2) to report related studies on church school enrollments, and (3) to develop attainable objectives toward improvement of volunteer teaching in the future with recommendations for practical steps to attain them. Annexes are attached which contain articles by the Project Director and Technical Assistant, a memorandum on research design selection, and a detailed evaluators report. Eleven appendixes are also included which contain tables, lists of components, and definitions. (RC)

Writing an Instructional Unit with Behaviorally Stated Objectives. A Five-Day In-Service Workshop Instructional Unit.

East Texas State Univ., Commerce.

Pub Date May 71

Note—83p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Behavioral Objectives, Course Objectives, Educational Objectives, \*Inservice Teacher Education, Instructional Materials, Manuals, Process Education, Teacher Developed Materials, Teacher Workshops, \*Unit Plan

This manual presents a guide that organizes and coordinates the information necessary to plan and write an instructional unit that contains behaviorally stated objectives and to prepare an evaluation that measures what is taught. The manual contains (1) a list of general objectives, (2) a list of behavioral objectives, (3) the class procedure, (4) assignments, (5) instruction aids, (6) an evaluation (examination), (7) an evaluation of the instructor's objectives, and (8) a bibliography. The chapter on instruction aids is the longest chapter and contains a pretest, an explanation of planning cycle, and six papers describing how to write behavioral objectives. The desired results hoped for in this workshop are not only that teachers will learn to plan and write instructional units but also that teachers will come to see the purpose and value of such a tool in teaching. A Study of Measures of Classroom Learning Environments. Technical Report Number 4.

Roosevelt Univ., Chicago, Ill. Coll. of Education. Spons Agency—Spencer Foundation, Chicago, Ill. Pub Date 75

Note—73p.; Appendix C will reproduce badly

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Classroom Environment, Classroom Observation Techniques, \*Educational Environment, \*Learning, \*Measurement Instruments, \*Observation

Identifiers—\*Learning Environment

This study deals with the following topics: (1) the extent to which three different learning environment instruments and their underlying conceptual framework are empirically related, and (2) the extent to which intensive observation of classrooms aids in the interpretation of instruments' characterizations of a class. In the first part of the study, three instruments measuring student perceptions of psychological aspects of classroom learning environments were administered to 233 high school students in 11 classes. The three instruments were the Learning Environment Inventory, the Class Activities Questionnaire, and the Authenticity, Legitimacy, and Productivity (ALP) Ethos Instrument. The

instrument data were analyzed using the individual as the unit of analysis. The second part of the study involved nonparticipant observation of one of the original 11 classrooms. The results provided a baseline of data for the possible synthesis of studies, making use of each instrument separately (1) to raise more detailed hypotheses of learning environments, (2) to explicate methodological issues, and (3) for the constructive consideration of "unintended" effects of curriculum. (The learning environment instruments and data from the study are included in appendixes.) (Author/RC)

Research Techniques in Biomechanics.

Pub Date 75

Note—5p.; Paper presented at the Southern District of the American Alliance for Health, Physical Education, and Recreation (San Antonio, Texas)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Biochemistry, \*Biology, Electromechanical Aids, Electronic Equipment, Instrumentation, \*Measurement Instruments, Measurement Techniques, \*Mechanics (Physics), Motor Development, \*Motor Reactions, Physiology, Psychomotor Skills, Research Methodology

Identifiers—\*Biomechanics

Biomechanics involves the biological human beings interacting with his/her mechanical environment. Biomechanics research is being done in connection with sport, physical education, and general motor behavior, and concerns mechanics independent of implements. Biomechanics research falls in the following two general categories: (1) that specific research which contributes to the body of knowledge of motor behavior based on biomechanical type problems, and (2) the service components biomechanics provides to other subdisciplines for delineation of movement. The methods and general instrumentation techniques utilized in biomechanics research include (1) cinematography or high speed film (to record and analyze movement); (2) electronic transducers (to convert mechanical displacement, velocity, or acceleration into electrical voltage); (3) electrogoniometers (used to measure joint displacement); (4) anthropometry (technique of measuring length, girths, and widths of various part of the human body); and (5) electromyography (EMG) technique of investigating electrical activity associated with muscular contraction). Cracraft, Joe D.

The Effects of Exercise on the Firing Patterns of Single Motor Units.

Pub Date May 75

Note—18p.; Paper presented at the Annual Meeting of the American College of Sports Medicine (New Orleans, Louisiana, May 22-24, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Athletics, \*Biochemistry, \*Exercise (Physiology), \*Motor Reactions, Muscular Strength, Physical Activities, Physical Fitness, Physiology, \*Statistical Studies

Identifiers—\*Firing Patterns

In this study, the training effects of static and dynamic exercise programs on the firing patterns of 450 single motor units (SMU) in the human tibialis anterior muscle were investigated. In a six week program, the static group (N=5) participated in daily high intensity, short duration, isometric exercises while the dynamic group (N=5) participated three times weekly in low intensity, moderate duration, isotonic exercises. The control group (N=4) did not participate in an exercise program. Pre- and post-test SMU firing patterns were recorded by means of 26 gauge tygon coated monopolar needle electrodes. In order to assess the degree of impermissibility or periodicity of motor unit firing, an interspike interval (ISI) longer than 260 milliseconds was defined as a lapse in motor firing. An individual ratio of normal ISIs to lapses for each SMU three minute recording run and the mean ratio for each subject (MLR) were calculated. Significant differences were found between MLR pre- and post-test values for both groups (p less than 0.05). These results indicate that changes in motor unit firing can be produced by specific exercise programs. High intensity, short duration exercises

produce more variable than normal firing rates, and low intensity, long duration exercises produce firing rates less variable than normal. (Author/BD)

Williams, Joseph H.

Training in Interaction Analysis as a Means of Staff Development for Master Teachers, Classroom Teachers and Paraprofessionals. Maxi II Report.

Pub Date 15 May 75

Note—197p.; Submitted in partial fulfillment of the requirements for the degree of Doctor of Education (Nova University)

EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage

Descriptors—\*Behavioral Objectives, Behavior Development, Behavior Rating Scales, \*Classroom Communication, Cooperating Teachers, \*Inservice Programs, \*Inservice Teacher Education, Learning Processes, Paraprofessional School Personnel, Questionnaires, Staff Improvement, \*Student Teacher Relationship, Teacher Behavior, Teacher Improvement

The purpose of this study was to test the effectiveness of an inservice staff development program in promoting change in patterns of teacher-child interaction. The program used (1) the combined techniques of systematic analysis of teaching behavior with the Behavior Ratings and Analysis of Communication in Education (BRACE) observation system, (2) self-confrontation through videotapes, and (3) joint conferencing between a teacher and a person acting in a staff development capacity to produce changes in adult-child communication which are related to the goals of developing thinking, self-activated learners. Fifteen subjects participated in the study. The treatment was effective in producing increases in the amount of adult communication dealing with logic and with communication which supports learning (p less than .059). The treatment was also effective in producing increases in the amount of child initiated communication (p less than .059), of child communication dealing with logic (p less than .059), and of the total volume of child communication. In addition, the participants perceived the program as helpful and worthwhile. The results of this study suggest that this type of staff development and program to change adult-child patterns of interaction should be continued and implemented on a wider basis. (Sixteen appendixes are attached which include letters, questionnaires, and other material relevant to the study.) (Author)

Alternative Teaching Strategies; Helping Behaviorally Troubled Children Achieve. A Guide for Teachers and Psychologists.

Pub Date 75

Note—217p.

Available from—Research Press, 2612 N. Mattis Avenue, Champaign, Illinois 61820 (No price quoted)

Document Not Available from EDRS

Descriptors—\*Academic Achievement, Academic Failure, \*Behavior Problems, Elementary Education, Elementary School Students, \*Socially Deviant Behavior, Teaching Guides, \*Teaching Methods, \*Teaching Procedures

This book provides (1) specific information about overt classroom behaviors that affect or reflect academic success or failure, and (2) information and suggestions about alternative teaching strategies that may be used to increase behavioral effectiveness and subsequent academic achievement. The focus of the book is on specific behaviors, behavior groupings, and total behavior patterns of children which, through a long series of research projects, have been shown to describe and distinguish successful and unsuccessful students throughout the elementary school grades. This focus is coupled with extensive step-by-step descriptions of alternative teaching strategies that can be practically incorporated into plans for each child or groups of children in the classroom. The first chapter, concerning the proportion of children displaying disturbance in school, provides the teacher, and those with responsibility to help the teacher, with a realistic picture of how many children are having difficulty coping in the classroom. Each of the next 10 chapters provides extensive and detailed descriptions of specific, feasible teaching alternatives for working with students displaying each of the achievement-re-

lated behavior dimensions mentioned in Chapter One. The focus of the last chapter is upon common elements among teaching strategies. In this chapter previous discussions of alternative teaching strategies are reviewed. (RC)

**Toward a Technology for Humanizing Education.**

Pub Date 74

Note—123p.

Available from—Research Press Company, 2612 North Mattis Avenue, Champaign, Illinois 61820 (No price quoted)

**Document Not Available from EDRS**

Descriptors—Humanism, \*Humanistic Education, \*Humanization, Human Relations, Individualized Instruction, \*Individualized Programs, Student Attitudes, Student Behavior, Student Participation, \*Student Teacher Relationship, Teacher Attitudes

This book presents both a rationale for humane classrooms and specific processes for developing them. In each chapter, a specific dimension of humane interpersonal relationships is presented, followed by an instrument for assessing the dimension and a study which both validates the dimension and illustrates how local investigators could employ it in their schools. Three technologies which can provide data for investigating the humanness of the interpersonal processes in a classroom through these dimensions are discussed. The first technology, interaction analysis procedures which describe quantitatively the verbal components of classroom interaction, is discussed in chapter 2. The second technology, discussed in chapter 3, was developed to delineate seven types of cognitive functioning in a classroom. The third technology discussed in chapters 4-6, is related to the assessment of levels of specific interpersonal conditions which determine whether an interaction is facilitating or retarding. The three critical dimensions of such interpersonal relationships are described as empathy, congruence, and unconditional positive regard. Chapters 7 and 8 present scales for measuring interpersonal relationships in terms of more global dimensions. The book also presents the central ideas and practices through which educators could work together toward creating a national thrust for the development of programs for humanizing classrooms. (BD)

**Document Not Available from EDRS**

Descriptors—\*Behavioral Objectives, \*Behavior Change, \*Behavior Development, Behavior Patterns, \*Behavior Problems, Conditioned Response, Reactive Behavior, \*Student Behavior, Teacher Behavior, Teaching Guides

This book is a teacher's guide for dealing with and modifying children's behavior. Chapter one discusses behavior and how it is strengthened, weakened, or shaped by consequences of the behavior (rewarding, ignoring, punishing). Chapters two and three present techniques which can be used to strengthen desirable behaviors and weaken undesirable behaviors. Chapter four offers hints and tricks of the trade to be used in shaping behavior and in behavior maintenance. Chapter five presents a sample experiment used to modify a hypothetical student's undesirable behavior. Chapter six first gives some examples of children with problems and then discusses methods of dealing with and solving these problems. Chapter seven is an outline summary of the main points discussed in the book. Three appendices are attached. Appendix A is a three part survey quiz on the material presented in the book; Appendix B presents a classroom point system which the teacher may institute in order to modify students' behavior; and Appendix C is a list of "pay-offs" for school-aged children. **Modifying Classroom Behavior; A Manual of Procedure for Classroom Teachers.**

Pub Date 74

Note—95p.

Available from—Research Press, 2612 North Mattis Avenue, Champaign, Illinois 61820 (No price quoted)

**Document Not Available from EDRS**

Descriptors—\*Behavior Change, \*Behavior Development, \*Changing Attitudes, Contingency Management, \*Negative Reinforcement, \*Positive Reinforcement, Social Reinforcement, Student Behavior

This book for teacher trainees and practicing teachers contains programmed lessons that are designed to explain the theory and techniques of classroom behavior modification. The first part deals with basic principles of behavior modification and includes chapters on how behaviors are learned, why they are maintained, and how they can be eliminated. It also contains a chapter on measuring behavior. The second part focuses on modifying classroom behavior. The chapters are divided into sets, each of which represents a different concept important to the chapter focus. Each set begins with a narrative designed to present new material. The programmed items were selected to give feedback to the reader regarding understanding of the material. In addition, the programmed items, or frames, incorporate classroom application of the concepts. The reader should respond to each of the items prior to checking the answer. Many of the sets contain exhibits which are excerpts from actual research done in the field of behavior modification. A list of suggested reading is included for those interested in learning more about the procedures and applications of behavior modification. (RC)

**New Tools for Changing Behavior. Revised.**

Pub Date 74

Note—147p.

Available from—Research Press, 2612 North Mattis Avenue, Champaign, Illinois 61820 (No price quoted)

**Document Not Available from EDRS**

Descriptors—\*Behavioral Objectives, Behavioral Science Research, \*Behavioral Sciences, \*Behavior Change, \*Behavior Development, \*Behavior Problems, Behavior Rating Scales, Retarded Children, Socially Deviant Behavior

This book deals with the science of behavior and how it can be used humanely for positive and direct change. It was written for a mass audience, including parents, persons with elderly family members, the helping staff in clinical situations, college students, and teachers in training. Part 1 discusses the science of behavior and includes chapters on the basic behavioral law of reinforcement, subprinciples of reinforcement (timing, pairing of verbal and physical rewards, scheduling, and shaping), and observing behavior. Part 2 deals with the clinical application of these behavioral laws, and includes chapters discussing the behaviorally disordered child, the retarded child, adolescents, adults, punishment, and case studies illustrating specific applications of positive behavior management. "Question frames" have been inserted throughout the text to give the reader feedback on how well he/she is reading and understanding the material. They consist of a statement in which one or more blank spaces appear for the reader to fill in based on the material presented in the one or two preceding paragraphs. The book also suggests a list of six books for further reading. (BD)

**Pain and Joy in School.**

Pub Date 74

Note—71p.

Available from—Research Press, 2612 North Mattis Avenue, Champaign, Illinois 61820 (No price quoted)

**Document Not Available from EDRS**

Descriptors—Elementary Secondary Education, \*Humanistic Education, Poetry, \*School Role, \*Short Stories, \*Student Attitudes, \*Student Teacher Relationship

This book deals with how schools can generate experiences which are both painful and joyful to students. It endorses a kind of schooling which will teach students love of life, pursuit of truth, and human compassion. The book presents both the joyful and painful experiences of students through short stories and comments by both children and parents. The first section, on painful experiences, contains 18 stories, dealing with such topics and experiences as indifferent teachers,

physical punishment, violent teachers, experiencing shame, learning not to be yourself, having your feelings ignored, rules that dehumanize, and uncaring teachers. The second section, which deals with joyful experiences, contains 15 stories, on topics and experiences such as mutual respect, sensitive teachers, having the courage to try something new, a principal who cares, a teacher who stimulates learning, interested parents, and loving teachers. (BD)

**Writing Behavioral Contracts; A Case Simulation Practice Manual.**

Pub Date 75

Note—87p.

Available from—Research Press, 2612 North Mattis Avenue, Champaign, Illinois 61820 (No price quoted)

**Document Not Available from EDRS**

Descriptors—\*Behavioral Objectives, Behavior Chaining, \*Behavior Change, Case Studies, \*Contingency Management, Counseling, \*Performance Contracts, \*Reinforcement, Simulation, Writing Exercises

This book on writing behavioral contracts is structured to give the reader an opportunity to use contingency contracting in a situation that resembles the real world. Contracting is a technique used to structure behavior counseling by making each of the necessary elements of the process so clear and explicit that they may be written into an agreement for behavior change that is understandable and acceptable to everyone involved. Contracting is also a means of scheduling the exchange of positive reinforcements between two or more persons. The reader is introduced to the basic principles of contracting through the use of a sample case, and through exercises that will enable him/her to write behavioral contracts. Some elements of these exercises are left to chance. The exercises are designed so that sometimes things will go well and at other times chance will cause the reader to change his/her tactics. The last unit of the book contains detailed strategies collected from several programs that use contracting extensively. (RC)

**Developing Student Discipline and Motivation; A Series for Teacher In-Service Training.**

Pub Date 75

Note—68p.

Available from—Research Press, 2612 North Mattis Avenue, Champaign, Illinois 61820 (No price quoted)

**Document Not Available from EDRS**

Descriptors—\*Behavior Change, \*Behavior Patterns, Classroom Environment, \*Discipline, Negative Reinforcement, Positive Reinforcement, \*Reinforcers, Social Reinforcement, \*Student Motivation

This book contains a widely used method for structuring learning in a positive environment. The material is presented in a workshop format. Each unit should be read and worked on for one week; the teachers should then meet to exchange ideas. Unit 1 discusses behavior, and informs the reader that if he/she wants to influence a change in behavior, he/she must first observe what is sustaining the behavior at its present rate. In unit 2 the reader is given instructions for observing his/her own behavior. Unit 3 presents ways to analyze the classroom environment, and focuses on methods of presenting tasks to children and their effect on responses. The basic principles of human behavior is the subject of unit 4. Unit 5 discusses the phases necessary to influence behavior. These phases include (1) an analysis of the situation, (2) a strategy for change if any is desired, and (3) an evaluation of what has worked and what else is needed. Using social reinforcers is the topic of unit 6 while unit 7 describes how to use nonsocial reinforcers. The last unit contains a checklist to use if the results are not satisfactory after attempting behavior change. An appendix containing critical issues for discussion is also included in this book. **The Most Important Five Minutes in Any Lesson (or Workshop).**

**Pub Date Nov 75**  
**Note—22p.**

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
**Descriptors—**\*Effective Teaching, \*Lesson Plans, \*Planning, Teaching, Teaching Methods, Teaching Procedures, \*Teaching Skills, \*Teaching Techniques

There are several critical five minute periods in any lesson, and it is important for teachers to know how to use them. No matter how long a period may be, the most important five minutes, and no more, should be written out. This writing forces the teacher to put down on paper only the most important items. The first five minutes of a period should be extemporaneous. Any teacher who has carefully written out or thought out the most important five minutes of a lesson is in a good position to look over the group and decide where to begin. The last five minutes of every encountered session should be used to sum up what has been done and to clarify future expectations. The ability to establish some sort of human contact with the class before beginning the professional contact is a sign of a good teacher. The teacher should look around for a friendly face to focus in on before beginning the lesson. If a teacher does a good job in presenting a lesson to at least one learner, there is a great possibility that the rest of the class will catch the main idea. The teacher who looks around for more friendly faces during the five minute warmup will find the class more receptive to what the teacher has to present. Staying around for at least five minutes after the end of a lesson provides the teacher with an opportunity for a followup between self-fulfilling teachers and aggressive learners. (RC)

**Descriptors—**\*Behavioral Objectives, Health Education, Instructional Materials, \*Workbooks, Writing Skills

**Identifiers—**\*Learning Modules, Nursing Education

This document contains outlines of work sessions on how to write better objectives and a workbook to accompany these sessions. The first section of the document discusses the following seven steps to be observed in writing better behavioral objectives: (1) write a simple behavioral objective; (2) edit your verb to make it an action verb; (3) revise your objective to make it learner-centered; (4) remove ambiguities to attain operational clarity; (5) chop-up the criteria into degrees of excellence; (6) pinpoint the conditions under which the learner will perform; and (7) ask a total stranger for his/her opinion of your objectives on steps 1-6 above. Three examples are presented in which these seven steps have been applied to a general objec-

tive in order to better define it. The first section also discusses applying these steps to allied health modules. The second section discusses the application of the material presented in the first section to a course outline. It covers gathering and classifying materials, determining categories and subcategories, and evaluation. The last section is a workbook which applies the seven steps outlined in the first section to nursing and health-related fields. (BD)

**Identifiers—**\*Teacher Corps

This Teacher Corps program at Michigan State University is attempting to improve the quality of preservice teacher education within a competency based framework. The program emphasizes consistent use of instructional design and the instructional processes of assessment, goal setting, determining objectives, developing teaching strategies, and evaluating. During this two-year program, students spend 50 percent of their time in an internship at a Lansing elementary school and 50 percent of their time in completing degree requirements. Additionally, the interns receive field-based bilingual training and are involved in a variety of community based activities. In the spring of 1973, 30 interns were selected for this program from populations which included Mexican-Americans and/or Spanish-speaking, blacks, American Indians, and economically disadvantaged whites. On examining the academic achievement of these interns, it was found that the mean grade point average for these Teacher Corps interns was the same as for the seniors in the College of Education at Michigan State University. Fifty percent of the minority interns had grade point averages equal to or better than the average for the seniors in the College of Education. The nonminority interns had the highest grade point averages of any of the groups in this comparison. When the interns were grouped by sex, the male interns appeared very similar to the minority interns, while the females closely resembled the nonminority interns. (BD)

**Guide for a Student Teacher Training Program.**

**Pub Date 17 Oct 74**

**Note—56p.; Paper submitted in partial fulfillment of the requirements for the degree of Doctor of Education (Nova University)**

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors—**Cooperating Teachers, Elementary Education, Guides, \*Practicums, Preservice Education, Student Teachers, \*Student Teaching, Teacher Education

The purpose of this practicum was to provide a planned procedure for the student teacher training program at Schertz Elementary School during April and May of the 1973-74 school year. The preceding teacher training program contained an excessive number of weaknesses, primarily involving lack of direction for the student teacher and lack of self-evaluation procedures. It was hypothesized that a set of guidelines could improve the efficiency of this program. These guidelines were designed to give the desired direction without hindering the initiative and creativity of those involved. Evaluation of this practicum was based on three sources of information. First, cooperating teachers were asked to compare the student teacher training program before and after the guidelines were put into use. Second, questionnaires about the guidelines were answered by all participants. The third source of information involved observation by the author, including analysis of checklists provided within the framework of guidelines, as well as observation of participants in action. Increased efficiency and effectiveness were indicated by all three sources; the practicum was, therefore, deemed successful. (Author/BD)

**Descriptors—**\*Health Education, Health Personnel, \*Health Programs, Policy Formation, Responsibility, \*School Health Services, \*School Nurses

The purpose of this handbook is to assist administrators and nurses in planning, organizing, and implementing an effective total school health program. Its contents are divided into three sections and seven appendixes. The first section discusses the functions of the administration, including those of delineating responsibilities, formulating goals and objectives, and developing policies for the school health program. Section 2 concerns the functions of the school nurse. Some of the topics discussed are the major duties and responsibilities of the nurse in the school health program, the nurse's role in health instruction, the nurse's responsibility for the school environment, and continuing education and professional development. Section 3 contains 11 sample forms and procedures for use by the nurse and/or health administrator. The appendixes contain various guidelines concerning school health care, requirements for school nurse certification, charts, reports, a list of resources, and a bibliography. (RC)

**Descriptors—**Course Evaluation, \*Guides, Humanism, \*Humanistic Education, \*Human Relations, \*Inservice Teacher Education, Teacher Behavior, Teacher Improvement

This is a guide written to detail a humanistic philosophy of education. It is the product of a 12-week training program for experienced K-12 teachers. The training program consisted of a basic movement program, regular lectures and discussions of human relations (relating, loving, learning), and practical workshops with simulated classrooms as an environment. The participants were selected from a population of volunteer teachers. Following the training program, participants returned to their classrooms in the beginning of the fall 1974 semester prepared to put into operation their training experiences. Several forms of evaluation were chosen to measure teacher performance, including regular observations, teacher check lists, and student evaluations. Review of evaluations provided data for a review of the guide. On completion of the project, it was proposed to have a teacher training course built around the guide to be adopted in at least one college and to pursue the possibility of further adoptions. This project was carried out satisfactorily. The humanistic philosophy of education, as detailed in the guide, and the training program produced productive and effective teaching experiences for participant teachers and their pupils. A course in human relations for teachers—designed around this guide—was adopted at Monmouth College, Department of Education, West Long Branch, New Jersey. (Author/BD)

**Descriptors—**\*Behavior Change, Grade 7, \*Human Development, Junior High Schools, \*Junior High School Students, \*Secondary School

Teachers, Student Attitudes, Surveys, \*Teacher Behavior, Teacher Improvement

The purpose of this practicum was to make secondary school teachers more aware of their own behavior with children as individuals and to bring about change in a direction perceived by teachers, students, and the practicum designer to be positive rather than negative. One hundred twenty grade 7 students were selected to make up the Mentor Program group (experimental) and 120 grade 7 students were identified as the Comparative group (control). The Mentor Program children were involved with faculty Mentors during the school year. The Comparative group received no special kind of treatment. Throughout the school year the Mentors and children met as individual and group needs dictated. Each of the 240 students was administered the Student Attitudinal Instruments in the fall (pretest) and spring (posttest). The responses were then analyzed. The Mentors monitored their own behavior for negative acts. Questionnaires were also developed for the student and faculty groups, and the responses were analyzed. The investigations showed that the teacher group involved in the program improved their classroom behavior and that the child's perception of the teacher also improved. (RC)

Identifiers—Virginia (Virginia Beach), \*Virginia Beach 45 15 Pilot Program, Virginia Beach Schools

The School Board of Virginia Beach has conducted a two-year pilot program focusing on elementary school students who attend school 45 days and break 15 days year round. Four principal questions were proposed and researched by various independent agencies: (1) What effect does the 45-15 cycled-attendance year-round operation have on pupil achievement in reading and mathematics? (2) What effect does the 45-15 cycled attendance year-round have on the way pupils feel about school? (3) What effect does the first grade entry under the 45-15 calendar have on reading readiness? (4) What effect does experience with the 45-15 cycled attendance year-round plan have on parent attitudes? In addition, serious attention has been given to the operational and capital costs of the 45-15 experimentation. (BJG)

Identifiers—Australia, Australia (Victoria), Australian Scholastic Aptitude Tests, New Zealand, Project Tertiary Education Entry, United Kingdom, United States

The problems associated with the transition from the secondary level to the tertiary level in

education have given rise to many surveys, analyses of statistics, research projects, reports and literature reviews. Much has been written on topics such as testing, selection, prediction and wastage, with findings and conclusions which appear to have varying degrees of relevance to contemporary problems in Victoria. This literature review does not attempt to discuss or even list every article ever published in this area. It does attempt to define a limited area in terms of those aspects which seem more relevant to the circumstances of the present problem. Some early studies are discussed in relation to the changing perspectives and the historical developments in methods of analysis and suggested solutions. Overseas studies have been selected when their findings have been general and transferable to the current Victorian situation, or when they have appeared to influence other important investigations. Although some non-cognitive studies are reviewed, the general emphasis is on studies dealing with cognitive factors in testing and selecting. (Author/RC)

**Edumetric Validation of Cognitive Style Map Items and Elements: I.**

Note—19p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Achievement Gains, \*Cognitive Measurement, Comparative Analysis, Higher Education, \*Individual Differences, Individualized Instruction, Measurement Techniques, Norm Referenced Tests, \*Test Reliability, \*Test Validity

Identifiers—\*Cognitive Style Mapping, Edumetric Properties of Tests

The differences between edumetric and psychometric uses of tests were described and the relevance of the edumetric dimension for measuring student learning gains, especially in the context of individualized instruction involving multiple learning mode options, was clarified. Also, the procedures for edumetric reliability and validation assessment were described. The procedures were applied to two college classes, Speech Communication and World Civilizations. The results yielded strong evidence for the edumetric reliability and validity. Extremely strong evidence was provided by the reliability and validity coefficients estimated for the entire population. As part of the ongoing program of reliability and validity assessment of the Cognitive Style Mapping (CSM) items and elements, evidence was provided for the edumetric reliability and validity of CSM and various fruitful implications for further study were considered. Descriptors—\*Children, \*Cognitive Processes, Elementary School Students, \*Error Patterns, Memory, \*Pictorial Stimuli, Verbal Development, \*Verbal Stimuli

Identifiers—Rebus, Verbal Encoding

If older children automatically label pictorial stimuli, then their performance should be impaired on tasks in which such labeling would increase the error rate. Children were asked to learn pairs of verbal or pictorial stimuli which, when combined, formed a different compound word (BUTTER-FLY). Subsequently, a false recognition test that included the compound was administered. The error data indicated that verbal labeling occurred only among the older children. (Author)

Identifiers—Computerized Tests, \*Navy

The potential usefulness of computerized tests for supplementing paper-and-pencil measures for predicting job performance abilities was the objective of a series of studies. This report covers the initial test development and analysis research. Eight computerized tests were constructed to measure five personal attributes identified in previous research as being important for job performance. The experimental battery also contained nine previously developed tests. The battery was administered to 385 enlisted personnel and test results and interrelationships were analyzed in conjunction with operational written test and biographical variables. (NTIS)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III, Georgia

During 1973-74, ESEA Title III funds became available for the development of a "Model Comprehensive Needs-Based Guidance System and Modular Instructional Strategies" for the state of Georgia. The proposal called for a new conceptualization of guidance; one that derives its goals and objectives from the developmental needs of students. There were six major objectives of the project: (1) to develop a comprehensive needs-based guidance system, (2) to develop a comprehensive list of process-related competencies required of counselors, (3) to develop a modular delivery system for the training of counselor competencies, (4) to field test the competency-based instructional modules, (5) to field test the efficiency of a needs-based guidance system, and (6) to develop a competency-based system for the certification of counselors. A tentative schematic representation of the model is appended. (Author/RC)

**Evaluation and the Social Science Interdisciplinary Course.**

San Francisco Univ., Calif. Office of Institutional Studies.

Pub Date Nov 72

Note—22p.; Paper presented at the Annual Convention of the Community College Social Science Association (2nd, Los Angeles, Calif., November 2-4, 1972)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Achievement, \*Behavioral Objectives, Course Evaluation, Curriculum Evaluation, Evaluation, \*Evaluation Methods, \*Interdisciplinary Approach, Models, Program Evaluation, \*Social Sciences, Student Evaluation, Teacher Rating, Teaching Techniques

The role of educational evaluation is discussed in relation to interdisciplinary courses in social science. How one evaluates student achievement, a course or an instructor can be defined by means of defining behavioral objectives. That is, the expressed outcomes of the particular course can be expressed as the goals to be met by students and on the courses being taken or taught. Some suggestions are given to aid in establishing these behavior goals. It is suggested that the use of these behaviorally defined objectives will

develop a more independent learning and thinking student, as well as enhance the value of student achievement, curricular design and instructional skill. (DEP)

Identifiers—Minnesota Satisfaction Questionnaire, Minnesota Satisfactoriness Scale

The primary purpose was to determine the effectiveness of distributive and office education programs at the secondary level in North Carolina. The study ascertained how satisfied graduates of these two program areas were with their present jobs and how well they were performing in their jobs as perceived by their respective employers. This longitudinal study consisted of two parts: part one embraced six occupational education programs areas and was completed in 1972; part two was based on the same population of the 1972 study in regard to distributive and office education graduates and their employers and was completed in 1974. Identifiers—Gallaudet College, Model Secondary School for the Deaf, \*Project Structured Language Improvement

This report outlines the formative evaluation of the first lesson in the Structured Language Improvement Project (SLIP) - an English language instructional program being developed at the Model Secondary School for the Deaf, Washington, D.C. The theme of this first lesson is the distinction between the simple present (e.g. He eats lunch every day.) and the present progressive (e.g. He is eating lunch right now). Significant gains in terms of ability to correct mistakes in usages of the two verb forms were found for three of the four tested students. Formats and activities which were most and least successful in terms of capturing student interest and/or helping students meet the objectives were identified. The instructional development team concluded that this language learning program is feasible for use in a school for the deaf. The test instruments used appear in the appendices. (Author/DEP)

gitudinal Studies, \*Mathematical Models, Matrices, \*Measurement Techniques, Predictor Variables, Scores, Standard Error of Measurement, Statistical Analysis, Testing Problems, \*Test Reliability, True Scores

Identifiers—Academic Growth Measurement, Quasi Markov Simplex Model, \*Simplex Models, Statistical Variance

Forming a sequence covering the various aspects of the simplex model, four articles are presented here under the following titles: "A Simplex Model for Analyzing Academic Growth", "Analyzing Ratings With Correlated Intrajudge Measurement Errors", "The Correlation of States With Gain", and "The Reliability of College Grades from Longitudinal Data". The most important finding of this study is that a simplex model which allows for measurement error, fits a variety of longitudinal academic data quite well. This allows for attenuation corrections when only one measure is available at each time. More importantly, the results suggest that the commonly used split-half or parallel form procedures for estimating reliability may typically yield overestimates or reliability due to "method" variance, i.e., nonindependent measurement errors resulting from the use of closely similar item types. The simplex model appears less subject to this problem because both item format and content change over time. It has been demonstrated that accurate corrections for attenuation are essential to a study of the determinants of academic growth. (Author/RC)

Identifiers—Scotland, \*University of Edinburgh

Evaluation plays an important role in the academic career of students and instructors. It is a concept that is repeated throughout the academic year and one that determines future roles and placement of students. This report is a summary of the findings of the first two years of a five-year research study of evaluation conducted at Edinburgh University in Scotland. The methods of evaluation and the intended uses of results are varied and many; for this reason the study focuses on the process of requirements for the final honors paper in a science course. It attempts to establish how different students and teachers react to the evaluation methods, what are the effects of these methods on teaching and courses, what individual students' reactions are to the examination process and how they prepare for it. The majority of the information was collected by means of questionnaires for both students and staff. The appendix contains information on how data was collected and some key questions used in the student interviews. (DEP)

Literature Reviews, Minority Groups, \*Nature Nurture Controversy, Political Issues, Predictive Validity, Racial Differences, Standardized Tests, \*Test Bias, \*Testing, Testing Problems, Test Validity

Numerous strategies have been used throughout the years to test cultural groups. This paper grew out of the need to find and use standardized tests that would depict accurately the performance of various cultural groups in America. In order to make judgments about performance, it is wise to examine the theoretical structure from which most of the existing tests were developed. Accordingly, the paper traces the development of the various strategies and theoretical structures, explaining why they have met with limited success. Through a paradigmatic analysis of the literature, it identifies the existing testing paradigm as a monocultural one, and it relates the various efforts to produce a culture-fair test. The paradigmatic analysis is extended to encompass a proposition, based upon the coalescence of the scientific (theoretical and measurement) and policy contexts. The analysis suggests a procedure by which tests can be developed and/or evaluated if they are to depict accurately the performance of various cultural groups. (Author)

Identifiers—\*Air Force Academy

Mathematical models of judgment policy are compared in evaluating 625 Cadet Performance Reports during a single rating cycle. Linear and nonlinear regressions are used to describe the cues most important in determining overall ratings. In addition, performance rating policy is compared with stated policy for each of forty cadet raters. In general, the findings support current literature in judgment policy-capturing. Cadet raters are internally consistent in applying their individual policies to cadet ratings. The relative importance of the ten cue variables varies significantly between raters while the aggregate data allow overall ratings to be described with only ten of the cues. There is no difference between the linear and nonlinear models in the amount of variance explained. The latter model does provide considerable insight into the composition of the overall ratings in terms of cue variable interactions. Finally, cadet raters' stated policies differ greatly from their actual policies. Recommendations are proposed to provide a more consistent interpretation and application of the Cadet Performance Report rating system. A logical extension of this study includes the implementation of a weighting scheme and a follow-on study to further validate the present findings. (NTIS)

Cooperation, Student Attitudes, \*Student Centered Curriculum, Student Evaluation, Student Motivation, Summative Evaluation, Testing

The purpose of this three-year evaluation was to determine the effects of a newly designed curriculum for early adolescents. From a pool of 600 applicants, students were randomly assigned to the new curriculum school and to traditional schools curriculum. A number of measures of the implementation of the curriculum and its effects on students were made. Findings on the effects of an innovative curriculum on a student-perceived learning environment, student self-concept, parental reaction, and the usefulness of randomization in formative and summative evaluation are analyzed and discussed. Descriptors—\*Adults, Anxiety, Certification, \*Cognitive Ability, Essay Tests, Formative Evaluation, \*Instructional Programs, Multiple Choice Tests, Occupational Tests, Program Effectiveness, Testing, \*Test Wiseness

This paper reports the findings of an attempt to improve test-wiseness (TW) through direct instruction in selected test-taking strategies. TW was defined as "a cognitive function, subject to improvement through both general exposure to a wide variety of test items, and specific training in test-taking skills." The total investigation included: development and validation of a test instrument to measure TW; evaluation of the level of TW in an adult occupational group; program development and refinement; investigation of the psychological correlates of TW; and, formative and summative evaluations of a TW program. A program was developed to provide training in responding to multiple-choice and essay test items. The program combines instruction and measurement in a workbook format, with diagnostic testing and some branching. It was designed for use by adults, and focuses on strategies applicable to a wide variety of occupational or licensing examinations. Rules and strategies are emphasized, rather than practice in specific item types. Included are rules related to accuracy of item interpretation, deductive reasoning to eliminate absurd, similar or contradictory options, and cue-using strategies. A complex, multi-sample

design was used for formative evaluations and additional evaluations will be completed. General findings to date have shown an increase in TW both on an internal and an external criterion and a decrease in test-related anxiety, after use of the program. Trends for increased consistency in test performance over time were noted. (Author/RC)

Contributions to Objective Measurement and Evaluation of Trainee Competency.

Pub Date Oct 74

Note—33p.; Paper presented at the Conference of the Military Testing Association (Oklahoma City, Oklahoma, Oct., 1974)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Computer Programs, Goodness of Fit, Item Analysis, \*Mathematical Models, Matrices, \*Measurement Techniques, \*Military Personnel, \*Military Training, \*Personnel Evaluation, Probability, Statistical Analysis, Systems Development, Trainees

Identifiers—Binary Measurement Model, \*COMET, Frequency Ratio Method

The purpose of this paper is to lay a basis for and discuss the components of a system, called COMET, designed to objectively measure and evaluate the competency of trainees in military training enterprises. COMET is an acronym for "Computerized Objective Measurement and Evaluation of Trainees." These goals will be accomplished by: (a) describing what the author means by the terms "measurement," "objectivity," and "evaluation," by indicating systems antecedent to COMET, and describing the objective Binary Measurement Model (BMM) used in the COMET system, (b) deriving and illustrating a new procedure for estimating one of the parameters and fit of the BMM model, called the Frequency Ratio Method (FRM), and (c) specifying the component subsystems, and their functions, of COMET as well as its goal, objectives and practical problems associated with its implementation. A detailed numerical example is provided to facilitate understanding of COMET's mathematical and statistical aspects. (Author)

Identifiers—Least Squares Analysis, Ridge Regression Analysis, Variance (Statistical)

An "undesigned" experiment is one in which the predictor variables are correlated, either due to a failure to complete a design or because the investigator was unable to select or control relevant experimental conditions. The traditional method of analyzing this class of experiment—multiple regression analysis based on a least squares criterion—gives rise to a number of interpretation problems when the effects of individual predictors are to be assessed. Some difficulties and their effects on the quality of information are discussed. Two methods are described in this report for improving the information obtained from the undesigned human factors experiment. One is to collect more information at a few data points selected at locations that improve the orthogonality of this non-orthogonal design. The other is to use a ridge regression analysis in place of the conventional least squares analysis, in which a slight bias is introduced into the data in such a way that the combined bias and variance error is smaller than the variance error of unbiased estimates from the least squares analysis. The ridge analysis produces more stable and meaningful regression coefficients. Computational aids—both references and complete computer programs—are supplied. (Author)

Identifiers—\*Student Attribute Study

One of a series of reports from a larger investigation entitled "The Student Attribute Study," the present paper discusses classroom observation data collected in this study concerning the interactions between teachers and students who had been previously identified as objects of teacher attachment, concern, or rejection. The Student Attribute Study as a whole was designed to follow up on earlier work relating teacher expectations and attitudes to differential teacher behavior with different kinds of students. In part, it has been a replication and extension of previous work identifying important expectations and attitudes that teachers hold and relating these to differential treatment of different students. In addition, it represents a movement in focus from identifying differential teacher-student interaction patterns related to teacher attitudes and expectations toward investigation of differential student attributes and behavior which presumably trigger these differential teacher expectations and attitudes in the first place. Thus, in addition to identifying differential teacher-student interaction related to teacher attitudes and expectations, the Student Attribute Study tries to answer the question "What student attributes do teachers notice and use in forming expectations and attitudes?" An Investigation of Bias in a Criterion-referenced Test.

Note—49p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Achievement Tests, Comparative Analysis, \*Criterion Referenced Tests, Elementary Education, Elementary School Students, \*Factor Analysis, Factor Structure, Multiple Regression Analysis, \*Negro Students, Norm Referenced Tests, Reading Tests, Standardized Tests, \*Test Bias, Testing Problems, Test Interpretation

Identifiers—California Achievement Tests, Contingency Analysis, \*Perspective Reading Inventory, Short Form Test of Academic Aptitude

Scores on the Prescriptive Reading Inventory, the California Achievement Tests, 1970 Edition, the the Short Form Tests of Academic Aptitude were obtained for black pupils and representative samples of pupils in grades 1-3. These scores were compared in an attempt to assess bias in the Prescriptive Reading Inventory, a criterion-referenced achievement test. Using factor analyses, contingency analyses, and regression analyses, interrelationships among the reading scores on the two tests were compared. It was hypothesized that the norm-referenced test would show more bias as indicated by differential relationships among scores. The regression analyses indicated some bias in all the tests used. The contingency analyses, made of the CRT only, suggested little bias. The factor analyses suggested parts of the CRT were not biased but the remaining parts and the NRT measures were. In all cases, the amount of bias appeared small. (Author)

Descriptors—\*Elementary Secondary Education, Human Relations Programs, Inservice Teacher Education, Principals, \*Program Evaluation, \*Released Time, School Schedules, Staff Improvement, \*Staff Meetings, \*Teacher Attitudes, Teachers

Identifiers—Minneapolis Public Schools, Minnesota (Minneapolis), \*Tuesday Released Time Program

During the 1973-74 school year, elementary and secondary students in Minneapolis were released from their classes every Tuesday at 2:00 to allow staff members to participate in staff development activities. A variety of different types of meetings were distributed throughout the 37-week schedule: building meetings, citywide meetings, curriculum meetings, human relations meetings, etc. This report summarizes the overall findings. An evaluation strategy was developed with two major considerations. First, it would provide a vehicle for systematic planning and documentation of released time meetings. Second, it would provide outcome measures of released time benefits in addition to surveys of staff opinions. The evaluation strategy proceeded through five steps: needs assessment, objective setting, activity planning, process evaluation, and outcome evaluation. Evaluation findings indicated that many positive activities occurred during the Tuesday Released Time Program and that the participants had generally favorable views of the program. Several recommendations for improvement are given. (Author/RC)

Identifiers—\*National Assessment of Educational Progress

Since 1969, the National Assessment of Educational Progress (NAEP) has gathered census-like information about levels of educational achievement across the country and reported its findings to the nation. Individuals were selected for examination so that the levels of achievement they demonstrated would be representative of the achievement of the entire country. Individuals were selected from four age levels—nine, 13, 17 and 26 through 35—which correspond to four key stages in the education of most individuals: the end of primary school, junior high school, high school and a few years past the end of formal schooling. The individuals were also classified according to region of the country, sex, race, parental education and size and type of community to provide additional information about types of schools and students. Achievement levels of young Americans in seven assessment areas are described in this volume—science, social studies, music, literature, reading, writing, and citizenship. Results of the seven assessments indicate that there are serious disparities in the achievement levels of various groups within the nation. The results indicate the degree of that disparity. (RC)

Identifiers—\*MEAN System

Over 1,100 published tests including over 5,400 subtests, keyed to educational objectives of secondary education, were evaluated by measurement experts and educators. The tests were evaluated specifically with the concerns of grades seven and eight in mind. Upon a test's or subtest's assignment to one of the educational objectives, it was subjected to an intensive evaluation according to the MEAN system. MEAN is an acronym reflecting the four critical areas of concern to test users: Measurement Validity, Examinee Appropriateness, Administrative Usability, and Normed Technical Excellence. Thirteen of the 39 MEAN criteria deal with the empirical aspects of the test, mostly reliability and validity. Within any of the four evaluation categories, a letter grade, based on points assigned to each aspect of each criterion, was computed. Letter grades assigned were "G" (good), "F" (fair), and "P" (poor). Each test then earned four letter grades by the MEAN system serving as the Center's official evaluation of the test, for example: Acme Reading Test (GFFF). Along with the test evaluations which are presented in tabular form, an index of objectives, an index of tests evaluated, and a list of publishers and distributors of the tests are included. (RC)

Identifiers—\*Elementary Secondary Education Act Title I, Pennsylvania (Philadelphia), Philadelphia School District

This overview in the form of a Digest of Annual Evaluations of currently funded Elementary and Secondary Education Act (ESEA) Title I projects was prepared on the occasion of the completion of Philadelphia's first decade of involvement (1965-1975). The Digest focuses on the past, present, and future. It begins with a summary of Philadelphia's involvement between 1965 and 1975, including four key areas of Title I impact which show promise for the future—pupil performance, effects of different learning environments, parental involvement rates, and factors influencing project success. The major portion of the Digest consists of separate abstracts for the current Title I projects. Each abstract includes four sections: management information, project description, evaluation techniques, and major findings on a year-by-year basis through February 1975. A list of 34 projects no longer funded under Title I appears in the appendix. (RC)

**Identifiers—**Integrative Processes, Kit of Reference Tests, Marker Tests, \*Reference Measures Cognitive Noncognitive Factors

This report is part of a general study of Reference Measures for Cognitive and Noncognitive Factors. The main activity being reported is the development of "factor-referenced" or "marker" tests for several recently identified cognitive factors. A secondary activity involves the study of possible relationships to factors already established. These developmental activities include a field study of these measures for improvement of the items in the tests, the determination of the reliabilities of the tests, and some clarification of these cognitive factors. The five newly identified factors are: concept attainment, figural fluency, integrative processes, visual memory, and verbal closure. Because it seemed especially important to determine whether the new factors could be separated from other somewhat similar factors, marker tests for six other factors were included in the study. These established factors are figural adaptive flexibility, logical reasoning, general reasoning, number facility, spatial orientation, and speed of closure. The results indicated that the attempt to find the verbal closure and figural fluency factors had been successful, that the visual memory factor had been adequately replicated, that there was confusion between the integrative processes factor and some of the reasoning factors, and that the attempt to replicate the concept attainment factor had failed. **Descriptors—**\*Affective Objectives, Affective Tests, \*Classification, Elementary Secondary Education, \*Matrices, \*Measurement, \*Taxonomy

The measurement of affect to support the achievement or nonachievement of affective education goals is an unresolved problem for educational institutions. The paper outlines a means for both developing an affective goal structure and identifying measurable indicators of affective behavior. To achieve this, it defines and discusses concepts related to educational affective context, affective objective hierarchy, affective learning objectives and affective classification matrix. Each of these concepts is further explained through the use of examples taken from an elementary and secondary school setting. The paper concludes that the application of these concepts to curriculum development will result in a more humane, as well as affective, education experience. (Author/RC)

**Identifiers—**Construct Validity, Kit of Reference Tests, Marker Tests, \*Reference Measures Cognitive Noncognitive Factors

The primary objectives of this project commonly referred to as "Assessing Human Abilities" were: (1) to provide reference measures for cognitive factors; and (2) to provide a guide to reference measures for self-report temperament factors. The overall objective was to conduct research in the area of factor analysis directed toward the identification of tests and other instruments that can serve as markers for well-established factors. The term "factor referenced" was introduced in this project to call attention to the factors as the construct of interest. This usage is in keeping with the general concept of criterion-referenced tests. It is the sense of clarifying something that is being measured that the factor-referenced measures are offered to researchers and practitioners concerned with assessing human abilities. It is hoped that the results of this study will aid in the development of structure for the cognitive domain of human abilities and a beginning for a comparable structure for the temperament domain of personality. Such theoretical structures are founded on empirical evidence and are amenable to continued challenge and verification. Researchers could be expected to use a small number of the resulting factor-referenced tests as markers for testing conjectures about factors in their studies. Summary lists of the 23 cognitive factors with the recommended marker tests, and the 28 temperament factors with the scales proposed for them are given in the appendix. (RC)

**Descriptors—**Behavior Change, \*Behavior Rating Scales, Classrooms, \*Counseling Effectiveness, Elementary Secondary Education, \*Emotionally Disturbed Children, Student Behavior, Test Reliability, \*Test Validity

After a survey of existing behavioral measures was made, a behavior rating scale was developed to measure the observable disruptive behavior of emotionally disturbed children in the classroom. Estimates of various types of reliability were calculated, and scale validity was examined. The scale was used to evaluate the effect of counseling on children referred by teachers because of maladjustive classroom behavior and indicated that counselors were effective in improving classroom behavior in a significant number of cases. The Employability Skills Program (ESP) at Edison High School was designed to serve 10th grade students who were considered to be potential dropouts because of basic skills deficiencies, poor attitudes toward school, or individual adjustment problems. The major student-related objectives of the project were to improve basic skills, improve attitudes toward school, improve self-concepts, and to clarify educational and vocational goals. About 100 students participated in ESP during the 1972-73 school year. One-third of the students were identified as eligible for instruc-

tion through the Special Learning and Behavior Problems (SLBP) Program. Ninth grade school records of the ESP students indicated poor attendance, poor behavior ratings, and mainly grades of D and F in academic subjects. Between September 1972 and May 1973, ESP students made modest gains on the STEP Reading and English Expression Tests and greater gains on the Social Studies test. The majority of the ESP students felt that they benefited academically from participation in ESP, that they improved their self-understanding, and that they learned about careers and jobs. ESP students appeared to have more favorable views of their teachers, the relevance of the curriculum and their own learning progress than did two comparison groups of 1972-73 students. Eighty percent of the students would select ESP over the regular high school program in 1973-74 if they had an option. Recommendations were made to continue the program. (Author/DEP)

**Identifiers—**Minneapolis Public Schools, Minnesota (Minneapolis), Student Opinion Questionnaire

In May 1972 Minneapolis public school students in grades 7-12 were given the 93-item Student Opinion Questionnaire (SOQ), an inventory that measures student attitudes in several school-related areas. This report describes junior and senior high student responses by achievement in school, racial/ethnic background, and sex. Students who identified themselves as high academic achievers had substantially more positive attitudes toward many aspects of school than did students who saw themselves as low achievers. Black students at the junior high level expressed more favorable attitudes toward school than did white and Indian students. A greater percentage of blacks than whites and Indians said they liked school, that the curriculum was relevant, and that they were involved in decision making. At the senior high level these differences between racial-ethnic groups were not as pronounced. Senior high blacks were not as positive as junior high blacks, while senior high Indians were more positive than junior high Indians. Few substantial differences between females and males occurred. Males had less positive attitudes than did females on the items related to unfair punishment and racial attitudes. Females expressed greater anxiety about speaking in front of the class, and tended to have more positive attitudes than males toward school in general and the presence of positive reinforcement. The Reorganized Junior High School Program completed its second year of operation in June 1973. An additional counselor was hired for each of the two schools in the project, Jordan and Marshall-University. A major procedural objective called for the counselors to place greater emphasis on team member, implementer, and facilitator functions. The outcome objectives of the project were increased counselor effectiveness as viewed by teachers and students, positive student attitudes toward school, and increased parent and student involvement in the school. Two seventh grade counselors at Jordan assumed responsibility for the usual administrative role in the area of student behavior. Working contacts between counselors and teachers were increased by team meetings held twice a week during the second semester, counselor visits to classrooms, and informal meetings in the seventh grade conference area. At Marshall-University teacher-counselor teams consisting of one counselor and four teachers, were set up to work with 160 eighth graders and 100 seventh graders. Daily team meetings during the team teachers' common preparation time were the core of the project. Generally, both teachers and students expressed more favorable attitudes toward their counselors after implementation of the Reorganized Junior High School Program. (Author/BJG)

Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I, Minneapolis Public Schools, Minnesota (Minneapolis)

Focusing on the basic skills of reading and mathematics, identified as major problems by a fall 1973 needs assessment of the Minneapolis Public Schools, more than 600 Title I supported staff worked to improve the achievement of these children in 43 public and parochial schools. Attempts to measure impact were made, and a number of individual projects were evaluated. Substantial gains for children in grades 7-9 were noted, but these gains could not be attributed solely to the Title I effort. Gains were also noted for several projects involving elementary school children. Three of the five program objectives for 1973-74 were reached. Title I children in 1973-74 did at least as well as Title I children in 1972-73. Title I children maintained their distance relative to non-Title I children. Students in secondary school programs made substantial gains. Long term test score trends showed growth in grades 1-3 for Title I and non-Title I schools. Achievement trend lines for grade 5 and 6 appear flat. Data were not available for grade 4. Evidence suggests that although Title I children in Minneapolis are not falling further behind their non-Title I classmates, changes in student populations suggest that the gap will widen. Recommendations are made. (Author/BJG)

Identifiers—\*Reading Teacher Observation Scale

This report describes the observer's manual and the corresponding trainer's manual for the classroom observation instrument which was designed to code the behavior of the teacher during reading instruction. The "Reading: Teacher Observation Scale (TOS)" has been designed to be used with a corresponding observation instrument which focuses on the behavior of the students. The TOS can either be used by itself; or it can be used concurrently with the "Reading: Student Observation Scale (SOS)" by having two observers present in the classroom, one using the Reading TOS and the other observer using the Reading SOS. When both observation instruments are used at the same time in the classroom, the pair of trained observers would observe so that one observer codes the teacher's behavior in ten-second intervals while the other observer codes the behavior of a different student every fifteen seconds. The time intervals for these two instruments are different because the pilot tests of the instruments indicated that it was too difficult to do reliability studies of student observations within any shorter time-interval. The manual which was used by the observers during the training program appears in Part I of this report. The trainer's manual which was used during the training program appears in Part II of this report; the trainer's manual contains additional practice exercises and a detailed training schedule. The formal training program for the observers also included audio-tapes and color slides which simulated scripts of teacher-student interactions. (Author/RC)

A method of individual instructor classroom research is proposed and demonstrated in this paper. By capitalizing on baseline data collected from a similar, prior class and focusing treatment on difficult test items, the instructor can develop sensitive within class designs for the detection of treatment effects. An experiment using written objectives given to the students to aid their learning and using the single classroom design shows that objectives significantly improve learning. Written objectives are also shown to interact with item difficulty. The experiment leads to the recommendation that instructors engage in personal inquiry into their efforts to influence student learning and that such inquiry be added to the educational research literature. Consumer Education: Third-Year Final Report. Report No. 7614.

Philadelphia School District, Pa. Office of Research and Evaluation.

Report No.—PSD-7614

Pub Date Jul 75

Note—61p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Consumer Education, \*Educational Objectives, Elementary Secondary Education, Family Involvement, Instructional Materials, \*Integrated Curriculum, Parent Workshops, \*Program Evaluation, Questionnaires, Teacher Attitudes, Teacher Education, Team Teaching

Identifiers—Pennsylvania (Philadelphia), \*Philadelphia School District

The Consumer Education project aims to teach consumers to spend their money more wisely. Through school district teachers and administra-

tors, the project hopes to reach students and their families. Services offered by the Consumer Affairs Education Services staff include workshops for teachers and parents, support for individual teachers and facilities through liaison staff members, materials from and the use of the resources center, newsletter, teacher guides, and the initiation of independent study programs. Of the seven objectives measured, all were met. Requests for materials were responded to, teachers were actively encouraged to integrate consumer education into their regular curricula, and a competency guide was developed, distributed, and evaluated. Also, new curricular materials were evaluated and parents, businesses, and governmental agencies were included in project activities. The objective not measured dealt with assessing student knowledge of consumer issues. Lack of an appropriate instrument was responsible for this; however, an instrument is currently being developed to assess student knowledge in consumer education. (Author)

Identifiers—Arizona (Mesa), California (Stockton), California (Woodland), Connecticut (Hartford), Indiana (Gary), Michigan (Detroit), Michigan (Grand Rapids), Michigan (Inkster), Michigan (Menominee), Virginia (Norfolk)

This study of performance contracting was made in 1974-75. It differs from other studies in that it is based on a comprehensive body of data, including information about state-supported contracts in Michigan and California; it is focused on the role of monetary incentives in education rather than on the particular instructional programs; it made a special effort to collect information about teacher-contracted projects; and it is especially concerned with the long-run effects of performance contracting in the districts where it has been tried. The data base consists of interviews held in ten school districts and at three state departments of education, and with representatives of three private firms; documents furnished by the school districts and the state departments; and 42 responses to a questionnaire sent to the 79 school districts which were apparently all that might ever have had a performance contract (other than the ten in which interviews were held). The questionnaire used in the study is included. A five-page summary of the study is appended. (Author/RC)

Identifiers—\*Reading Student Observation Scale  
This report describes the observer's manual and the corresponding trainer's manual for the classroom observation instrument which was designed to code the behavior of students during reading instruction. The "Reading: Student Observation Scale" has been designed to be used

with a corresponding observation instrument which focuses on the behavior of the teacher. As originally designed, the Student Observation Scale can either be used by itself or it can be used concurrently with the Teacher Observation Scale by having a pair of trained observers observe at the same time in each classroom such that one observer codes the teacher's behavior in ten-second intervals while the other observer codes the behavior of a different student every fifteen seconds. The time intervals for these two observation instruments are different because the pilot tests of the instruments indicated that it was too difficult to do reliability studies of student observations in classrooms within any shorter time interval. The manual which was used by the observers during the training program appears in Part I of this report. The trainer's manual which was used during the training program appears in Part II of this report; the trainer's manual contains additional practice exercises and a detailed training schedule. The formal training program for the observers also included audio-tapes and colored slides which simulated scripts of teacher-student interactions. (Author/RC)

**Identifiers**—\*New York (New York)

This descriptive study reports on the delivery of educational services to and resources for emotionally handicapped children in the city of New York. Data were gathered from observations of public and private programs and from interviews with administrative personnel from these programs. Section 1 provides an overview of the children, the law, and the system. Section 2 provides a background addressing such topics as the number of children in need of special and educational services and the programs that are available. Section 3 describes the system of identification and supportive services, covering such aspects as the organizational framework of educational programs, decentralization, identification, diagnosis, evaluation, and supportive services. Section 4 covers the public sector (Board of Education programs) focusing on special classes, pilot programs, special day schools for the socially maladjusted and emotionally disturbed, other centrally administered programs, district programs, and services for emotionally handicapped students, of high school age. Section 5 concentrates on the quasi-public sector. Conclusions included in the final section note an insufficiency of programs, the inadequate quality of services, discrimination, fragmentation, and lack of accountability. Recommendations are made in each of these areas. (AM)

**Identifiers**—\*New York (Manhattan)

This document describes the planning and implementation of a comprehensive program to facilitate the adjustment of newly arrived Puerto Rican pupils and parents to the school and the surrounding East New York community. The program encompassed the following areas: improvement of school atmosphere, training of teachers and para-professionals, more effective use of instructional materials, greater emphasis on Puerto Rican history and culture, instruction in the Spanish language for staff members, and parent and community involvement. A process evaluation of all program components was made bi-monthly by the program participants. Objectives of this evaluation study are to determine the operational status and objectives, population served, staff utilization, specific activities and methodology, parent and community involvement, facilities and materials used, and effectiveness for each of the enumerated components. The program is said to be processing with satisfactory results. In order that the needs of new arrivals will be met on a permanent and ongoing basis, a bilingual educational program for the school is proposed. This proposal along with samples of materials employed in the training program, manuals for in-service courses, materials pertaining to parent activities, curriculum areas for teaching in a bilingual program for grades 1-3, and recipes for Puerto Rican food dishes are included in the appendices. The purpose of this conference was to produce a set of recommendations and suggestions that could be available to teacher training institutions, state education agencies, and other private and public institutions concerned with the study of ethnicity and bilingualism/biculturalism. Five major topics that form the basis for the report are training programs, training programs (related services and aides), overlapping programs, ethnicity, and supply and demand. Recommendations are brought together under 12 headings. Brief summaries of the rationales leading to and suggestions for implementation of each recommendation are included under each recommendation. Among the major headings dealt with are preparation of American teachers for teaching services in a foreign country, preparation of teachers trained abroad for teaching in the U.S., preparation of bilingual teachers to teach adult basic education programs, upgrading of certification requirements and techniques, training for persons in related services in second language experience, the expansion of present bilingual programs, and research on bilingual education. **Identifiers**—Maryland

This paper is a critique of the utility of Bidwell and Kasarda's "socio-ecological" model of school district-level academic achievement. The paper is considered to show that this model is seriously misspecified due to its omission of aggregate levels of academic ability. Based on achievement test data from the 24 school district of the state of Maryland, the report finds that estimates of the influences of community resources and organizational characteristics of districts are markedly inflated due to the omission of aggregate levels of student ability from the analysis. One 5-10 percent of the total variance in student achievement in Maryland is estimated to lie between school districts. This figure establishes an upper bound on the importance of any and all district-level variables for academic achievement. These findings are held to seriously undermine the utility of the Bidwell-Kasarda model of school district-level academic achievement. It is asserted that specific results cannot be generalized for any other State because of the small number of school districts in Maryland and the fact that districts are coterminous with county boundaries. This document describes the development of an instrument to identify and diagnose developmental deficits at age 5 and the planning of a deficit centered training curriculum to prevent learning disabilities. An evaluation of the effectiveness of this curriculum, based on measures of the children's developmental growth and their academic achievement before and after the intervention program, indicates changes in intelligence, bodily schema, perceptual function, language development, and academic achievement for experimental and control groups following their first grade experience. Since the academic results are considered to be meaningless at this time, a followup study at the end of the children's second year of schooling will be made to ascertain differences based on both groups' exposure to the same reading program. Although the developmental gains are stated to be impressive, the degree to which the experimental children are able to compete in school is held to be the determinant of the program's ultimate success. Further investigations of the effect of special grouping, smaller class size, and the curriculum as they relate to this study are urged. (Author/AM)

**The Effects of Project Head Start and Differential Housing Environments Upon Child Development.**

Pub Date Jun 67

Note—22p.; Research conducted as part of a doctoral dissertation, Cornell University, Ithaca, New York

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Achievement, \*Compensatory Education Programs, Disadvantaged Youth, Enrollment, Family Characteristics, \*Housing Patterns, \*Human Development, Individual Development, Low Rent Housing, Maturation, \*Minority Group Children, Personal Growth, Preschool Children, Slums

Identifiers—Missouri (Kansas City), \*Project Head Start

This study tests the influence of various combinations of housing environments with both the participation and nonparticipation of disadvantaged children in a special enrichment program. Three hypotheses are put forth: (1) children living in public housing will exhibit greater growth and development than children living in substandard housing; (2) children in Head Start programs will exhibit greater growth and development than control children; and (3) there will be no interaction effects. Two predictions derived from the hypotheses are made: (1) children living in better housing and participating in Head Start programs will exhibit greater growth and development than children in other groups, and (2) children living in substandard housing and not enrolled in Head Start programs will exhibit the least amount of growth and development. Only the second hypothesis was confirmed indicating Head Start's tremendous impact on the participating children. Three conclusions are drawn from this study: (1) Head Start, as compared with the housing environment, can produce more dramatic immediate results; (2) the significance of the housing environment as a factor in human growth and development remains inconclusive and needs further research for verification; and (3) the housing environment, rather than acting as a direct controlling influence, may simply provide the setting which encourages or inhibits the influence of other variables. The Psychological Costs to Quality and Equality in Education.

Pub Date (67)

Note—26p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Classroom Integration, Cultural Disadvantage, Disadvantaged Youth, Economic Disadvantage, Educational Disadvantage, \*Educational Opportunities, \*Educational Quality, \*Equal Education, Human Relations, \*Intergroup Relations, Middle Class Culture, Middle Class Norm, \*Minority Group Children, Psychological Characteristics

The initial part of this paper summarizes the bases for the assertion that the most immediate, overwhelming, and stubborn obstacles to achieving quality and equality in education lie as much in the character and way of life of the American Negro as in the indifference and hostility of the white community toward blacks. A discussion of prenatal damage, father absence, an impoverished home environment, and dysfunctional patterns of child rearing are included here. These inadequacies are considered to present problems not only to the Negro child but also to his white companion in an integrated classroom setting. Findings of social-psychological research, calling for a counter-strategy of active involvement in work with disadvantaged children on the part of middle class children and adults of both races, are presented. These results are seen as benefiting not only the disadvantaged but also the advantaged child, by providing him with needed training in actual behavior consistent with the democratic values of human dignity and social responsibility. Materials, \*Manuals, Minority Groups, \*Puerto Rican Culture, \*Puerto Ricans, Social History, Social Studies, \*Teaching Guides, Urban Studies

Identifiers—\*New York (Manhattan)

This document is a teachers' guide to the television series, "Boricuas: The Puerto Ricans." The manual provides additional information to help teachers understand the adjustment problems and special educational needs of Puerto Rican students. The program order is as follows: Puerto Rican studies, island of Borinquen, nineteenth century, golden age, twentieth century, the people, the Puerto Rican family, plastic art of Puerto Rico, El Santero, Puerto Rican architecture, typical dances of Puerto Rico, Puerto Rican drama, and bilingual education. Each program session consists of a brief introduction, a series of questions for discussion, and suggested references. The appendices include the aims and objectives of the Office of Bilingual Education, a listing of Puerto Rican agencies in New York City, an explanation of the seal and flag of Puerto Rico, and the Puerto Rican national anthem. Document Not Available from EDRS

Descriptors—Cultural Factors, Curriculum Guides, \*Ethnic Groups, Ethnic Studies, \*Instructional Aids, \*Instructional Materials, Instructional Media, Instructional Technology, Manipulative Materials, Media Selection, \*Puerto Rican Culture, Puerto Ricans, \*Urban Studies

Identifiers—Caribbean

This document describes the contents of a kit considered to have been designed to extent the learning of pupils who are exposed to films, film strips, and other programs that introduce Puerto Ricans and people of other Caribbean regions. The kits are held to be usable in conjunction with the film strips, as library or showcase presentations, or as research projects. It is suggested that certain specific lessons be taught using objects from the kit after introducing the kit and organizing for its use by the children. Some examples of the lessons include stamps and coins of the Caribbean, a map review lesson, and Puerto Rico's santeria, a true folk art. Other examples for follow-up lessons include biographical studies and topical studies. References for teachers, mature students, and elementary and intermediate students are provided. This document forms part of a comprehensive program planned for and implemented in East New York to facilitate the adjustment of newly arrived Puerto Rican pupils and parents to the school and community. Depreciated Self-Concept in Blacks: Implications for Counseling.

Pub Date Mar 75

Note—18p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (New York, New York, March 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Counseling Effectiveness, \*Counseling Goals, Counselor Acceptance, Counselor Performance, \*Counselor Role, Cultural Differences, Cultural Factors, Negro Attitudes, \*Negro Youth, Role Perception, \*Self Concept, Self Esteem, Social Values

This paper begins by reviewing the literature on social perceptions and attitudes in terms of the black self-concept. Issues discussed here are culture conditioning and marginality, self-concept, social perception and attitudes, interrelationships between attitudes and perceptions, and the influence of cultural values and beliefs. Problems and attitudes that blacks might bring to the counseling session are dealt with next, followed by a discussion of the philosophical base or rationale for the counseling process. Suggested steps that counselors might immediately take as individuals and collectively as professionals to counsel these minority populations include an acceptance and encouragement of change, a commitment to the goals of human fulfillment, and the development of a true respect for diversity. A number of suggestions directed to those individuals desirous to counsel minorities are: (1) counselors must move out of the cubicle into the community; (2) counselors' reliance on remedial services must be replaced by active preventative and developmental strategies; (3) counselors must become sensitive to the need to be involved in a greater diversity of services; and (4) counselors must begin to see themselves as facilitators of self-evaluation and decision-making. Descriptors—Anthropology, \*Area Studies, Demography, Ethnic Groups, Ethnology, Females, Group Structure, Immigrants, \*Information Networks, Intercommunication, Land Settlement, \*Migrants, Sex Differences, \*Social Integration, Social Systems, Sociocultural Patterns

Identifiers—\*Portuguese Americans

Portuguese immigrants in America and Canada have certain institutions in their traditional socio-culture which are considered to act as preadaptive mechanisms in the migrant's settling-in process. This paper discusses one locale which has a large proportion of recent Portuguese immigrants, and emphasizes how women, in particular, are important in the formation of new networks, through the utilization of a well-known Portuguese technique of "making a cunha." The data are stated to suggest that in the migration process women are significant in the formation of both general and optative-set networks. The study is said to raise a number of questions such as: (1) whether there is bias in the data which minimizes the female role in network formation; (2) whether women play more important factorial roles during periods of instability and/or rapid cultural change; (3) how institutionally significant the cunha process is cross-culturally; and, (4) how the cunha process relates to patronage. Descriptors—\*Birth Rate, \*Census Figures, Community Size, English (Second Language), Ethnic Groups, \*Migration, Population Growth, Population Trends, Puerto Rican Culture, \*Puerto Ricans, Research Methodology, Statistical Analysis, \*Urban Immigration

This paper combines records from the United States census with records from the Puerto Rican census and compares for the first time the fertility levels of Puerto Ricans who migrated to the United States with those of their counterparts who remained in Puerto Rico. The general hypothesis tested is that migration and residence in a place where low fertility is the norm results in lower fertility among the migrants than among those who remained at the place of origin. In general, the effect of migration to the mainland is considered to reduce fertility, but to a very small extent. Some evidence that this effect of migration on fertility is diminishing is stated to exist. Results of the analysis of the relationship between the ability to speak English and current fertility for urban island residents is held to indicate that those who speak English have considerably lower levels of current fertility than those who do not. The ability to speak English is seen to be an indicator of a whole cluster of attitudes and behaviors associated with what is labeled "modernism." The importance of micro-census data when addressing the issue of migration and fertility is stressed. (Author/AM)

Pupil Reading Achievement in New York City. A Report of the April 1974 Reading Test Survey, Grades 2 Through 9, New York City Public Schools.

New York City Board of Education, Brooklyn, N.Y. Office of Educational Evaluation.

Pub Date Jan 75

Note—115p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Achievement Rating, Community Schools, Comparative Analysis, Educational Assessment, Elementary Grades, Intermediate Grades, Junior High Schools, Municipalities, National Norms, \*National Surveys, \*Reading Achievement, Reading Level, School Districts, School Surveys, \*Standardized Tests, Student Testing, \*Tables (Data), Test Reviews

Identifiers—\*New York (New York)

This report contains a tabular summary of the results of the April 1974 city-wide reading test administered in Grades 2 through 9 in all New York City public schools. Test results are presented at three levels for comparative analysis: New York City with other major cities, community school districts within N.Y.C., and community schools within districts. Test results data are presented in arithmetic means, medians, and percentages allowing for varied means of analysis. Results indicate that citywide averages improved from 1973 to 1974 in Grades 3 and 7 and declined in Grade 9. The remaining five grades remained at the same level. Citywide percentages of pupils reading at or above grade level decreased two-tenths of one percent. Taking into account the reading achievement statistics for the city as a whole and for its component community school districts, the report concludes that there has been a high degree of stability in reading achievement over the past four years. Relative Achievement Levels of White and Black Children Before and After Desegregation.

Pub Date Apr 75

Note—19p.; Paper presented at the Annual Meeting of the American Educational Research Association annual meeting (Washington, D.C., April 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Academic Achievement, \*Caucasian Students, \*Integration Effects, \*Minority Group Children, Negro Youth, Racial Differences, Racial Integration, School Integration, Statistical Data, Test Results

Identifiers—Florida, \*Performance Contrasts

Changes in the relative academic achievement of Florida's black and white children over the last 13 years during which desegregation was taking place are investigated. The availability of achievement data for the entire black and white population, along with the 13-year time span between observations are seen as principal advantages. Data show that the academic achievement gap between white and black children was smaller in 1974 than in 1961. The amount of decrease in the gap is stated to be small, yet of practical significance for the four subject areas examined: reading, vocabulary, math computation, and math problems solving. Of these areas, convergence in the black and white distribution was greater for math computation than for the othersubtest areas examined. The use of different tests in 1961 and 1974 is held to make assessment of changes in the absolute performance level of black or white children difficult. It is suggested that the study be viewed as an evaluation of a social action program rather than a scientific experiment. (Author/AM)

Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I, Kansas (Wichita)

Various programs listed under the categories of instructional components, supportive components, and summer activities are evaluated here. Programs under instructional components include corrective reading programs, primary-intermediate mathematics, neglected children's institutional programs, business education for delinquent children, and preschool programs. The supportive components describes the parent education program. Included in the summer activities programs are early start, neglected children's program, delinquent children's program, tuition scholarships, basic primary and corrective reading, and primary and intermediate math. Delivery of service is seen to have become more concentrated with fewer schools identified as Title I targets and with fewer programs being continued. Evaluation of performance objectives in the neglected and delinquent institutions is considered to be inconclusive because of the short length of time most pupils are institutionalized while involved in the program. Seventy-four percent met or exceeded stated objectives for reading; 77-98 percent met the objectives in mathematics; and over 96 percent in preschool program met the stated objectives. (Author/AM)

Integrating the Ill-Prepared Freshmen Into College: A Pilot Project.

Pub Date [74]

Note—15p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*College Freshmen, College Placement, Communication Problems, Educationally Disadvantaged, Educational Needs, Educational Opportunities, Educational Problems, Individual Characteristics, Individual Instruction, Individual Needs, \*Open Enrollment, Pilot Projects, Program Effectiveness, \*School Orientation, \*Student College Relationship, Student Problems, Surveys

Identifiers—City University of New York, \*Kingsborough Community College, New York (Brooklyn)

A number of problems encountered by a large number of entering college freshmen at Kingsborough Community College under Open Admissions, such as serious deficiencies in English comprehension and express skills, deficiencies in mathematics, basic study skills, uncertainty with regard to academic expectations, and a general lack of sophistication in understanding college procedures and requirements, are listed. A two-pronged attack to combat these problems, including a placement committee to control the academic program and workload of all incoming freshmen, and an intensive orientation and academic program and workload of all incoming freshmen, and an intensive orientation and academic counseling system, is described. The orientation and pre-registration goals are considered to have been achieved by means of a program to which entering freshmen are invited at the end of the previous semester in groups of about one hundred. Following a general introduction and orientation to the college, counselors proceed to counsel and pre-register students in groups of ten, with the technical assistance of a student aide. To serve the number of students who remained perplexed after the large scale orientation and pre-registration, an individual approach consisting of informal briefing and question and answer periods is suggested. Results of a pilot survey sampling students' reaction to this approach suggest that it successfully accomplished its objectives. (Author/AM)

Descriptors—Adjustment Problems, Comparative Analysis, \*Day Schools, \*Elementary School Students, Ethnic Groups, Family Problems, Grade 7, Group Structure, Group Unity,

Homogeneous Grouping, \*Jews, Personality Problems, Private Schools, \*Public Schools, Religious Factors, School Environment, \*Student Adjustment, Student Problems

Four hypotheses are tested in this study: (1) that there is no significant difference between students in regard to the total number of stated problems of adjustment; (2) that there is no significant difference between the two groups in adjustment related to either health and physical development, school, home and family, money, work, the future, boy-girl relationships, relations to people in general, and self-centered concerns, as reflected by the number of stated problems in each of these areas; (3) that there is no significant difference between the groups in the number of problems of adjustment specifically related to religion, with the all-day group indicating a greater degree of adjustment. Results showed more health and development and school problems and less feelings of security for day-school students. No significant differences between groups are found for the other problem areas. Findings are discussed in terms of Lewin's theory concerning ingroup and outgroup attitudes. (Author/AM)

Identifiers—CDDP, City University of New York, \*College Discovery and Development Program, New York (New York)

This report is the eighth in a series of longitudinal studies describing the College Discovery and Development Program aimed at identifying disadvantaged and underachieving ninth graders and developing their college potential in five special high school development centers. The document provides a summary section which focuses on program purposes, the eighth year of the program, facilities, and salient findings. Other sections include a description of the eighth population of college discovery students, of college progress of program students in classes I-V, high school graduation and college admission for class VI and a socioeconomic overview of classes I-VIII. The increase in the number of participants in the program who completed their studies with a bachelor's and associate of arts degree was noticeable during the eighth year. Class VIII resembled the previous seven groups in age, family structure, living conditions, ethnicity, history of mobility, previous scholastic averages, and attendance, but was found to be less well off economically than other classes. Analysis of transcripts indicate that program students continue in college at a higher rate than nonprogram students and Open Admissions students, and that they earn slightly lower grade point averages than regular freshmen. This report is the seventh in a series of longitudinal studies describing the College Discovery and Development Program aimed at identifying disadvantaged and underachieving ninth graders and developing their college potential in five special high school development centers. The document has an introductory section including such topics as the seventh year of the program, the setting, staff, student personnel, and fiscal matters. Other sections include a description of the seventh population of college discovery students, attendance and achievement for all classes in 1971-1972, college progress of program students in Classes I-IV, high school graduation and admission to college for class V, a socioeconomic overview of Classes I-VII, a description of an adjunct summer program in mathematics, and summary. Class VII resembled the previous six groups in age, family structure, living conditions, ethnicity, history of mobility, previous scholastic averages, and attendances, but was found to be less well off economically than other classes. The general findings for program students whose college records can be studied show a pattern of progress not greatly different from than of non-program classmates in each college. (Author/AM)

This report is the sixth in a series of longitudinal studies describing the College Discovery and Development Program aimed at identifying disadvantaged and underachieving ninth graders and developing their college potential in five special high school development centers. The sixth year brought the completion of the discovery and development cycle for the first of its students, those who had completed their studies with associate degrees, and the mid-college point for the first baccalaureate students. Various sections include descriptions of the sixth year of the program, personnel, facilities, the sixth population of students, attendance and achievement for all classes in 1970-71, college progress for classes I-III, high school graduation and admission to college for class IV, and a summary. Class VI resembled the previous five on all variables except for a lower income. The general findings for program students whose college records can be studied show a pattern of progress not greatly different from that of nonprogram classmates in each college. A number of newly stated specifically expressed behavioral objectives were added to the proposal for funding for the sixth year. (Author/AM)

Descriptors—Economic Factors, Environmental Influences, \*Intelligence Differences, \*Nature Nurture Controversy, Policy Formation, Psychological Patterns, \*Psychological Studies, Public Policy, \*Racial Differences, Research Methodology, Research Problems, \*Research Reviews (Publications), Research Utilization, Social Factors, Statistical Analysis

This book is considered to provide a sober, balanced, and scholarly examination of the evidence that bears on the role of genetic and environmental factors in the determination of group differences in ability in the United States. The first chapter provides something of the background and recent history of the concern with racial-ethnic differences in intellectual performance in the U.S. The three chapters that complete the first part of the book are said to be intended to clarify some of the issues of definition and measurement surrounding three of the key concepts on which the controversy focuses—race, intelligence, and heritability. Following this, the four chapters in the second part of the book review the body of evidence relevant to the major empirical question of concern: What are the relative roles of the genes and the environment in accounting for differences in average performance of different U.S. racial-ethnic groups on tasks purporting to measure intellectual capacity? In the concluding section, whatever theoretical conclusions the authors state as appearing to be justified by the data and what purportedly appear to be—and not to be—legitimate implications of these conclusions for the formulation of social policy are set down. Identifiers—\*New York (New York)

The purpose of this report is to explore what is being done, as well as what is not being done, for students who enter New York City schools with little or no understanding of English. The data provided in this report provided the basis for a class action suit which resulted in the establishment of the Pilot Schools bilingual program. The Community Service Society began to gather the available facts in connection with legislation introduced in the 1973 session of the New York State Legislature. Consideration of the proposed legislation required information on the kinds of programs the New York City Board of Education and Community School districts are providing for these pupils, the number of students being served, and the effectiveness of these programs. Major findings derived from such data as Board of Education reports, interviews with administrators of programs for non-English speaking pupils in the New York City public schools, a content analysis of evaluations of selected bilingual programs, and observations of bilingual programs in city schools, include the following: (1) between 1971 (the date of the first published report on the Board of Education's language survey) and 1973, the proportion of pupils with English language difficulty increased from 8.9 percent to 12.9 percent of the total school enrollment, and (2) by 1973-1974, only about half of those with language problems were receiving special language instruction. Other findings are also highlighted. (Author/JM)

Identifiers—\*New York (New York)

A class action begun on September 20, 1972 was settled on August 29, 1974 by a Consent Decree signed by United States District Judge Marvin E. Frankel. The group of children affected by the mandates in the Consent Decree are "all New York City public school children whose English language deficiency prevents them from effectively participating in the learning process and who can more effectively participate in Spanish." The decree mandates that "an improved method for accurately and systematically identifying and classifying children who are Spanish-speaking or Spanish-surnamed will be designed and implemented by the Board of Education." In February 1975, a total of 40 elementary, junior high, and high schools were identified and designated as Pilot Schools. These schools were to provide a complete bilingual program for all students within each school who had been identified as needing the program. They were also required by the decree to serve as training centers for appropriate school personnel in other schools. The agreement calls for the Board of Education to fully implement the program for all children in the described category by September 1975. (Author/JM)

Descriptors—\*Age Differences, Census Figures, \*Demography, Economic Factors, Family Role, Labor Force, Longitudinal Studies, National Surveys, \*Occupational Surveys, \*Racial Differences, School Role, Social Differences, Social Structure, \*Socioeconomic Status, Statistical Analysis

This paper focuses on changes in the occupational levels of black and white men in the decade between 1962 and 1973. For each race taken separately, and then for both in comparison, shifts are described in the mean levels and a dispersion of occupational socioeconomic status of men in the experienced civilian labor force. An attempt is made, it is stated, to account for these intercohort and racial shifts in terms of commensurate compositional changes in factors of family background and regular schooling. An inquiry is made into the allocative processes which distribute men into their current occupational statuses from their family backgrounds and in terms of their schooling. These allocative processes are understood as the basis of social differentiation and inequality, and they are called processes of socioeconomic stratification. New data has been made available, and partly analyzed here about the socioeconomic origins

and destinations of black and white men based on a 1973 replicate of the 1962 Occupational Changes in a Generation Survey (OCG). These data are considered to provide clearer insights about the sources of socioeconomic change for both races. They also permit some purportedly intriguing speculations about the course of racial inequality and about the evolving roles of families and schools in a maturing, postindustrial society. This essay treats inequality in access to schooling in demographic perspective. In constructing a brief history of educational inequality in the U.S., the 1962 and 1973 surveys of "Occupational Changes in a Generation" are drawn on heavily. It is found that among men born in the U.S. during the first half of this century, inequality of schooling has declined sharply, even as educational attainment has increased to levels unprecedented elsewhere in the world. Not only has total inequality in the distribution of schooling declined, but both the variability in schooling which may be attributed to differences in social background and the variability which is independent of social background appear to have declined. Moreover, these increases in educational equality appear to have occurred within black and Spanish minority groups as much as in the majority population. There is a mixture of change and stability in the effects of social background characteristics on schooling. On the whole, social origins have become more favorable to high levels of schooling with minority groups, as in the majority population, but large differences in social origins persist among these groups, and in some instances the social origins of majority and minority populations have diverged. For cohorts of U.S. men born in this century, half or more of the variance in schooling must be attributed to the influence of family background. (Author/JM)

This paper focuses on the change in the growth rate in schools by looking at some of the available data and rearranging it in ways that explain the flattened growth rate. The analysis begins with an overview of the market—past, present, and future. From there, future prospects for the school business are estimated. Declining enrollments, a tight job market for college graduates, the role of schooling in the development of per-

sonal and national wealth, cybernation, and changes in techno-structure are seen to have adverse effects on schools. Positive measures such as an increased emphasis on school improvement based on accountability, market development, restricting access, and charging higher prices to those admitted are cited. Preventive steps to improve the position of the schools are urged such as the discouraging of certification services outside the formal school system, of school discount houses, and of movements that propose a deschooling of society. Broadening the concept of work to include categories presently excluded is seen as a way of returning to schools the function of educating. (Author/AM)

Identifiers—Missouri (Saint Louis)

This paper summarizes the results of a participant observation study conducted on two public alternative high schools in the St. Louis, Missouri metropolitan area. Phase I of the study consists of a literature-generated delineation of larger societal factors which create student unrest and give impetus to the development of alternative schools. Utilizing student and faculty interviews, the second phase derived three basic categories of concerns—curricular, bureaucratic-organizational, and interpersonal. The final phase of the study uses direct observation of three levels of complexity: the physical setting, the programmatic regularities, the analytic description. These are described in detail and analyzed. Four tensions confronting the alternative schools studied are identified as having as a shared theme the larger issues of the individual versus society. The alternative school is refused endorsement as a forerunner of the future. Students are encouraged to participate in these settings, but until a balance which promotes individual freedom along with group responsibility is achieved, it is held that its potential as a serious contribution to American education cannot be judged. Identifiers—\*Michigan (Detroit), \*New York (New York)

The 15-year effort to decentralize New York City public schools and thereby implement basic changes in the school system is briefly sketched in this study. The structure of the school system, powers of local boards, central board, and chancellor, school board elections, keeping the public informed, educational impact, and effect on truancy and crime are among the issues discussed. Structural change is found not to go to the root of most serious school problems which

appear to be basically social and economic in nature. Although decentralization in New York City has created new job opportunities for minorities and brought control of schools closer to the community, it is considered not to have affected quality of education in schools. Likewise, Detroit's efforts toward decentralization are described. Intended as political rather than educational reform, decentralization here has produced a grass-roots school board, and it has involved more people in school affairs. Yet significant reforms in the schools are seen not to exist, and a new structure that includes both the management and political skills of the city's top leaders and the knowledge and vitality of the neighborhood representatives is urged. **Identifiers**—\*Elementary Secondary Education Act Title I, ESEA Title I

This is the first of the progress and interim reports prepared for an evaluation study of compensatory education programs to be completed by 1977. This report describes and analyzes those parts of the research proposed in the research plan which have, to date, been fully designed and funded. These consist of (1) a description and discussion of projects initiated in FY 1975, the questions addressed by each, and their expected results; (2) a description of major projects to be undertaken during FY 1976; and, (3) an analysis of policy issues which have emerged from responses to the requests for proposals issued to date. Six major studies in the areas of student development, funds allocation, and administration comprise the on-going research. Major projects to be funded during FY 1976 will, it is stated, deal with funds allocation and administration. Implications of research proposals identify several important issues with respect to early reading curricula, alternative designs for compensatory education programs, and demonstration projects. **Identifiers**—North Carolina

This study focuses on a formerly all-black high school, which formed one-half of the dual school system in North Carolina, in order to assess both the direct and indirect functions that the school may have performed in developing leadership skills, apprenticeship opportunities, and the total development of the black community. Seven reasons indicating the importance of the study are given, including the use of official data to document the formal structure of the school, the increase in awareness of the influence of leadership and membership on students and on school as a socializing agent, and the validity of the methodology used to test qualitative aspects of the high school. The study is presented in seven

parts which deal with methodological perspective for for understanding the high school in North Carolina in relation with community development, data description for 1963-64 school year, the black high school, the black high school principal, the black high school ten years later--1973, and inferences and propositions that are seen to warrant further consideration. **Descriptors**—\*Ability, Classroom Communication, \*Community Characteristics, \*Educational Environment, \*Environmental Criteria, \*Individual Development, Learning Processes, Student Role, Student Teacher Relationship, Teacher Role

Based on an approach that analyzes the structure of educational processes in relation to the structure of its outcome, this paper develops the argument that the function that a specific environment fulfills depends critically on who is in control within the environment, and suggests how the implications of this argument might be tested. The hypothesis is that an educational purpose will be most effectively accomplished when control of the teaching-learning process is congruent with the control of the thought-action intended as an educational outcome. To present the theory, teacher, joint teacher-and-learner, and learner control are analyzed as process, and the control of community, competence, and individuation are analyzed as three categories of outcomes. Because the problem has not been conceptualized in tri-partite terms before, no single research study is considered to contain the full range of necessary distinctions. Control is seen to be one of the dimensions through which an analysis of the relationship between teaching-learning processes and outcomes can be made. A structural analysis of control is found to reveal limitations in past research on classrooms. (Author/AM)

## Introduction

**Resources in Education** is prepared monthly by the Educational Resources Information Center (ERIC) to make possible the early identification and acquisition of reports of interest to the educational community. ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating the most significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 clearinghouses located at universities or with professional organizations across the country. These clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The clearinghouses are listed on the inside back cover.

All the documents cited in the Document Résumé Section of the journal, except as noted, are available from the ERIC Document Reproduction Service. Availability and prices of document collections are to be found on the How To Order ERIC Document Reproductions page.

Descriptors—\*Career Opportunities, Career Planning, Careers, \*Demand Occupations, \*Employment Opportunities, Females, Labor Force, Labor Market, \*Manpower Needs, Occupational Aspiration, Occupational Guidance, Occupations, Vocational Counseling, \*Working Women

Identifiers—Consortium of States, \*National Occupational Competency Testing Institute, Illinois

Women's opportunities for employment will be directly related to their level of skill and experience but also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1970 and 1980, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craftsmen and foremen (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. The résumés in this section are arranged in numerical order by ED number, and alphabetically by clearinghouse prefix initials and acquisition number.

Each clearinghouse focuses on a specific field of education. However, the reader who is interested in a broad subject such as Reading may find pertinent résumés in allied clearinghouse entries. It is therefore important to consult the subject index for a more comprehensive search.

Clearinghouses and their prefixes follow in the order they and their entries appear in this section:

**A Career Development Worktext for Junior High School Students.**

Memphis City School System, Tenn.

Spons Agency—Bureau of Adult, Vocational, and Technical Education (DHEW/OE), Washington, D.C.

Bureau No—0-361-0115

Pub Date 71

Contract—OEC-0-70-5181

Note—61p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—\*Career Exploration, Career Planning, \*Individual Development, Instructional Materials, Learning Activities, \*Secondary Education, Study Guides, \*Workbooks

Identifiers—SPAN, Start Planning Ahead Now, Systems Program Approaching Nonunemployment

The worktext was developed, as part of Project SPAN (Start Planning Ahead Now), for the use of junior high school students. Its purpose is to help them assess their personal attributes and qualities and understand how they relate to future employability and how they can help in the selection of vocational goals. Emphasis is placed on the development of personal traits. It presents factual pre-occupational information and provides activities that will aid the students in evaluating themselves. The latter part of the worktext provides some information and practice activities that the student, as a future job hunter, should begin to learn: securing a social security card, filling out an application form, and how to respond during an interview. **Development of Generalizable Educational Programs in Laser/Electro-Optics Technology: Final Report.**

Technical Education Research Center, Waco, Tex.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Bureau No—BR-8-0491

Pub Date Jan 75

Grant—OEG-8-080491-4701(085)

Note—64p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Counseling, \*Course Descriptions, \*Curriculum Development, Curriculum Guides, \*Electronics, Instructional Materials, \*Lasers, \*Optics, Post Secondary Education, Technical Education

Identifiers—Laser Electro Optics Technology

The purpose of the Laser/Electro-Optics Technology (LEOT) Project was to establish a pilot educational program, develop a flexible curriculum, prepare and test instructional materials, transport the curriculum and instructional materials into other educational institutions by establishing relevant LEOT programs wherever they are needed, and to assure that faculties in these schools provide students with requisite knowledge and skills to prepare technicians for useful employment in this field. The curriculum which was developed is intended for use by two-year postsecondary technical institutions. The educational philosophy which was adopted focused on laboratory learning, i.e., teaching principles by doing things with your hands (as opposed to theory lectures or training in simple manipulations or procedures). The report begins by describing the project objectives and detailing the degree and manner in which these objectives were accomplished. All end products of the project are briefly described (curriculum outlines, instructional materials, support documents, and career counseling guides). There is discussion of the roles of the Industrial Advisory Committee, the Evaluation Team, and the Institutional Pilot Program. Following this is a short description of dissemination activities. **Practical Nursing for High Schools. Curriculum Bulletin 1973-74 Series No. 5.**

New York City Board of Education, Brooklyn, N.Y. Bureau of Curriculum Development.

Pub Date 74

Note—625p.

Available from—Auditor, Board of Education of the City of New York, Publications Sales Office, 110 Livingston Street, Brooklyn, New York 11201 (Publications List No. 00-7534-4, \$6.00)

**EDRS Price MF-\$1.08 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Course Content, Curriculum Development, \*Curriculum Guides, Guides, \*Health Occupations Education, Medical Education, Practical Nurses, \*Practical Nursing, \*Secondary Education, Units of Study (Subject Fields)

Identifiers—Paraprofessional Personnel

The bulletin, a revision of Practical Nursing for High Schools published in 1963, is a guide for the licensed teacher of nursing in educating the practical nurse student. The publication can be used as a resource for developing the program in individual schools of practical nursing or to develop the behavioral objectives for each procedure. Part 1, Practical Nursing 1 and 2, intended for

the junior year, includes: fundamentals of practical nursing, body structure and function, growth and development, and normal nutrition and diet modification. Part 2, Practical Nursing 3 and 4, intended for the senior year, includes: nursing care of patients with diseases and disorders of the body system, maternal and child care, pediatric nursing, and psychiatric nursing. Each part consists of a brief general introduction and an outline of the objectives for the various units. Each unit presents a course outline developing a general topic, including application and patient-related activities. Where applicable, medical information about bodily systems and functions is provided. The appendix includes a history of the program, a 38-page bibliography, samples of various forms, a sample lesson plan and test, a 24-page visual aids list, and source directory. (Author/BP)

**Self Instructional Manual for Tumor Registrars: Book 1, Objectives and Functions of a Tumor Registry.**

National Cancer Inst. (NIH), Bethesda, Md.

Report No—DHEW-NIH-75-917

Pub Date [73]

Note—137p.

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

Descriptors—Data Collection, \*Health Occupations Education, Medical Case Histories, \*Medical Record Technicians, Occupational Information, Programmed Instruction, \*Programmed Texts, Records (Forms), Study Guides

Identifiers—Cancer, \*Tumor Registrars

The programmed text is designed to provide tumor registrars with a means of learning the procedures for abstracting charts of cancer patients and for carrying out the other functions of a tumor registry. It was developed as an adjunct to on-the-job training for use without direct instructor supervision. Directions and suggestions for using the manual are provided. The content is presented in three major sections. The first deals with the definition of a tumor registry, general introduction to tumor registries, types of registries, confidentiality of patient records, and functions of registries (data collection, patient follow-up, education, and research). Descriptions of job activities and job aids of the tumor registrar are contained in the second section. The final section presents the relationship between the tumor registry and the hospital in general, other hospital departments, and outside medical organizations. The material is presented in paragraph and outline form. Objective and subjective test items are interspersed followed by answers. Important words in tumor registry vocabulary are underlined and defined. Sample medical record forms

are included in the text. Also contained are a two-page glossary, a selected bibliography for learner use, and a subject index. (MS)

**Educating for the Integration of Occupational Clusters Into Careers. Information Series No. 3.** Northern Illinois Univ., De Kalb. ERIC Clearinghouse in Career Education.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

Report No—Info-Ser 3

Pub Date [75]

Note—113p.

Available from—ERIC Clearinghouse in Career Education, 204 Gabel Hall, Northern Illinois University, DeKalb, Illinois 60115 (\$4.50 including postage; \$5.50 foreign)

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

Descriptors—Bibliographies, \*Career Education, Curriculum Development, Elementary Secondary Education, \*Literature Reviews, \*Occupational Clusters, \*Program Development

The literature review focuses on the nation's current readiness to incorporate the 15 USOE occupational clusters into the nation's evolving career education. This readiness first simplifies job complexity by grouping a multitude of jobs into occupational awareness, career orientation and exploration, and career selection and preparation. But knowledge of career development is needed to make career education work. So is a vision of education as a continuing arrangement of means by which individuals challenge their environments to make them speak back to them honestly. Systems knowledge is required. Management by objectives becomes an acutely needed technique. Titles cited in the review (the documents are contained in the ERIC or AIM/ARM collections) indicate the considerable span of career education. The program must be organized and administered in the school as a whole because the subject must be taught in elementary, middle, and high school and in post-secondary education as well. Occupational clusters must be introduced into the curriculum at all levels and reflected in the functions of career guidance, placement, and follow-up at various times. Some products of the cluster development efforts have been entered into the ERIC system and are identified and briefly described; projects developing material are described in the appendix. (Author)

**A Model for Implementing a Career Education System.**

Hawaii Univ., Honolulu.

Pub Date Apr 75

Note—31p.; Paper prepared for the American Educational Research Association Annual Meeting (Washington, D.C., April, 1975); The model and flow chart referred to in the document are not included

Available from—Dr. T. A. Ryan, University of Hawaii, 1776 University Avenue, Honolulu, Hawaii 96822 (\$1.00)

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Career Education, \*Delivery Systems, \*Models, \*Program Development, Program Evaluation, \*Program Planning

The model for career education implementation defines three major functions which constitute the essential elements in the implementation process: planning, implementation, and evaluation. Emphasis is placed on the interrelatedness of implementation to both planning and evaluation of career education. The 11 subsystems involved in implementing career education are discussed: establish conceptual framework to conduct public relations/information service; establish enabling legislation/set policy; allocate/provide funds; establish advisory committee/organize staff; arrange community participation; arrange institutional participation; scheduling time; develop program guide; recruit/select/develop staff; develop/obtain software/hardware; and arrange facilities/sites. The initiation of the career education delivery system is concerned primarily with the pilot test and field test. To maintain the system, there must be a closed loop from system operation to evaluation to provide continuous feedback and direct adjustments in the operating system. The model as-

sumes a foundation of local initiative fostered and reinforced at regional and national levels. (Author/EC)

**Aspects of a Modern Business Education Program.** New York State Education Dept., Albany. Bureau of Business Education.

Report No—Bull-205

Pub Date Sep 75

Note—42p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Business Education, Business Skills, \*Course Descriptions, \*Curriculum, \*Evaluation Criteria, Program Effectiveness, \*Program Evaluation, Rural Education, Secondary Education

A collection of six papers by New York business educators deals with criteria for judging the completeness and effectiveness of a business education program. The curriculum, recruitment, program promotion, image, and other aspects of a comprehensive high school program are outlined by C. Irene Schindler. Karen R. Gillespie of New York University describes the well-prepared business student as meeting the demands of business through skills acquired in high school curriculum, work experience, and youth organizations. The philosophy, curriculum, and unusual aspects of the suburban Kings Park High School program are discussed by Neil V. McNeill. Louise M. Petraglia and Wallace Kravitz detail methods for incorporating reality into business instruction at Mineola High School. Business education in a rural setting is the topic of Joan M. Gray from Au Sable Valley Central School, Clintonville. Hobart H. Conover of the State Education Department analyzes the relevancy of curriculum to modern business practice and the need to monitor the effectiveness of programs. A concluding section identifies Future Business Leaders of America programs, cooperative work experience, and simulation as important components in education programs. Three-unit vocational course sequences are listed for seven career areas. (MS)

*Hand, Janice S.*

**From the Student: Vocational Education in Montana's Job Market.**

Western Interstate Commission for Higher Education, Boulder, Colo.

Spons Agency—Montana State Advisory Council for Vocational Education, Helena.

Pub Date Aug 74

Note—27p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Educational Assessment, Employment Experience, Followup Studies, \*Graduate Surveys, \*Program Evaluation, Relevance (Education), \*Student Opinion, Vocational Education, \*Vocational Followup

Identifiers—Montana

A two-part survey of 265 of Montana's approximately 2,300 post-secondary vocational technical education students was designed to measure student job skills in the State's job market and to provide a base for improving vocational education. The first part involved mailing questionnaires to 600 students randomly selected from 897, and was supplemented by the arbitrary selection of 150 from the same number for personal interviews. A closed-answer format, 12-item questionnaire was developed to gather information on: student educational completion, education as related to employment, student views of educational quality, and student concern regarding counseling and others. Results, based on 229 returned questionnaires and 36 conducted interviews are summarized in narrative and graphic form for each question. They show an overall satisfactory rating of vocational education by former students. An area of particular student concern was desire for school responsibility in providing job placement. The comment section of the questionnaire yielded a large number of suggestions and criticisms for improving vocational education. Sixteen response trends are identified as part of the conclusions. Appended are the questionnaire, computer print-out of total responses, correspondence forms, and acknowledgements. (MS)

*Syllabus in Trade Welding.*

New York State Education Dept., Albany. Bureau of Secondary Curriculum Development.

Pub Date 72

Note—56p.; The chart on page 39 will not reproduce in microfiche

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Course Content, \*Curriculum Guides, \*Metal Working Occupations, Post Secondary Education, Secondary Education, \*Trade and Industrial Education, Unit Plan, \*Welding

The syllabus outlines material for a course two academic years in length (minimum two and one-half hours daily experience) leading to entry-level occupational ability in several welding trade areas. Fourteen units covering are welding, gas welding, oxyacetylene welding, cutting, nonfusion processes, inert gas shielded-arc welding, welding cast iron, welding stainless steel, pipe welding, and plasma welding (optional) are presented in a three-column format. The first column lists the topics of instruction for each unit. Cognitive, affective objectives, and behavioral objectives corresponding to the topics are provided in the second column. The third column describes specific teaching activities for presenting the topics. Appended are a resource list of books, a list of audio-visual software with sources, a suggested group of tools and equipment necessary for a trade course in arc and acetylene welding, information on eye safety, and the procedure for obtaining welding certification in New York State. (MS)

**Career Preparation in Data Processing—Keypunch Operator, Key-To-Tape Operator, Key-To-Disk Operator. An Instructor's Guide.**

New York State Education Dept., Albany. Bureau of Continuing Education Curriculum Development; New York State Education Dept., Albany. Bureau of Secondary Curriculum Development.

Pub Date [75]

Note—43p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Business Education, Curriculum Guides, Data Processing, \*Data Processing Occupations, \*Electronic Data Processing, Post Secondary Education, Secondary Education, \*Teaching Guides, Unit Plan

The outline presents six units of instruction for use in secondary schools and adult education programs to help prepare students with basic typewriting skills for employment as data entry operators. The units are: (1) introduction to punched card data processing, (2) nonbuffered card punch machines, (3) punched card verifiers, (4) buffered card punch/verifiers, (5) key-to-tape data recorders, and (6) key-to-disk data recorders. They are designed for use as follows: unit one as an introduction to any of the other units, unit three to follow unit two, and units two, four, five, and six, which do not build on the content of the other units, to be used in any sequence. Objectives for each unit are stated in behavioral terms. A two-column format lists topics necessary for an adequate presentation on the left and teaching methods on the right with textbook page references. A description is provided of instruction time required, facilities, application in secondary and adult education programs, classroom management, general teaching suggestions, and expected outcomes for the entire course. Also included are a three-page glossary and a 30-item bibliography of textbooks, references, films, transparencies, and programmed instructional units. (Author/MS)

**A Study of Career Centers in the State of California: Final Report.**

Grossmont Union High School District, Calif. Spons Agency—California State Dept. of Education, Sacramento. Research Coordinating Unit.

Pub Date 30 Jun 75

Note—191p.

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**

Descriptors—\*Career Education, \*Career Planning, Costs, Facility Planning, Facility Utilization Research, Guidance Centers, Guidance Personnel, Guidance Programs, \*Occupational Guidance, Post Secondary Education, Program Planning, \*Resource Centers, Secondary Education, \*Vocational Counseling, Vocational Development

Identifiers—California, \*Career Centers, Career Guidance

California Career Centers are inschool information centers offering a variety of information and

guidance which can be used efficiently and constructively by career guidance personnel as an educational tool to facilitate the career development of students. This study represents an effort to assist guidance personnel to implement, maintain, and improve career centers. Data was collected from a questionnaire given to career centers and students in participating schools. Each of the essential parts of an operational career center are discussed at length: (1) staff (career counselor, work experience coordinator, and paraprofessional), considered in relation to their background and training, job description and allocation of time, and student utilization of their services; (2) printed and audiovisual sources of career information; (3) career center programs and activities; (4) the effectiveness of career centers on students; (5) financial aspects of operating career centers; and (6) evaluation. Detailed suggestions are offered on ways to implement, maintain, and improve a center. Each chapter includes recommendations and references designed to furnish practical guidelines for career education personnel, and the document concludes with a general summary of recommendations. A list of participating schools and the instrument used in the study are appended. (Author/EC)

Descriptors—\*Career Education, Change Agents, Curriculum Development, Elementary Secondary Education, \*Inservice Teacher Education, \*Institutes (Training Programs), \*Material Development, Program Attitudes, \*Program Development, Regional Programs, Tables (Data), Teacher Attitudes, Teacher Improvement

Identifiers—Pennsylvania, \*Thematic Resources Activities for Career Education, TRACE

The document is the first volume of the final report on an inservice training institute in career education; five teams of K-12 educators from three different school districts in one region of Pennsylvania in the three one-week sessions, which were held at four-week intervals. The goals of the institute were to improve the scope of the participants' career education concepts, to increase their career education strategies and techniques and their commitment to career education, and to develop career education curriculum units and usable classroom media. The report briefly describes the procedures followed in organizing and conducting the institute, presents and analyzes the findings of surveys of the participants' attitudes and reactions, and concludes with an outline of the career education curriculum unit which was used to train the educators during the institute. Among the conclusions are these: A curriculum infusion model appears to be a viable strategy for introducing career education elements into a school; intensive sessions with intervals between them and interaction among participants from different districts facilitated the training. That participant teacher and counselor aides did not effectively support teachers' implementation of units is attributed to the omission of a specific training module for aides. (AJ)

The second volume of the final report on a regional inservice training institute in career education for teams of selected Pennsylvania educators, the document is a collection of 14 appendices to the actual report of the organization and proceedings of the institute, which was held in three one-week sessions at four-week intervals. The appendices are comprised of: (1) materials related to the proceedings of the institute, such as team meeting minutes, sample communiques, agendas, and worksheets; (2) career education resource materials, such as Bureau of Employment Security listings, job cluster descriptions, and occupational outlook information; (3) reference materials for program implementation, such as learning center guides, bibliographies, sample newsletters, and a booklet from a career education project in Cashmere, Washington, on generating community involvement through an advisory board; (4) evaluation forms used by the Pennsylvania institute to assess its effectiveness; and (5) the Career Education and Teacher Change Assessment Scale administered to institute participants. Identifiers—\*Thematic Resources Activities for Career Education, TRACE

The book, Volume Three of a final report, is a collection of teachers' guides to units in career education, written by Pennsylvania teachers during a regional inservice institute in career education. The format used, Thematic Resources and Activities for Career Education (TRACE), incorporates the concerns of the Pennsylvania Career Development Model and one of the 15 USOE career clusters into an academic subject already being taught. The collection contains one or two sample units for most grade levels from kindergarten to grade 12; additional units, indicated as appropriate for a span of two or more grade levels, cover the others. Each unit contains an introduction, a statement of goals and behavioral objectives, the concepts or generalizations to be developed, an outline of subject matter (academic skills, careers related to the thematic unit, specific occupational information, etc.) to be mastered, suggested student learning activities, the author's evaluation of the unit after using it, and a bibliography and resource list. An outline of the curriculum unit used to train educators during the institute is included, and the book concludes with three brief units developed by paraprofessionals: two model community simulations for elementary children, and a guide to using resources for secondary students. Descriptors—\*Career Education, \*Community Resources, \*Directories, \*Elementary Secondary Education, \*Resource Guides, Teacher Developed Materials

Identifiers—\*Pennsylvania (Columbia County)

The booklet is a directory to the career education resources of Columbia County in central Pennsylvania and was developed by teachers dur-

ing an inservice institute. It is the fifth volume of the final report of the institute. The resource persons or companies which appear in the directory are grouped by occupational cluster, then listed alphabetically within the cluster according to specific occupational title. For each community resource listed, an address and telephone number are given and a notation is made on the educational services offered (individual contact, class speaker, field trip), the amount of advance notice required, the grade level recommended, and the career subject which the resource person could address. In many cases, a brief comment notes additional information. Two indexes, one of occupational titles and one of company titles, refer the user to occupational cluster numbers. (AJ)

Descriptors—\*Community Health Services, Delivery Systems, Health Personnel, \*Health Services, Program Administration, Program Guides, \*Program Planning, \*Volunteers, \*Volunteer Training

The complex issue of health care delivery is of continuing concern among health care volunteers. Trends in health services that affect the volunteer include those resulting from government or funding policy; changes in the structure of the health professions; increasing consumer interest in health care; and the growing demand for health care information. Volunteer roles include direct service, administration, and policy setting. The planning and implementing of community health volunteer programs can follow one of two models. The first includes six steps: exposure-reflection; problem identification, analysis, and data gathering; goal setting; strategy and planning; implementation; and evaluation. The second focuses on the broad situation but can use the same steps as the first. The attitude to volunteer work should be that of professional commitment to the particular job and should be accompanied by a commitment to interpersonal skills in working with others and sometimes also advocacy for community health. Administering a community health care program involves: recruitment; using the available skills of the volunteers; orientation of volunteers; task design, assignment, and scheduling; and supervision. A form for community survey for a comprehensive approach to health concerns is included. (EC)

Descriptors—\*Career Education, Content Analysis, \*Educational Objectives, Evaluation Criteria, \*Evaluation Methods, Measurement Techniques, Secondary Education, \*Student Evaluation, \*Test Construction

The development of instruments to measure the attainment of career education objectives in the middle grades was the objective of this study. The procedures used involved the following tasks: analysis of career education objectives by a jury of vocational and industrial arts teachers; writing test items appropriate for evaluating learning in the cognitive, affective, and psychomotor domains related to the objectives; developing techniques for scoring the tests; and testing the instruments for validity and reliability. Since the objectives were pupil-centered and flexible it proved to be impossible to write objective items. The subjective nature of the test exposed an unanticipated problem of scoring, which was solved by the development of an explicit scoring key to be used by two independent scorers. The final form of the test contains 25 self and work-related items calling for written responses and is to be used at the ninth grade level. The list of objectives sent to the judges, the revised list of objectives, the test, and the scoring key for the test are appended. (Author/EC)

Descriptors—Comparative Analysis, Cooperative Education, Cooperative Programs, \*Employment Experience, \*Graduate Surveys, Job Satisfaction, \*Vocational Education, \*Work Experience Programs

A 67 percent response was obtained from 2,165 graduates of three types of vocational programs who were surveyed approximately 18 months after graduation to determine and compare their degree of satisfaction with their high school programs and their jobs, programs are: (1) total in-school vocational program; (2) Capstone program—in-school vocational training followed by cooperative work experience in the senior year; and (3) diversified occupations program—total cooperative work experience with school programed related theory. Results of an employer questionnaire indicated satisfaction with the work produced by graduates from the different programs. The procedures and techniques used in collecting the data for this survey are discussed and the findings are described in detail. The findings showed that graduates of vocational programs had a much lower unemployment rate than did the national average of all high school graduates, with Capstone graduates having the lowest unemployment rates. Graduates from total in-school programs did least well in terms of obtaining and keeping employment, pay, job satisfaction, and employer satisfaction. Comments from graduates and employers and the graduate and employer questionnaires are appended. (Author/EC)

Descriptors—\*Area Vocational Schools, \*Enrollment Projections, \*Feasibility Studies, \*Regional Planning, \*Research Methodology, School Planning, Vocational Schools

Identifiers—\*Connecticut

To help determine the feasibility of establishing in any Connecticut town new regional vocational-technical schools that would not produce any adverse effects on existing schools, this research study presents a methodology and computerized program by which these assessments may be made. Part One discusses the need for this type of methodology and its important characteristics.

Part Two describes the concepts and parameters, including summary presentations of relevant statewide data and the procedural approach to determine the impact of a new regional vocational-technical school upon enrollments in existing regional vocational-technical schools. Part Three presents four illustrative case of proposed location areas and their projected impact on existing schools to demonstrate the implementation of the new methodology. Part Four presents detailed consideration of the various factors within the new enrollment projection methodology, their limitations and accuracy, and also considers potential improvements to the methodology through improved data collection and analyses. Summary conclusions and recommendations resultant from this study are discussed in Part Five. (Author/EC)

Identifiers—New York

The first phase of the study on "The Education of Adults in New York in the Last Quarter of the Twentieth Century" was directed toward determining past, present, and future needs in adult education by conducting various interviews and examining literature in the field. Observations indicate that lifelong learning will be a central concern of education in the future, and much needs to be done to make lifelong learning available to all. A proposed "agenda for action" focuses on examination throughout the State of the Areas of: (1) financing, (2) information, (3) counseling, (4) adult learning goals, and (5) the role of the media, particularly television. Additional State or Federal financing for adult part-time students, information dissemination of adult education opportunities, and increased educational/vocational counseling are all viewed as major areas of concern. Proposed focus on adult learning goals has been narrowed to the initial key topic of adult knowledge regarding children and youth, with later emphasis on public affairs, occupations, and the elderly. Special attention is being directed to the role of television in adult education. Working papers on the five areas are being compiled to be used in future proposed consensus building conferences. Identifiers—New York

A summary of the first nine months of the study on "The Education of Adults in New York in the Last Quarter of the Twentieth Century," the report has further explored what public policies and programs might serve to increase the participation of adults in individualized learning activities by examining the issues of: (1) financing, (2) information, (3) counseling, (4) adult learning goals, and (5) the role of the media, particularly television. An approach to financing adult learning that has generated much interest has been a universal lifelong educational entitlement plan to guarantee access to education for individuals throughout their lives. Several State papers related to the concept are presently being considered at the national level. Other possibilities being explored are the opportunities available through private resources. Effective information dissemination appears to be through existing agencies. Additional study is needed to determine how augmented vocational/educational counsel-

ing services can be provided. Only preliminary probes have been made into the issues of adult learning goals and the role of educational television. Action plans include discussion at State/regional adult education conferences, continued participation in the national exploration of the entitlement concept, and increased publicity on the lifelong learning concept. Identifiers—New York

A working paper for the study on "The Education of Adults in New York in the Last Quarter of the Twentieth Century," the discussion is directed to the financing of lifelong learning. It examines the many facets of the question, "What is the 'case' for considering education for all adults a public good and, therefore, an appropriate object of public policy and funding?" in perspective with other social concerns. It recognizes the need for increased public funding if opportunities for lifelong learning issues in the years ahead will be: Who will be funded? For what? How? How much? time for New York State to set as a policy objective the elimination of financial barriers to access to lifelong learning opportunities for all adults. Central public issues in the years ahead will be: Who will be funded? For what? How much? Some alternative Means of providing public funds to support adult education are discussed: (1) State financing of leadership positions, (2) State financing of information and counseling services, (3) State aid to institutions for adult students, (4) institutional incentive grants, (5) extensions of State aid to part-time and non-credit students, (6) entitlement approach, and (7) tax incentives. Identifiers—\*Educational Entitlement, New York

Part of the study on "The Education of Adults in New York in the Last Quarter of the Twentieth Century," the paper presents one entitlement approach, in the form of an outline/analysis of a possible bill that might be developed, as an alternative to financing life-long learning. The paper is intended to stimulate further discussion of the idea of Educational Entitlement (EE). Main provisions of the hypothetical bill would entitle every adult American to receive an annual EE, beginning three years after last enrollment as a regular high school or college student and remaining available throughout the individual's life, to be used for any of a broad range of educational activities. Funding possibilities would be annual funds appropriated by Congress or a special tax to pay for EE. Basic reasons cited for public subsidy of adult learning through EE include: (1) reducing the cost barrier for more adults to participate; (2) seeking to change the fact that those who now participate tend to be those who have already had more education; (3) providing adults with maximum decision-making in determining their education; and (4) adjusting public financing policy for education toward a position of "age neutrality" for adults. Identifiers—Career Counseling, Needs Assessment, New York

A working paper for the study on "The Education of Adults in New York in the Last Quarter of the Twentieth Century," the report is directed to the provision of educational/career information/career counseling services for the adult public. The paper is intended to stimulate discussion on the topic at the State and national level. The main purposes of the report are: (1) to describe the types of services now available; (2) to identify the need for such services; (3) to define the problems, needed research, and policy issues involved in providing the services; and (4) to identify alternative solutions. Discussion covers: the need for information and counseling services (as evidenced by survey data, reports by educational commissions, individual response to services, and Federal government and private foundation financial support); various possible support services for providing educational information and counseling services (a statewide educational resource data bank, the licensing of counselors and charting of counseling agencies, and a resource and planning center); staffing of counseling services; training programs for counselors of adults; and the cost and funding of these services. A chart in the appendix lists and describes existing counseling services throughout New York State. (EA)

Descriptors—\*Counselors, \*Educational Counseling, \*Educational Needs, \*Educational Problems, \*Post Secondary Education, \*Veterans, \*Veterans Education

Identifiers—New York, \*Vietnam Veterans

Educational and training benefits under the G. I. Bill of 1966 exist for Vietnam era and peacetime veterans. In 1974 New York State accounted for 513,000 Vietnam veterans and 248,000 peacetime veterans who are eligible for G.I. educational benefits, but only half of those eligible had applied for available benefits. Lack of adequate outreach and counseling services in different agencies and schools have contributed to the 14 percent unemployment rate of Vietnam veterans. A continuing increase in veteran population is projected with 80 percent eligible for postsecondary educational opportunities. A characterization of the Vietnam veteran is given in terms of location, age, educational background, and employment. Discharge procedures, available counseling, and G. I. benefits are described with reference to the various State agencies that offer information and assistance to veterans. Problems encountered are also discussed. Examples of programs that assist the veteran and a model program are given as a guide for veteran counselors. Problem areas in meeting the needs of the veterans are identified as related to limited federal funding, lack of interagency cooperation, and lack of outreach and counseling services. Appended material include documentation for the study. (EC)

Identifiers—\*Africa

The Kikuyu seminar, third in a series of international meeting on the use of comparative studies as a tool of adult education, focused on the application of the comparative approach to developing countries, particularly Africa. Essential components of the structure of adult education were divided into main sectors, which are individually discussed within the document: (1) goals of adult education; (2) content of adult education; (3) providing agencies; (4) administration and finance; (5) staff, training, and research; (6) methods and materials; and (7) external relationships. The report highlights the range of subjects within each sector, indicates some of the alternatives under discussion, and offers 17 recommendations related to the seven sectors. The seminar conclusion was that "only by taking a comprehensive view of the total field of adult education, regarding it as a system made up of apparently independent but nevertheless interacting components each either supporting or weakening the others, would it be possible to secure a harmonious development of the whole and thus bring about a significant and lasting development of adult education." Appendixes contain the opening speech by the Minister for Housing/Social Services, Kenya and diagrams of adult education structure in Sudan, Tanzania, and Zambia. (EA)

Descriptors—\*Employment, \*Employment Programs, \*Federal Legislation, \*Federal Programs, \*Labor Demands, \*Labor Market, \*Manpower Needs, \*Manpower Utilization, \*Public Service Occupations, \*Research Needs, \*Unemployment

Recent economic trends led to several pieces of manpower legislation and the establishment of several programs: the Manpower Development and Training Act of 1962, the Comprehensive Employment and Training Act of 1973, and the Emergency Jobs and Employment Assistance Act of 1974. This legislation opened public service jobs and established Federal programs for special unemployment assistance. The role of manpower programs in alleviating the unemployment situation and the need to develop human resources to meet employment needs in the future are discussed. Aspects of the implications that these programs have for research and development issues in the making of comprehensive manpower plans and the establishment of planning councils are reviewed. Some of the research and development needs arising from current public service employment programs are raised. Suggestions for major efforts under manpower programs include: special programs for disadvantaged clients; providing income assistance to ex-offenders; placing trained minority women in jobs commensurate with their skills; and improving the employment service. Other areas for research and development concern the transition from school to work for young people and the increasing unemployment rate of black teenagers. (Author/EC)

**Institution-Building in Technical Assistance: The Design Perspective and Some Implications for Research and Development in International Education. Occasional Paper No. 8.**

Ohio State Univ., Columbus. Center for Vocational and Technical Education.

Pub Date 75

Note—16p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Conceptual Schemes, \*Developing Nations, \*Institutions, \*Research Design, \*Research Methodology, \*Technical Assistance

Different approaches to economic assistance for developing nations have been used over the years. These basically involved building institutional structures such as those found in developed nations and the introduction of investments and industrialization. The Interuniversity Research Program on Institution Building studied various aspects of institution-building, development, and problems encountered in building agricultural research, teaching, and service institutions in developing countries. The need for more knowledge of technical assistance methodology resulted in various research projects to study ways of improving technical assistance and institution-building based on a new model. A design perspective approach to institution-building concerns effective arrangements within the domain of technical assistance encompassing implementation and evaluation. Designing is a unique process for a particular problem where technical assistance is often affected by the characteristics of agencies and environments. Questions concern the applicability of the design approach on a practical level, its basic assumptions, and what impact it might have on the field of education. (EC)

The publication, a summary of a two-day workshop for education and rehabilitation personnel working with the mentally retarded student-client, contains the rationale for work-study experience programs, guidelines for establishing and maintaining a program, and information on various stages of the process. The following papers, which are included in the document, were presented: John R. Peck (Department of Special

Education, University of Texas, Austin), "Why We Need Work-Study Programs"; Stanley Fudell (Department of Special Education, Texas Tech University, Lubbock), "Planning and Implementation of a Work-Study Program"; and Tom J. Hicks (Director of Special Education, Arkansas State Department of Education, "Status of Program Standards and Accreditation for Work-Study Programs in Arkansas". Two role-playing panel discussions, also included, were held to exemplify the establishment of a work-study experience program and to provide insight into the cooperative nature of the program and familiarization with the student-client. Descriptors—Educational Programs, \*Federal Government, \*Federal Legislation, Government Employees, \*Internship Programs, Student Employment, \*Student Volunteers

The hearing considered two bills, H.R. 2162 introduced by Charles Wilson of California, and H.R. 3522 by C. W. Bill Young of Florida, which authorize any officer or employee of the United States to accept the voluntary services of certain students for the United States. This was advocated by President Ford in his commencement address to the Ohio State University where he strongly emphasized the need to bring education and employees together in a new climate of credibility and pledged the government's help to create a responsive vocational environment. The testimony presented includes comments from students participating in the Executive High School Internships of America Program, serving as special assistants to senior officials in government, private nonprofit agencies, civil organizations, educational and cultural institutions, mass communications, and the private sector. Other supportive testimony came from sponsors and schools involved in the Internship Program, the Associate Secretary of the National Association of Secondary School Principals, the Administrative Assistant of the Association for Supervision and Curriculum Development, and others. The full text of all testimony and discussion is included in the document. (Author/EC)

Descriptors—\*Educational Assessment, \*Evaluation Criteria, \*Evaluation Methods, Measurement Instruments, Post Secondary Education, \*Program Evaluation, Secondary Education, \*Vocational Education

The instrument was designed for an assessment program to assist schools and institutions in determining specific needs of their vocational programs and to provide the North Dakota State Board for Vocational Education with accountability data for use in program development. The form is divided into 12 sections to facilitate identification of program needs: philosophy and objectives, curriculum, instructional staff, administration, physical facilities and equipment, instructional materials and supplies, guidance, community involvement, student organizations, advisory committees, students with special needs, and occupational experience. Detailed criteria for each section are listed with ratings to be indicated on a five-point continuum ranging from major improvements needed to no improvements needed. The scale also provides a space for indicating that the criteria does not apply. Each page of the instrument, to be marked by a self-

assessor and/or outside evaluator, is produced in duplicate for use with carbon paper. A rating scale (0-100) following each section represents a summary evaluation to be marked based on responses to the criteria for each section. Space for comments and recommendations is also provided. Finally, an assessment profile sheet contains space for indicating the summary ratings for the major sections and an overall program rating. Prediction of Academic Performance of the U.S. Navy Officer Students in Operations Research/Systems Analysis Curriculum at the Naval Postgraduate School.

Naval Postgraduate School, Monterey, Calif.

Report No—AD-A009-922

Pub Date Mar 75

Note—77p.

Available from—National Technical Information Service, Springfield, Virginia 22161 (AD-A009-922; HC \$4.75; MF \$2.25)

Document Not Available from EDRS

Descriptors—Academic Achievement, Academic Records, Biographical Inventories, \*Grade Prediction, \*Graduate Students, Graduate Study, Masters Theses, Measurement Instruments, \*Military Personnel, Military Schools, \*Officer Personnel, \*Predictive Measurement, Predictive Validity, Predictor Variables, Vocational Interests

A study of the U.S. Navy officer students who were registered in the Operations Research/System Analysis curriculum at the Naval Postgraduate School (NPS) in spring, 1974, was conducted using biographical data, the Strong Vocational Interest Blank, and the Graduate Record Examination to develop an equation predicting academic performance of U.S. Navy officer students. Several prediction equations were derived, using a development sample and then cross-validated, using a hold-out sample; the results were statistically significant. Four of the prediction equations derived were selected to be further analyzed to obtain regression coefficients, using the Jackknife procedure. No significant differences were found between the results obtained using the Stepwise Regression procedure and the Jackknife procedure. It was concluded that data from the three instruments (the biographical questionnaire, the Strong Vocational Interest Blank, and the Graduate Record Examination), as well as data from any combination of two (or three) of them, provided higher potential for predicting academic performance than did prior academic performance. It is pointed out that the group studied was highly homogeneous; already accepted to NPS, all the officer students had a prior grade average of 2.5 or above. Among appendices are the biographical questionnaire, the Strong Vocational Interest Blank, and graduate education potential categories for classification. (Author/AJ)

Descriptors—Administrative Change, Change Strategies, Communication Problems, \*Computers, Decision Making, Educational Problems, Interaction, Management, \*Management Development, \*Management Education, \*Management Information Systems, Models, \*Operations Research, Organizational Change, Problem Solving, Technological Advancement

Identifiers—\*Computer Models

The report begins with a brief examination of the role of computer modeling in management decision-making. Then, some of the difficulties of implementing computer modeling are examined, and finally, the educational implications of these issues are raised, and a comparison is made between what is currently being done and what might be done to improve managerial use of computer modeling. The main thesis of the paper is that Computer Management Information (MIS) and Operations Research/Management Science (OR/MS) technicians have had little impact on top-level managerial decision-making. Some of the reasons for this include lack of communication, lack of necessary management incentive, differences in cognitive style between managers and OR/MS/MIS analysis, the perceived threat of the OR/MS/MIS techniques, and the fact that computer modeling is yet a relatively new technique. The report holds that computer models must be developed which interact with the manager to extend his thinking ability, rather than solve a problem. Management education has generally neglected managerial issues related to computer modeling. The use of computerized games and cases studied is discussed as a means for training managers to model effectively. (Author/AJ)

Document Not Available from EDRS

Descriptors—Aviation Mechanics, Aviation Technology, \*Design Needs, Equipment, Equipment Evaluation, \*Equipment Maintenance, \*Military Training, \*Task Analysis, Trend Analysis

Identifiers—\*Avionics

A research study was conducted to determine the feasibility and desirability of developing generalized training equipment for use in avionic systems maintenance training. The study consisted of a group of survey and analytic tasks to provide useful guidance to serve the needs of the Naval Aviation community in future years. The study had four specific objectives: (1) to assess the extent of maintenance task commonality existing among airborne weapons systems; (2) to identify new developments and design trends in avionics equipment; (3) to recommend the development of specific generalized training devices; and (4) to describe the general design characteristics of the training equipment recommended. The following tasks were completed and are reported: (a) a survey and inventory of operational aircraft; (b) the selection of a sample of avionics systems; (c) the identification of major task requirements existing for those systems; (d) a survey of new developments in avionics system design; and, (d) a survey of

present maintenance practices. Recommendations were formulated for generalized training equipment development: (1) a generalized communication system maintenance trainer; (2) a digital systems training device, augmented for avionics; and (3) a series of generalized devices for teaching lower level maintenance skills. Document Not Available from EDRS

Descriptors—Course Content, Course Organization, \*Driver Education, Evaluation Methods, \*Institutes (Training Programs), Lesson Plans, Practicums, \*School Buses, Teaching Methods, Traffic Safety, \*Trainers, \*Training Techniques, Workshops

The National Highway Traffic Safety Association (NHTSA) has supported the development of a training program for school bus drivers in the form of a curriculum package (instructor's, course, and trainee study guides). To assist the States in making the program operational, NHTSA in 1974 supported the conduct of five five-day institutes to explain the curriculum package in detail to potential instructors and teach them how to teach. The document reports on the institutes, describing the planning, preparation, management, and evaluation procedures. Findings include these: 99 percent of the 78 enrollees from 47 States and two territories expect to be personally involved in school bus driver training efforts if the course is offered at the local level; 97 percent expect their organizations to use NHTSA materials; and 92 percent rated the institute as quite or very valuable. Among the appendices are 70 pages outlining the institute's presentations to the trainees. These include teaching methodology topics as well as curriculum-specific topics, and workshop procedures which included lesson organization and practice teaching. Teaching at the institutes was shared by Dunlap and Associates, Inc., and Central Connecticut State College. Various educational institutions in different areas served as hosts. (AJ)

Descriptors—Educational Assessment, \*Employment Experience, Followup Studies, \*Graduate Surveys, \*High School Graduates, \*Job Placement, Program Effectiveness, Relevance (Education), Vocational Education

Identifiers—Arizona (Tucson)

A survey of the 1972 and 1973 graduating classes from Sunnyside High School, Tucson, Arizona was conducted to secure information on the effectiveness of vocational training. An instrument was designed to determine placement in areas related to training, additional on-the-job training needed, and academic satisfaction of nonvocational graduates. A 39 percent return was obtained, and results are tabulated and analyzed. Fifty-three percent of the graduates responding were employed, 37 percent were not looking for work, and only 9.6 percent indicated that they were looking for work. Of those working 67 percent said that they were not working in jobs where they had high school training. On-the-job training was not needed by 54 percent of those responding. Where it was required, the length of training for over 50 percent was one to three weeks. The number of graduates in postsecondary education was 48.7 percent. The survey indicated that vocational and academic courses were

generally satisfactory in meeting the needs of work and college. Recommendations are given for improving the placement program and increasing the amount of vocational and academic courses. A copy of the survey used and selected comments are included. (Author/EC)

Descriptors—\*Career Education, \*Elementary Secondary Education, \*Program Descriptions, Program Development, \*Program Evaluation

The report outlines a K-12 career education program planned and implemented for 18 months. Six goals and objectives were designed to produce career exploration and practical occupational experiences, an instructional model, student and community counseling and placement services, and inservice education. The procedures followed in developing the program and 19 results and accomplishments are listed and discussed. Also described are means of internal and external evaluation and nine conclusions and recommendations for improvement and expansion of the program. The second part of the report presents the results of a third party evaluation done by the Research Coordinating Unit, University of Nebraska which attempted to relate project activity, recommendations, and suggestions to project objectives. Results, activities, and problems were reported to the evaluation committee on a quarterly basis. Tabulation of activities and recommendations directed at the objectives indicates the productivity of the project. The evaluation concludes with a list of future recommendations for what was found to be a generally successful program having local and statewide impact. Appended are: list of career education source materials, student evaluation of an instructional unit, list of teacher-developed units, PERT chart of learning activities for staff improvement, and inservice program evaluation instrument. Some of the career education activities which have taken place during the first year of a comprehensive K-12 program involving 780 students in six schools are summarized in the report. The program, developed for a rural community (Milford, Nebraska, population 1,850), had six objectives designed to produce career exploration and involved practical occupational experiences for students, an instructional model, counseling and placement services for students and community members, and inservice education. The project was evaluated using the pretest, post-test method. Components briefly described are: (1) inservice program, (2) new program implementation, (3) highlights of first semester (list of guest speaker, project, and field trip activities for all grades), (4) conceptual career education model program (emphasizing the concepts of self, career orientation, and world of work), (5) Milford Information Center which provides students, parents, and dropouts with career, job placement, and educational information, and (6) the K-12 counseling and guidance program. A three-page list of career

education references and materials is included. Appended are the conceptual model, titles of teacher-produced units, description of the counseling and guidance program, one secondary and three elementary teaching units, and an information center newsletter. (MS)

An exploration program, part of a comprehensive rural school-based career education project, utilized mini-course offered in cooperation with a community college to introduce ninth through eleventh grade students to technological careers. The objectives of the program were to provide students with short-term exploratory experience and at least one competency in a curriculum area while developing the concept of community services provided by the college. Eighteen four to six hour mini-courses were structured in five occupational curriculum divisions: business, auto and diesel, construction, electrical and electronics, and manufacturing and fabrication. The courses were taught by college staff at the college between spring and summer quarters. Of 1,100 students initially indicating an interest in the two-day program and selecting four course choices, 154 actually attended both days. Inservice program development, student enrollment priority, promotion of the program to other area schools and the community, assessment of program need by area counselors and superintendents, means of evaluation, description of content and activities for four courses, and a PERT chart are included. Summaries of student and staff evaluation forms indicate a generally favorable response to the courses. Appended are: planning schedules, promotion materials for superintendents and counselors, and course registration forms. (MS)

Descriptors—\*Career Education, Elementary Secondary Education, \*Program Evaluation, \*Questionnaires, \*Test Results

The results of a pre and post-test designed to provide continuous evaluation of a K-12 career education program are contained in the report. Students, teachers, administrators, and counselors from Milford Public Schools and from four control school districts, whose characteristics are described in the report, participated in the evaluation. Members of the Milford Parent Teacher Organization (PTO) were also respondent in the tests which were administered in May, 1972 and May, 1973 to the same populations. The evaluation instrument consisted of 11 components: (1) questionnaire on occupational units, (2) counselor questionnaire, (3) student ranking of occupations, (4) student listing of occupations they knew something about, (5) occupational and educational information test, (6) school sentiment index, (7) choosing a job inventory, (8) cooperative education sentiment index, (9) attitudes toward a guidance program, (10) administrative evaluation, and (11) Milford PTO evaluation. Data presented separately for each component includes: the collection form, an objective, the procedure used, results of pre and post-tests (tabulated for each school), observations, and conclusions. Appended is a letter of commitment for participating schools. (MS)

Different aspects of life can be experienced by a child in a learning environment offered by a teacher. Such experiences will better prepare the student for the future in his dealings with other people and situations. The book offers detailed suggestions for various ways in which the teacher can introduce to the student in the primary grades information about various occupations and also words which may be useful in future reading and writing experiences. It contains sections on words to know, things to talk about, and things to do relating to different environments the child finds himself in (home, school, and community). Information is provided for the teacher about a variety of occupations, geared to the suggestions for student activities. (EC)

Descriptors—Adult Characteristics, \*Adult Education Programs, Census Figures, \*Demography, \*Economically Disadvantaged, Educational Background, \*Educationally Disadvantaged, Educational Needs, Educational Objectives, Educational Opportunities, Females, \*Post Secondary Education, Senior Citizens, State Surveys, Tables (Data)

Identifiers—\*New York

The document examines the adult population of New York State demographically in terms of potential participation in postsecondary continuing education. Information is divided into four sections of supplemental data. Section one, New York State Population, discusses the general characteristics of the adult population (those 25 and over). Section two, Educational Levels, state that less than 12 years of schooling has been received by 47 percent of the State population, with 31 percent receiving 12 years of schooling, and 22 percent having 13 or more years of education. Potential participants in the educational programs number 3.5 million. Section three, Specific Populations to Be Served by Postsecondary Continuing Education, examines women, senior citizens, and the educationally and economically disadvantaged. It is stated that this last group is in the most need of, and least represented in, continuing education programs. Section four, Summary of Report, presents the specific group statistics. Federal census data and estimated adult learning audience for New York State (1970), a list of 1974 New York State legislative bills concerning senior citizen education, two tables regarding New York State's economically disadvantaged, data on the Higher Education Act of 1965, and a legislative memorandum regarding program support are appended. The study was made to obtain curriculum development data for food service education programs below the baccalaureate level. Tasks related to the job functions of service, production, sanitation/safety, menu planning, procurement, supervision, and management were studied for five job categories of full-time personnel: middle-level service, upper-level service, middle-level production, upper-level production, and manager. Questionnaires, personal interviews, and a task list were used to obtain information from managers and employees in 32 restaurants, 20 hospitals, 14 nursing homes, 23 colleges/universities, and 21 schools in Iowa which met the selection criteria. Data from 339 of a possible 525 tasks lists are analyzed in detail and are also presented in tabular form for each job category, classified by establishment type, to show the percent of personnel performing the tasks, relation of task patterns to job category and establishment type, and frequency of performance. A detailed summary presents specific conclusions supporting three general outcomes: Tasks for the job categories and establishments were identified, commonality and uniqueness in their performance was demonstrated, and probable changes in task combinations were shown. A three-page reference list and appended data collection materials and tables of data are included. (MS)

The report established the need for educational accreditation and consolidates the various means of achieving accreditation that are available to the Armed Forces, into one accessible reference. The scope of each accrediting method is presented in detail, allowing educational officials to evaluate the methods in respect to their individual objectives. Sufficient data is included to direct officials in the initial procedures for obtaining accreditation. Emphasis is also placed on the extent the Armed Forces are concerned with accreditation by citing institutions that have been accredited or institutions that are working towards it. Special consideration has been given to the United States Army Materiel Command Intern Training Center at Red River Depot. All of the initial procedures to achieve accreditation have been proposed for the Center. (Author)

**Identifiers**—\*Illinois, Local Education Agencies

The document summarizes the fourth annual evaluate findings, based upon on-site evaluation, during 1974-1975, of 88 local educational agencies (LEA) throughout Illinois. Each LEA Evaluation focused on eight areas, and these same areas provide the structure for the report, with conclusions, recommendations rating, and suggested solutions provided. (1) Students Served commends the variety of delivery systems used and expansion of programs regarding special groups but notes five areas where improvement in meeting the needs of special student groups is necessary. (2) Occupational Programs notes expansion of services through LEA co-operation but concern is expressed for poor quality programs. (3) Administrative Organization cites both areas where improvement is needed while noting staff working relations are good. (4) Personnel finds teachers basically well qualified. (5) Objectives are unclear and in need of development. (6) Evaluation explores the variety and amount of evaluative programs used. (7) Resources Utilized notes a lack of co-ordination between resources available and their use, and inadequate equipment and facilities. (8) Guidance commends student interest growth in occupational areas and suggests further development of programs in the school system. The report was prepared to aid in program planning and evaluation on a State and local level. (LH)

Unit), Family Life, \*Family Relationship, \*Females, Industrial Personnel, Interviews, Job Tenure, Questionnaires, \*Social Adjustment, Social Science Research, Southern States, Surveys, Teachers, \*Vocational Adjustment

**Identifiers**—Louisiana (Saint Martinville)

The report describes a research project which investigated the impact of change on new employees, their families, and the community when a new type of industry locates in a small semirural Louisiana community. The subjects of the research were 218 women (144 black and 74 white) employed in the new clothing manufacturing industry and in three traditional jobs in the community (unskilled factory work, domestic work, and teaching). Personal interviews were used to ascertain the background, evaluation of work situation, and the effect of employment on such areas as childcare patterns, child development, leisure time for the family, social life activities with other workers, and family planning for the subjects. In addition, results on the Metropolitan Achievement Tests were used to assess the academic performance of the children of the subjects. In general, few findings were related to length of employment (one year vs. three years) in the new industry. Although racial factors affected some results, the families of both black and white workers were satisfied with the workers' jobs, and their children showed improvement in reading and mathematics over a one-year period. Two appendixes include the interview questionnaire and the Occupational Level Rating Scale used to determine workers' socioeconomic status. (JR)

**Descriptors**—\*Annotated Bibliographies, \*Career Education, Community Involvement, Educational Counseling, Educational Guidance, Educational Programs, Evaluation, Field Experience Programs, \*Higher Education, Inservice Teacher Education, Instructional Programs, \*Models, Student Placement

The model for career education in higher education describes sample characteristics and activities for each of the model's seven components: faculty-staff inservice, counseling and guidance, instructional program, field experience in the world of work, community involvement, placement services, and evaluation. An annotated bibliography for career education in higher education contains 81 entries of books, journal articles, handbooks, reports, manuals, guides, monographs, and bulletins, all published since 1966, all but a few since 1972. The entries are grouped into categories coordinated with the model's seven components and one general background heading. (JR)

**Descriptors**—\*Career Education, Educational Innovation, Educational Needs, Educational Programs, \*Higher Education, \*Institutional Role, Instructional Programs, Models, Relevance (Education), \*Secondary Education, \*Student Needs

Secondary and higher education have at least two things in common with respect to career education. Assuming that students' career preparation is minimal, both must strive to compensate for this deficiency, and both levels sorely need faculty and staff inservice. At the secondary level alone there is a need to look at every student as having a career goal and as needing help with career planning. Career education implementation activities at the high school level include: career guidance and counseling, job information, career exploration opportunities, job preparation opportunities, cooperative education experiences, placement services, and realistic and relevant learning opportunities for dropouts. At the higher education level it is necessary to meet students' needs through innovative and flexible

programming. A model for career education in higher education recently developed by the author and his students contains seven components: faculty-staff inservice, counseling and guidance, instructional program, field experience in the world of work, community involvement, placement services, and evaluation. Dealing with students as individuals who have stated and unstated career development needs is basic to program development in any institution. (Author/JR)

**Identifiers**—ERIC Clearinghouse in Career Education

The first of two parts of the career education primer focuses on the following aspects of career education: the need for the refocusing of educational systems toward career education; ways of incorporating career development elements, life activities, and a democratic ethic into career education programs; methods of including parents, families, and communities into the process of career education; the fashioning of career education programs out of existing instructional programs; the utilization of career resources available in the community; sample programs in such community involved career education programs at the various educational levels; the national career education resource center, the ERIC Clearinghouse in Career Education; the planning and evaluation of new career education programs; and the professional commitments which will be necessary to involve educational personnel and institutions in career education. Part 2 of the primer, a bibliography of ERIC career education literature which comprises over half of the document, describes the ERIC system and lists 50 pages of career education literature by subject under the headings of: philosophy; programs; program organization, administration, and evaluation; and education in career education. **The Liberal Arts and Career Education: A Look at the Past and the Future. Monograph on Career Education Series.**

Spons Agency—Office of Career Education (D-HEW/OE), Washington, D.C.

Pub Date Jun 75

Note—29p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Career Education, \*Educational History, Educational Needs, Educational Philosophy, Higher Education, \*Liberal Arts

The monograph provides a historical perspective on the role that liberal arts has played in preparing individuals for careers and examines the role it will have to play if the liberal arts are to remain a meaningful form of education. The argument has four parts. First, it examines recent definitions of career education as an education calculated to ask with particular clarity what a person's vocational and life purposes are. Second, it examines the history of liberal education from the twelfth through the eighteenth centuries as an education also calculated to refine people's vocational skills and shape their life purposes. Third, it examines deviant nineteenth century traditions which argue for the separation of education from the formation of vocational or life purposes in the interest of a pursuit of knowledge for the sake of knowledge. Fourth, it displays how the older marketplace version of liberal education also per-

sisted through the nineteenth century up to today and how effective modern versions of this sort of education have emerged which emphasize that a liberal arts education must be open to the real world. It concludes that the new career education and a reformed liberal arts study can and must support one another. (Author)

Report No.—TR-2

Pub Date Mar 75

Note—18p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Employment Qualifications, \*Job Analysis, \*Military Service, \*Research Design, Research Utilization, Task Analysis, \*Technical Reports

Identifiers—Job Design, Job Enrichment, Navy

The report is based on a working meeting (University of Akron, Akron, Ohio on November 13, 1974) of research contractors involved in job analyses, job design, and job derived employment criteria. The purpose of the meeting was to provide an informal exchange of research findings and designs among the participants, most of whom were engaged in research projects funded by the Office of Naval Research. The meeting included a consideration of task taxonomy, structured job analyses, task inventories, and the relevance of these methodologies to selection, training, and job design. Research results from field and experimental simulation studies were reported and discussed. A distribution list of names and addresses is included. (Author/EA)

Barrett, Gerald V. *And Others Relationships Among Job Structural Attributes, Retention, Task Descriptions, Aptitudes, and Work Values. Technical Report No. 3.* Akron Univ., Ohio. Dept. of Psychology.

Spons Agency—Office of Naval Research, Washington, D.C. Personnel and Training Research Programs Office.

Report No.—TR-3

Pub Date May 75

Note—70p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**  
Descriptors—Electronics, Field Studies, Individual Characteristics, \*Job Satisfaction, \*Job Tenure, Maintenance, \*Military Personnel, Standardized Tests, Task Performance, Vocational Aptitude, \*Work Attitudes, \*Work Environment

Identifiers—Attribute Description Scale, Attribute Preference Scale, Navy

The report describes field studies involving nonsupervisory Naval maintenance and monitoring electronics personnel. The studies' results indicated that Naval retention was related to a number of individual and job attributes. Extended Naval tenure was associated with lower verbal and clerical aptitudes (Naval Test Battery); higher levels of activity preference, pride in work, personal relations, and satisfaction with supervision and the work itself; a less explicit description of the future; and a belief that others shape and control one's future. The Attribute Preference Scale/Attribute Description Scale (APS/ADS) was developed to measure descriptions of current jobs and job structural attribute preferences. Results showed that Naval personnel who indicated a greater discrepancy between preferred and described job attributes characterized their current jobs less favorably. Twenty pages of appendices explain and provide copies of the APS/ADS scales, a biographical information sheet, and descriptive statistics for APS/ADS. A distribution list provides the names of those persons and agencies to whom the report was distributed. (Author/JR)

Powers, Thomas F. *And Others The Seminar Practicum: A Community Based Instructional System for Paraprofessional Education.*

Pennsylvania State Univ., University Park. Food Service and Housing Administration.

Pub Date 30 Jun 74

Note—197p.

**EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage**  
Descriptors—\*Course Descriptions, \*Course Evaluation, External Degree Programs, \*Food Service Workers, Instructional Systems, Low Income Groups, Minority Groups, Practicums, Programed Units, \*Service Workers, \*Student Seminars, Tables (Data), Work Experience Programs

Identifiers—Community Based System, Hospitality Education, \*Paraprofessional Personnel

The instructional system which emerged from the Pennsylvania State University three-year project was a seminar practicum for Hotel and Food Service paraprofessional workers which provides work experience, a set of self-instructional modules, subject matter, a weekly seminar discussion, and encourages minority/lower income students. A summary of two test programs has indicated that students and faculty consider the practicum an eminently successful means of delivering hospitality education. The report presents a detailed view of the conceptualization of the seminar process, difficulties, and models employed in developing the self-instructional materials; a report from a year's experience in teaching the seminar practicum; objective measurements of student performance; and a summary of student/faculty/employer views of seminar practicum effectiveness. Also presented are a summary of the Dietary Technician program and an outline of remaining work on external degree and upper division program development. Material that was reviewed in the process of conceptualizing the paraprofessional role is presented to clarify Hotel and Food Service/Dietary Technician programs as fundamentally paraprofessional from a functional standpoint. The concluding section presents a brief discussion of some of the policy issues raised by this and other paraprofessional education system design projects. (Author/EA)

Descriptors—Annotated Bibliographies, Bibliographies, Economic Factors, \*Economic Status, \*Food Service Industry, \*Futures (of Society), Mechanical Equipment, Methods, Nutrition, \*Planning, Tables (Data), \*Technological Advancement

Designed as a basic reference document, the report has mapped the economic and technological territory of the food service industry, examined the dynamics shaping the industry today, and examined questions in need of further research. It is a volume that might be useful to food service teachers and curriculum planners as well as a volume which might be of interest to the industry and students. The report is organized into six main sections, authored by professionals in the field: (1) Industry Dynamics: An Institutional View, (2) Food Processing and Preparation Equipment As It Shapes the Future of Food Service, (3) Food Processing Methods: The State of the Art and Its Future Effect on Food Service, (4) Nutrition As It Affects and Will Affect Food Service, (5) Planning Aspects Affecting the Future of Food Service: A Study of Planning and Spatial Issues, and (6) Economic Trends Influencing the Future of the Food Service Industry. A bibliography or annotated bibliography is included at end of each main section. The concluding, partially annotated Bibliography of the Economics of Food Consumption (59 pages) has been organized to make information available to those particularly interested in hospitality industry food service. Descriptors—\*Administrator Guides, \*Guidance Services, \*Job Placement, \*Manuals, Records (Forms), Secondary Education, \*Secondary School Students, Vocational Followup, Work Experience Programs

Directed to school systems initiating a job placement program, the Atlanta Public Schools (Georgia) job placement manual discusses how a job placement program can provide a transition from school to work for all students leaving the public schools, as well as place students in paid and non-paid part-time work experiences as a part of their education. The five sections of the manual cover: (1) planning and management (administration, organization, objectives, advisory committee role, decisions, vocational personnel role); (2) student development (student needs, student strengths, job seeking and job holding skills, disadvantaged and handicapped students, communications, and student involvement); (3) job development (employer lists and surveys, and community relations); (4) central record system (student and company surveys, job order forms, student personnel cards, letter of introduction, student and employer followup reports); and (5) followup (followup study, information feedback, and follow-through activities) and follow-through (work adjustment and career development activities and placement linkage). Copies of related information forms are included within the sections. Appendixes include information on child labor laws, interview hints for students, and additional sources. (EA)

The job placement manual of Forest Park Senior High School, Forest Park, Georgia, assists in producing a more effective program by providing specific job placement procedures for the high school. The 1,900 student high school, located in a suburban area south of Atlanta, had 522 graduates in 1974 (42 percent—college-bound, 10 percent—technical school, 35 percent—employment, and 13 percent—other plans). The manual provides information regarding: the job placement advisory committee; management plan (staff roles and responsibilities); surveying student needs; publicity; assessing placement opportunities; preparing students for finding, entering, and maintaining employment; placement procedures; job adjustment; records; related agencies; staff development; and calendars. Appendixes contain copies of various sheets related to job placement. (EA)

\*Occupational Information, Resource Guides, Secondary Education, Technical Education, Technical Occupations, Trade and Industrial Education, Vocational Education

The first of four main sections of the electrical occupations curriculum guide is an introduction which describes the design and use of the guide and which provides five pages of suggested curriculum resources. Section two contains job descriptions for 18 electrical occupations. For each occupation the guide explains industry's expectations of the person performing that job and outlines the basic skills that must be learned to gain an entry-level job. Section three contains 50 educational blocks of specific skills or portions of a skill that needs to be learned, each of which provides references, a general objectives, and a topical outline specifying skill objectives and recommended time. Each job description in section two makes specific reference to the appropriate educational blocks in section three, thus providing a cross reference between the two sections. Part four is an appendix which illustrates such things as electrical charts, forms, abbreviations, tables, symbols, and equipment, and provides a glossary, a list of references, and criteria for placing handicapped students. Identifiers—\*Traffic Court Judges

A series of five national instructor training workshops were planned for traffic court judges and administrators. A curriculum package which had been previously prepared was used to orient selected key personnel toward highway safety. Technical Education Research Centers (Midwest

Center) conducted the conferences from October 23 to December 12, 1974. The report contains detailed information on the successful operation of Manpower Training workshops for the National Highway Traffic Safety Administration using a management conference procedure. Thirty-one of the fifty States, Puerto Rico, Virgin Islands, and the District of Columbia were represented with 63 enrollees. Individual response was very positive and all participants were awarded Department of Transportation Certificates of Completion qualifying them as instructors for Traffic Court Judges workshops. A summary (11 pages) of the references used in the workshops is appended together with related workshop correspondence and forms. (NTIS)

The report describes the development of a model training program, Training and Technology, and subsequent efforts to diffuse the innovation. Before the inception of TAT, a survey study, Resources for Southern Manpower Development, had indicated that the South had considerable manpower development potential and need. TAT was organized by Oak Ridge Associated Universities and Union Carbide Corporation, Nuclear Division to develop the potential and satisfy the need. The program capitalized on the industrial training capacity and the industrial environment of an actual production facility to produce an up-to-date training system carefully designed and frequently modified to meet current industrial needs. The concept in its final form involved six months of full time training with the curricula directed entirely toward actual job skills. When the concept was fully established and its effectiveness demonstrated, ORAU encouraged diffusion of the model. The model is analyzed in terms of its potential for diffusion. (NTIS)

Identifiers—\*Rhode Island

The first of three main sections of the report on career education in Rhode Island, a rationale for career education, discusses the need for career education, some misconceptions about career education, seven career education tenets, and two State career education program models (Oklahoma and Nevada). Part two deals with career education programs and (1) reviews career education at the level of the U. S. Office of Education (USOE) with respect to occupational clusters and present USOE career education efforts; (2) describes career education programs in the States of Arizona, Alabama, Florida,

Nevada, and California; and (3) reviews the state of career education in Rhode Island (discussing the programs implemented at Pawtucket, East Providence, and North Kingstown). Part three, the future of career education, provides a capsule summary of the USOE fiscal year 1975 Plan for Career Education, summary and conclusions, and recommendations regarding a State career education plan, financial support, and further public and professional acceptance of the career education concept. Over half of the report on career education programs in Rhode Island consists of detailed reports of specific projects which provide the following information: sponsoring agency, program title, program director, project dates, grade level, number of population to be served, description of the population to be served, amount of Federal funds, and program description. The number of programs supported by Vocational Education Funds for 1973-74 so described is 15; for 1974-75, 17. In addition, the report provides all of the above information except the detailed program description for 10 projects funded by mini-grants under the Vocational Education Amendments of 1968. Furthermore, it provides descriptive information for 11 career education programs and activities which are being supported by a variety of non-federal sources. Finally, it provides a compilation of the returns of a career education questionnaire report for the State of Rhode Island. (JR)

Identifiers—\*Needs Assessment

The report identifies important questions typically asked of the vocational education enterprise by legislators. Assuming that Congress provides a national forum for inquiry into the progress of vocational education where evidence from the States is reflected, selected House and Senate committee hearings and reports on education were reviewed to produce a list of representative questions. The questions presented deal with: those served by vocational education, curricula, staff resources, facilities and equipment, costs, and outcomes. These are followed by a 17-page section listing specific questions structured around the following components of a conceptual framework for vocational education: (1) the context (population, employment, education, economic, local government economic, school revenue base, and training resources information); (2) the inputs (revenue and new student information); (3) the process (enrollment, expenditure, program, staff, and site information); (4) the product (completion and withdrawal information); (5) the impact (post-school employment, job satisfaction, employer satisfaction, and school satisfaction information); and (6) the interrelation between the framework components. The report concludes with a brief description of information available through existing management systems and an epilogue stating the limitations of the report's accounting-type questions and the critical importance of answers to interrelated questions in planning. National Environmental Manpower Planning Conference.

Environmental Career Center, Inc., Washington, D.C.; Environmental Protection Agency, Washington, D.C. Office of Education and Manpower Planning.

Pub Date Dec 74

Note—184p.; Edited transcript of the Proceedings of the National Environmental Manpower Planning Conference (Phoenix, Arizona, December 8-11, 1974)

EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage

Descriptors—Air Pollution Control, Community Planning, \*Environmental Technicians, \*Federal Legislation, \*Federal Programs, \*Manpower Development, Manpower Needs, \*Planning Meetings, Resources, State Federal Support, Statewide Planning, Waste Disposal, Water Pollution Control

Identifiers—\*Environmental Personnel

The national planning conference was held to acquaint State and local environmental agencies with available resources and Federal/State activities related to the development and utilization of an environmental workforce. The 200 participants and 48 speakers represented Federal, State, local, and private agencies as well as professional associations, universities, colleges, community/junior colleges, and vocational technical schools. Moderator for the general session was James D. Goff, Arizona Department of Health Services. Robert G. Ryan spoke on "Selected Environmental Legislation: Manpower Implications." Panel presentations and moderators were: "Manpower Implications of Federal Environmental Program Strategies," Francis J. Lostumbo; "How Environmental Needs Can Be Met through CETA (Comprehensive Employment and Training Act)," John Ropes; "Progress Report on Utilization of CETA," William F. Hagan; "Utilization of Vocational and Adult Education Funds," Darold E. Albright; "Utilization of State Program Grants," Chester J. Shura; "State Training Centers—109(b) projects," John L. Coakley, Jr.; "State Legislated Training Centers," Franklin J. Agardy; "Recent Developments in National Projects," George L. B. Pratt; "State Reactions to Federal Program Strategies," Chris Beck; and "General Session and Wrap-Up," Robert Knox. Needs, resources, and problem areas were considered both in the presentations and the question and answer periods following each session. (EA)

A Model Delivery System for an Exploratory Career Education Program Grades (5-9).

Seaford School District, Del.

Note—42p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Career Education, \*Career Exploration, City Wide Programs, \*Curriculum Guides, Delivery Systems, Educational Administration, Integrated Curriculum, \*Junior High Schools, \*Models, Program Descriptions

Identifiers—Delaware (Seaford), Seaford School District

The document provides the model delivery system for an exemplary career education program developed for the Seaford School District and a curriculum guide for grades five-nine developed by teachers. The model briefly discusses career awareness and preparation but stresses career exploration. The school district's comprehensive exploratory program is presented in outline form, specifying program needs and goals, and administrative and management objectives. For each educational objective stated the following information is provided: concepts and skills, grade level, suggested subject area, activity, resources, and evaluation. (KB)

Permanent Education, A Framework for Recurrent Education: Theory and Practice.

Council of Europe, Strasbourg (France).

Pub Date 75

Note—32p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Adult Education, Articulation (Program), \*Continuous Learning, \*Educational Experiments, Foreign Countries, Political Influences, Social Factors

Identifiers—Council of Europe, \*Recurrent Education

The report provides an account of the work accomplished and the publications produced by the Council of Europe since 1967 concerning permanent education. Part 1 examines the historical perspective of permanent education, its development within the Council of Europe, and the implications of the principle of recurrence for other stages of the education system. Part 2 summarizes and assesses the 16 experiments which were conducted by the Council for Cultural Cooperation of the Council of Europe in various member countries as concrete examples of the principles of permanent education. Three key problems have emerged as themes in the council's analysis of the experimental projects: the problem of integrating mutually influencing but separate levels of education as well as educational activities with other aspects of human life, the potential conflict between individual development and social constraints, and the political problem of not being able to alter the educational system without modifying sociopolitical structures. Part 3 is directed toward the development of recurrent education as a new approach to adult education. Issues examined include individual needs, structural changes, course content, teaching/learning methods, unit/credit system, and costs. (EA)

Identification of Countermeasures for the Youth Crash Problem Related to Alcohol.

Dunlap and Associates, Inc., Darien, Conn.

Spons Agency—National Highway Traffic Safety Administration (DOT), Washington, D. C.

Report No.—DOT-HS-801-344; PB-239-158

Pub Date Jan 75

Note—241p.

Available from—National Technical Information Service, Springfield, Virginia 22161 (PB-239-158; HC, \$7.50; MF \$2.25)

EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage

Descriptors—\*Accident Prevention, Alcohol Education, \*Drinking, \*Males, Motor Vehicles, Question Answer Interviews, Questionnaires, Rehabilitation, Research, Safety Education, Surveys, \*Traffic Accidents, Traffic Safety, \*Young Adults

Past research relevant to the problem and possible countermeasures are discussed as the basis for the survey. Face-to-face interviews were conducted with male New York State drivers. These groups, each containing young and middle aged drivers were sampled as follows: (1) random sample of the general population of licensed drivers, (2) drivers recently involved in an 8 p.m. to 6 a.m. injury producing motor vehicle crash, and (3) drivers recently convicted on an alcohol driving offense. The results indicated that 14 percent of the young drivers in the general population as compared with only 5 percent of the middle aged drivers reported having had an alcohol related accident within the past three years. Driving after drinking was common among young people (about three times per month) and drinking frequency appeared consistent across young and middle aged driver populations. Young driver alcohol crash countermeasure and future research recommendations made are: late-night driving and speed-limit restriction, lowered absolute Blood Alcohol Concentration limit, public education for awareness of drinking-driving and disturbed behavior, driver rehabilitation, and mandatory alcohol safety interlock systems for convicted offenders. A five-page reference list and appended questionnaire form are included. (NTIS)

**Descriptors**—\*Educational Programs, Emergency Programs, Emergency Squad Personnel, First Aid, \*Injuries, \*Institutes (Training Programs), Medical Services, Police, Program Descriptions, Rescue, Teacher Education, \*Traffic Accidents, Traffic Control, Traffic Safety

The purpose of this study was to expose key individuals to the National Highway Traffic Safety Administration (NHTSA)-developed curriculum materials for crash injury management and to teach them how to teach. The scope of the training effort is described using a detailed discussion and separate conclusions for the following tasks: planning, selecting institute sites and dates, developing and adapting course materials, enrolling and informing candidates, selecting and orienting teacher trainers, conducting and evaluating institutes, and providing follow-up services. The objective was accomplished through five 30-hour instructor training institutes conducted in various areas of the country. Enrollees were associated with law enforcement or emergency medical services. Seventy-three percent of the enrollees expect that their organizations will use all or some of the NHTSA curriculum materials in their future training. Appended are: curriculum notice and reference sources, research review, institute outlines, institute forms and handouts, enrollment memoranda, enrollee roster, institute evaluation summaries, and institute follow-up letter. An Annotated Bibliography for Health Occupations: A Guide for Teachers and Students.  
Illinois Professional and Curriculum Development Unit for Vocational and Technical Education, Springfield.

Pub Date Jul 75

Note—236p.

**EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage**

**Descriptors**—\*Annotated Bibliographies, \*Health Occupations, \*Instructional Materials, \*Paramedical Occupations, Post Secondary Education, \*Secondary Education, Vocational Education

The bibliography is designed to assist teachers and students at the secondary level in selecting printed and audiovisual materials related to health occupations. The 115 items relate to the following occupations: dental assistant, medical laboratory aide, practical nurse, nurse assistant, rehabilitation aide, physical therapy aide, radiologic aide, health care aide, respiratory therapy aide, medical assistant, mortuary aide, pharmacy aide, recreational therapy aide, and geriatric aide. The six-digit coding system used for arranging the bibliography consists of a numerical listing with a Health Occupations (HO) prefix. It is compatible with the ERIC system, allowing for cross referencing and expansion. An index lists the code numbers according to student or teacher materials. A two-page form is included for each document. The first page, which has the HO number and the OE code number for the occupations category, indicates: the title, name of developer or author, type of material, type of student or teacher who could use the item, if training is required for optimum use, availability of consulting services, copyright restrictions, provisions for acquiring, and an ordering address. The second page very briefly describes the document and its format and provides evaluator's comments. (MS)

Criteria for Developing Criteria Sets.  
Minnesota Univ., Minneapolis. School of Public Health.

Pub Date Aug 75

Note—29p.; Product of the University of Minnesota Independent Study for Health Care Trustees

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Educational Philosophy, \*Evaluation Criteria, Evaluation Methods, Matrices, \*Systems Approach

Criteria sets are a necessary step in the systematic development of evaluation in education. Evaluation results from the combination of criteria and evidence. There is a need to develop explicit tools for evaluating criteria, similar to those used in evaluating evidence. The formulation of such criteria depends on distinguishing between terms (concepts) and statements (link-

ages among concepts). For both terms and statements a further distinction must be made between categories (nonvariable classes or attributes) and continua (variable continuous dimensions). Borrowing from the discipline of sociology, an exploration for categorical terms for constructing a systems approach yields the elements: resources, structures, integrations, performances, and outputs. Continuous dimensions borrowed from theory development are scope, parsimony, precision, and accuracy. Combining these dimensions and elements in a four by five solution grid provides both descriptive definitions and a prescriptive framework. Affixing labels to each cell of the grid provides both literal definitions (labels) and theoretical definitions (dimension by element). Dividing the system's elements into their philosophical components yields ontology, epistemology, ethics, aesthetics, and psychology. Crossing these philosophical elements in turn with the five system elements yields a five by five matrix which provides 25 possible elements for the investigation of criteria for criteria sets. (JR)

Everything You Always Wanted to Know About the National Legislature But...Career and Vocational Education Professional Development Report No. 10.

North Carolina State Univ., Raleigh. Center for Occupational Education.

Spons Agency—Office of Career Education (DHEW/OE), Washington, D.C.

Bureau No—BR-02-2591

Pub Date 73

Grant—OEG-0-72-4676(725)

Note—28p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Career Education, \*Educational Change, Educational Legislation, Federal Government, \*Government Role, Speeches, \*Vocational Education

In the paper, prepared from a recording of his keynote address for a conference on change in vocational education, Congressman Pucinski expresses his intense interest in vocational education and his belief in the democratic process. Education is vital if people are to understand the complex legislative process and the challenges to accepted institutions. This slow, built-in process provides protection against bad legislation. Lack of a national education policy and the development by the executive of rule by guidelines have caused problems for Congress. Through compromise in the legislative system, good programs do emerge, such as vocational education, toward

which the Congress is very favorable. Development of this practical educational approach can help save the educational system. In dealing with our growing population and economy, and with the need to change occupations within a lifetime, career education, in combination with vocational education, is vital. Occupational education can then continue at the postsecondary level. There is a need to overcome the stigma of vocational education as a place for nonachievers. Other challenges and opportunities are especially present in the areas of distributive education, agriculture, home economics, and paramedicine. (MS)

Note—272p.; Papers presented at a Conference on Labor in Nonprofit Industry and Government (Princeton, New Jersey, May 7-8, 1973)

Available from—Princeton University Press, Princeton, New Jersey 08540 (\$11.50)

Document Not Available from EDRS

**Descriptors**—College Faculty, Employment, Government Role, \*Labor Economics, \*Labor Market, Labor Unions, Public School Teachers, \*Public Service Occupations, School Personnel, Statistical Analysis, Strikes, Wages

**Identifiers**—\*Nonprofit Sector (Labor Market), Public Sector (Labor Market), Readings (Collections)

Originally presented at a Conference on Labor in Nonprofit Industry and Government held at Princeton University, the studies are the first to provide an economic discussion of the public sector labor market. Melvin Reder examines the effect of the absence of the profit motive on employment and wage determination in the public sector. Orley Ashenfelter and Ronald Ehrenberg estimate the elasticities of demand for various types of labor employed by State and local governments. Theoretical ideas about behavior in nonprofit industries are employed by Richard Freeman to study the higher education industry. John Burton and Charles Krider try to predict the incidence of strikes in the public sector, while Donald Frey presents a model of the behavior of school boards in hiring faculty. The magnitude of the extra wage received by unionized public employees is compared by Daniel Hamermesh to that of private unionized workers in the same occupation. (Author)

Vocational Rehabilitation of the Disabled and Disadvantaged in the United States and Europe.

Connecticut State Dept. of Education, Hartford. Div. of Vocational Rehabilitation.

Spons Agency—Social and Rehabilitation Service (DHEW), Washington, D.C.

Pub Date Jun 71

Note—232p.

**EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage**

**Descriptors**—Disadvantaged Groups, Educational Programs, Federal Legislation, \*Foreign Countries, \*Government Role, National Programs, Physically Handicapped, \*Program Descriptions, Program Effectiveness, \*Rehabilitation Programs, State Programs, Vocational Adjustment, Vocational Education, \*Vocational Rehabilitation, Vocational Training Centers

The study of vocational rehabilitation of the disabled and disadvantaged in the United States and Europe focuses on the extent to which workshops and rehabilitation facilities meet the needs of handicapped individuals in their adjustment to disablement and to the world of work. The study provides background information and statistics, discusses pertinent national legislation and the steps taken to implement that legislation, summarizes the vocational rehabilitation resources and facilities employed throughout the nation, and lists references consulted for each of the following European countries: United Kingdom, France, Ireland, Belgium, Netherlands, Switzerland, Austria, Yugoslavia, Norway, Denmark, Sweden, and West Germany. The study also discusses vocational rehabilitation programs in the U.S. at the Federal level, at the regional level (region 8), and in the State of Connecticut, and describes in detail 11 model programs in various States. The study closes with a discussion

of conclusions and recommendations indicating that although U.S. efforts at vocational rehabilitation are more organizationally structured than those of the European countries discussed, there is still a basic deficiency in the U.S. in making rehabilitation services available to all of those in need of such services. Appended are several Federal and Connecticut laws and directives regarding vocational rehabilitation. (JR)

Descriptors—Career Choice, \*Career Opportunities, Career Planning, \*College Majors, \*Guides, Higher Education, Occupational Guidance, \*Occupational Information, Secondary Education, Vocational Counseling, Vocational Interests

Presented in two volumes, the job guide handbook can be used by high school and college counselors, students, recruiters for business and industry, and parents in determining areas of employment which are compatible with a student's or potential employee's interests, abilities, and preparation. Volume 1 lists job areas for students majoring in anthropology, economics, history, languages, mathematics, political science, psychology, and sociology. Volume 2 covers possible jobs for majors in accounting, biology, chemistry, geology, and physics. Both volumes begin with a lengthy glossary of terms pertaining to the occupations. The guide is divided into sections according to academic majors, each section providing a list of areas of employment for the major. For each area of employment the guide briefly defines the job activities involved, lists the types of establishments providing jobs in that area, and lists the job opportunities (job titles) possible in the area of employment. A Universal Model for Evaluating Basic Electronic Courses in Terms of Field Utilization of Training.

Air Force Occupational Measurement Center, Lackland AFB, Tex.

Note—34p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Electronics, \*Evaluation, \*Military Service, Models, Occupational Tests, \*Performance Tests, Tables (Data), \*Training Identifiers—Air Force, \*Electronic Principles Inventory

The main purpose of the Air Force project was to develop a universal model to evaluate usage of basic electronic principles training. The criterion used by the model to evaluate electronic theory training is a determination of the usefulness of the training vis-a-vis the performance of assigned tasks in the various electronic career fields. Data collection is through a survey booklet, called the Electronic Principles Inventory, which is completed by practitioners in the field. The inventory is general in nature and can be administered to anyone who works with electronics, regardless of the level of involvement. The data can be analyzed using the Comprehensive Occupational Data Analysis Programs (CODAP). Significant results were found between and within electronic specialties. The results presented in the report would be useful to managers in the areas of training, personnel classification, and testing. (Author/EA)

Descriptors—Bibliographies, \*Curriculum Design, \*Curriculum Development, \*Curriculum Planning, Elementary Education, \*Elementary Secondary Education, \*Industrial Arts, Industrial Technology, Junior High Schools, Learning Activities, Secondary Education

Providing a general framework for local curriculum development, the guide is intended to assist industrial arts teachers and public school administrators in situations where a comprehensive curriculum development effort is undertaken, a new industrial arts curriculum is being developed, or an existing program is being revised. Four phases of coordinated planning and decision-making are presented: (1) establishing the basis for industrial arts in the K-12 school system; (2) establishing the basis for industrial arts on the various operational levels (elementary, junior high, and high school); (3) outlining the local industrial arts program; and (4) preparing teaching plans. Phase 1 involves establishing the need for the program and describing how the needs can be met and general program goals. Phase 2 is directed toward the needs of subpopulations within the school, with a recommended list of goals for each operational level. Phase 3 identifies the program offering, scope, and sequence. A suggested list of knowledge/skill/attitude competencies, developed by a team of Iowa industrial arts teachers, and corresponding sample learning activities are included for the offerings recommended. An eight-page reference/resource section is provided to assist with phase 4, which is directed mainly to the individual teacher. (EA)

Responding to the need for qualified personnel for career education, the authors designed the guide for use by university program or instructional planners in the preparation of undergraduate/graduate personnel for implementing career education in grades K-12. The basic components of the document consist of: (1) 105 broad general goals in career education personnel development significant to quality career education for integration into existing educational personnel preparation programs; (2) two or more alternative strategies for achieving each of the 105 goals; and (3) 25 university staff approaches for integrating career education into existing university personnel development courses or programs. Goals and alternative strategies were developed from a synthesis of field data collected by classroom observation and interviews in 25 university/college sites in the United States, appropriate data selected from the literature, and project staff training and experience. Appendix A consists of information relative to interest and efforts in career education collected informally from additional university sites. Appendix B is a listing of contributors to the data collection. An index of terms common to teacher education preparation and career education concepts, coded to the 105 goals, is also included. Descriptors—Census Figures, \*Charts, Educational Background, Employment Patterns,

\*Employment Statistics, Family Status, Income, \*Labor Force, Marital Status, Statistical Data, Unemployment, \*Working Women

Fifty-six charts present data on the characteristics of American working women and their changing status over the past 25 years. The major data source is the Current Population Survey conducted monthly for the Bureau of Labor Statistics by the Bureau of Census. Part 1 provides information on employment and unemployment. In January 1975 some 36 and one-half million women were in the work force, about 40 percent of the country's entire labor force and almost 46 percent of all women 16 years and over. Part 2 shows the marital and family status. Married women living with their husbands, nearly 21 million in 1974, account for almost three-fifths of all women workers. However, the number of families headed by working women is rising. Income of working women is analyzed in Part 3, and data on their education are shown in Part 4. The great majority of working women have not yet attained parity with working men in earned income. Median usual weekly earnings of women in full-time jobs in 1974 were about 60 percent of those of men. In 1974, 72 percent of women workers had graduated from high school, compared with 67 percent for men. Part 5 provides additional information on the characteristics of working women. (Author/EA)

Descriptors—\*Community Programs, County Programs, \*Employment Programs, \*Employment Services, Federal Legislation, \*Federal Programs, Federal State Relationship, Job Placement, Job Training, \*Manpower Development, Program Descriptions, State Programs, Unemployment Insurance

The current role of the Department of Labor's Manpower Administration as determined by the Comprehensive Employment and Training Act of 1973 (CETA) is described. CETA shifts the responsibility for training and job placement services from the Federal government to States, cities, and counties which operate their own programs using funds provided by the Federal government. The community manpower system includes about 400 comprehensive manpower programs and additional public service employment programs for areas of unusually high unemployment. Eligibility requirements, services provided, and the operation of these programs are outlined. Other programs are provided for groups with special job market disadvantages (seasonal farmworkers, Indians, youth, older workers, and persons with limited English). The Federally administered programs described are: apprenticeship, job corps, and the work incentive program. Research, development, and evaluation functions of the Manpower Administration's Office of Policy are discussed. Finally, a summary of the historical development and services of the employment service and the unemployment insurance program, both operated as Federal-State partnerships, is provided. The report also contains an address list of Assistant Regional Directors and suggestions for obtaining more information on community manpower programs. (MS)

Descriptors—American Indians, Asian Americans, \*Employment Patterns, \*Employment Statistics, \*Equal Opportunities (Jobs), \*Females, \*Minority Groups, Negroes, Spanish Americans, Tables (Data)

**Identifiers—\*Standard Metropolitan Statistical Areas**

The report reflects the employment status of women and minorities among companies with 100 or more employees in the Standard Metropolitan Statistical Areas of: Atlanta; Baltimore; Boston; Chicago; Cleveland; Dallas; Denver; Detroit; Houston; Los Angeles-Long Beach; Memphis, Tennessee-Arkansas; Miami; Newark; New Orleans; New York; Philadelphia; Pennsylvania-New Jersey; St. Louis, Missouri-Illinois; San Francisco-Oakland; Seattle-Everett; and Washington, D.C.-Maryland-Virginia. Detailed employment data were obtained from 1972 EEO-1 Reports filed with the Equal Employment Opportunity Commission. Participation rates were examined for females, blacks, Spanish surnames Americans, Asian Americans, and American Indians. Although employment of women and minorities has generally increased between 1970 and 1972, the survey showed unbalanced occupational distribution and income for women and minorities. Twice the proportion of minority as Anglo women held positions in the laborer and service worker categories. Differentials between occupational distributions of Anglo and minority women were the greatest in Memphis and New Orleans and for Anglo and minority males in Memphis and Dallas. Blacks realized representation gains in the white collar field and Spanish surnamed Americans in the laborer category. Almost 70 percent of Asians were white collar workers; approximately two-thirds of American Indians were blue collar/service workers. (EA)

**Apprenticeship Training in the 1970's: Report of a Conference. Manpower Research Monograph No. 37.**

Manpower Administration (DOL), Washington, D.C. Office of Research and Development.

Pub Date 74

Note—113p.; Report of a Conference (Washington, D.C., May 30-June 1, 1973)

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Stock No. 2900-00223; \$1.85)

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

**Descriptors—**\*Apprenticeships, \*Conference Reports, Costs, Foreign Countries, Job Training, Manpower Development, Minority Groups, \*Policy Formation, \*State of the Art Reviews, Training, Vocational Followup

The conference report summarizes the state of the art of apprenticeship, as determined by a decade of systematic research, and offers recommendations for changes in policy and in practice. Eighteen papers, all dealing with fundamental problems in apprenticeship and skill training in the United States, were presented at the conference by practitioners, academic researchers, representatives of labor, and members of government. Summary papers in the document are grouped under the headings of: Apprenticeship As a Training Process, Lessons from Followup Studies of Journeymen and Apprentices, Apprenticeship and Minorities, Training Data and Manpower Planning, and Lessons from Foreign Experiences with Apprenticeship. A major diagnosis of the conference was that apprenticeship is basically healthy but some changes can make it more vigorous and productive. Guiding principles for a model apprenticeship system include: voluntarism with some governmental support and guidance, flexibility in defining and implementing standards, applying the training system to a wide range of occupations and industries, and emphasis on both quality and quantity. Specific conclusions and recommendations were categorized according to costs and financing, ways and means to improve quality of training, apprenticeship and minorities, and data requirements for developing model training systems. **Military Occupational Data Bank (MODB): Personnel Selection and Classification.**

Department of the Army, Washington, D.C.

Report No.—AR-611-3

Pub Date 4 Sep 74

Note—13p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Classification, \*Data Bases, Data Collection, \*Enlisted Men, Military Service, \*Occupations, \*Personnel Selection

**Identifiers—**\*Military Occupational Data Bank, MODB

The regulation contains policy guidance, administrative procedures, and responsibilities for the operation and maintenance of the Military Occupational Data Bank (MODB). It revises a former regulation governing the MODB method of operation by revising the list of occupational data collection agencies and by providing expanded information concerning data analysis, data reliability, and supplemental information available to MODB users. The first of three chapters is a general one which discusses the purpose and scope of the regulation, explains the terms used in it, describes the MODB, and discusses its responsibilities. Chapter 2, on the source of collection for enlisted Military Occupational Specialties (MOS), discusses objectives, restrictions, questionnaires, responsibilities, administrative procedures, and procedures for selecting qualified MOS incumbents. Chapter 3, MODB reports for enlisted Military Occupational Specialties, discussed objectives, standard reports, special reports, background information (BI) summary, Comprehensive Occupational Data Analysis Programs (CODAP) reports, requests for MODB reports, data reliability, and supplemental publications. A sample of the MODB Questionnaire Data Sheet is included. (Author/JR)

**Identifiers—**Seattle Highline High School, Washington (Seattle)

Covering the time period from July 1973 to July 1974, the report documents the first year of a project to implement career education in the Highline High School in Seattle. A career alternatives model (CAM) to provide each student with opportunities to consider all alternatives is described as a means for student development in self awareness, economic understanding, decision making, and employment skills. Goals and procedural components of CAM, in which guidance and inservice teacher education are stressed, describe the project. A 43-page report of an evaluation conducted by the University of Washington's Bureau of School Service and Research (BSSR) is included in the document. The concluding section (67 pages) consists of sample instructional materials and other program-related documents. (MU)

**Identifiers—**National Longitudinal Survey Hi Sch Class 1972

The bulletin presents data taken in the fall of 1973 for the National Center for Educational Statistics' National Longitudinal Study of the High School Class of 1972. The study surveyed approximately 22,000 high school seniors in 1,200 schools in the spring of 1972. Sixty-two percent of vocational-technical, 24 percent of general education, and 12 percent of academic students indicated that they had received specialized training intended to prepare them for immediate employment upon graduation. Of those who had looked for work in areas where they could use their specialized training, about 80 percent of the vocational-technical and academic students and 77 percent of the general students found jobs. Approximately 87 percent of vocational-technical and 80 percent of academic and general students who worked in training related jobs expressed satisfaction with their training. Although a generally high rate of approval was found, especially among business and office occupations students, two aspects of specialized training were criticized fairly often. First, many persons, especially health and home economics students, did not find their high school training useful in their on-the-job training programs. Second, many persons, especially agricultural and trade and industrial students, would have liked more experience in their training area before starting to work. (Author/JR)

grams, Delinquent Rehabilitation, Dropout Characteristics, Dropout Prevention, Dropout Problems, \*Dropout Programs, Dropout Rehabilitation, \*Dropouts, \*Educational Programs, \*Literature Reviews, Potential Dropouts, Relevance (Education), Remedial Programs, Secondary Education, Student Alienation, Vocational Education, Work Study Programs

Identifiers—Career Intern Program, CIP

The first chapter of the literature review describes the Career Intern Program (CIP), a cooperative career education venture of the Opportunities Industrialization Centers of America and two Philadelphia high schools, which is composed of three steps: career awareness (general orientation, development, motivation); career exploration (academic instruction, career expectation instruction, hands on work experiences); and career specialization (on-the-job training, technical schools, community college). Chapter 2 describes the identification of the potential dropout with respect to the following factors: the verbal deficit, the individual student's personality, environmental factors, and student self-concepts. The remaining two chapters review the literature of career education programs similar to CIP throughout the rest of the U.S. Chapter 3 surveys primary prevention programs and deals separately with: programs to change the schools themselves, targeted educational programs, remedial educational programs, vocational educational programs, counseling programs, and work study programs. Chapter 4 surveys rehabilitation programs, and deals separately with: continuation education, rehabilitating the dropout, and rehabilitating the juvenile delinquent. (JR)

Vocational Youth Organizations—Are They Needed?

University of Northern Colorado, Greeley.

Spons Agency—Colorado Research Coordinating Unit, Ft. Collins.; Colorado State Board for Community Colleges and Occupational Education, Denver.

Pub Date 30 Jun 74

Note—88p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Advisory Committees, \*Educational Needs, Program Evaluation, \*Secondary Education, State Surveys, \*Student Organizations, \*Surveys, \*Vocational Education, Youth Clubs

The project focused on securing evidence to support or reject the assumption, based on their support by educators and industry, that vocational youth organizations (Distributive Education Clubs of America, Home Economics Related Occupations Clubs, Future Farmers of America, Future Homemakers of America, Future Business Leaders of America, and Vocational Industrial Clubs of America) are an essential part of secondary vocational education programs in Colorado. Five populations were surveyed, and specific questionnaires were developed for students, teachers (advisors), administrators, parents, and employers (training sponsors) to determine if the organizations were felt to be important and if they were accomplishing their objectives. The rate of response exceeded 65 percent for all populations. Each questionnaire was analyzed for general trends by using means and percentages. Each item was analyzed by means of chi-square for differences among youth organizations. The tabulated findings, discussed in detail for each questionnaire type, indicate an overall positive perception of the organizations. Detailed conclusions show that the organizations were perceived as important and were meeting their objectives but were in need of support by the schools. Appended are the objectives of five national organizations, the instruments, and cover letters. (Author/MS)

Note—56p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Adult Basic Education, \*Adult Educators, Educational Needs, Questionnaires, Rating Scales, \*Secondary Education, State Surveys, \*Surveys, \*Teaching Skills

Identifiers—Adult Basic Education Competency Inventory, \*Adult Secondary Education, Utah

The survey, conducted to determine patterns of instructional needs as perceived by adult basic education (ABE) and adult high school (AHS) teachers, attempts to answer three questions: from a broad array of possible instructional competencies, which competencies do teachers (1) perceive as being of the highest priority? (2) feel they have the greatest ability to perform? (3) rate highest in priority and lowest in their ability to perform? The population surveyed consisted of 69 ABE teachers and 186 AHS teachers employed in Utah. A majority of the teachers did not respond; respondents were the more experienced teachers. The survey instrument, the Adult Basic Education Teacher Competency Inventory (revised October 1974), consisting of 170 statements of teacher competency previously established and validated, is appended. Teachers were asked to indicate the degree to which a teacher should be able to perform, and the degree to which they can perform, each competency. These are among the findings: ABE teachers felt most competent in those areas which they gave highest priority; the area of highest need was mathematics instruction. AHS teachers agreed widely on their abilities and on most-valued competencies; math and reading competencies showed great differences between "should" and "able to" statements. (Author/AJ)

Identifiers—\*Navy

The manual contains career guidance materials describing occupations and career development opportunities in the Navy. The materials were developed for integration into the Oregon Career Information System, a career education program utilizing both computerized and manual information systems. The report includes a discussion of the general work of the Navy, its size and organization, work environment, hiring practices, pay, training and education, and a comparison of Navy occupations with those listed in the Oregon Career Information System. The bulk of the document contains descriptions of each enlisted occupation or "rating" and each officer category and specialty. The following detailed information is provided for 70 Navy enlisted occupations: nature of the job, working conditions, qualifications, training provided by the Navy, Navy employment opportunity, and additional information sources (page number references within the document). The same categories of information, except for Navy training, are presented for 60 officer occupations. (Author/MS)

Identifiers—Mail Processing Equipment Maintenance Personnel, \*Post Office

The study examines post office mail processing equipment (MPE) maintenance positions on the basis of interviews conducted among maintenance mechanics and supervisors at 17 small, medium, and large mechanized post offices for the purpose of determining existing and desired maintenance practices and maintenance personnel policy. The study considers nine problem areas: decreasing manpower pool, distinctions between mechanic grades, career ladders, entrance and promotion examinations, apprenticeship programs, in-house training systems, specialization guidelines, pay comparability, and full utilization of mechanics. The study makes recommendations with respect to: restructuring MPE maintenance department jobs; maintenance career ladders; training of MPE mechanics; classification of post office MPE maintenance positions; and job descriptions, job assignments, and staffing criteria. Five appendices, comprising more than half the document, contain proposed job descriptions (functions, duties and responsibilities, organizational relationships, and qualifications for nine positions); a 30-page job analysis and job evaluation form for equipment maintenance positions; a list of the U.S. Post Offices surveyed; job evaluation questions and job rating tables; and a conversion and reclassification guide for MPE mechanics. Descriptors—\*Employment Qualifications, Equipment Maintenance, \*Government Employees, Item Analysis, \*Machine Repairmen, Manpower Development, Multiple Choice Tests, Occupational Tests, \*Performance Tests, \*Test Construction

Identifiers—Mail Processing Equipment Maintenance Personnel, \*Post Office

The report discusses the development of written job proficiency examinations for four Mail Processing Equipment (MPE) positions (MPE apprentice, MPE mechanic, MPE senior mechanic,

and MPE supervisor). After a brief introductory chapter, the next chapter describes the determination of examination objectives and the desirability of testing specific job knowledge and the aptitude for acquiring future job qualification knowledges, but not job skill, personality factors, and physical characteristics. Chapter 3 discusses the preparation of the examination items (of the five-alternative multiple choice variety) based on an analysis of maintenance and supervisory skills, the purpose of which was to test minimum knowledge standards while at the same time assuring an adequate supply of successful applicants. Chapter 4 discusses the preliminary administration of the 384 items to a sample of maintenance personnel currently engaged in job activities that correspond to the proposed job descriptions at the 13 most highly mechanized post offices. Chapter 5 covers the selection of 339 test items, the assignment of the items to the four qualifying examinations, and the minimum standards for determining job qualification. Chapter 6 discusses test validity and makes suggestions to the Post Office Department for broadening the assessment of worker qualifications. (JR)

Vocational Education for the Handicapped;  
Assistance in Initiating or Strengthening Vocational Programs for Handicapped Youth.

New Jersey State Dept. of Education, Trenton.  
Bureau of Occupational Research.

Pub Date Sep 74

Note—7p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Elementary Secondary Education, Emotionally Disturbed, \*Handicapped Students, Mentally Handicapped, Physically Handicapped, \*Program Descriptions, \*Vocational Education

Identifiers—New Jersey

The philosophy and programs presented are designed to assist New Jersey educators in planning and developing vocational education for the handicapped. An important measure of the success of such education, the handicapped person's ability to get and hold a job, is described. Federal legislation providing for more training for the handicapped is briefly outlined. Twelve categories of handicapped persons are used for educational classification and are defined here: mentally retarded educable, mentally retarded trainable, neurologically impaired, perceptually impaired, emotionally disturbed, socially maladjusted, visually handicapped, auditorily handicapped, communication handicapped, orthopedically handicapped, chronically ill, and multiply handicapped. The recommended team approach to long-term vocational development involving education and counseling is outlined. Five major phases (each described in detail) of the vocational preparation of the handicapped form a strategy which has often proven effective: (1) vocational evaluation, (2) self and career awareness, (3) skill training, (4) getting started in a real job, and (5) followup. The sequence of programs developed for the handicapped (elementary through high school level and older) includes technology for children, introduction to vocations, employment orientation, work experience and career exploration program, and part-time cooperative employment orientation. Descriptors—Career Awareness, \*Career Education, Career Exploration, Elementary Secondary Education, Post Secondary Education, Preschool Education, \*Program Descriptions, Technical Education, \*Vocational Development, \*Vocational Education

Identifiers—New Jersey

The major programs sponsored by the Division of Vocational Education assisting career development in New Jersey are identified and briefly described. The stated objectives of career development are: identification of a variety of occupational opportunities, development of a

number of career alternatives, demonstration of job responsibility, acquisition of a job-oriented value system, implementation of career decisions, and evaluation of results. The programs and services offered in the State are listed for preschool through post secondary and adult levels. They are designed to accomplish the objectives by providing: (1) exploratory experiences; (2) integrated vocational and academic education; (3) assessment of interests, aptitudes, and abilities; (4) opportunities for the development of good work habits and attitudes; and (5) occupational skill training. Thirty-six major programs and services are listed alphabetically with designated grade levels and descriptions which define the purposes and activities involved for each. Specialized statewide services are also outlined including: county career education coordinators, teacher education and training, curriculum management center, occupational resource center, and center for consumer education services. Position Paper on Industrial Arts Education in New Jersey.

New Jersey State Dept. of Education, Trenton.  
Div. of Vocational Education.

Pub Date Jun 74

Note—7p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Educational Philosophy, Elementary Secondary Education, \*Industrial Arts, \*Industrial Education, Post Secondary Education, Special Education, Trade and Industrial Education

Industrial arts programs, courses organized for the development of understandings about the technical, consumer, occupational, recreational, managerial, social, historical, and cultural aspects of industry and technology, are an important area of education. Industrial arts education develops individuals in terms of general education objectives, requires abstract reasoning in practical situations resulting in greater understanding of the content area, and contributes toward the understanding of and preparation for participation in the world of work. Programs are designed to provide opportunities for practical experience, exposure to a variety of jobs and careers, personal development, and career guidance. Such education provides both boys and girls with a means of expression through the use of tools, materials, and processes. It consists of: (1) integrated technological problem-solving activities in the elementary grades; (2) exploratory experiences for middle/junior high school students; and (3) exploratory or concentrated experiences for senior high school students, depending on the learner's background. In adult education, industrial arts provides a means of acquiring new skills or improving work related skills. For special education students, valuable hands-on learning experiences are offered in the on-going program or in specifically tailored courses. Industrial arts youth organizations are an integral part of the instruction program. (Author/MS)

Descriptors—Employment Experience, Followup Studies, \*Job Satisfaction, Longitudinal Studies, \*Males, Multiple Regression Analysis, \*Program Effectiveness, Relevance (Education), Statistical Studies, Success Factors, \*Vocational Education, \*Young Adults

The study of non-college-attending, male high school graduates examines vocational, general, and college preparatory high school curricula and certain post-school training opportunities to uncover differences in their effectiveness, either alone or in conjunction with post-school programs, in preparing youth for careers. Based on data from the National Longitudinal Surveys of Young Men 1966-69, the following serve as

criterion measures in a multivariate framework: a general occupational information test, attitudes toward adequacy of preparation, participation in post-school training, skill level of jobs, wages, measures of career potential, overall job satisfaction, and unemployment experience. Multiple regression is used to identify and measure the net effects of educational and training variables by controlling statistically for other influences, with separate analyses conducted for white and black youth. The empirical findings reported and discussed for each criterion measure are summarized and provide the basis for specific conclusions which do not support the view that vocational education at the secondary level is superior preparation for the world of work. Four major implications for secondary education are drawn from the findings. A 14-page bibliography, a discussion of statistical tests of the significance of intergroup differences in regression, and tabulated regression results are appended. (Author/MS)

Descriptors—Career Awareness, Career Education, \*Career Exploration, Counseling, \*Curriculum Development, Curriculum Guides, \*Elementary Education, \*Guidance, Occupational Information, \*Program Descriptions, Resource Guides, Self Concept, Unit Plan, Work Attitudes

The Boise, Idaho career exploration project (grades 1-6) involves curriculum development, guidance/counseling, and research. Guidance and career units were primarily written by a curriculum writer and the project director; teacher involvement was mainly through study of the written materials. The guidance/counseling component is geared to the development of positive work attitudes and self-concept, expansion of occupational awareness, improved pupil performance in basic subjects, and the development of a Career Resource Information Bank. Student achievement was measured by usual normative and pre-post comparisons and criterion evaluation. Career awareness pre- and posttests were administered to six experimental groups while students in the control groups were posttested relating to their occupational awareness and interest. Standardized test instruments were found to be inappropriate to measure the side-effect results of a program not designed to directly influence academic achievement. Third-party evaluation indicated a very successful project. Future plans of the career awareness program include a three-year expansion to cover the entire district. More than half of the document is devoted to appendixes consisting of career and guidance units, curriculum materials lists by grade, an interim evaluation report, evaluation tests (career awareness and self-appraisal), and parent reactions. (EA)

Guide for Establishing Programs of Vocational Exploration.

West Virginia State Dept. of Education, Charleston. Bureau of Vocational, Technical, and Adult Education.

Note—61p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Business Education, \*Career Exploration, Environmental Education, Industrial Education, Learning Activities, \*Program Development, Program Evaluation, \*Program Planning, Resource Guides, Secondary Education, Service Education, \*Vocational Education

Developed to assist local educational agencies in developing vocational exploratory programs for ninth and tenth grade students, the document outlines activities that emphasize self-exploration and occupational information. Information needed to assess the direction and limits of individual programs, identification of occupational groupings, and instructional program planning,

(including program descriptions, goals and objectives, activities, and administrative procedure) are outlined. Business, environmental, industrial, and service occupations exploratory laboratory groupings and career resource center information are individually appended and make up the bulk of the document. Business occupations include business and office, distribution and marketing, communications and media; environmental occupations include agri-business and natural resources, environment, marine science, and recreation; industrial occupations include manufacturing, construction, transportation, fine arts and humanities; and, service occupations cover consumer and homemaking, health, personal service, and public services. Sample activities pertaining to the individual area job groupings, special facility considerations, and equipment lists are provided. Career Resource Center provides lists of necessary equipment, books, films, booklets, and tapes available. It is emphasized that programs should be designed to meet the needs of the students, capitalize on previous career education experiences, and contribute to subsequent high school and post high school opportunities. Thorson, James A.  
*Attitudes Toward the Aged as a Function of Race and Social Class.*

Pub Date 1 Nov 74

Note—10p.; Paper presented at the Annual Meeting of the Gerontological Society (27th, Portland, Oregon, November 1, 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Attitude Tests, \*Comparative Analysis, \*Older Adults, Racial Factors, \*Social Attitudes, Social Class, Social Factors, \*Young Adults

Studies have indicated that subjects with more years of education show a positive attitude toward older persons. The present study investigated the effects of other variables, in this case race and social class, in relation to attitudes toward older persons. A sample group of high school juniors and seniors whose ages ranged from 16 to 18 were given a questionnaire based on the Kogan Attitudes Toward Old People Scale. The subjects consisted of 48 blacks and 50 whites; 46 belonged to the lower income class and 52 to the middle income class. The results of the study showed almost no effect on attitudes toward older people based on race and social class. Combining data from this study with a previous study giving a total of 194 subjects showed a relationship between number of years of education and a more positive attitude towards the elderly. The tabulated scores and a list of references are included. (EC)

Thorson, James A.  
*Variations in Attitudes Toward the Aged Held by Selected Groups in the Southern United States.*

Pub Date 27 Jun 75

Note—11p.; Paper presented at the International Congress of Gerontology (10th, Jerusalem, Israel, June 27, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Attitude Tests, \*Comparative Analysis, \*Older Adults, Racial Attitudes, \*Social Attitudes, Social Class

A three-part study has been conducted over the past several years to isolate and describe correlates of attitudes toward the elderly. The paper briefly summarizes the first two parts of the study and concentrates on its concluding portion. Data from the first part of the study indicated that younger and more well-educated subjects displayed more positive attitudes toward the elderly. Data from the second part of the study showed little relationship between the variables race and socioeconomic status and attitudes toward the aged. The third part of the study tested for relationships between personality characteristics and attitudes toward old people. It was hypothesized that persons high in the trait of nurturance would have more positive attitudes toward the elderly. Data collected using the Edwards Personal Preference Scale showed positive attitudes correlated with high scores for the traits of intrapersonal, nurturance, and endurance. However, demographic factors seem to be more important determinants of attitudes toward old people than are the personality items. Data indicate that females, subjects who are older, and subjects having a

higher number of years of education have more positive attitudes toward old people. A list of references is included. (Author/EC)

Descriptors—\*Cooperative Education, Cooperative Planning, \*Cooperative Programs, Exchange Programs, \*Interinstitutional Cooperation, Internship Programs, School Industry Relationship, \*Teacher Education, Teacher Improvement, Workshops

The report describes the planning, development, and conduct of a workshop held for educator, business, industry, and labor representatives of seven States. The workshop was designed to accomplish needed statewide planning for improved cooperative approaches to professional development, including industry/education exchange programs and internship. A model of the Cooperative Education Program Delivery System was developed. The introduction describes the background leading to the project need specification and the specific objectives of the project. It also describes the characteristics of the participant group and the potential impact of the project. The section on project activities explains how the workshop and supportive activities were designed to be responsive to participant needs and how this design is implemented. It describes each workshop session and includes a discussion of activities undertaken to assure control of project effectiveness. The section on project evaluation presents the basis for and the methodology used in evaluating project activities. It reports and discusses evaluation findings. The final section summarizes the project's activities, presents conclusions in relation to project objectives, and offers recommendations for future activities. The appendix contains a participant list, participant survey questionnaires, and worksheets. (Author/EC)

*A Developmental Program for Preparing All Students for the World of Work.*

Rhode Island Univ., Kingston. Curriculum Research and Development Center.

Spons Agency—Cranston School Dept., R.I.

Pub Date 15 Jun 74

Note—24p.; The photographs will not reproduce well

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Career Education, \*Educational Objectives, Elementary Education, Program Effectiveness, \*Program Evaluation, Program Improvement, Questionnaires, Test Results

Identifiers—Dutemple Elementary School, Rhode Island (Cranston)

Focusing primarily on test data from locally developed tests, the document presents results and an evaluation of the first year of a program developed for elementary grades at Dutemple School, Cranston, R. I. The first section discusses behavioral objectives and presents pre- and post-test results, grade by grade tabulated to show levels of attainment of objectives. Recommendations suggest more concentration on identifying and helping students who are not achieving satisfactorily. Teacher evaluations and recommendations are presented in the second section, with a staff questionnaire providing data. It was felt that students became more aware of a variety of careers and benefited from "hands on" experiences, but teachers expressed a need for better program administration and preparation, and the availability of inservice training. Project activities are illustrated through photographs, in the third section, and include log cabin construction, the making of career scrapbooks, and model airplane building. A sample of the staff questionnaire is appended. (LH)

The report reviews current literature dealing with past/present/future mechanisms to assist workers' adjustment to technological change. A basic concern of the study is what level of governmental policy, if any, is needed in this area. Part 1 is a discussion of the conceptual impact of technological change on the labor market. The four chapters of Part 1 are directed to the effect of technological change on employment as related to production function, input prices, demand shifts, and skill sector requirements; worker adjustment to technological change through private/public adjustment mechanisms; other relationships between workers and technological change; and adjustment mechanisms and social well-being. Part 2, a review of current literature from 1965 through 1973, is anticipated to be representative of total work in the area. Chapter 1 of Part 2 summarizes findings on worker displacement, analyzes policy recommendations in the literature, and indicates needed research. Chapter 2 focuses on which types of workers are affected by technological change (skill, age, sex, ethnic groups, occupation, and industry). Chapter 3 reviews the private/public adjustment mechanisms and which workers benefit most and least from these adjustment mechanisms. An extensive bibliography accompanies Part 2. (EA)

Descriptors—Employment Projections, Government Role, \*Manpower Utilization, \*Policy, \*Technological Advancement, \*Vocational Adjustment

A supplement to the report on adjustment to technological change, the document reviews policies of recent years related to adjustment to

technological change and the added implications of the Blair and Fichter studies ("Mechanisms for Aiding Worker Adjustment to Technological Change" by Larry M. Blair and "Forecasting the Impact of Technological Change on Manpower Utilization and Displacement: An Analytic Summary" by Alan Fichter). The author concludes that, despite concern generated by the unemployment issue at the beginning of the 1960's, little was done through public policy to aid worker adjustment to technological change. Displacement, rather than neglect, was viewed as the economic and social malady; whether the displacement had technological or other roots was incidental. However, considerable progress was made on behalf of displaced and unplaced individuals during the Manpower Decade, 1960-70. Reviews of post-1965 literature on worker adjustment to technological change by Blair and Fichter further support the fact that technological change is just one of the factors determining future manpower requirements. Fichter feels that, given the general mobility and adaptability of the United States labor force, improvement of forecast methodology is not a high priority need. Nine recommendations related to the issue conclude the report. (EA)

**Establishing an Education Program at the Marin County Jail.**

Pub Date Jan 75

Note—192p.; Practicum submitted in partial fulfillment of the degree of Doctor of Education, Nova University

EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage

Descriptors—\*Adult Education Programs, \*Correctional Education, \*Corrective Institutions, Educational Facilities, Educational Legislation, High School Equivalency Programs, \*Prisoners, Program Administration, Program Content, \*Program Development, Program Evaluation, Program Planning, Student Characteristics, Vocational Education

Identifiers—California (Marin County), \*Marin County Jail

A detailed account of the establishment of an educational program at Marin County Jail, along with background information, is provided in the document. A discussion of inmate educational programs throughout the country examines inmate needs, facilities, staffing, and funding. Marin County school system interaction with penal institutions, its law enforcement agencies, and county jail are examined, and information gathered on visits to prison educational and voca-

tional programs in local proximity is discussed. Results of an educational survey of Marin County Jail inmates, program goals and philosophy, program establishment, and educational operations are examined. Reactions to the program were generally favorable. The proposal submitted to Marin County Board of Education to establish the jail program, an on-site evaluation report to the Marin County Superintendent of Schools, a report describing the program to the California State legislature, educational and vocational materials, and a bibliography of 27 titles are appended. It is stated that in the three month trial period of the program, 50 inmates had enrolled in the education program, with 17 working toward GED certificates and four having completed the GED requirements. The program has been approved for the 1974-75 year. (LH)

Spons Agency—California State Dept. of Education, Sacramento. Career Education Task Force.

Pub Date Sep 75

Note—67p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Career Education, Cooperative Education, \*Cooperative Programs, Educational Programs, \*Educational Strategies, Elementary Secondary Education, Models, \*Program Planning

The purpose of the report is: (1) to develop a conceptual model describing cooperative activities within the school setting; (2) to identify promising practices using cooperative activities to enhance the implementation of career education; and (3) to make recommendations regarding the incorporation of the conceptual model and cooperative activities into the development of a media presentation to be used for career education inservice training programs. The procedures in compiling information about cooperative activities which affect career education programs are described. The study focuses primarily on one aspect of the implementation of career education: the modification of existing structure to bring about program implementation. Practices are suggested to illustrate cooperative activities in school settings with career education programs. The practices included are curriculum legalization, communications, community resources, instructor's handbook, career guidance centers, careers fair, mini-societies, store-front classrooms, and construction technology. Each practice is discussed in terms of description, strategies for implementation, and considerations affecting implementation. Conclusions and recommendations are given. Appendixes related to the procedures of the study include interview forms and interviewing guidelines. (Author/EC)

**Continuing Education for Ministry—Perspectives and Prospects.**

Pub Date 16 Jun 75

Note—11p.; Address to the Annual Meeting of SACEM (8th, June 16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Adult Education, Adult Education Programs, \*Clergymen, Educational Change, \*Educational Needs, \*Professional Continuing Education, Religious Education, \*Theological Education

The development of continuing education for ministry shows a need for more growth and change in seminary training to meet the fundamental needs of the clergy and the laity. Recent changes since 1960 have resulted in three developments: (1) the need for continuing education for ministry has been recognized; (2) the increasing number in the variety and distribution of continuing education resources that present predominantly a standard theological curriculum of biblical, historical, doctrinal, and pastoral concerns; and (3) the interaction between learning and practice has been recognized and the responsibility of the clergy-learner in the parish context has been identified as an essential ingredient in individual plans for continuing education. A problem exists in the lack of participation in con-

tinuing education programs among the clergy who need this form of organized programs of study. This problem comes as a result of the lack of resources for funding experiments and improvements in continuing education programs for ministry. Despite budgetary problems, development in research on continuing education in ministry has increased over the years. Future trends to meet the training needs of the clergy will show an increasing role for continuing education. (Author/EC)

**Goals for Vocational Education Professional Development System or Model for Wisconsin: Report of Survey.**

Wisconsin State Board of Vocational, Technical, and Adult Education, Madison. Research Coordinating Unit.; Wisconsin Univ. - Stout, Menomonie. Center for Vocational, Technical and Adult Education.

Pub Date Sep 75

Note—21p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Advisory Committees, \*Educational Objectives, Objectives, \*Opinions, Questionnaires, \*Staff Improvement, State Officials, \*Surveys, Tables (Data), Teacher Educators, \*Vocational Education, Vocational Education Teachers

Identifiers—Wisconsin

The purpose of the survey was to validate a list of seven goals for a vocational education professional development system. Objectives were to ascertain perceptions of the degree of importance, extent of achievement, and responsibilities for accomplishing the goals. The goals are: staff educational needs, staff supply and demand, efficiency of system, geographic availability, flexibility of programs, effectiveness of system, and certification of personnel. These goals were incorporated into a four-part questionnaire: (1) to identify respondents by type of agency or institution and their area in vocational education, and their perception as to the (2) degree of importance, (3) extent of achievement, and (4) agency responsibilities for achieving each goal. A five-point Likert-Type scale was incorporated into the questionnaire sent to 160 subjects with a 68.8 percent rate of return. Tables and discussions are presented based on the findings drawn from the data. It was concluded that all goals but "certification of personnel" ranked as "High Importance—Goal Greatly Needed." "Certification of personnel" was viewed as a goal of "Average Importance—Goal Needed but not Essential." Recommendations and comments from the survey are included as well as a copy of the questionnaire used for the survey. (Author/EC)

**Planning, Programming and Budgeting Systems (PPBS) and Cost Benefit Analysis (CBA): Economic Considerations for Adult Education. Occasional Paper No. 5.**

Pacific Association for Continuing Education, Burnaby (British Columbia).

Pub Date Jul 75

Note—62p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Adult Education, \*Cost Effectiveness, Decision Making, \*Educational Economics, Evaluation Methods, Management Systems, \*Program Administration, Program Budgeting, Program Planning, \*Systems Approach

Identifiers—\*Planning Programming Budgeting System, PPBS

In adult education, program planning and administrative management are important areas within which economic analysis may contribute to effective and efficient decision making. The adult education administrator is faced with a dual economic task: (1) to prove beforehand that his programs will pay for the operating budget he is demanding; and (2) to make correct decisions both administratively and in the market-place to insure an efficiently operating organization and a continuous inflow of participants and funds. Two concepts are discussed to aid the adult educator at both the program planning stage and within his administrative functions: planning, programing and budgeting systems (PPBS) and cost benefit analysis (CBA). An overview of the demand for PPBS is presented as a rationale for its increasing acceptance, and a 10-step procedure is developed

for generalized use in any educational institution. Within this 10-step procedure, CBA is introduced as one of the many possible program evaluation techniques to judge a program's worth. An example of CBA using a manpower training program is presented to allow the reader to understand the scope and limitations of the technique. A 36-item bibliography is included. (Author/EC)

**Identifiers**—Australia, Colombia, Finland, France, Philippines, Poland, Sweden, United Kingdom, \*United States, USSR

Compiling available statistical information on the status of women in health careers, the chart book was designed for use at the International Conference on Women in Health. Tables and figures illustrate statements through statistics and graphs. In the section dealing with the United States, tables present a broad statistical base, and figures illustrate that particular information in terms of women. Information regarding the United States is divided into three sections: (1) a summary discussing the labor force with 11 tables and figures; (2) information on different health practitioners containing 20 tables and figures; and (3) educational data tracing enrollment, graduate figures, and type of institution, with 19 tables and figures. Information regarding women and health occupations in Australia, Colombia, France, Finland, the Philippines, Poland, Sweden, the United Kingdom, and the USSR are presented in the international section of the document. Twenty-three tables and 15 figures augment the international data. A glossary of 52 related terms is provided. (LH)

**Identifiers**—\*Texas

The survey reports on the status of real estate education in Texas colleges during the 1974-75 school year. A 90 percent response was obtained from two and four year colleges. General findings showed that 78 Texas institutions of higher learning (43 community colleges and 35 senior colleges) offered real estate courses during that period. These courses were attended by 19,501 enrollees. In addition, three universities offered real estate courses by correspondence. Texts adopted by both community and senior colleges are categorized and listed. Charts are given to illustrate the number of participating colleges, types of real estate courses taught, enrollment rate, and texts used. (Author/EC)

**Descriptors**—\*Business Education, Career Exploration, Curriculum Guides, \*Grade 8, \*Home Economics, \*Industrial Arts, Instructional Materials, Learning Activities, Vocational Development, \*Vocational Education

**Identifiers**—Pennsylvania (Pittsburgh)

The curriculum guide outlines learning patterns which may be adapted or adopted by the creative teacher in occupational education. Emphasis is placed on processes basic to specific job activities found within the areas of: (1) business education, (2) home economics, and (3) industrial arts. Students are able to associate, integrate, and catalog these basic processes with specific job roles or careers ranging from entry level jobs to administrative positions. The educational goal of the experiences is the adaptation of this knowledge to future decision making processes by the students. For each unit general objectives, specific objectives, processes, careers, developing core, student learning activities, and references are given. Units covered include: business communications, information processing, merchandising, clothing and textiles, foods and nutrition, home, health and community service, construction, manufacturing, power and transportation, and visual communications. The business education and home economics sections include appended tests, forms, and other instructional materials. (Author/KB)

**Descriptors**—Bibliographies, Cooperative Planning, \*Delivery Systems, Economic Factors, \*Economic Research, \*Educational Programs, Health Occupations Education, \*Health Services, Manpower Needs, Manpower Utilization, \*Regional Planning, Regional Programs

**Identifiers**—\*Health Delivery Systems

The document's research concerns are directed to the study of various dimensions of health care delivery systems and the dynamics of health manpower supply and requirements. It attempts to explore and determine the effectiveness of the economic system as a surrogate in health planning for the health care delivery system, and to estimate the interrelationships of the health manpower education systems with the economic system and the health care delivery system. The overall objectives of the project were to determine the applicability of regional economic theory in this framework, thus lending further insights into the process of locational decision-making, and developing a useful tool and perspective for the health planner. The document represents a summary of the major activities, findings, and conclusions identified in the final report of the research. It describes the major hypotheses and findings, and policy implications of the study. A 12-page bibliography is given under the topics of economics and health. (Author/EC)

**Descriptors**—\*Case Studies, \*Clinics, Counseling Goals, Counselor Role, Drug Abuse, \*Drug Addiction, Program Descriptions, Program Effectiveness, \*Rehabilitation Counseling, \*Vocational Rehabilitation

An outline of vocational rehabilitation of the ex-addict is presented, with emphasis placed on the development of treatment plans, counselor in-service training, and clinical procedures. Discussion is based on the Beth Israel Medical Center (BIMC) programs of Methadone Maintenance Treatment and Alcohol Treatment. Section 1, Proceedings, defines goals for vocational rehabilitation and discusses the ex-addict, counseling techniques, and counseling forms developed by the BIMC program. The needs of the patient are

stressed in planning systematic treatment, and a summary of sources of influence on the client-counselor relationship are provided. Section 2, Clinical Profiles, examines three cases in terms of the impact clinical procedures have had on the patients for whom problems were assessed and plans developed. Each case study discusses rationale for selection, patient profile, plan formulation, initial and revised treatment, and followup, where applicable. The BIMC project is reviewed. Appendixes discuss project background, a vocational rehabilitation program within the Methadone Maintenance Treatment, the Alcohol Treatment Programs, and Drug Addiction Service Staff participation in the research project. Vocational Structured Interview and Semantic Differential Forms, comments, and an editorial seminar agenda and its participants are also appended. (LH)

**Descriptors**—\*Career Awareness, \*Career Education, Curriculum Guides, Developmental Programs, \*Grade 6, \*Instructional Materials, Personal Interests, Student Interests, \*Teaching Guides, Teaching Techniques, Vocational Aptitude, Work Sheets

**Identifiers**—Arizona

The developmental unit, intended to become part of a total K-12 career education curriculum, is designed for use at the sixth grade level. It follows an interdisciplinary approach to subject matter, with the primary focus in the social studies area. Providing approximately 20-25 hours of instruction, the unit lends itself to the self-contained classroom or a team teaching situation. The student is shown that different occupations require different competencies, appeal to different personalities, and offer different benefits. The learner identifies and relates his major area of interest to various occupations. Preceding the main body of each of the 10 lessons are the concepts, estimated time, vocabulary, required resources, and instructor preparation tasks. Prepared worksheets enable the instructor to make a transparency or ditto master or use a page of the unit with the opaque projector. Instructor strategies for discussion, role playing, speakers, and field trips are presented in the appendix along with a list of supplementary materials. A brief bibliography is also included. (NJ)

**Identifiers**—Arizona

The developmental unit, intended to become part of a total K-12 career education curriculum, is designed for use at the kindergarten level. The overall purpose is to promote in the learner an understanding that the three basic skills he is acquiring in school are relevant to those required in everyday life. The unit provides approximately 10 hours of instruction and consists of eight lessons. Key items introducing each lesson are the concepts, estimated time, vocabulary, required resources, and instructor preparation tasks. The bulk of the document consists of prepared worksheets useful as transparencies and ditto masters. The lessons include detailed descriptions of the activities, sample questions and responses, and tasks allowing for practice of the desired outcome. Assessment procedures are also included to help the instructor determine the level of achievement of the performance objectives. (NJ)

**Descriptors**—Career Education, \*Career Exploration, \*Career Planning, \*Curriculum Development, Curriculum Research, Grade 9, Grade 10, \*Industrial Arts, Industrial Education, \*Instructional Materials, Models, Occupational Information, Process Education, Program Descriptions, Secondary Education, Self Concept, Teaching Guides

**Identifiers**—\*Career Orientation

The document reports that the culmination of the industrial cluster's 12-month research grant was the career plan process model. The process oriented model is a vehicle to facilitate occupational orientation and exploration and consists of a self-directed exploration of a wide range of industrial occupations. The document presents information about the project, including program narrative, time table, participants, and resource persons and includes a varied collection of materials produced by or used in the developmental program. Evaluative data and the research base are also presented. The materials development section begins with a career planning guide for industrial related occupations at the grade 9 level. (LJ)

**Identifiers**—Oklahoma

The life science curriculum is designed to promote the development of healthy living habits. Emphasis is placed on problems of major concern in the daily life of students and on significant problems in modern society. The curriculum is designed for students enrolled in the coordinated vocational education and training for disadvantaged and handicapped youth program to fulfill the laboratory science course requirement for

graduation from Oklahoma high schools. The curriculum is divided into seven areas: (1) introduction, (2) how the body works, (3) food and life, (4) behavior, (5) disease control, (6) heredity, and (7) ecology. Each area consists of one or more units of instruction. Each instructional unit includes behavioral objectives, suggested activities for teachers and students, information sheets, assignment sheets, job sheets, visual aids, tests and answers to tests. Lists of lab materials are appended. (VA)

**A Guide to the Planning of Industrial Arts Facilities. 24th Yearbook.**

American Council on Industrial Arts Teacher Education, Washington, D.C.

Report No.—VT-102-104

Pub Date 75

Note—184p.

Available from—McKnight Publishing Company, Bloomington, Illinois 61701

**Document Not Available from EDRS**

**Descriptors**—Evaluation Criteria, \*Facility Guidelines, \*Facility Planning, \*Industrial Arts, Industrial Education, School Safety, \*School Shops, \*Yearbooks

The purpose of the yearbook is to provide guidelines for the industrial arts facility planner. The yearbook provides a discussion of the terminology, status, and trends relevant to industrial arts education; a sequential development system for the planning of industrial arts facilities; the principles relative to the planning of facilities; the planning for effective management and organization of industrial arts facilities; and the facility needs to implement some of the innovative industrial education programs that have come about in the past two decades. In the appendix, check list forms are provided to help the planner to determine the program requirements, to evaluate the facility, and to systematically analyze the safety conditions of the facilities. The report is designed primarily for internal use by administrators and staff members of the Guided Occupational Orientation Project in Syracuse, New York, and contains a summary evaluation for the 1972-73 school year activities associated with the project. One section of the report discusses and displays specific outcomes compared with goals established prior to the beginning of the school year. The second section presents recommendations based on data as well as field observations by the evaluation team members. Summary charts showing each grade, the variables to be affected by the project, the associated goals for 1972-73, and a data summary are included. (Author/VA)

Descriptors—Career Awareness, \*Career Education, Career Exploration, \*City Wide Programs, Developmental Programs, \*Elementary Secondary Education, Program Descriptions, \*Program Evaluation, \*Systems Approach, Vocational Development

Identifiers—New York (Syracuse)

The report provides a summary of the independent, third party evaluation of the 1972-73 funding year of the Guided Occupational Orientation Project of the Syracuse City School District. A systems approach to evaluation was utilized in this effort. The funded project involved all three grade populations—elementary, junior high school, and senior high school. Each major grade grouping had a distinct focus: (1) elementary—career awareness, (2) junior high school—career orientation and exploration, and (3) senior high school—job training and placement. Each group goal was supported by separate grade level goals. The variables for each target group—students, parents, and industry—are described in terms of the actual effect of the program to date. In assessing the overall impact of the project, the major findings were: (1) career awareness is increasing generally for students in grades five through nine; (2) attitudes are not being affected, therefore, attitudinal concepts would be discarded; and (3) in grades 10-12, the occupational learning centers are having the desired impact on the target population. Descriptors—\*Career Education, \*City Wide Programs, \*Curriculum Development, Educational Objectives, \*Elementary Secondary Education, Formative Evaluation, Integrated Curriculum, Occupational Guidance, \*Program Evaluation

Identifiers—Ohio (Grove City)

The purpose of the project was to develop a career continuum, incorporating within the regular school curriculum the world of work, for grades K-10, which would be adaptable to the total South-Western City School District. It was intended that the program would culminate with the grade 11 and 12 program already in existence. The developed curriculum was used with students in nine elementary, four middle, and three high schools. Field experiences for students were provided at the career orientation and ex-

ploration levels. The project was evaluated utilizing locally prepared pre- and post-tests, survey forms, checklists, and data comparison charts. Samples of evaluation instruments are appended. (VA)

Identifiers—Oklahoma (Sand Springs), \*Sand Springs Public Schools

Project goals for the year ending June 30, 1974 were to complete development of the model initiated in Sand Springs Public Schools during the 1972-73 school year, to provide dissemination of the model across the State, and to demonstrate

the model in operation. Major efforts concerned instructional material revisions or development from the first year of the project where gaps were indicated. Five specific career education components were included in the research and development phase of the project: elementary school awareness, junior high exploration, high school training, placement, and guidance and counseling. Statewide workshops were held to disseminate information about the model. The major result of the project is that the career education model is operational in the district and has been spread throughout the State. A detailed evaluation report (13 pages) is included in the document. A general conclusion was that the program was successful in meeting its objectives with a positive attitude by teachers and community involvement with the school system. The appendix includes sample forms, instructional materials, and materials related to program activities. (MF)

Ohio's Program Review for Improvement, Development, and Expansion (PRIDE) in vocational education and guidance was researched and developed by the Division of Vocational Education, Research, Survey, Evaluation, and Exemplary Programs during the 1969-70 school year. Intensive study was directed toward process review and its impact on total program review to meet the mandates of the Vocational Education Act of 1963 and its subsequent amendments. As a result of the study, the Division was able to identify the following six basic components for program review: administrative review, process variable review, product review, cost analysis review, availability and impact review, and acceptance and congruence review. Specific areas addressed in the State report for 1972-73 were administration and planning, adult education, special needs education, division of guidance and testing, agricultural education, business and office education, distributive education, home economics education, and trade and industrial education. **Identifiers**—\*Armed Services Vocational Aptitude Battery, ASVAB, Texas (San Antonio)

The study reports correlations between student scores on the general technical composite of the Armed Services Vocational Aptitude Battery and cumulative grade point averages. Data were collected on 911 juniors and seniors selected from a sample at 22 high schools in the San Antonio, Texas, metropolitan area. The general technical score was found to significantly relate to overall academic performance for 19 out of the 22 samples, with a media rank order correlation coefficient (rho) of .44. Results indicate that the level of relationship was not differentially affected by school-specific ethnic group composition, school expenditures, or average teacher/pupil ratio.

Since socioeconomic levels represented in the various samples go from the highest to the lowest ranges, limited generalizations may be meaningful to other school districts with similar diverse populations. The report is designed for reference by high school counselors, service test administrators, and educational specialists as a supplemental guide to the interpretation of Armed Services Vocational Aptitude Battery results in local guidance and counseling programs. (Author/MF)

**A Study of the Correlation Between Selected Instructional Methods and Individual Learning Styles Measured on a Concrete/Symbolic Continuum. Final Report.**

Wisconsin Univ. - Stout, Menomonie. Center for Vocational, Technical and Adult Education.

Spons Agency—Wisconsin State Univ. System, Madison.

Report No—VT-102-140

Pub Date Jun 74

Note—94p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—\*Cognitive Measurement, College Students, Comparative Analysis, Correlation, Educational Experiments, Educational Research, \*Learning Characteristics, Learning Processes, \*Psychomotor Skills, Questionnaires, \*Student Opinion, \*Teaching Methods

The study attempted to measure the impact of diverse instructional methods on individuals whose learning styles tended to fall along a concrete-symbolic continuum as measured by a learning activities questionnaire. Two assumptions were made: (1) those with highly concrete learning styles learn best by direct contact type activities and (2) individuals with highly symbolic learning styles learn best by abstract type activities. The study population consisted of university students enrolled in an audiovisual communications class. Two methods of instruction were developed: a direct contact type using the actual equipment being studied with assistance from an instructor when desired, and an abstract method using audiotape narration only. Findings indicated that there was no significant difference in the cognitive skills gained regardless of learning style or treatment. However, there was a significant difference in psychomotor skills gained depending on the treatment method, with the direct contact method more effective than abstract treatments. It was felt, therefore, that the theory of learning style measurement and the teaching to measured learning style is a valid theory. Student opinion favored the direct contact type of instruction to the abstract approach. The questionnaire, testing and survey instruments, audiotape narrative, and data tables are appended. **Identifiers**—North Dakota

To provide information about changing educational and vocational opportunities for students from small, rural North Dakota secondary schools, a Career Development Institute was established at the North Dakota State School of Science. The purpose of the Institute was to broaden students' knowledge of the opportunities available to them in the world of work. Participants of the Institute's first four years (1970-1973) were surveyed for their ratings of the career development program. Data and findings are presented under three major headings: students (214 responding), parents (165 responding), and schools (163 surveyed). Students indicated that the Institute was helpful in choosing a career, that they learned of new career areas, and that the Institute program would be beneficial for all high school students. Survey responses from parents and schools also indicated that the Institute appeared to be an effective way to broaden knowledge of career opportunities and to help students plan educational programs to fit their career plans. The survey instruments, tabulated responses to the surveys, and comments from parents and schools are appended. (MF)

Descriptors—Disadvantaged Groups, \*Manpower Development, \*Program Evaluation, Questionnaires, \*Rehabilitation Programs, Remedial Programs, \*State Programs, Vocational Education, Vocational Rehabilitation, \*Vocational Training Centers

Identifiers—\*Manpower Development and Training Act Programs, MDTA Programs, Mississippi

The concern of educational and political leaders as to the extent and nature of impact made by Institutional Manpower Development and Training Act (MDTA) programs provided the basis for the study. The research report describes the degree of influence that the MDTA programs had on vocational and technical education in the State of Mississippi 1970-73. Thirty-five persons involved in vocational education were interviewed to obtain data which would contribute questions and answers to the focal point of the study. The data were analyzed within 10 categorical segments: outgrowing vocational education programs; the effect of manpower curricula and industrial training methods; obtaining necessary equipment and facilities; services to disadvantaged persons and the open entry—open exit policy; information on administrators, teachers, and students who went on to other vocational education programs or positions; information on the "start-up" policy; the effects of the MDTA stipend and the GED; years of most and least influence on other programs; influence ratings and state of Manpower training; and successful techniques used in industry. Overall, institutional MDTA programs were thought to have a moderately positive degree of influence upon other vocational education programs. The survey instrument and response data are appended. A statewide assessment of the Intensive Office Laboratory (IOL) programs in Indiana is reported. The IOL programs were established to better prepare students for initial entry into office occupations on graduation and for advancement on the job after employment. The five-year period from 1966 through 1971 was selected for analysis. The evaluation study is divided into two

parts. Part 1 involves a study of the background and makeup of the IOL programs and the IOL coordinators. Part 2 involves a followup study of the graduates of IOL programs. (Author/VA)

Descriptors—\*Annual Reports, \*Longitudinal Studies, Program Planning, Questionnaires, \*Tables (Data), Teacher Recruitment, \*Teacher Supply and Demand, \*Vocational Agriculture Teachers

The tenth annual survey of the supply and demand for teachers of vocational agriculture describes the nature and degree of the shortage of teachers in the field in 1974. It also identifies changes and trends since 1965. The data were secured from all institutions preparing vocational agriculture teachers as well as State supervisors in agriculture. Displayed in tables, the data provide information about the number and placement of vocational agriculture teachers in 1974 in addition to information and specific recommendations useful in teacher recruitment, agriculture education program planning, and certification standard modification. The survey instruments used to obtain the data are appended. (NJ)

Identifiers—Pennsylvania (Ebensburg)

The interim report describes the progress of the first year of a three-year exemplary project in career education beginning in 1973 and conducted by the Admiral Peary Area Vocational Technical School in Ebensburg, Pennsylvania. The purpose of the project was to develop a "reality bound" total K-14 educational continuum. The model consists of an elementary component, a middle school component, and a secondary school component. Other support activities are career guidance, postsecondary career education, community involvement, and test instrument development. The report presents the objectives and accomplishments of the program, a description of the project design, and a third party evaluation report, along with recommendations and conclusions. (NJ)

Identifiers—\*Water Utility Operators, Wisconsin

The document is a final report of a study of the basic competencies required by water utility operators using a ground water source, conducted at Southwest Wisconsin Vocational-Technical Institute from July to August 1974. The overall purpose of the project is to develop a competency-based curriculum model for statewide use in municipal engineering technician programs. The research was carried out in the form of a competency survey mailed to water treatment plant operators. The survey revealed characteristics of the utilities and the operators, the operators' competencies and training desires. The resultant data are displayed in tables and the survey instrument is appended. (Author/NJ)

Descriptors—Curriculum Development, \*Distributive Education, Learning Laboratories, Management Education, Merchandising, \*Program Descriptions, Program Evaluation, \*Retailing, Secondary Education, \*Simulation, Summative Evaluation

Identifiers—North Dakota (Fargo), \*School Stores

The final report evaluates the activities of the first nine weeks of a project designed to develop a curriculum guide for a school-model store at a North Dakota high school. The program combines the favorable aspects of both the school store and the model store, providing "live" experiences as well as simulated ones. The Distributive Education One curriculum is built into the store. The major retailing functions—merchandising, management, sales promotion, and finance are the foundations on which the store and the project are developed. Students are grouped into one of the retailing functions for nine weeks, rotating at the end of the period. The report presents the rationale for the program, a general description of its design, and suggested implications of the school store. (NJ)

Identifiers—Occupational Training Information Systems, Oklahoma, OTIS

The report presents the findings of followup surveys of secondary and postsecondary graduates of vocational-technical programs in Oklahoma from 1970 to 1974. The purpose of this study was to examine the post-training experiences of vocational-technical graduates the first, third, and fifth year after completing the training program. The information obtained is of use in program evaluation, Federal reports, and manpower support data for the Occupational Training Information Systems (OTIS). The results of the survey appear in three tables and provide information about the number of employed graduates and the relationship of employment to training. (NJ)

Identifiers—Project Decision 2, Wisconsin

Project Decision 2 was conceived and designed to assist high school students in making a career decision. To accomplish this, techniques and materials for use in career libraries throughout southwest Wisconsin were developed. The materials developed had special emphasis on agricultural careers for rural Wisconsin residents. An audiovisual tutorial approach was used in developing the materials to enable the students to view, listen, and analyze relevant and important data concerning career training and opportunities within the southwest Wisconsin vocational, technical, and adult education district. At the present time over 40 high school systems are utilizing the project materials on a daily basis. (Author/VA)

Descriptors—\*Adult Farmer Education, Agricultural Education, Educational Assessment, \*Participant Satisfaction, \*Program Evaluation, Program Improvement, Questionnaires, State Programs, \*State Surveys, \*Supervised Farm Practice, Teacher Response

Identifiers—Wisconsin

The final report presents the findings of an evaluation project set up to obtain reactions to the farm training program in Wisconsin from trainees and instructors. Two hundred and fifty farmers were selected for personal interviews on their respective farms. Each interview session lasted approximately 50 minutes. Data were obtained from the instructors by use of survey questionnaires and from open meetings. Some of the major recommendations based on the findings were: (1) Many on-the-farm jobs could be taught to groups of three to five farmers instead of individually; (2) the farm training program could

be extended beyond the five years by offering special classes in each district taught by specialists; (3) more mechanics should be offered in the regular farm program; (4) a crash program in every district and at State level should be developed to update instructors in the skills they need in order to have a quality program. Descriptors—\*Career Awareness, \*Career Education, Grade 7, Grade 8, Post Testing, Pretesting, \*Program Effectiveness, Research Projects, \*Rural Schools, Self Concept, \*Testing, Test Results, Tests

The purpose of the research project was to determine the effectiveness of a comprehensive career orientation program in increasing awareness of self and of career opportunities in students of rural areas. Conducted with grades 7 and 8 in LePera school in Parker, Arizona from May 1973 to October 1974, the program provided occupational information and concrete experiences which were designed to enhance student self-awareness. Career class activities were ungraded and were coordinated with the regular classroom curriculum. The SRA Career Awareness Survey Two was given as a pretest and posttest to show the amount of growth or regression in career awareness. The results indicated an increase in awareness of the world of work. Greater self-awareness, as evidenced through teacher observation, was demonstrated by students at the program's conclusion. The report includes an outline of the curriculum, the survey instrument, and tabulated test results. (NJ)

Identifiers—\*Arizona

The purpose of the study was to develop a model for evaluation of the distributive education program in Arizona. The project involved the design of survey instruments, the collection and analysis of data, and recommendations for program modification based on the findings. Surveys were made of students, teacher-coordinators, national leaders, and business and industry to determine if the needs of all were being met by the existing program. An occupational assessment of the marketing/distribution cluster was conducted and a model was developed for operationally defining cluster parameters and for identifying occupations which fit within those parameters. The body of the study includes the procedures, findings, and recommendations for the major objectives of the project. Six sample instruments are appended: a self-concept inventory, a work values survey, a distributive education student program evaluation, a DECA (Distributive Education Clubs of America) questionnaire, and a business community questionnaire. Descriptors—\*Associate Degrees, Cost Effectiveness, \*Educational Benefits, \*Graduate Surveys, Job Satisfaction, \*Nursing, Participant Satisfaction, \*Student Costs, Student Opinion, Tables (Data), Technical Institutes

The study presents the results of a cost-benefit analysis, comparing the private economic benefits with the private economic costs inherent in a two-year registered nurses program. The basic data were the result of a questionnaire administered to the class of 1971-73, the business office, office of student services, the Dean of Nursing and Health Occupations, State Employment Service, and publications from the Bureau of Labor Statistics. The study investigates such variables as instructional costs, foregone income, income prior to entry into the program, and starting salary on graduation. In addition, student opinions were used in three basic areas: first, whether the benefits exceeded costs; secondly, job satisfaction; and finally, their evaluation of their training. Ninety percent of the respondents felt that the economic benefits derived from their education exceeded the economic costs. Tables display the data which are also discussed in the report. Identifiers—North Carolina (Greenville), North Carolina (Pitt County)

A total of 160 high school students in the Pitt County and the Greenville city school systems participated in two summer institutes which were conducted to alter the attitudes and interests of students regarding vocational education. Participants for the institutes were chosen from the top two academic quartiles, after which an experimental and control group were established. The experimental group participated in a specially designed four-week institute involving many kinds of exposure to vocational education. The control group did not receive any treatment. Followup studies were conducted on both groups to determine the type of postsecondary education institution that participants chose to attend. Student attitudes and interests did change, more so for males than for females. Fourteen percent of the total experimental group enrolled in a technical institute, community college, or trade school compared to five percent of the control group. (Author/VA)

Identifiers—Nebraska, World of Work

Students' cognitive and affective development in achieving written communication objectives in the context of the world of work were compared with the same objectives placed in a liberal arts context. The research project involved four groups of students at Platte Technical Community College. Two experimental groups completed the cognitive objectives in the world of work context, whereas the two control groups completed the cognitive objectives in a liberal arts context. The students engaged in four projects within their respective settings. The posttest-only control group design was used to determine cognitive and affective differences. The data analysis showed that overall the experimental approach proved

better in cognitive skill development and the control approach proved somewhat better in affective development. Performance objectives, evaluative criteria, and tabulated project data are appended. (VA)

Descriptors—Community Benefits, \*Cost Effectiveness, \*Economic Research, Educational Planning, \*Input Output Analysis, \*Program Evaluation, Secondary Education, Statewide Planning, Tables (Data), \*Vocational Education

Identifiers—Ohio

The study addresses itself to the evaluation of the net social benefits from participation in vocational education at the senior high school level in the State of Ohio. Viewed as an investment in human capital, vocational programs were evaluated in order to estimate the excess of social benefits over social costs that accrue from training an individual in any of the programs offered. Benefits were measured in terms of (1) contributions to the value of goods and services produced in the economy over the individual's working lifetime as a result of completing a vocational program and (2) costs, in terms of the value of the goods and services that had to be given up in order to provide the training. The results for the sample vocational education planning districts were then used to obtain similar estimates for the State's remaining 103 vocational education planning districts. The computed estimates indicated that increasing the participation rate by senior high school students in vocational education programs to 40 percent of average daily membership in all of the vocational education planning districts would result in a statewide increase in net social benefits amounting to a minimum of \$108,918,528 and a maximum of \$326,951,424. Identifiers—Ohio

The survey was designed to determine the level of parent and student acceptance of the philosophy of vocational education and the current practices employed in operating vocational education programs and guidance services in the public schools of Ohio. In the 1973-74 school year, 50,168 9th and 12th grade students and 19,640 parents of these students in 107 public school districts participated in the parent and student vocational education survey. The results indicate that both parents and students have an increased awareness of the need for vocational education. The parents also indicated strong support of guidance, planning for careers, and acceptance of testing to assist in career development, although the students showed less understanding of the process. Tabulations of each survey item are presented in this report along with an analysis of the responses. (Author/NJ)

The objective of the project was to provide the guidelines and format for a procedure that could be used for assessing the placement and followup of vocational graduates. A model for obtaining accurate feedback as to the kinds of success graduates are having in the world of work was developed. The survey instrument used for collecting data was field tested at three different settings within the State of Indiana. A computer program was written for retrieving the data in a meaningful format. A total of 536 graduates in 29 career division programs were surveyed. The survey provided information on the number of occupational graduates that had secured employment, the number employed, number continuing their education, number who could not be located, and a salary range for those graduates that were employed. **Descriptors—Affective Tests, Career Choice, Discriminatory Attitudes (Social), Equal Opportunities (Jobs), \*Evaluation, \*Females, Feminism, Interest Scales, \*Interest Tests, Minority Groups, Racial Discrimination, \*Sex Discrimination, Sex Role, Sex Stereotypes, Test Bias, \*Vocational Interests, Working Women**

**Identifiers—\*Career Interest Inventories, National Institute of Education, Readings (Collections)**

A series of papers and guidelines, resulting from the National Institute of Education (NIE) Career Education Program's study of sex bias and sex fairness in career interest inventories, are presented in the document. Intended for publishers and users of career interest inventories and related services and materials as standards for evaluating sex fairness, the guidelines are presented in the following sections: the inventory itself, technical information, and interpretive information. Eleven papers are presented, dealing with issues identified by the NIE Career Education Program Planning Group study. Chapter topics include: (1) the impact of interest inventories on female career choice; (2) the use and evaluation of interest inventories and simulations; (3-4) technical aspects of interest measurements; (5) the face validity of interest measures; (6) factors affecting a client's view of interest inventories; (7) sex bias in terms of black women; (8) interest inventories and the mature woman; (9) the cost of developing interest inventories; (10) counter-biased guidance systems analyses; and (11) legal implications of sex bias in interest inventories. Each paper contains an abstract and is discussed in the overview. Background material is supplied in the forward, and the book is indexed. (LH)

Pub Date 75

Note—240p.

Available from—AIM/ARM, The Center for Vocational Education, The Ohio State University, 1960 Kenny Road, Columbus, Ohio 43210

(Annual, Calendar-year subscription \$34.00, six issues plus index)

**EDRS Price MF-\$0.76 HC-\$12.05 Plus Postage**

**Descriptors—\*Abstracts, \*Educational Research, Indexes (Locators), \*Instructional Materials, \*Literature Guides, Technical Education, \*Vocational Education**

The publication is presented with the purpose of providing educators easy access to current materials relevant to vocational-technical instruction and research. In the abstract section instructional materials (159 items) are followed by research materials (91 items) with the subject and author indexes providing access to both categories. The subject index descriptors are those listed in the "Thesaurus of ERIC Descriptors." The Projects in Progress section opens with a title by State index and provides abstracts of five curriculum projects and a directory of curriculum coordination centers. A title by State index provides access to 33 research projects in progress funded by the Vocational Education Amendments of 1968 (Public Law 90-576), Parts C, D, and I. A State directory of research coordinating units is provided. VT numbers included are VT 101 951 to 102 200. It is noted that, by arrangement with the ERIC Clearinghouse in Career Education, many of the documents announced in AIM/ARM will also be announced in "Resources in Education" (RIE) and these will be available in microfiche and/or hard copy through the ERIC Document Reproduction Service. Items not selected for RIE will be incorporated into the AIM/ARM, VT-ERIC Microfiche Set. A cross reference list will be supplied in a future issue of AIM/ARM. (SA)

**Identifiers—\*British Columbia (Vancouver)**

Many Indians are leaving their communities to seek employment in the cities, but because of lack of education and social prejudice are forced to live under poor conditions. The Indian Education Center in Vancouver has an adult basic education program that includes counseling. The center tries to help all Indians referred to it; so far it has assisted about 200 Indian men and women. The center tries, through trust, confidence, and friendship, to develop a productive interpersonal relationship with its Indian students. It attempts to create a friendly center atmosphere with T.V., stereo-tapes, ping pong and pool tables. The program is flexible enough to accommodate individual differences. Each person's abilities are identified, and individuals are encouraged to seek personal, social, and academic growth. The help and cooperation of various agencies and individuals are sought and encouraged. The center cooperates, particularly, with agencies, counselors, and social workers that are closely involved with Indian affairs. (Author/SE)

**Descriptors—Behavior Patterns, \*Developmental Psychology, \*Individual Psychology, \*Interaction Process Analysis, Models, \*Parent Child Relationship, \*Personality Theories, Speeches, State of the Art Reviews**

**Identifiers—\*Transactional Analysis**

This theoretical paper explores the implications of some modifications and extensions of the Transactional Analysis (TA) theory of personality and attempts to understand some specific aspects of human nature and behavior in evolutionary terms. "Ego State" as used in TA designates both a structural and functional unit of the personality. The term, "State", refers structurally to a unit of the personality and functionally to a condition of that unit. This paper refers to the structural unit as an Ego Sub-System. The functional unit is referred to as an Ego State Role which is the mechanism whereby the subunits of the Ego Sub-Systems are organized into relatively stable functional units. Among the major assumptions are: more than one Sub-System may be, and typically is, active at a time and each contributes to the quality of the transaction; developmentally and evolutionarily, the Child appears first, then the Adult; the Parent appears last and is an outgrowth and specialization of the Adult, and is specifically related to mankind's heritage of having been a social carnivore; for each major sub-unit of the Child there is a reciprocal and corresponding sub-unit in the Parent. The survival value of guilt and anxiety are briefly explored in relation to human evolutionary theory. (Author)

 Descriptors—\*Behavior Change, \*Culturally Disadvantaged, \*Employment Interviews, Feedback, Rehabilitation Counseling, Speeches, \*Video Tape Recordings, \*Vocational Adjustment

This project involved 50 members of a culturally disadvantaged group who had come to a neighborhood settlement house for help in obtaining and maintaining a job, and who were subsequently enrolled in a work preparation program at a large rehabilitation facility. The counselees were given the option of having or not having themselves videotaped during a number of simulated job interviews and trials; for the 44 who chose to be taped, their own behaviors were played back to them the day following each filming. No attempts to counsel the people were made, although many of them would, after watching themselves on tape, ask for advice about how they might go about being "more cool" in given situations. Following about 10 weeks of such playback experience, the majority of the counselees were able to get and hold jobs, and a six-month followup revealed that their chances of staying on a job were significantly better than those of another group of people from the same settlement house who had not been exposed to the opportunity to see a playback of their own behavior. Specifically, these individuals who had been afforded the opportunity to monitor their own behaviors by videofeedback reported nearly 80 percent success in maintaining satisfactory vocational adjustment, while just over 50 percent of those who had not received this feedback were satisfactorily employed. **Identifiers—\*Ontario**

A survey of grade 12 students in Ontario, conducted in spring 1973, sought to identify what factors influence an adolescent's future educational and vocational plans. A followup telephone survey of the same grade 12 students was conducted in November 1973 to evaluate the predictive utility of an "intentions" survey. The objectives of this survey were to ascertain: (1) the present activities of these adolescents; (2) the extent to which these adolescents were acting in accordance with their intentions as stated in spring 1973; (3) what factors distinguish adolescents who act in accord with their intentions or act contrary to their intentions; (4) to what extent adolescents in November 1973 duplicated their response to the question, "Which one statement best describes what you plan to do in the fall of 74?" and, (5) what factors distinguished "consistents" and "inconsistents" relative to question 4. Results indicated that an "intentions" survey is a poor means of predicting individual behaviors but a good device for forecasting aggregate behaviors. A profile of "consistents" and "inconsistents" is included. (Author/HMV)

Note—208p.

**EDRS Price MF-\$0.76 HC-\$10.78 Plus Postage**  
 Descriptors—Educational Strategies, Elementary Education, \*Instructional Design, \*Learning Theories, \*Skill Analysis, State of the Art Reviews, \*Task Analysis

The structure of knowledge in a particular subject-matter discipline and the structure of behavior in a given task-skill domain are often regarded as unrelated or even antithetical bases for the systematic design of instructional products and procedures. This volume documents progress toward a methodology of instructional design founded on the premise that both learning to know and learning to do are essential to the effectiveness of a given course of instruction. Briefly described, the methodology involves three distinct but interrelated techniques of analysis: content, task, and skills. The papers in part 1 present the theoretical rationale underlying the proposed methods and describe the procedure for skills analysis. The papers in Part 2 illustrate applications of content, task, and skill analysis in the science inquiry area at the primary grade level. (Author/HMV)

The report describes a program whose purpose is to minimize the student dropout rate through a comprehensive educational program located in a neighborhood center. The center is designed to provide effective academic training, related supervised employment, and allied support services. The program serves ninth grade students from Warren Harding High School in Bridgeport, Connecticut, who have exhibited behavioral and attitudinal characteristics related to dropping out of school. Moreover, the project is developing a functional model for replication purposes in the city of Bridgeport as well as in other urban centers throughout the state and the nation. Data collected locally and related experience gained through the program will also enable the educational system to better identify, understand and serve potential dropouts. (Author)

Descriptors—Cognitive Measurement, \*Conservation (Concept), \*Logical Thinking, \*Older Adults, \*Performance Factors, Performance Tests, \*Problem Solving, Task Performance, \*Training

Several studies have shown that the elderly do not perform well on the Piagetian problems of logical thinking; the present set of studies aimed at demonstrating that the elderly maintain the competence to solve such problems. The first study performed by the authors assessed performance of 60 noninstitutionalized middle-class elderly females on area and volume conservation tasks. On overall performance only 33.3 percent

of the subjects were classified as conservers. The second study employed a training paradigm to determine whether simple verbal feedback activated the strategies required for adequate performance on conservation tasks. Twenty-two subjects who failed to conserve in the assessment study were administered a 20-trial training procedure. Half of these subjects received no feedback. An immediate posttest indicated that the feedback group performed significantly better than the control group on the near transfer posttest task and on the five out of six far transfer tasks. The authors argue that the ease with which training effects were established and the improved performance after training support the view that the elderly maintain competence to adequately solve problems of logical thinking. Descriptors—Anxiety, \*Classroom Guidance Programs, Counselor Role, Educational Development, Elementary Education, Group Counseling, \*Motivation, Research Projects, \*Self Concept, \*Teacher Role  
Identifiers—\*Glasser

Research results have suggested that reduction of anxiety and defensiveness among students in a group situation enhances school achievement and school motivation. The present study aimed at demonstrating that using the Glasser discussion method, which encourages students to take responsibility and discuss various problems that they face in school, increases motivation and improves their self-concept. Six groups of 10 elementary school students each served as subjects. Two groups were led by counselors, another two by teachers while the other two served as controls. The increase in school motivation, as assessed from the pre- and post-treatment scores of the subjects on the SCAMIN inventory, was significantly higher in the counselor-led groups than in the teacher-led groups, but the experimental groups were not significantly different from the control groups. The increase in self-concept, as assessed on the SCAMIN inventory, was significantly higher in the teacher-led groups than it was either in the counselor-led or control groups. The author concludes by suggesting that the Glasser discussion techniques be used for a longer time span. (Author/SE)

This paper reviews the research literature on the relationship of drugs, alcohol, and driving among young people, university students, and a group of young criminals. The data show that young people use drugs more than adults do, and that they drive under the influence of drugs or alcohol, especially at night, more often than adults do, and consequently young people are more vulnerable to accidents due to drug use than are adults. The writer then considers possible countermeasures against drinking and driving such as limitations on drinking by young people, the amount of permissible liquor consumption, and limitations on driving such as forcing speed limits during certain periods of the day. The writer concludes that few countermeasures have demonstrated their effectiveness; nevertheless, he argues that it is essential that more effort be placed on the development of effective countermeasure programs and that those programs in existence be more effectively evaluated. Descriptors—Community Agencies (Public), \*Community Services, Generation Gap, \*Helping Relationship, \*Home Visits, \*Older Adults, Orthopedically Handicapped, Research Projects, Speeches, \*Volunteers, Youth Problems

This special project, manned by volunteers, aimed at seeking out and serving "homebound elderly" among whom 22 desired such intervention. College students, middle-aged and older adults were involved in conducting weekly visits. Although no special effort was made to recruit young volunteers for this project, it is suggested that such assignments can be made successfully. Most of 49 referrals were cited as homebound because of physical disabilities, and fewer than half lived alone. Assumptions about elderly homebound who live alone, are lonely, and who, therefore, should be sought out in a general way, are not warranted. Instead, agencies are encouraged to participate in organized surveys of their local communities in order to differentiate the various needs of older persons. The call to assist the elderly has widened the generation gap between young and old people. To help close this gap, the authors suggest interagency, interorganizational community models that are designed to direct teenage and college youth into helping roles that include home visiting, escort service and shopping for older adults. Social workers of various specialties can help fashion such cooperative models. (Author/SE)

**Explaining the Aspirations of Working Class Girls.**  
Pub Date Mar 75

Note—25p.; Paper presented at the Annual Meeting of the American Education Association (Boston, Massachusetts, July 1-4, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*Aspiration, Educational Interest, \*Females, High School Students, \*Identification (Psychological), Occupational Aspiration, Research Projects, \*Sex Role, \*Social Differences

Until recently research on women's educational and occupational aspirations has ignored the role of sex role ideology (SRI) and has concentrated primarily on college women. This study was implemented with 270 grade 12 girls, 25 percent of whom were from lower class backgrounds. Four scales of SRI were administered: femininity, power, division of labor, and women's liberation. An additional set of four scales of aspirations was also given: educational, occupational, marital aspirations, and occupational commitment. The results indicated a high correlation between educational aspiration and power and women's liberation, while marital aspirations correlated negatively with each of the four scales of the SRI. These correlations suggest that the more conviction in the equality of the sexes, the higher the educational aspirations of the girls. Agreement with the women's liberation items were the best predictors of occupational and educational aspirations, even after such important background variables as achievement and social class were controlled. The author concludes that the relationship correlations found in this study were very low, and that the results can not be generalized unless a more representative sample of subjects is used. (SE)

At this symposium on career education and the school counselor, three researchers spoke about a project on which they have been working which involves field-testing and evaluating 61 career education units that are to be infused into the present public school curriculum, K-12. This project explores the implications of the school-based model as it relates to the role of the school counselor. The first speaker was Jacqueline E. Haveman, who gave an overview of career education and school district responses to it. The second speaker, Gordon K. McLeod, discussed "The Infusion of Career Education Into Existing School Subject Areas." The third speaker, Jeanette Wheeler, discussed "The Role of School Counselors and the Comprehensive Career Education Model, CCEM." These three speakers were from the American Institute for Research. To conclude the symposium, Garry Walz, the director of the ERIC Clearinghouse for Counseling and Personnel Services, addressed the participants about career education. (SE)

Descriptors—\*Family Role, \*Individualism, Parent Child Relationship, \*Parent Responsibility, Social Influences, \*Socialization, Speeches, Urban Environment, Values, \*Youth Problems

This speech discusses the negative effects of privacy on youth. The great technological developments, bureaucratization, and concentration of life in urban and suburban areas have greatly increased personal privacy and reduced close personal contacts. This paper discusses several studies which suggest that the above factors lead young people to have ambivalent attitudes toward privacy: on the one hand they value privacy highly, while on the other hand they desire close personal ties. Moreover, data show that privacy leads to antisocial acts as well as self-destructive acts. The punishment of antisocial acts by governmental agencies is counterproductive; certain basic changes in the American socialization process should be introduced to deal with the problem positively. Parents and other concerned adults should be given improved incentives to personally observe, and accept responsibility for, the conduct of children. Children and youths should be encouraged to spend more time within the personal observation of other youths or responsible adults and establish on-going relationships with them. Finally, the philosophical implications of our current high evaluation of personal privacy should be reconsidered. The author has tried to answer possible objections to his propositions. (SE)

This is a report of a training course for guidance counselors. Nine counselors and 27 stu-

dents participated in the program. The counselors administered various tests such as the Kuder, Holland, and ICL tests; they had individual interviews with the students, organized discussion groups, and showed films to the students. At the end of the three-day program, counselors held a general discussion of the results obtained, and the training program was evaluated by both the counselors and the students. All counselors, and most of the students, were very pleased about their experience and said they benefited from it. The directors of the training program conclude that home-school guidance staffs should be trained in career counseling and should know that instruments are available for vocational appraisal. The general consensus was that a one-day practicum with students was too short and that it should be extended into a three-day session. The report contains a detailed schedule of the three-day program; of the instruments, scales, and films used; and also various checklists and questionnaires. (SE)

Careers Program-Outreach is a project funded by the Vocational Education Act whose purpose is to expand career options for students, particularly the disadvantaged, and to serve as an incentive to school staffs to innovate and implement career development programs. The major emphases of this program are: (1) to assist counselors to develop programs which include in existing counseling services career counseling, and to experiment with new techniques and methods; (2) to introduce staff to the concept that careers have a place in the classroom, and to the latest concepts of occupational education; and (3) to demonstrate how career exploration programs for students in junior and senior high school can be effectively organized and conducted. Program descriptions, career education materials, questionnaires and evaluations are included. (Author/GMF)

Identifiers—\*Career Resource Center

During 1973-74 school year, the Nassau N.Y. Board of Cooperative Educational Services experimented with a Career Resource Center at one area neighborhood center. In 10 months this Career Resource Center served 3, 132 students and 387 professional staff, and developed and experimented with four model programs in career counseling and guidance. The central project objective was to integrate the Career Resource Center concept into everyday pupil personnel services at one area center. Other objectives were: (1) to utilize a combination of group orientation, group counseling, aptitude testing and multimedia approaches to career education; (2) to demonstrate effective career counseling techniques to school staffs; and (3) to provide service to junior and senior high students including disadvantaged, handicapped and potential dropouts. Model programs described include counseling, career exploration, employability training, and decision making skills. Audio-visual, career guidance, and psychological test materials were available at this center for use by students and counselors. (GMF)

Descriptors—\*Behavior Patterns, \*Motivation, Nonverbal Communication, \*Perception, Psychological Testing, Research Projects, \*Stereotypes, Stimulus Behavior, \*Verbal Communication, Visual Perception

This final report attempts to summarize the major findings of three and one-half years of research in the area of understanding and accurately judging others. The author's research on person perception focuses on the use of sound motion pictures of interviews as the primary stimulus and vehicle for the research. Subjects used for these studies were usually college students from psychology classes. There are three major sections or topics for this research: (1) assessing the validity of verbal and non-verbal cues in accurately judging others; (2) effects of money, anticipation and competition upon judging scores and self-reports of motivational arousal; and (3) social stereotyping and its relationship to accuracy in person perception. Results indicate that accurately perceiving and judging another is a complex task affected by many variables, and the difficulty in decoding them depends on the transparency or opaqueness of the person being judged. In addition, according to the authors, people can be trained to be better judges of others. (GMF)

Maturation, Negro Students, Open Education, Program Evaluation, \*Self Concept, \*Socialization, Student Participation, \*Summer Programs, Tables (Data), \*Urban Youth

This study has attempted to identify the longitudinal impact of a summer program model designed to enhance central city junior high school youth's self-concept, attitude toward school, participation in school, academic achievement, and socialization/maturation. Three sets of experimental/control groups were included in the study and after two years in the program, randomly selected youth revealed significant improvements in socialization/maturation—that is, their ability to take care of themselves and get along better with others. They also served in significantly more school leadership positions than control youth. There was no significant improvement in self-concept, attitude toward school, participation in school, and academic achievement. Leadership-prone students however, did achieve significant gains in the latter areas. A description is included of the program's background, history, input, changes over the years, problems and recommendations. (Author)

Descriptors—\*Achievement, \*Affective Behavior, \*Hostility, Literature Reviews, \*Motivation, \*Parent Child Relationship, Permissive Environment, \*Sex Differences, Speeches

This article summarizes and discusses some of the studies which relate parental attributes to children's achievement orientations, that is, both achievement motivation and achievement behavior. The warmth-hostility dimension is one of two main parental dimensions which have continually arisen in factor analyses of child rearing patterns. The other major dimension, that of permissiveness-restrictiveness, is considered in this paper only in relation to the warmth-hostility dimension. The paper includes a review of the major theories of achievement motivation and behavior, a description of the two main parental dimensions, and summaries of achievement studies related to the Warmth-Hostility dimension. The paper concludes with a discussion of the methodological limitations of these studies: the use of self-reports, lack of distinction between intellectual and academic achievement, not enough investigation of other kinds of achievement, and relatively little available data on the father-child relationship. The author makes recommendations concerning these and other methodological problems in this area of research. (Author/SJL)

This report assesses the needs of and resources for children of alcoholic parents, and recommends strategies based on the identification of service gaps. The number, characteristics, life experiences, feelings, coping mechanisms, and problems of children of alcohol parents are discussed. Needs common to this group and factors which variably condition the impact of parental alcoholism on children are identified. A survey of actual and potential helping resources subsumes the nuclear and extended family, general community contacts, child and family

agencies, alcoholism treatment programs, and specialized services for the children of alcoholic parents. Common characteristics of these helping resources are noted, as are the gaps between needs and resources and conditions which have created such gaps. Recommendations are provided for each potential resource system and for a national effort to address the current situation. (Author)

Literature Reviews, \*Military Personnel, \*Pre-

dictor Variables, \*Prisoners, Probationary

Period

Identifiers—\*Parole

This partially-annotated bibliography surveys numerous studies relating to the prediction of delinquency and of parole success. This literature search was undertaken to review those studies whose results would assist the military in the selection of pre-release indicators of successful adjustment. The chosen indicators would then be used to predict the parole success of military prisoners and, therefore, aid in release determinations. An attempt was made to include the major studies, military and civilian, in the areas of parole and delinquency prediction. Studies dealing with the general problem are inserted prior to the empirical research in an attempt to first give the reader an overview of the topic. (Author)

(Sociological Unit), \*Hyperactivity, \*Interac-

tion Process Analysis, \*Parent Child Relation-

ship, \*Psychopathology, Research Projects

Identifiers—\*Hierarchical Control

Present research questions the traditional unidimensional model in childhood psychopathology. Not only do parents influence the development of their offspring, they, in turn, are influenced by them. The infant is an active agent, affected by and affecting those around him. The infant emerges as a primary source of influence—often in the direction of the malevolent distortion of the caregiver's attention. This study further suggests that the family has the properties of a dynamic social unit wherein reciprocal interaction effects appear to be intrinsically related to sources of control or command over others. For example, fathers of children in psychotherapy were consistently and significantly more controlling than the normative group. Fathers of hyperkinetic children tended to have extreme scores, high or low, on a measure of hierarchical control. More systematic exploration of family life along the dimensions of power, influence, and susceptibility to influence is needed to increase the understanding of why and how specific individuals within a family succumb to pathology. Expectations for childhood and its outcome take on quite different meanings when one designates the child as female. A girl needs an Affirmative Action Childhood to counteract the intensive, pervasive, and crippling socialization process which negatively and powerfully affects her aspirations, and, therefore, her future as an adult. Included in an Affirmative Action Childhood should be the need to help boys give up their contemptuous, superior attitudes toward females which is allowed and reinforced in childhood, and which pervasively affects all their later adult relationships with women whether on a professional or a personal level. Approval of equal pay for equal work, and equal employment and educational opportunity are, of course, necessary. But the nuances of sexism which train girls not even to aspire to equal employment and equal educational opportunity must also be dealt with if the vicious circle is ever to break. (Author)

Descriptors—\*Children, \*Concept Formation,

\*Developmental Tasks, Discrimination Learn-

ing, Elementary Education, Feedback, \*Learn-

ing Processes, \*Schematic Studies

A schema is best understood as a statistically defined concept. Schematic concept formation consists of abstracting the common elements or properties of a defined class in a schema. Thereafter, both discrimination and retention are facilitated, since only deviations from the schema need be processed for any particular class exemplar. In the present study, 240 children ranging from 6 to 12 years of age were trained in an oddity task, either with or without knowledge of results to distinguish 67 percent redundant patterns representing different schemata. Schematic concept formation was found to occur prior to age 6 and increase in efficiency to ages 11 or 12. This ability did not depend on knowledge of results and was not related to traditional measures of intelligence. The schematic concept formation task appears to be a promising nonverbal and perhaps culture-independent measure of learning potential or ability. (Author)

Research was conducted to investigate two general classes of human attention models, early-selection models which claim that attentional selecting precedes memory and meaning extraction mechanisms, and late-selection models which posit the reverse. This research involved two components: (1) the development of simple, efficient, computer-oriented methods for generating rigorously precise stimulus material (these required human attention experiments); and (2) the execution of two experiments which employed computer-generated stimuli. The first experiment examined the filtering characteristics of attention mechanisms when subjects were

required to select from either acoustically or semantically similar competing messages. Results show that semantic similarity is disruptive only at a slow presentation rate, while the effects of acoustic similarity do not depend on presentation rate. In the second experiment, subjects performed a tone detection task in one ear, while simultaneously monitoring a digit sequence presented in the opposite ear. Digits were recalled following presentation. Tone detection performance decreased as the number of digits to be recalled increased. Both findings are interpreted as supporting early-selection attention models. (Author)

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—\*Anxiety, Children, Learning, Measurement Techniques, Neurosis, \*Psychological Patterns, \*Psychophysiology, \*Research Needs, Research Projects, \*Stress Variables

This series of papers on stress and anxiety is part of a larger project concerned with a critical appraisal of research needs in the areas of personality, emotion, and motivation. A group of behavioral scientists contributed their expertise in identifying critical variables, concepts, and processes relating to stress and anxiety. Rather than attempting an exhaustive review of the relevant literature, each author reviews articles in his area of expertise and notes those theoretical and empirical contributions he considers especially important. Each author specifies the knowledge needed to clarify present information and/or fill gaps in existing knowledge, and describes the theoretical and methodological problems related to these research needs. The papers presented in this series are: (1) Stress and Anxiety: An Overview; (2) Stress Research; (3) Conceptual Meaning and Measurement of Anxiety; (4) State and Trait Anxiety; (5) Physiological Aspects of Anxiety; (6) Anxiety and Learning; (7) Anxiety in Children; and (8) Neurotic Anxiety. Descriptors—\*Attention Control, Behavioral Science Research, Cognitive Processes, Comparative Analysis, \*Experimental Psychology, \*Pattern Recognition, \*Psychological Patterns, Research Projects, \*Stimulus Behavior

This report describes the experimental studies conducted to examine the role of mental structures in four different areas of research. The first area involves the structural analysis of isolable subsystems involved in visual and auditory pattern recognition. The second area involves the study of the encoding and retrieval of emotional or evaluative information. The study of complex patterns of active and passive production of voluntary movements constitutes the third field of investigation. The fourth area cuts across work in the other three and deals with distinctions between automatic processing and processing which is under active attentional control. Experi-

ments in these areas are designed to examine the relationship between mental structures in general and the brain systems which subserve the functions of consciousness. The final part of the report deals briefly with efforts to make these findings on mental structure available in the form of course materials. (Author)

Descriptors—\*Community Services, \*Delinquent Rehabilitation, \*Interagency Cooperation, Manpower Development, \*Program Descriptions, Program Evaluation, \*Rehabilitation Programs, Young Adults, \*Youth

Identifiers—\*Project Crossroads

This report describes and evaluates Project Crossroads, a manpower approach to the rehabilitation of accused offenders prior to adjudication. In order to demonstrate the feasibility of working with the court and its personnel to provide a pretrial intervention alternative for youthful first-time offenders, Project Crossroads provided a community-based program of manpower services to young men and women in the pretrial stage of the criminal court process. Project services include counseling, job placement, job training and remedial education. The report evaluates Project Crossroads in relation to its impact on the court adjudication of its participants, measurable results in the spheres of participant recidivism and employment, and evaluation of the characteristics of project participants who achieve success by Project Crossroads standards. The report discusses the role of this program of intervention in mitigating some negative byproducts of routine case processing, and makes recommendations concerning further program use and evaluation. **Counseling Preferences Among College Students: New Directions for Change.**

Pub Date 24 Mar 75

Note—7p.; Paper presented at the Annual Meeting of the American Personnel and Guidance Association (31st, New York, New York, March 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Behavioral Counseling, College Students, \*Comparative Analysis, Counseling Services, Higher Education, \*Nondirective Counseling, \*Psychotherapy, Questionnaires, Research Projects, \*Student Opinion

This study explores counseling preferences of college students and their relationship to students' sex, major, and year in school. A questionnaire (Direction-Unconscious Motivation Scale) designed to assess attitudes toward psychoanalytic, behavioral therapy and client-centered counseling approaches was given to 683 volunteers who were students at two New York State Colleges. Results showed that students reported a greater preference for a psychoanalytic than a behavioral therapy approach. However, few participants were highly positive about any of the three counseling approaches in their entirety. Responses to many of the questionnaire items were related to sex and year, and indicated that most participants held preferences for seemingly contradictory or potentially conflicting counseling goals or techniques. The authors suggest that counseling centers include counselors who differ in treatment model and outlook, are sensitive to conflicting counseling needs, and can adapt their techniques to the unique patterns of preferences of different clients. Pub Date [74]

Note—307p.

EDRS Price MF-\$0.76 HC-\$15.86 Plus Postage

Descriptors—\*Change Strategies, \*Child Care Centers, Child Welfare, Comparative Analysis, \*Institutional Role, \*Program Effectiveness, \*Research Methodology

This report presents the results of a three-year program of research designed to evaluate the effectiveness of institutions serving dependent and neglected children in terms of their impact on resident children, and their ability to respond to changing demands on their services. Basically, the research was geared to determining whether the open, community-oriented institution was more effective with children and responsive to change initiatives than its counterpart, the closed (non-community-oriented) institution. Three distinct external strategies for inducing institutional change were developed and introduced in a controlled fashion over a year's time with groups of institutions. An examination of the results of these strategies enabled an assessment of the degree of responsiveness of differently structured institutions to different types of external change initiatives. These efforts yielded considerable information of a technical nature on measuring institutional effectiveness, and of a substantive nature regarding the quality of care provided by institutions for dependent and neglected children. Descriptors—\*Affective Tests, \*Classification, Educational Testing, Elementary Secondary Education, Emotional Development, \*Evaluation Methods, \*Measurement Instruments, Program Evaluation, \*Test Selection

This paper defines affective development as, "the growth of an individual's attitudes toward self, others, and institutions." The intent of this paper is to provide educators with the information necessary to use existing measures of affective development in the evaluation of their educational programs. This information includes: (1) a listing of recently designed measures of affective development; (2) a system for classifying these instruments; and (3) a method for evaluating the usefulness and appropriateness of these tests. With these resources, educators can have a systematic method for identifying, evaluating, and selecting measures of affective development. This methodology can be helpful in the process of deciding which instrument is best suited for use with a particular program. (Author)

Identifiers—Minnesota (Minneapolis), \*Teen Age Medical Service

This paper presents the objectives and results of an experimental program, the Teen Age Medical Service, in Minneapolis, Minnesota. The first objective of this program was to experiment with new ways of delivering additional, more extensive, and continuous personal services while maintaining the emergency and episodic services that have successfully evolved. Program components used in assessing movement toward this

objective were: (1) a pregnancy service for teenagers which integrated medical and social services; (2) family planning services for teenagers; (3) provision for continuity of medical service for alienated or emancipated teenagers; (4) a system for community institutional coordination; (5) a medical service clinic for the poor; (6) a personalized, comprehensive medical care program for teenagers; and (7) a community health education program. Three other objectives for the Teen Age Medical Service were examined in relation to program content and quality of services. These program objectives were: (1) to develop methods of involving and employing youth in the actual delivery of health services to their peers; (2) to assist other concerned individuals and groups interested in initiating similar youth services in other metropolitan locations; and (3) to develop effective methods of integrating the findings and experience of the center into public policy.  Descriptors—\*Changing Attitudes, \*Curriculum Development, \*Educational Needs, Elementary Education, Sex Role, \*Sex Stereotypes, Sociocultural Patterns, Speeches, Teacher Education

This speech evaluates some of the effects of sex-role stereotyping on both men and women. The results of a number of recent research studies are presented to chart some societal changes already evident in relation to sexism. In this context of change, the author deals with the nature of educational programming for young children which will counter sexism. The training of teachers of young children is discussed in regard to survey data on prospective teachers' self-evaluation and expression of attitudes on sex-role stereotyping. The implications of sexism, and the means used to challenge sexism, are discussed. (Author)

 Descriptors—\*Counseling Goals, Elementary Secondary Education, \*Guidance Objectives, \*Guidance Programs, Program Descriptions, \*Program Evaluation, \*Pupil Personnel Services, School Districts, Teacher Participation

An extensive self-study has provided considerable information about the guidance and counseling services in the State College Area School District. Appropriate personnel have stated 21 objectives for these services as well as recommendations to implement these objectives. The latter deal with: (1) providing adequate and continuous guidance and counseling services to students in elementary and secondary education; (2) improving the coordination between counselors on the one hand, and teachers and administration on the other; (3) establishing an ongoing relation between parents and counselors to help the former understand their children better as well as to help them understand the purpose and programs of the schools; (4) fostering continuous teamwork among those specialists within the school system whose functions can aid the development of students; and (5) making use of community resources as well as acting as a liaison between the school and the community professional agencies. Finally, an appeal is made to all interested and responsible parties to review this report and its accompanying recommendations, and to try to implement them. (Author/SE)

Note—19p.; Paper presented at the Fall Meeting of the Michigan College and University Placement Association (Detroit, Michigan, October 24, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—College Students, Community Colleges, \*Counseling Services, Employment Opportunities, Employment Services, \*Facilities, \*Job Placement, Junior Colleges, \*School Industry Relationship, Speeches

This speech discusses various aspects of a placement director's work in a large community college. A successful placement director is an ambitious extrovert. Placement requires an ample budget, and approximately 1,000 square feet of space for offices and parking. Students should be helped to prepare resumes and the placement director should prepare introductory letters and other referrals, and arrange these in a file. He should also prepare students for job interviews by rehearsals and encouragements. A brief form should later be sent to students, asking for feedback. The second major task of a placement director is to have detailed information about the various kinds of job openings in and around the city where the college is located. This can be obtained from newspapers and through establishing personal contacts with major companies who might need employees. The director should try various means to get in touch with company officials, and inform them about the college and its programs and how the graduates can be helpful to them in their employment settings. This sourcebook is the result of a week-long conference of about 50 "Study Abroad Advisors" held in 1974. The workshop and the sourcebook are the first steps toward professionalizing the field of advising U.S. students who wish an overseas experience. The sourcebook is designed as a complement to the Council on International Educational Exchange's guidelines on developing campus services for students going overseas. The sourcebook discusses the purpose of studying abroad, the roles of the advisor as they relate to the student and university administration, various details on overseas programs, the role of language in an Experience Abroad, program evaluation and transfer of credits, financial aid, orientation for U.S. students before departure, and personal and academic readjustment after returning from abroad. Finally, the book includes appendices which list the names of the workshop participants, important addresses, additional sources of information on travel and work abroad, and various other guidelines and materials that were used in the workshop. The concept "trochic meter" was taught to 180 college Ss by means of eight treatment conditions. The independent variables involved

presenting a definition (D) or instances (E) or both combined with attribute definition (A) and/or attribute prompting (P). Dependent variables were corrected classification and specified classification errors. Hypotheses consisted of prediction of particular errors for each treatment. Six of the eight hypotheses were supported at significant levels. The most effective condition for promoting correct classification consisted of D + E + A + P. The last effective condition consisted of D or E alone. (Author)

This document, prepared by a Study Group of the Institute on Rehabilitation Issues, highlights some of the more basic and timely issues regarding the measurement of client outcomes. Areas in which change should be measured, in priority order, are vocational functioning and potential, economic independence, physical functioning and psychosocial functioning. The document is not intended to be a guide or an outline of how to establish and implement a program for measuring client outcomes. Instead it reviews current practices, emerging aspects and implications, presents issues, and makes recommendations. (Author/HMV)

Descriptors—Evaluation Methods, Guidelines, \*Handicapped, Program Descriptions, \*Program Development, \*Rehabilitation Counseling, Resource Materials, \*Severely Handicapped, Social Services, \*Vocational Rehabilitation

Identifiers—\*Conference Report HR 8395

One of the significant results of the 92nd and 93rd Congresses was the statement in the Conference Report: H.R. 8395 clarifying the roles to be played by the federal state grant-in-aid program for vocational rehabilitation. The Conference Report states that the order of selection be modified to require serving first those individuals with the most severe handicaps. The severely disabled and the severely handicapped populations should be the first priority of vocational rehabilitation programs. The challenge is to find means to pursue the objective in ways that work. This publication attempts to describe an intense program of vocational rehabilitation services in which time, money, and effort are spent in ascertaining what reasonably can be expected to improve the severely disabled and severely handicapped's ability to live independently and function within a vocational setting. It is intended to provide a practical training guide that will be helpful in the development of programs and for the provision of services to the severely disabled. (Author)

Identifiers—PAT, \*Profile Analysis Technique

Operating under the assumption that: (1) state agencies routinely collect large amounts of data; (2) these data possess significant potential for evaluating VR programs; and (3) the program evaluation potential of these data has been largely untapped, the W. Va. Research and Training Center has been developing techniques for evaluating rehabilitation programs. This publication contains three papers, the first of which details the basic rationale for a technique developed in the Research and Training Center that is designed to simplify the ultimate development of standards for self-evaluation of VR programs. This technique, called Profile Analysis Technique, takes currently existing data and formats it in such a way as to increase its intelligibility. The second paper, dealing with Marco and Micro Aspects of Program Evaluation in rehabilitation, takes the theoretical approach developed in the previous paper and shows its application to a number of real-life situations. The third paper, dealing with Measurement of Client Outcomes, continues with a demonstration of how routinely available data can generate fine-grained analysis of program functioning. (Author)

A Sequence of Developmental Stages Designed to Classify Client Responses in Counseling Interviews in a Way Which Will Reveal Significant Changes in Client Feelings and Perceptions as He Seeks and Gains Independence and Self-Autonomy in Dealing with His Adjustment Difficulties.

Note—16p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Behavior Change, \*Classification, \*Counseling, Helping Relationship, Interpersonal Relationship, \*Interviews, Program Descriptions, \*Response Mode, \*Sequential Programs

This paper describes a system of classifying client responses in counseling interviews. The author begins his classification at Stage 1, where the client's self-evaluation and levels of independence and self-autonomy are so low he cannot admit he needs help, and delineates each stage of the client's reaction through Stage 12, the final step, where the client's self-evaluation and levels of independence and self-autonomy have increased so that he can now accept the fact that while he will still have to face problems as they arise, he now feels adequate to cope with them. Each stage level is described, complete with characteristic perceptions and feelings with psychological explanations, a description of definitive overt behavior, and illustrative client comments. Identifiers—Vermont

This is the last in a series of three studies dealing with Vermonters' aspirations and demands for education beyond the secondary level, and the problems of their access to it. The focus is on high school graduates and addresses the wide disparity between demonstrated aspiration to at-

tend some form of postsecondary education, and actual enrollment or continuation after high school. The study analyzes the development of educational aspiration and the causes of noncontinuation. Use of factor analysis and regression analysis showed the development of aspiration to be contingent on three main variables—the academic program in which the student is enrolled in high school, the formulation of occupational goals, and the existence of a utilitarian value for postsecondary education which translates the desire for occupational training and success into the need for further education. Several barriers acting to inhibit or impede enrollment are also examined. The study includes a section of case history narratives designed to complement the traditional statistical interpretation of the data, and provide a contextual framework from which to view the problems in Vermont. Identifiers—California

This document, prepared by California Review and Synthesis of Foster Care Studies project reviews and combines the major recommendations of seven recent California studies of foster care. These studies were: (1) Children Waiting, State Dept. of Social Welfare, 1972; (2) Report on Foster Care in California Joint Legislative Audit Committee, 1973; (3) Report on State's Role in Foster Care in California, Joint Legislative Audit Committee, 1974; (4) New Perspectives on Child Welfare Foster Care Services, Staffing, and Delivery System, Madison et al; (6) Adoptions and Foster Care Study Report, State of California, Dept. of Health, 1973; (7) Progress Report #1, Bolton Associates 1970. The consultants who reviewed these studies determined three Systems Recommendations, rated here in order of priority: (1) development of a single Children's Service Unit; (2) limitation of Juvenile Court and Probation jurisdiction to the most serious offenders with assignment to Protective Services of jurisdiction for abused or neglected children; and (3) initiation of a statewide supervising agency designated to monitor probation departments, establish standards, and evaluate program effectiveness. High School Guidance Counselors' Correspondence Course Manual: How to Use Correspondence Courses to Supplement High School Classes.

Massachusetts State Dept. of Education, Boston. Bureau of Adult Education and Extended Services.

Pub Date Oct 74

Note—72p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Correspondence Courses, \*Counselor Functions, \*Course Objectives, \*Guidance Counseling, \*Manuals, Secondary Education, Student Needs, Supplementary Education

This manual describes 20 correspondence courses which supplement regular school offerings and are administered through high school guidance counselors. More than two-thirds of these carry high school credit. The courses are available not only to students needing to fulfill credit requirements, but also to those who: (1) need courses not taught in their own schools, (2) are homebound, (3) have schedule conflicts, or (4) have difficulties with particular learning situations at school. Currently 150 Massachusetts communities are participating in this state-wide program which permits a guidance counselor in each participating high school to serve as liaison between students and programs. Sample pages from each of the 20 correspondence course study guides are included. (CKJ)

Sex Differences in the Social Bases of Self-Esteem.

Pub Date Sep 74

Note—11p.; Paper presented at the Annual Meeting of the American Psychological Association (82nd, New Orleans, Louisiana, August 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Behavior Patterns, \*Interaction Process Analysis, \*Interpersonal Relationship, Research Projects, Self Concept, \*Self Esteem, Self Evaluation, \*Sex Differences, \*Social Relations

The study examined sex differences in the influence of perceived evaluations of self by various types of referent others upon self-esteem. Distinctions were made between authority and peer relationships and between close and distant relationships. The status dimension proved particularly important for males, their variation in self-esteem being primarily accounted for by perceived peer appraisals (in both close and distant relationships). On the other hand, the intimacy dimension appeared to be most critical for females, their self-esteem levels being largely a function of perceived appraisals of close others (both authorities and peers). Leadership Styles and Member Attitudes in T Groups.

Pub Date Sep 74

Note—10p.; Paper presented at the Annual Meeting of the American Psychological Association (82nd, New Orleans, Louisiana, August 1974)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Affective Behavior, Attitudes, Group Dynamics, \*Interpersonal Relationship, \*Leadership Styles, \*Needs, Psychological Needs, T Groups, \*Trainers

It was hypothesized that favorability of member attitudes toward the trainer and group in T groups is a function of similarity of members' control and affection needs with the trainer's. It was further predicted that similarity in control needs would affect attitudes toward the trainer primarily during an early stage, and similarity in affection needs would influence attitudes toward the group during a later stage. These hypotheses were disconfirmed. However, strong effects associated with trainer needs were observed. Trainers low in control and affection needs elicited relatively favorable reactions at an early point and negative responses at a later point. (Author)

Our Common Concerns in the Field of Aging.

Pub Date 75]

Note—7p.; Speech presented at the Governor's Conference on Aging (Columbus, Ohio, April 15-16, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Federal Programs, \*Needs, \*Older Adults, \*Social Services, Speeches

This keynote address speaks to problems faced by the elderly, particularly in the areas of finances and social services. The public concerns over the viability of the social security system are briefly examined and confronted. The speaker, U.S. Commissioner on Aging, stresses the need for his peers to become acquainted with, and use, the many services available to them, including special cost-saving public transportation and no-cost or low-cost legal services. He further advocates the need for older persons to remain involved in life, as a source of strength not only for themselves but for the nation. (CKJ)

**The Effects of Amount of Study Time, Quality of Instruction, and Degree of Initial Learning Upon Retention of an Intellectual Skill (Summary).**

Pub Date [75]

Note—26p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975); Not available in hard copy due to marginal reproducibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—Achievement, \*Instructional Programs, Intelligence, \*Learning, Post Testing, Research Projects, \*Retention Studies, \*Skill Development, \*Study Skills

The present study sought to discover the effects on delayed retention of two different degrees of quality of initial instruction for two different amounts of learning time; which combination of quality and time is most likely to be achieved in normal school situations; and the implications for those who design instructional materials. Two programed texts, one superior to the other in the quality of produced level of initial learning, were prepared and administered to 120 high school seniors randomly assigned to one of four equal-sized treatment groups, in combination with each of two differing amounts of learning time. An immediate posttest and a delayed retention test were administered. Parametric and nonparametric statistical tests yielded the following results: (1) an increased amount of study time promoted differing levels of achievement in delayed retention; (2) existing differences among groups could be attributed to effects of differing quality of instructional levels and/or amount of initial learning; and (3) no interaction effects were significant. Limitations of the study are delineated. (Author/SE)

**Helping Roles in School Systems: Counselors as Maintainers of the Status Quo.**

Pub Date [74]

Note—21p.; Paper presented at the Annual Meeting of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Clinical Diagnosis, \*Counselor Functions, \*Counselor Role, Environmental Influences, Helping Relationship, Models, \*Role Perception, \*School Environment, Social Factors, Surveys

Most counselors adopt a "clinical" role as opposed to an "environmental" one, seeking to make the individual adjust to existing social and educational conditions rather than trying to bring various aspects of the organization or social system into harmony with each other and with individual needs. To find out which role is actually adopted by counselors, the author sent questionnaires to 108 counselors in rural, urban, and suburban areas, and held extensive interviews with a subsample of 12 counselors. Items adjudged clinical received the three highest rankings, while the two most environmentally oriented items were ranked next to the bottom of the scale. The interview results indicated that the group considered the clinical role more appropriate than the environmental one. Counselors enjoy and feel more confident in the role of the clinician; moreover, counselors' perceptions of the expectations of

others in the school, with the exception of students, also appear distinctly clinical. The author concludes that counselors are operating within a model that protects the status quo, fails to address change, and depends for its continuance on advocacy of the currently existing school system. (SE)

**A Conceptual Model for Home-School Consultation.**

Pub Date [74]

Note—18p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Behavioral Objectives, \*Conceptual Schemes, \*Consultants, \*Family School Relationship, Models, \*Parent Participation, Referral, Student Teacher Relationship, \*Teacher Participation

Because of the need for trained personnel to help people cope with their problems, the focus must shift from training persons who give direct services to training persons who function as consultants. The consultant works with a consultee (who is often a parent or a teacher) to help a third party (who is often a client). The author presents a conceptual mode to describe the functions of a consultant. The first stage involves the request for consultation during which the consultant acquires important information regarding the nature of a client's problems, environments and abilities. The second stage identifies the problem behavior, and observes or assesses client behavior. Factors which are maintaining the client's undesirable behavior are identified to determine whether the client requires referral. If not, consultant and consultee agree on the desired behavioral changes to be initiated. If the consultant judges that the consultee is capable of helping the client change his behavior, then he trains the consultee to implement specific recommendations to initiate positive change in the client. Finally, an evaluation of the effectiveness of the procedure is made. (SE)

This evaluative report includes a brief description of the project, the identification of the program objectives (product and process) for the year involved, and the process evaluation findings concerning the elementary, middle and junior high school components, and concludes with observations on the extent to which the program has fulfilled the stated objectives, making several recommendations for the future. The major observation is that the project has progressed on schedule, moving in the direction of the established goals for the elementary and middle school components but not for the senior high school component. Two of the many recommendations include: providing a periodic program of inservice teacher education to allow for exchange of ideas, teaching strategies and resources; and initiating plans for the final year to institutionalize favorable aspects of the project. Identifiers—\*Reaction Time Recognition Memory Paradigm

A major contribution of information-processing theory to the psychology of remembering is the concept of memory or information retrieval. Several theories of the fact retrieval processes of the human memory, which constitute a substrate for any cognitive ability requiring stored information, have drawn heavily on certain data processing constructs. This document is organized into three sections: (1) a definition of human fact retrieval and its implications for experimental investigations of memory, (2) theoretical constructs that have been used to formulate models of fact retrieval, and (3) the possible roles of temporal information and cues in experimental procedures for investigating human fact retrieval. The document considers the strengths and weaknesses of the current theoretical approach to memory that emphasizes the micro-processes and micro-structures. This approach is somewhat unique in its use of quantitative differences, as opposed to qualitative orderings, to resolve theoretical issues. The authors stress the influence of contextual cues on the fact retrieval process as well as problems related to complexity of research design, and conclude that it is not yet possible to design a single successful model of human fact retrieval. Descriptors—\*Learning, \*Reading Comprehension, Reading Research, Reading Speed, \*Recall (Psychological), Retention, Secondary Education

This study explored the effects of different sentence conditions upon reading comprehension as evidenced by reading rate and recall taken at various times. Thirty-two subjects from a California high school representing four sex-by-ability groups, read experimental material on a table-top programmer while being timed. Recall responses were recorded on a cassette tape recorder. Experimental conditions of the trials varied by size of presentation, sentence by sentence or block of three sentences; type of passages, paragraph or unrelated sentences; order of input, logical or scrambled; and recall condition, immediate recall or no immediate recall. Some of the results showed that rate significantly increased in both sentence by sentence reading and immediate recall conditions. Scrambling the order of related sentences increased the time taken to read the material. The more able readers recalled more than the average-ability readers. Sentence by sentence readings significantly increased the number of correct responses. Immediate recall was an important variable, increasing total production, types of responses within and across test points, and amount of recall between test points. Unrelated sentences were remembered more accurately than related ones. (MKM)

# Secondary Education, Study Skills, Teacher Education

A course for teaching reading in the secondary school, designed for teachers both with or without previous study in the teaching of reading, is presented in outline form. The course is divided into the following five sections: reading perspectives or theory, secondary programs, assessment, classroom organization, and content-specific proficiencies. Each section contains an introduction and list of goals, tasks or assignments, and suggested instructional resources. Alternative assignments are given, based on the experience of the teacher. Field experiences are required. (MKM)

Descriptors—\*Auditory Perception, Auditory Visual Tests, \*Decoding (Reading), Educational Research, Elementary Education, Learning Disabilities, \*Listening Comprehension, \*Reading Comprehension, Reading Skills, \*Visual Literacy

This paper reports the outcomes of a correlational study that examined the relationships between visual and auditory perceptual skills, on the one hand, and comprehension that is independent of decoding, on the other. Five sets of test scores—a visual perceptual test (Coloured Progressive Matrices), an auditory perceptual test (Auditory Motor Placement), a listening and reading comprehension test (Durrell Listening-Reading Series), and a single word decoding test (Word Recognition subtest; Diagnostic Reading Scales)—were compared. The resulting correlation coefficients showed a highly significant relationship between visual perceptual skills and listening comprehension, and visual perceptual skills and reading comprehension when the effect of decoding skills was controlled. Auditory perceptual skills were more closely related to reading comprehension than to listening comprehension. It is suggested that although decoding skills explain much of the variance in reading comprehension, visual perceptual skills also contribute to the explanation of this variance. (Author)

Identifiers—\*Reflection Impulsivity

The literature on performance differences in various tasks as a function of reflection-impulsivity (R-I) is reviewed in this publication. A series of four experiments is then described which involve the cognitive-perceptual basis of R-I of children on a picture recognition memory task. Results from these studies indicated the following important, but tentative, conclusions about the process of picture recognition memory and the underlying perceptual basis of the R-I dimension in children: reflective and impulsive children differ in their propensity to engage in a detailed visual feature analysis of stimulus arrays; the process of visual feature analysis is perhaps the most important component in the underlying

basis of R-I; strong inferential evidence was provided that picture recognition memory is primarily a process of visual feature analysis in which the role of verbal labels is minimal and indirect; recognition memory performance is susceptible to differential instructions which emphasize care versus quickness; recognition memory for pictures appears to increase over the elementary school years; and the Selfridge-Neisser model and the recognition paradigm are useful for future research. It was suggested that future research should be performed in this area. (Author/RB)

This book brings together papers presented at a conference on early experience and visual information processing in perceptual and reading disorders sponsored by the National Academy of Sciences. The goal of the conference was to integrate basic knowledge of structure and mechanisms of eye and brain with their function and their behavioral roles in perception, with the focus on underlying factors that may contribute to reading disorders. The first section discusses topics related to the role of the visual system: optical and oculomotor, retinal, and central neural factors. The second section discusses attentional and perceptual mechanisms. The third section discusses early experience and learning in visual information processing. The fourth section discusses the role of information processing in perceptual and reading disabilities. The fifth and final section discusses management of children with perceptual and reading disabilities. The introduction is written by Donald Lindsley and Francis Young. Individual papers are written by such authors as Jeanne Chall, Robert Boynton, Robert Doty, Roger Sperry, Richard Jung, George Sperling, Ira Hirsh, Merton Flom, William Mason, Robert Fantz, and H. Burt Richardson, Jr. (TS)

Identifiers—Missouri

An instrument was designed to allow respondents to freely express their opinions concerning the major learning problems of students in the public schools, the quality and nature of their teacher education programs, and their retrospective views of courses which would have met their needs better than the ones which were taken. The instrument used to collect the data was an open-ended opinionnaire which was distributed to all public school administrative units within a 24-county area of southwest Missouri. Administrators were requested to distribute the instrument to faculty members and to some students as well. The 158 respondents indicated, among other things, that their preparation was not adequate for teaching the expressive and receptive communication skills, for teaching children appropriate questioning skills, for matching materials with children's reading levels, or for organizing class-

rooms for instruction in reading. Other conclusions drawn from this questionnaire are discussed and specific recommendations are made. (TS)

Descriptors—\*Childrens Books, \*Childrens Literature, Cloze Procedure, Individual Reading, \*Measurement Instruments, Primary Education, \*Readability, Reading Comprehension, \*Reading Level, Reading Materials, Reading Material Selection, Reading Skills

In order to utilize interesting children's trade books in a systematic reading program, two readability formulas were devised based on a selection of children's trade books. Children's scores on selections from these books and judges' rankings were compared. The judges' decisions were considered to be highly credible and were used as the criterion measure. Correlations are reported between 23 textual variables and the criterion. Two readability formulas based on these variables are discussed: one based on a regression analysis that included publisher and linguistic variables (Formula P) and one that included only the linguistic variables (Formula L). Formula P uses words per page and impersonal pronouns plus third person personal pronouns per sentence in the regression equation and correlates .819 with the judges' summed rankings on 50 books. Formula L uses words over seven letters long per sentence and impersonal pronouns plus third person personal pronouns per sentence in the regression equation and correlates .718 with reading difficulty as determined by judges' rankings on 50 books. The books used are listed by title and author, and the judges summed rankings and the regression formulae rankings are given. Grade level scores were not considered appropriate to be assigned. (MKM)

**The Relationship between Representational Competence and Achievement in Beginning Reading.**

Pub Date 75

Note—6p.; Paper presented at the Annual Meeting of the International Reading Association (20th, New York City, May 13-16, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Beginning Reading, Grade 1, Primary Education, Reading Achievement, Reading Comprehension, \*Reading Difficulty, \*Reading Instruction, Reading Research, \*Reading Skills

The purpose of this paper was to test the hypothesis set forth by Farnham-Diggory (1967)

and Denner (1970) that problem readers lack representational and syntactic competence. A random sample of 72 first graders, stratified by sex and social class, was given the Gates-MacGinitie Reading Test and the Farnham-Diggory tasks. An analysis of variance showed no significant differences between sexes and social classes on the Farnham-Diggory tasks. Low, although significant, correlations were found between symbol synthesis scores and scores on the reading achievement test. These results were in contrast to Denner's findings of a deficit in a group of first grade problem readers who had been selected and classified by their teachers rather than randomly chosen. The results failed to support strongly the hypothesis of an important relationship between representational and syntactic competence, as measured by the Farnham-Diggory tasks, and achievement in beginning reading. Identifiers—\*Japan

"A Psychological Study of Flexibility in Reading," the first in this collection of four articles, attempted to determine how flexibility in reading develops from elementary to junior high school. The results indicated that children in every grade in this experiment were flexible in reading, that is, they changed their speed of reading according to the reading materials. The "Developmental Study on the Difficulty Factors in Reading Kanji" concluded that the complexity of characters had no effect on the reading of Kanji, the frequency of Kanji was one of the significant factors which affected reading, and the familiarity of words in which Kanji characters were used was the most predominant factor in reading. The purpose of the third article, "A Yardstick for Readability," was to develop an objective method to assess the readability of Japanese sentences. "A Developmental Study of Reading Rate" determined that the speed of reading, given appropriate materials, was not the same for grades 2-9 and that there was a consistent increase in the rates of reading from grades 3-5. Furthermore, the accuracy of reading differed between schools. (LL)

Descriptors—\*Associative Learning, Educational Research, \*Memory, \*Recall (Psychological), \*Recognition, Verbal Learning, \*Word Recognition

If a series of verbal units is presented for study, and if a unit occurs two or more times in the series, the practice schedule for these multiple occurrences may be massed or distributed. In massed practice (MP) the item occupies adjacent positions; in distributed practice (DP) successive occurrences are separated by at least one other unit. The spacing effect, or the MP-DP effect, refers to better recall following DP schedules than following MP schedules. Four studies discussed in this report examined the spacing effect in four quite different situations: recognition of letters, verbal discrimination, short free recall lists, and recall of MP items presented twice with an intervening interval inserted to produce forgetting. MP-DP differences were found in all studies. Of particular interest were three interactions; subjects with a low criterion of responding in the letter study lost the MP-DP effect over a 30-second delay, and subjects with a high

criterion did not; a clear MP-DP effect, but no lag effect, was found only with unmixed verbal discrimination lists; and in free recall a sharp lag effect was shown for words presented three times but not for words presented twice. (Author/LL)

Descriptors—\*Association (Psychological), Cognitive Processes, Educational Research, \*Memory, \*Paired Associate Learning, \*Recall (Psychological), Recognition, Verbal Learning, \*Word Recognition

The purpose of these studies was to test a theory of associative context (defined as the association between two words in a pair) on recognition memory. The theory states that culturally associated words in a pair and nonassociated words in a pair differ after a single study trial in terms of their frequency representation in memory. Two experiments were required to show that the use of mixed lists of associated and nonassociated pairs was not the appropriate way to study the effect of associative context on recognition memory. The third experiment provided no support for the theory. Recognition of associated and nonassociated pairs did not differ appreciably. The loss in recognition performance for single words taken from study pairs was the same for associated and for nonassociated pairs. Frequency judgments paralleled the results for recognition decisions in most aspects of the data. It was concluded that associative context, specified in terms of the strength of the association between two words in a pair, is not a critical factor in recognition performance. (Author)

Descriptors—\*Cognitive Processes, Higher Education, Memory, \*Phonetics, Reading Research, \*Recall (Psychological), \*Syllables, Visual Discrimination, Visual Perception, \*Word Recognition

In an earlier study, subjects who were shown the two words "inside" and "consult" at two different points in a study list of two syllable words were willing to accept the word "insult" as having been on the study list. It was concluded that each syllable had a representation in memory over and beyond the semantic factors which are normally represented with words. The two experiments described in the present study take the theoretical position that the syllable was represented in memory as a visual-phonetic-articulatory frequency unit. In the first experiment, two independent words were presented for study with varying lags, the test being for the two words having meaning as a pair. In the other, elements of compound words were presented separately with the test being on the compound word. The subjects had to decide whether the two words had or had not been presented together on the study trial. The original position, that the syllables were represented in memory as a visual-phonetic-articulatory-frequency unit, was supported. (TS)

The role of information-processing task analysis in linking psychological theory to instructional practice is illustrated with reference to reading. Two detailed information-processing models of decoding skills are compared to show how psychological considerations suggest the superiority of one model over the other as a basis for instruction. Procedures for teaching the superior model are examined and related to general principles of instructional design, and examples of research questions generated by instructional practice are discussed. A final section considers the role of task analysis in bringing psychological theory to bear on instruction in the complex skill of reading comprehension. A general map of the domain of reading comprehension is proposed and consideration given its implications for both research and instruction. (Author)

Identifiers—Elementary Secondary Education Act Title III, ESEA Title III

The purpose of the program described in this report was to improve reading and other basic skills of third- and sixth-grade children by providing a program in which sixth-grade children tutored third-grade children. Three classrooms of third-grade children and three classrooms of sixth-grade children were involved in this endeavor over a three-year period of time. During the first two years of the project, there were minimal reading score gains. During the final year of the project it was shown that more than half of the children in each grade gained more than they had the preceding year. Some of the other

findings were that teachers participated in inservice programs extensively, developed and modified units of instruction, and utilized a variety of major curriculum systems. Attendance rose in the entire school during the three years. Research skills showed only minimal gains on a standardized test. A test of children's attitudes indicated that they liked each other and liked what they were doing. Teachers indicated positive feelings about themselves and the program. (MKM)

Identifiers—Florida

This report recommends that an annual report be made to the citizens of Florida about the state of literacy in Florida. The concept of literacy is defined in terms of levels of literacy and basic skills required to achieve the different levels. A review of the literature on literacy is the basis for three suggested levels of literacy: (1) pre-literacy, composed of skills which are still unstable and transient and which allow a person to complete the tasks demanded by society in its elementary schools; (2) basic literacy, composed of stable skills measurable at a grade level of approximately 5.5; and (3) career literacy, composed of occupationally specific skills and functional and survival skills and measurable at a grade level of approximately 7.5. Since work is one of the primary functions of being an independent contributing member of society, career literacy is considered necessary for a person to become minimally literate. The basic skills are those language and computational processes essential for literacy and upon which further learning depends. It is recommended that a statewide criterion assessment device be constructed to identify the essential tasks which need to be accomplished in each skill area. (MKM)

Note—13p.; Not available in hard copy due to marginal legibility of original document due to colored paper

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—\*Beginning Reading, \*Parent Role, Phonics, \*Preschool Education, Reading Development, \*Reading Games, Vocabulary Development, \*Word Recognition

This pamphlet suggests methods of teaching beginning reading using word cards, stories written by a parent, and phonics games. Activities using word cards include writing the name of a person or object on the card and helping the child associate that card directly with the person or object. Stories written by parents usually feature the children and relatives or friends of the children. Only a minimal vocabulary of nouns and action verbs was necessary in understanding these stories. Phonics games attempt to associate letters with their sounds and can be played with word cards and stories. (LL)

Descriptors—Elementary Education, Field Studies, \*Instructional Design, Instructional Programs, \*Language Development, \*Reading Instruction, \*Reading Skills, Research Methodology, Teaching Methods  
Identifiers—\*Wisconsin Design for Reading Skill Development

This study of the self-directed, interpretive, and creative reading elements of the Wisconsin Design for Reading Skill Development was conducted to gather descriptive data about implementation strategies being developed and practiced by field test teachers and to gather evaluative information about the usability of various management and instructional materials provided in the program. Questionnaires and telephone interviews were employed to collect information from one Colorado and two Wisconsin elementary schools involved in the field test. The most significant outcome of the study was the confirmation that systematic exposure of students to self-directed, interpretive, and creative reading skills did increase their awareness of and involvement in those areas of reading. In addition, the teachers demonstrated a positive attitude toward the program's organized approach to instruction. (Author/RB)

Descriptors—Evaluation Methods, Language Development, \*Reading Ability, Reading Development, Reading Research, \*Reading Skills, Research Design, Research Methodology, \*Teacher Motivation, \*Word Study Skills

This report summarizes information regarding populations, methods, evaluation and instructional materials, analyses, and results from three doctoral dissertations that used the Word Attack component of the Wisconsin Design for Reading Skill Development as an instructional and assessment instrument. The first study investigated the assumption that mastery of essential word attack subskills results in functional word attack ability. The second study investigated the degree to which first-grade subjects retained reading ability over summer vacation. Reading ability was measured by both norm-referenced and criterion-referenced tests. The third study investigated the effects on selected teachers of three motivational treatments: (1) pupil reading achievement moni-

tored without feedback to teachers, (2) social incentives given to teachers, and (3) monetary incentives given to teachers. Measures of effect were gain scores on the Wisconsin Tests of Reading Skill Development: Word Attack and staff teachers' perceptions of selected interpersonal variables. (Author/RB)

Descriptors—\*Child Language, \*Cognitive Processes, \*Discrimination Learning, Educational Research, Intermediate Grades, Language Development, Language Usage, \*Verbal Development, \*Verbal Learning  
Identifiers—\*Rehearsal Strategy

This study incorporated a correlational methodology into an experimental context to determine the functional components of rehearsal strategies in children's discrimination learning. The subjects for this study were 120 fifth- and sixth-grade children attending two elementary schools located in middle-class areas of Ogden, Utah. According to the frequency theory, successful performance on a visual discrimination task is attributed to subjective frequency discriminations learned prior to or during the task. It was hypothesized in this study that when a rehearsal strategy is added to the verbal discrimination task, attributes other than frequency may be called into play. The results of the present experiment now make it clear that when a rehearsal strategy (of the kind employed here) is applied to a verbal discrimination list, the task appears no longer to involve frequency discriminations, as it does when a rehearsal strategy is not applied. (RB)

Identifiers—\*Israel

Tests for prereading skills of Israeli kindergarten children were developed and tested on a wide range of socioeconomic levels. Based on studies in the United States and Israel, tests were developed for letter matching, rhyming, sound matching, and letter recognition. Results from 178 kindergarten children led to a division of the letter matching test into two separate tests, one for testing attention to letter order and one for testing attention to word detail. A second set of tests was then developed, based on the most reliable items from the first set of tests. These tests included rhyming, sound matching, letter order, and word detail. Data on the tests from 94 subjects in four lower-middle socioeconomic status (SES) kindergartens showed reliable results; however, a few low reliability items were scheduled for replacement in the next test revision. Finally, a test was developed for assessing knowledge of propositions at the kindergarten level and was administered with children from four levels. Differences in test scores were found between the three highest groups and the lowest group, but problems were also revealed in the test itself. (Author/RB)

**Identifiers**—\*Prereading Skills Program

This report documents the 1972-73 field test of teacher training techniques for the Prereading Skills Program. The program is a kindergarten-level instructional program designed to prepare children for beginning reading instruction. Four teachers in three Wisconsin schools participated in the field test of teacher training techniques. Fourteen teachers in schools where the Prereading Skills Program had been used during the 1971-72 school year provided evaluative information on program materials and activities. The teacher training evaluated in the field test took the form of workshops. Information relating to the effectiveness of the teacher training workshops was gathered by means of questionnaires, observations, and interviews. Analysis of the data indicated that teachers would be able to implement the Prereading Skills Program after less extensive workshops or perhaps without any workshops at all, provided that supplementary information on the use of specific components was included in the teacher materials. After further revision, the Prereading Skills Program will be used again by teachers who used the 1971-72 and 1972-73 field test editions. (Author/RB)

**Descriptors**—Grade 5, Intermediate Grades, \*Language Experience Approach, \*Program Evaluation, \*Reading Improvement, \*Reading Instruction, \*Reading Programs, Reading Research, Reading Skills, Remedial Reading

A language program was developed which was based on three areas of psycholinguistic abilities associated with auditory processes. The major aim of this study was to test the effect of this specially devised program on reading competence. Another aim was to test the effect of the program on reading attitude and spelling competence. Fifth grade children in two regular primary schools formed the sample. In one of the schools, average to above average readers were studied, while in the other school, average to below average readers were studied. It is concluded that (1) reading competence is influenced by primary language competence; (2) a remedial program in primary school reading is more effective if it includes language activities based on the auditory vocal aspects of primary language; (3) additional reading will not help children in the regular primary school who read below their chronological age; (4) the experimental group which made significant gains did so in the comparatively short time of seven weeks; and (5) spelling ability and reading attitude were not significantly changed by the oral language program during the seven weeks the program was in operation. (RB)

**Descriptors**—Aural Learning, \*Cognitive Processes, \*Grammar, Higher Education, Listening Comprehension, \*Memory, \*Narration, Oral Communication, \*Recall (Psychological), Retention Studies, Sentence Structure, Tape Recordings

This study examines recall of narrative prose for evidence of underlying structures such as the grammar used in the story's sentence structure. Subjects listened to repeated presentations of a tape recording of two pages from a history book, with verbals collected after each presentation. The subjects used in this experiment were 13 undergraduate students at the University of California, San Diego, who volunteered for the experiment in return for class credit or payment. The results show that serial structures and story grammar structure are important factors in the memory and recall of narrative passages. (Author/RB)

**The Development and Implementation of a Tutorial Program for Parents to Improve the Reading and Mathematics Achievement of Their Children.**

Pub Date Jun 75

Note—133p.; Maxi II Practicum, Submitted in partial fulfillment of requirements for D.Ed., Nova University

**EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage**

**Descriptors**—Academic Achievement, Educational Research, Elementary Education, \*Mathematics Instruction, \*Parent Education, \*Parent Participation, Parent Student Relationship, Program Development, \*Reading Instruction, \*Tutorial Programs

The purpose of the partium described in this paper was to teach parents tutoring skills so that they could help raise their children's academic achievement in reading and mathematics. The pupils and parents in the project represented a tri-ethnic population of blacks, whites, and Spanish surnamed. The practicum consisted of training 50 parents in reading and mathematics, two hours a week for 15 weeks, to tutor their children at home. The children of these parents were the experimental group. A group of 50 pupils whose parents were not trained in the tutoring sessions were used as the control group. Relevant data gathered during the study tends to support the two major hypotheses that, given the training program for parents, the students in the experimental group would show a significant increase in achievement over the students in the control group and the parents in the experimental group would evidence a more positive attitude toward the school. Both hypotheses were accepted with significance at the .001 level. (Author/RB)

**Document Not Available from EDRS**

**Descriptors**—Developmental Reading, Elementary Education, Q Sort, \*Reading Instruction, Reading Research, Remedial Reading, \*Role Perception, \*School Personnel, Teacher Attitudes

**Identifiers**—\*Reading Specialists

The purpose of this study was to identify and compare concepts of the ideal role and functions with the actual role and functions of the reading specialist. The public elementary reading specialists, classroom teachers, principals, and reading supervisors of Franklin County, Ohio, served as subjects. A Q-sort instrument was used for gathering the data for the study. Reading supervisors (coordinators) were less satisfied with the remedial or special reading programs in which they worked than were the other three groups; principals were more satisfied with the remedial or special reading programs than were the other three groups of participants in the study. Forty-two percent of the classroom teachers said that their understanding of the reading program in their building was less than "good." The investigator concluded that the role of reading specialists participating in the study is generally com-

patible with current authoritative opinion in the field and can be expected to result in increased reading achievement among the pupils enrolled in these programs. (Author/RB)

**Identifiers**—\*Picture Books

This investigation attempted to determine the feasibility of using selected wordless picture books and non-narrated films to facilitate reading achievement. The participating students transcribed oral language and written language about various aspects of the wordless picture books, and non-narrated films were used as the bases for reading experiences and the development of the students' reading abilities. Twenty fourth grade students were identified for participation in this study based on an IQ score of 90 or higher and a score on the reading test which indicated that the student was at least a year or more behind his ability level as calculated through the Bond-Tinker Expectancy formula. The study was a one group pretest posttest-design, using alternate forms of the California Reading Test. The results indicated (1) significant growth in reading vocabulary, comprehension, and total reading scores; (2) growth in oral language facility; and (3) significant growth in written language facility. No significant change in students' attitudes toward reading was revealed. (Author/LL)

This report describes a study of how maps are learned. Subjects (undergraduate students at the University of California) studied a simple map under various conditions and then answered questions about the map and drew the map from memory. It was found that local relations are learned before large-scale relations, that different types of map information must be presented simultaneously for effective integration, and that reading a story relevant to the map is more helpful in remembering the map than spending the same amount of time copying the map. Designed for use primarily by students, teachers, and media specialists, this book discusses the relationship between developmental

stages of children's growth and the literature that young people find relevant at various stages of their growth. Part 1 "Young People and Their Books," discusses literature and the nature of the child, the nature of the child, and developing creative responses through the literary encounter. Part 2, "The Developmental Years: Extending the Literary Encounter," contains chapters devoted to book selection and literature in the preschool, early school, middle school, and early and later adolescent years. Four appendixes provide lists of suggestions for the sharing of and responding to literature, book selection aids (annotated), graphic and literary award winning titles, and publishers of children's and adolescent literature. Subject, author, illustrator, and title indexes are also included. (LL)

Descriptors—\*Class Activities, Elementary Secondary Education, \*Individualized Instruction, \*Instructional Materials, Language Arts, Language Development, Learning Activities, Reading Games, \*Reading Instruction, \*Reading Skills

Four hundred and forty reading activities, organized in five sections for easy retrieval by the teacher, are contained in this supplementary manual for use in reading courses and learning laboratories. Section 1 presents a rationale for individualized diagnostic-prescriptive reading instruction and procedures for making it possible. Section 2 is devoted to reading readiness activities, and subsections are included on visual discrimination, auditory discrimination, alphabet knowledge, vocabulary for reading, and following directions. Section 3 consists of activities for basic reading skills, and includes subsections on sight vocabulary, grapheme-phoneme relationships, word structure, easy things to read, and remediation of specific difficulties. Section 4 is devoted to advanced reading skills, although many of the activities may be used with younger or less able students. Section 5 consists mainly of an annotated listing of books and published materials to be used by children and closes with a brief list of reference materials for the classroom teacher. (RB)

Document Not Available from EDRS

Descriptors—Doctoral Theses, Emotionally Disturbed Children, \*Oral Reading, \*Positive Reinforcement, Reading Achievement, Reading Improvement, Reading Instruction, \*Reading Research, \*Reading Speed, Teacher Influence, \*Teacher Response

This study was designed to determine the effects of two teacher responses on rate of oral reading. The teacher responses were the simple response of correcting a mispronounced word and the response of praise contingent on correct reading while ignoring all errors. The subjects were four boys ranging in age from nine to twelve from a residential treatment facility for emotionally disturbed children, all of whom were below grade level in reading achievement. Data were collected on word recognition responses and correct and error rates in oral reading, as well as on teacher responses in both word recognition and oral reading. The conclusion was that the teacher response of ignoring errors completely and making reinforcement contingent on correct oral reading results in a higher correct rate per minute in oral reading than does the teacher response of correcting a mispronounced word or telling a word the reader does not know. The two teacher responses may or may not have an effect on the child's error rate per minute. (Author/LL)

**The Relationship Between Written Syntactic Attainment and Reading Ability in Seventh Grade.**

Pub Date 75

Note—234p.; Ph.D. Dissertation, University of Pittsburgh

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-22,449, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, Junior High Schools, \*Reading Achievement, \*Reading Instruction, Reading Processes, \*Reading Research, Secondary Education, \*Syntax, Writing Skills

This study was designed to investigate the relationship between reading achievement and syntactic attainment. Two measures were used to provide the data: the Gates MacGinitie Reading Test, Survey E, and the Sentence Construction Test, Level E. The measures of reading and syntax were administered to 96 seventh-grade students in two suburban junior high schools in southwestern Pennsylvania. Correlations between the reading variables and sentence construction subtests were calculated and additional information was found by correlating each of the syntactic behaviors with reading comprehension, vocabulary, and speed. The findings of this study showed a close and reliable relationship between reading achievement and written syntactic attainment. Considering the syntactic complexity of junior and senior high school reading materials, it is recommended that the function of syntax in reading be given more emphasis. (Author/TS)

Descriptors—\*Beginning Reading, Doctoral Theses, Grade 1, Language Usage, Oral Communication, Oral Expression, Primary Education, \*Readability, \*Reading Materials, Reading Research, \*Standard Spoken Usage, Syntax, \*Textbooks

Identifiers—\*Developmental Sentence Scoring

This study was designed to determine whether the content of selected beginning reading textbooks is comparable in syntactic complexity to the oral language of normal first-grade children and whether there was a predictable progression of syntactic complexity within the textbooks examined. The ten samples were taken from the primary levels of the MacMillan Reading Series, designed for average readers, and eight samples from comparable levels of The Open Highways Series (Scott, Foresman and Co.), designed for "slow starters." Each of the 18 samples consisted of 50 consecutive sentences. The textbook samples were scored according to Developmental Sentence Scoring procedure. Examination revealed an irregular and unpredictable progression of difficulty in both series. It was concluded that the syntactic programing in the textbooks examined is not consistent with the order of syntax acquisition in the oral language of first grade children, although sample mean scores for both series were comparable to, or lower than, oral language mean scores for six-year-olds in the normative populations. Descriptors—\*Creative Dramatics, \*Drama, Dramatic Play, Elementary Education, Instructional Materials, \*Learning Activities, Play Therapy, \*Role Playing, Teaching Guides, Teaching Methods, \*Therapeutic Environment

The primary purpose of this book is to provide a practical working handbook for teachers and therapists. Chapter one is a general discussion of drama, with emphasis on its relevance to therapeutic work. Chapter two offers practical suggestions for starting a therapeutic session and for creating and extending specific environments. Chapter three explores drama with immigrants of all ages. Chapter four discusses drama and the slow-learning child, while chapter five discusses drama with the disturbed, maladjusted, or psychotic child. Chapter six focuses on drama with the physically handicapped, and chapter seven focuses on drama with the severely handicapped. Chapters eight, nine, and ten discuss drama with adults, frequent problems with therapeutic sessions, and psychodrama and role playing. Chapter eleven offers further practical suggestions for remedial drama, and chapter twelve gives specific warnings and suggestions for teachers. (TS)

Descriptors—\*English Curriculum, \*Evaluation Methods, \*Language Arts, \*Models, \*Program Evaluation, Secondary Education

This paper describes a language arts program assessment project in the Seattle schools. Among the topics discussed are the following: the history of the project; developing and implementing the model; a description of the model; relating goals, objectives, and instruments; observations from project participants; and the project critique. While the model described in this document was developed for use within an English department, the model may be found useful in other situations. The evaluators structured the model in general terms so that, with a few modifications, it might be used by either a school department, a grade level, a total school program, or a school district program. Twelve appendices include such items as instruments for evaluating attitudes toward teacher-identified skills and attitudes toward student-identified skills, and questionnaires about employer priorities, parent priorities, and college priorities. **A Comparison of Four Oral Language Elicitation Probes as Used with Kindergarten, First-Grade and Second-Grade Children.**

Pub Date 75

Note—13p.; Paper presented at the Annual Conference of the Midwest Association for the Education of Young Children, Madison, Wisconsin, April 18, 1975

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Child Language, \*Comparative Analysis, Early Childhood Education, \*Language Development, Language Research, Language Skills, \*Language Usage, Linguistic Performance, Oral Communication, \*Oral Expression

The purpose of this study was to investigate differences among four oral language elicitation probes used to collect language samples from young children. Ten kindergarten, ten first-grade, and ten second-grade children provided the oral language samples. Each class was divided by sex, and five boys and five girls from each grade were randomly selected to comprise the total sample for that grade. The results of this study contradict the belief that elicitation procedures used to obtain oral language samples are variables which influence the quantity of the verbal response. By using any or all of the probes reported in this study, it appears possible to evaluate the child's oral language on the variables identified and to use the samples in further analyses of syntactic and semantic diversity, both of which contribute to oral language complexity. **Assessing English and Language Arts Teachers' Attitudes toward Writers and Writing.**

Pub Date 75

Note—15p.; Paper presented at the Annual Conference of the New York State English Council (25th, Buffalo, October 9-11, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Changing Attitudes, Class Attitudes, \*Composition (Literary), Creative Writing, Educational Research, English Instruction, Evaluation Methods, Language Arts, \*Measurement Instruments, Student Attitudes, \*Teacher Attitudes, Writing Skills

Identifiers—\*Attitude Assessment

The thesis of this paper is that if English and language arts teachers will examine their attitudes toward writers and writing, and compare their attitudes with those held by successful writers, they may come to hold a more realistic idea of what the process of writing is like. An attitude scale dealing with writers and writing was administered to 23 graduate students who were all experienced teachers at the beginning of a five-week summer session course on teaching written composition. The scale included 40 items under three major categories: skills of writing, varieties of writing, and different kinds of writers. At the conclusion of the course, the attitude scale was again administered to the teachers. From the data it was concluded that, on the average, these teachers changed their attitudes toward writing and writers. (TS)

**Creativity and Innovation in Child Language.**

Pub Date Apr 75

Note—18p.; Paper presented at the Annual Meeting of the National Conference on the Language Arts in the Elementary School (7th, Boston, April 11-13, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Childhood Interests, \*Child Language, \*Creativity, \*Early Childhood Education, \*Language Development, \*Language Instruction, Language Learning Levels, Language Patterns, Reading Processes, Spelling, Writing

This paper discusses the nature of language knowledge and the manner in which children come to acquire this knowledge. Among the topics discussed are language production and the ability to understand sentences never heard before, sentence formation, children's construction of rules, children's language creativity, language acquisition and age, children's linguistic progress, reading exposure, children's early writing, and children and spelling. Following the discussion of these topics, it is suggested that children be introduced to the written word through writing other than reading. If children spell creatively for a period of time before being expected to read, they gain active experience in the principles of alphabetic representation. Written language from the start is systematic and accessible to children, and they can take an active role in dealing with it. Teachers should direct their efforts toward providing an environment in which children's natural language creativity can flourish. (TS)

Document Not Available from EDRS

Descriptors—Cognitive Ability, Doctoral Theses, \*Figurative Language, \*Imagery, Language Research, \*Poetry, Recall (Psychological), Secondary Education, \*Symbols (Literary), Thought Processes, \*Visualization

This study is designed to investigate the relationship between the extent of visualization of poetically elicited mental images (V) and five other variables involved in response to poetry: extent of verbal interpretation of the meaning of poetry; extent of recall of poetry; accuracy of recall of poetry; extent of liking of poetry; and level of abstraction of verbal interpretation of the meaning of poetry. To this end an instrument was designed to operationalize these variables as responses to four imagistic poems. The instrument was administered to 194 tenth, eleventh, and twelfth grade students of low, average, and high academic ability. The results of this study lead to the conclusion that V is an important

variable in the more abstract functions of poetic interpretation as well as in affective response. Further, support is lent to the theory that mental imagery can function as a symbolic agent of cognition and that this function can be enhanced with increasing clarity of visualization. (Author/LL)

**Ownership versus Developmental News Content: An Analysis of Independent and Conglomerate Newspapers of India.**

Pub Date 75

Note—29p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (Ottawa, Canada, August, 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Content Analysis, Developing Nations, Government Role, Higher Education, \*Journalism, Media Research, News Media, \*Newspapers, \*News Reporting

Identifiers—\*India, Ownership

This study examined one specific problem connected with the ownership and content of the Indian press: Is there any significant difference between independent newspapers and conglomerate-controlled newspapers in the quantities of developmental, governmental, and political news they present? The period of study was 1973, during which four daily newspapers representing three languages were examined. A sampling design was adapted for constructing an artificial year by taking the Monday of the first week of January, Tuesday of the second week of February, Wednesday of the third week of March, and so on through Saturday of the fourth week of December. The findings show that the four sample newspapers, irrespective of ownership, devote more area to governmental and political news than to developmental news, i.e., news that deals with economic, social, and technological progress in developing nations. But the independent newspapers contain more developmental than governmental or political news, while the conglomerates have more governmental than developmental or political news. (The results are presented in both table and narrative form.) (RB)

Design Trends in Editorial Presentation: A Survey of Business Communicators.

Pub Date 75

Note—29p.; Paper presented at the Annual Meeting of the Association for Education on Journalism (Ottawa, Canada, August 1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage  
Descriptors—\*Business Communication, Design, \*Editing, Higher Education, Information Dissemination, Journalism, \*Layout (Publications), \*National Surveys, Organizational Communication, \*Publications, Questionnaires

This study examines the design and editing procedures of business publications—publications for employees, stockholders, and combinations of these audiences. Following a review of the literature which turned up little information on business publications, it was decided that a mail questionnaire sent to a sample of business publication editors would be the best technique for obtaining information. Seventy-two percent of 439 randomly selected editors returned the questionnaires. The typical business publication today is an 8 1/2 by 11 inch magazine, 4 to 8 pages in length. The body within the typical publication is set in 10-point transitional type with one point of leading. Captions and headings are most frequently set in sans serif type and are 18 to 24 points in size. One-third of the printed matter in the typical publication is art; 80 to 90 percent is photography, and the remainder is predominantly line art. The numerous business publications appear in magazine, newspaper, and newsletter formats. (Additional information on the results of the study is presented in both a narrative and a table format.) (RB)

Preparing Students for Jobs: Managing and Writing for Specialized Magazines.

Pub Date 75

Note—9p.; Paper presented at the Annual Meeting of the Association for Education on Journalism (Ottawa, Canada, August 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—Audiences, \*Business Communication, \*Course Descriptions, Editing, Higher Education, Information Dissemination, \*Job Skills, \*Journalism, Periodicals, Publications, \*Technical Writing

In this paper, two magazine courses offered at Colorado State University as part of the Technical-Business Journalism concentration are described in terms of course content, class assignments, and course objectives. The course entitled "Writing for Specialized Audiences" assumes that the majority of magazines published today are edited for readers with specific informational needs. The objective of the course is to teach writers what is useful to readers in their business or activity in the shortest possible reading time. "Publication Management" is a course about the publishing business from the viewpoint of a publisher. The methods used in the course are to examine the purposes, problems, and operation of all facets of the publishing enterprise and to probe into such matters as advertising, circulation, editorials, promotions, production, research, and business office matters. The assignments given in each of the courses vary with the size of the course each semester. (RB)

Identifiers—Harmsworth (Alfred), \*Northcliffe (Lord)

This monograph examines the extent to which Lord Northcliffe, generally conceded to be the dominant force in the popularization of journalism in Britain and what was once the British Empire, influenced or was influenced by American developments in journalism. The first section, entitled "The Legacy," briefly reviews the popular press in England. The remaining sections of the monograph afford a biographical sketch of Lord Northcliffe and a discussion of his career, with emphasis given to his influence by and on American journalism at the beginning of the twentieth century. Identifiers—\*Press Criticism

This book examines the status of the press and the criticism surrounding it. Chapter 1 attempts to relate theories of criticism to the contemporary press, to define the public interest relative to the press, and to discuss the role of criticism and the social responsibility of the press. Chapter 2 presents a brief history of press criticism from its British origins to the present. Chapter 3 surveys various forms of press criticism and focuses primarily on experiments and applications in criticism and self-criticism. Chapter 4 is devoted to the consideration of reactions to proposals for a national press council and to the function and purposes of the several forms of national councils. In chapter 5, the reasons for necessitating press criticism are summarized and possible future developments are suggested. The appendixes include: codes of ethics, reports for a national press council, press council operating rules, a discussion of critical attitudes toward the media, two surveys on the image of the newspaper, and a consideration of newspapers' use of internal criticism. Descriptors—Classroom Arrangement, Classroom Games, Educational Games, Elementary Education, \*Individual Instruction, \*Individualized Instruction, Instructional Materials, \*Learning Activities, \*Writing Exercises, \*Writing Skills

This booklet is one in a series designed to bridge the gap between theory and practice by suggesting specific classroom activities based on current educational theory and research. Designed for elementary school teachers, it is divided into two sections. The first section discusses such topics as providing a healthy classroom environment for free expression; the various roles the teacher must play in encouraging children to write; evaluation; the learning center in the classroom; and the advantages of individualized writing instruction. The second section offers practical hints on such topics as organizing a writing center; developing a minicenter

for focus on a specific writing activity; preparing task cards which allow a child to choose an activity to complete independently; making activity sheets for writing; creating learning modules for writing; and including open activities for writing. Specific games, activities, and topics, such as the thesaurus, address books, idioms, and free verse, are discussed and illustrated. (TS)

Descriptors—Conference Reports, \*Consumer Economics, \*Consumer Education, Higher Education, \*Mass Media, Media Research, Merchandise Information, \*Publicize, \*Teaching Methods, Television Commercials, Television Research

This set of papers represents the written record of the 1973 national conference for advertising educators held at Arizona State University in March. The conference focus was on current developments in the practice and teaching of advertising. The purpose of the conference was to bring insights about current advertising developments to the attention of advertising educators. The papers are divided into those presented by educators and those by noneducators. The educators' papers are subdivided into two categories, research papers and papers related to the teaching of advertising. The research papers deal with consumer behavior as it has impact on and input to advertising. The papers on teaching advertising describe recent developments in pedagogical approaches and methodology. The noneducators' papers include perspectives on advertising regulation, views of trends in advertiser management and agency service, a review of media procedures, analyses of the employment and placement situation, and an overview of advertising's next generation. Pallante, James J.  
On Teaching "Oedipus Rex": A Compromise Interpretation.

Pub Date 75

Note—13p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Drama, Dramatic Unities, English Instruction, \*Greek Literature, Higher Education, \*Literary Analysis, \*Literary Criticism, Secondary Education

Identifiers—\*Oedipus Rex

This paper discusses the problems of interpreting "Oedipus Rex" and argues that morality was not the primary question being raised in this play, nor was Sophocles urging people to humility and piety. Instead, Sophocles was primarily interested in the insufficiency of human knowledge. The gods and their role in destiny, the character and personality of Oedipus, Oedipus' tragic flaw, and the role of guilt in the play are discussed. It is concluded that, in this play, human reason was an exercise in futility, that the universe is ordered and things will be and happen as they will, and that human beings can observe and even help, but not really change anything within that order. **Identifiers**—\*Film Criticism

"Understanding Film," the opening section of this book, discusses perceptions of and responses to film and the way in which experiences with and knowledge of other media affect film viewing. The second section, "Film Elements," analyzes the basic elements of film: the use of space and time, the impact of editing, sound and color, and the effects achieved by various points of view. The third section, "How Films Are Made," considers film-making and production in their various stages. Film theory and approaches to film criticism are reviewed in the fourth section, which includes an overview of major theorists, auteur criticism, and structuralism and semiology. A concluding section considers future trends for narrative film in terms of both technique and distribution. The appendixes list film reference publications, film periodicals, colleges and universities with film programs, and film distributors. (LL)

**Descriptors**—\*Educational Programs, Educational Research, Elementary Secondary Education,

\*Evaluation Methods, \*Instructional Design, \*Instructional Systems, Program Descriptions, Program Design, \*Program Development

Eleven common characteristics of instructional program systems have been identified: outcomes, instruction, quality verification, monitoring, personnel, data, interfaces, procurement, information, continuity, and costs. The requirements, specifications, and procedures of these must all be made explicit for each system. Although the eleven system characteristics enumerated are easily differentiated for explanatory purposes, it is important to note that they are interdependent and that the specifications for one are considerably dependent upon the specifications for another. The same is true of the systems themselves; there, too, interdependency between and among the systems requires careful analytic attention and subsequent procedural attention. (Author/RB)

**Descriptors**—\*Composition (Literary), Elementary Secondary Education, English Instruction, \*Grammar, \*Language Development, Language Research, Language Skills, \*Language Usage, \*Sentence Structure, Syntax, Writing Skills, Written Language

The purposes of this study were (1) to provide a method for the quantitative study of grammatical (syntactic) structures which is coherent, systematic, and broad, yet capable of refinement to accommodate details, and (2) to search for the developmental trends in the frequency of various grammatical structures written by students of average intelligence (IQs ranging from 90-110) in the fourth, eighth, and twelfth grades. Nine boys and nine girls were selected from each of the three grades, and close to 1000 words of writing were obtained from each student. The writing was done in class without alteration by anyone other than the writer, and the subject matter was not controlled by the investigators. In addition to sentence length, clause length, subordination ratio, and the kinds of clauses, the study analyzes structures within a clause: coordinated structures, nominals, the verb auxiliary, main verbs and complements, modifiers of verbs, and predicate adjectives. The results of this study are discussed at length, and tables provide additional information about the procedures used and data obtained. This report was written for two groups: the teacher or supervisor of English and the researcher in language development. (RB)

**Identifiers**—\*National Assessment of Educational Progress

This report, part of the National Assessment of Educational Progress (NAEP) survey, describes one facet of the national assessment of writing. The students—9-, 13-, and 17-year-olds who constitute the sample for the NAEP studies—were told to use their best writing but were not told that their papers would be examined for mechanical correctness. The data on mechanical correct-

ness obtained from an examination of these papers during the 1974 survey are compared with the data obtained from the 1970 assessment. Richard Lloyd-Jones of the University of Iowa (Iowa City) and Ross Winterowd of the University of Southern California (Los Angeles) offered the following observations about the writing assessment results: there is no evidence that the schools must "go back to basics" because the basics seem well in hand; language is always changing, but new ways of writing may not be worse in any defensible sense; writing is inextricably tied to reading; "Edited Standard English" as taught in most schools is one dialect of English; there are fewer rewards for being a good writer; and increasing class size results in fewer writing assignments. **Identifiers**—\*National Assessment of Educational Progress

The literature advisory group—comprised of English teachers at all levels, language arts supervisors, and professionals with a national perspective—convened in March 1972 to begin the revision of the literature objectives which had been created in 1965-66 by the National Assessment of Educational Progress. In this booklet, literature is defined as language used imaginatively to communicate ideas and feelings, express perceptions, provide interpretations, and present visions of human experience. Literature exists in all cultures at all times and appears in oral, written, and enacted forms. The advisory committee intended that the three major objectives be seen as a sequence of increasingly complex activities. The first objective emphasizes immediate experience with literature—the witness must be aware of imaginative language. The second objective emphasizes the ways in which the observer can participate in an experience with literature, and the third objective emphasizes literature as a cultural phenomenon. Two appendixes list the participants for the literature objectives conference and for the review conference. (LL)

**Descriptors**—Adjectives, Adverbs, English Instruction, \*Grammar, \*Language Arts, \*Language Skills, Morphemes, Nouns, Teacher Education, \*Traditional Grammar, \*Transformation Generative Grammar, Verbs

This book introduces a specific approach to sentence analysis by comparing traditional grammar with newer methods, including transformational grammar. The first chapter discusses the teaching of grammar and language skills and the use of standard and nonstandard dialects. Traditional grammar is defined and discussed in chapter 2. The other chapters discuss the morpheme, the noun, the verb, the adjective, the adverb, function words, the kernel sentence, and the transformation. Each of the chapters concludes with suggestions for further reading and a section for testing the concepts presented. (LL)

**Identifiers**—\*Journalism Education

This study examines the quality of the education programs offered by colleges and universities preparing high school journalism teachers. Following a lengthy review of the literature dating to the 1920s, the results of a questionnaire survey on journalism education are reported. The questionnaire was mailed to 117 persons associated with journalism education and high school journalism instruction. The total number of respondents was 104 (89 percent) of the 117 who received questionnaires. Some of the conclusions were that 54 high schools (51.9 percent of the 104 responding) have departments or schools of journalism that offer one course in high school journalism and advising, the most common number of credit hours available in high school journalism-publications advising is three semester hours (five quarter hours), the majority of schools surveyed do not offer summer workshops in high school journalism-publications subjects, and more high school oriented journalism course offerings are being planned by many of the colleges and universities. **Descriptors**—Curriculum Evaluation, \*English Education, Evaluation Methods, Higher Education, \*Performance Based Teacher Education, Program Descriptions, \*Program Evaluation, \*Teacher Education, \*Teacher Education Curriculum

The four sections in this booklet describe a teacher education program in English at the University of Georgia by outlining the program, describing the three major on-campus courses and field center experiences, and summarizing the evaluation plan. The first section describes such topics as the students in the program, the major functions of the program, major coursework and professional training, and the field experience sequence. The second section discusses preparing undergraduate students by providing English courses which are good background for teaching. The third section discusses some of the problems involved in establishing a field-based training program in public school centers. The fourth and final section discusses various evaluation instruments for the program, including the Minnesota Teacher Attitude Inventory, Conference Observation Forms, Departmental English Education Test, and Teacher-Candidate Program Evaluation. **Language Arts; Learning Objectives for Individualized Instruction.**

Westinghouse Learning Corp., New York, N.Y.

Pub Date 75

Note—132p.

Available from—Westinghouse Learning Press, 770 Lucerne Drive, Sunnyvale, California 94086 (\$7.00 paper)

**Document Not Available from EDRS**

**Descriptors**—\*Basic Skills, \*Behavioral Objectives, \*Individualized Instruction, \*Language Arts, \*Language Skills, Literature, Mass Media, Writing Skills

These learning objectives have been formulated for use in classes that emphasize individualization as well as in learning centers and resource laboratories that concentrate on a diagnostic and remedial approach to basic skills. They are designed for the mature student who has not yet mastered objectives ordinarily covered in earlier years. Objectives are listed for the following subject areas: listening and speaking, word skills, sentence skills, writing skills, literature and literary criticism, and analysis of mass media. Terminal objectives, established to provide appropriate learning segments for each of the skills, are numbered and printed in boldface. Subobjectives are also listed and are designed to contribute to the mastery of a terminal objective. The terminal objectives are numbered for computer storage and retrieval use. (LL)

**Descriptors**—\*Composition (Literary), Doctoral Theses, Educational Research, \*Language Arts, \*Reading, \*Secondary Education, \*Writing, Writing Exercises

**Identifiers**—\*Sentence Combining

The present study tested four research hypotheses dealing with sentence-combining (SC) practice as a component of the language arts curriculum. It examined the progress of 100 seventh graders over a period of three months. No formal instruction in grammar was included. Four classes, controlled for ability, sex, and teacher effect, followed a single curricular format, with the exception of the SC exercises completed by the two experimental classes between pre- and posttest. Effects of the SC treatment on students' writing were measured at pre-, and post-, and delayed posttest times. Effects on students' reading were measured at pre- and posttest times only. Results indicated that the experimental group wrote posttest compositions that were (1) syntactically more mature than those of the control group and (2) syntactically more mature than those they had written at pretest. Results from the two reading measures indicated that the treatment had no differential effect on reading rate. (Author/LL)

The purpose of this study was to investigate the processes and procedures utilized in designing and maintaining the teaching of communication skills in English elective programs. A systematic case-study description was made of skills components in the elective English programs in four public secondary schools in Massachusetts. The informational data was of two kinds: the content of verbal interviews with school personnel and pupils, and collections of printed materials of various sorts. (The results of the study are presented in detail, and it is concluded that skills development should be viewed as an integral part of the elective English program which includes the use of all modes of communication, both modern and traditional.) **Descriptors**—Doctoral Theses, \*Education, Higher Education, \*Journalism, National Surveys, News Media, \*Newspapers, \*News Reporting, Opinions, \*Press Opinion, School Community Relationship

This study sought to determine the perceptions of U.S. daily newspaper publishers, editors, and education reporters regarding the desirability and feasibility of three approaches to increasing edu-

cation news coverage: increased traditional local emphasis on education news coverage by daily newspapers, expanded wire service coverage of education, and multipage weekly regional education news supplements to daily newspapers. A questionnaire, sent to 606 individuals on daily newspapers, was accompanied by an eight-page tabloid prototype weekly education news supplement containing articles reprinted with permission from various education periodicals and other periodicals of general circulation. Analysis of the findings indicated that a majority of the publishers and editors were satisfied with present levels of local educational news coverage and wire service coverage of education, and that a majority of the publishers and editors did not regard publication by their dailies of a regional weekly education news supplement as either desirable or feasible. Several implications are derived from the results of the study. (Author/RB)

*The Effect of Rhetorical Training in Visual Literacy on the Writing Skills of College Freshmen.*

Pub Date 75

Note—165p.; Ed.D. Dissertation, Boston University School of Education

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-20,950, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—College Freshmen, \*Composition (Literary), Doctoral Theses, Educational Research, English Instruction, Higher Education, \*Rhetoric, \*Teaching Methods, \*Visual Literacy, \*Writing Skills, Written Language

This study undertook an examination of how specific rhetorical training in visual literacy would improve the ability of college freshmen to clearly state a thesis, to carefully shape an argument, to deliberately substantiate the argument with examples, and to skillfully express ideas with appropriately varied sentence structure. The hypotheses were that the study of formal features in visual media would supplement prior study of form in writing and that the bi-modal awareness of the common set of underlying features of rhetorical form would lead to heightened ability to recognize and manipulate form in both writing and visuals. Students in six sections of freshman composition initially wrote both a critical and an expository essay which were rated holistically by two readers each. The data collected in this study indicated that English teachers can optimistically look to training in visual literacy as a way not only of teaching important visual analysis but also of developing a bi-modal awareness that will improve writing skills. *Question Asking and the Teaching of Writing.*

Pub Date Oct 75

Note—14p.; Paper presented at the Annual Meeting of the New York State English Council (25th, Buffalo, New York, October 9-11, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Creative Writing, Literary Perspective, \*Questioning Techniques, \*Student Writing Models, Teaching Methods, \*Teaching Techniques, \*Writing Skills

This paper argues that provocative questions can be used by teachers to help students write. Described are a series of questions drawn from rhetorical theory, such as "How many times can I change focus so as to get the most complete understanding of a topic?" "When does X occur?" "Why does X occur?" and "What does X cause or prompt?" Several exemplary works are examined, including Shakespeare's "Hamlet" and "Beowulf." Several student compositions are also examined and discussed in terms of this questioning technique. (TS)

Descriptors—Academic Achievement, \*Affective Behavior, Cognitive Development, Communication (Thought Transfer), \*Critical Thinking, Doctoral Theses, Educational Research, Elementary Education, Intelligence, \*Propaganda, Publicize, \*Sex Differences, \*Small Group Instruction, Teaching Methods

This study attempted to better define the nature of critical thinking and its component skills (with a focus on the interpretation, analysis, and evaluation of data) by investigating the relationship between critical thinking competency and an activity card method of instruction, individual or small group work patterns, achievement, and sex. The propaganda techniques found in magazine advertisements were selected by the researcher as a valid curriculum stimulus for the critical thinking of fifth graders. Eighty fifth-grade students in one elementary school were divided equally into two experimental classes exposed to the activity card treatment and two control classes involved in noncritical thinking activities of equal duration. Each was further divided into either an individual or a small group pattern of interaction with the activity card treatment on nontreatment activities. A pretest and posttest design was followed. Interactions between the method of instruction, grouping pattern, and sex were insignificant except in the case of interactions between the boys and small group learning, which was significant. The researcher concluded that affective factors are involved in growth in critical thinking as well as intelligence and achievement. (Author/LL)

*A Flexible Modular System: An Experiment in Teaching Freshman Composition.*

Pub Date 75

Note—118p.; Ed.D. Dissertation, Boston University School of Education

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-20,967, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—\*College Freshmen, \*Composition (Literary), Doctoral Theses, Educational Research, English Instruction, Higher Education, \*Teaching Methods, \*Writing Skills, Written Language

Identifiers—\*Modular Instruction

The study investigated the effectiveness of a flexible modular system for teaching composition. It was hypothesized that measures of compositional ability would significantly favor students in the experimental course, and students in the experimental course would register significantly higher in affective measures of interest and involvement. The modular system was a series of five modules: language games; personal experience; research techniques; ideas, issues, and controversy; and critical expression. The five modules each contained a content focus and compositional skills which required mastery. The students participating in the study were college freshmen enrolled in composition at Boston University. It was concluded that the flexible modular system is a more effective method of teaching composition than is the traditional method. (Author/RB)

*A Study of the Handling of Verbal Nonstandard Grammar by English Teachers in an Innercity Secondary School.*

Pub Date 75

Note—255p.; Ed.D. Dissertation, Columbia University

Available from—University Microfilms, P.O. Box 1764, Ann Arbor, Michigan 48106 (Order No. 75-20,225, Mfilm \$7.50, Xerography \$15.00)

Document Not Available from EDRS

Descriptors—Doctoral Theses, \*English Instruction, \*Inner City, Language Standardization, \*Language Styles, Language Usage, \*Nonstandard Dialects, Secondary Education, Secondary School Teachers, \*Teacher Attitudes, Written Language

The purposes of this study were to identify the attitudes and behavior of teachers in an innercity secondary school toward language in general and nonstandard grammar in particular. Responses of the 18 member English department to a content-specific questionnaire and videotapes of 12 English classes, representing a sample of all grades and tracks within the school, served as the sources of information for the study. The teachers studied appeared to be more expanding in their attitudes than in their behavior. They expressed acceptance of dialectal differences, recognized the role of context as a major determinant of standard usage, and were somewhat aware of distinctive black speech patterns. They did not correct students' verbal errors in class as a general practice. They did, however, correct written work to conform to standard usage, and the integral relationship between academic achievement and standard usage was noted as a continuing pervasive influence on secondary school English teaching. It was suggested that the language systems of teachers and students be overtly identified and utilized to begin an inquiry into language and its effect on each classroom participant. (Author/LL)

Descriptors—\*Child Language, Creative Teaching, Creative Writing, Drama, Elementary Education, English Instruction, \*Exceptional Child Education, Exceptional Children, \*Language Arts, Primary Education, Reading Processes, Retarded Children, Spelling Instruction, \*Teaching Guides, \*Teaching Methods, Writing Skills

This book provides a background guide to the creative teaching of integrated English in the contemporary primary school. Part 1 suggests that

everything done in the primary school is part of an integrated language program, but that some classification is desirable so that important aspects are not neglected. Parts 2, 3, and 4 look at the special needs of the major areas of speaking, listening, writing, and reading. Part 5 combines these areas within the context of the mass media of communication. Within each section practical and creative suggestions to stimulate pupils' interest and discussions are provided under three headings: background, application in the classroom, and the atypical child. Included are such topics as speaking and thinking, the nature of communication, language and culture, handwriting in perspective, testing, development of vocabulary, expressive writing, learning to write a story, teaching the writing of poetry, dyslexia, the retarded reader, children and stories, and children and the mass media. Descriptors—Doctoral Theses, \*English Instruction, \*Individualized Instruction, Secondary Education, \*Teaching Methods, \*Teaching Models

The purpose of this study is to examine the concept of individualization of instruction as it applies to high school English instruction. The first two chapters of the study provide the rationale for individualizing high school English instruction, chapters 3 and 4 suggest a strategy, and the final chapter presents a summary and conclusions. Chapter 1 analyzes some of the conditions of our present society which call for new educational approaches. Chapter 2 examines some of the major developments in the concept of individualization from the early 1900s to the present. Chapters 3 and 4 discuss some of the essential changes in role and function of both teacher and student in an individualized situation and present model units for various areas of English in grades 10-12. One of the conclusions discussed in chapter 5 is that efforts should be made to prepare prospective teachers of high school English to approach instruction through an individualized approach. **Document Not Available from EDRS**

Descriptors—\*Academic Achievement, \*Comparative Analysis, Core Courses, Doctoral Theses, Educational Research, \*Elective Subjects, \*English Instruction, \*Language Usage, Secondary Education, Written Language

In this study, a comparison was made between the achievement scores in English usage of students who were assigned English classes during their last two years of high school and the scores of students who elected English classes. The 667 participants in this study were members of the 1970 and 1972 graduating classes at Aviation High School, Redondo Beach, California. The findings indicated that there was no significant difference on a standardized test of English usage between the scores of students who were assigned English classes and the scores of students who elected English classes during their last two years of high school. The study also found that there was a significant difference on a standardized test of English usage between the scores of students who elected four or more semesters of English and the scores of those who elected fewer than four semesters of English during their last two years of high school. While the results indicated that there was no difference in student performance whether the student elected or was assigned to English, increased course work in English was an apparent factor in improved English performance. (Author/RB)

Descriptors—Doctoral Theses, \*Educational Improvement, \*Educational Needs, \*Educational Programs, Educational Research, Elementary Education, \*English Curriculum, English Instruction, \*Language Arts, Language Instruction, Language Skills

To determine the priorities that linguists and educators stress as essential to the development of positive language arts programs, numerous works by selected linguists and educators were read. Letters were also sent to major publishing companies requesting complimentary copies of current elementary language arts textbook series for evaluation. Additional information on leading series was obtained through research at the San Joaquin County Instructional Materials Center in Stockton, California. The research indicated that positive measures are underway in the 1970s to reform language arts instruction. Some of the conclusions presented indicated that linguistic research is commanding a more influential role in the reform of the English curriculum; that the educational priorities synthesized in the research projected are viable priorities for the development of language arts programs; and that English curriculum reform requires on-going improvements in teacher-preparation programs. Descriptors—\*Editing, Guidelines, Language, Language Guides, Language Teachers, \*Language Usage, Publishing Industry, \*Sex Discrimination, Sex Role, \*Sex Stereotypes, \*Writing Skills

Identifiers—\*National Council of Teachers of English

Written in response to a resolution passed at the 1974 convention of the National Council of Teachers of English, these guidelines are based on the assumption that the sexist usage of language aids in arbitrary assignment of roles to both men and women and would be better omitted. Although directed specifically to editors, these guidelines for eliminating sexist language can be useful to all educators who help shape the language patterns and language usage of students and thus can help promote language that opens rather than closes possibilities to women and men. The following general problems in using nonsexist language are discussed, examples are given, and alternatives are suggested: (1) the omission of women as in "the common man" and "businessman" and in the use of the masculine pronoun for the generic singular and indefinite pronoun; (2) the demeaning of women by not treating men and women in a parallel manner and using patronizing or trivializing terms; and (3) sex-role stereotyping such as appears in the sentence "Have your mother send cookies for the field trip." Specific problems of female representation in books or collections of articles discussing professional issues, booklists, teaching units, research, reference books, and journal articles are discussed. Identifiers—\*Broadcast Industry Conference

This document contains the papers presented at the Twenty-Second Annual Broadcast Industry Conference held at California State University, San Francisco, in 1972. The aim of the conference was to develop a better means of communication among nations existing in a world that has grown smaller because of the development of the communications media. The papers presented include S.I. Hayakawa's "Some Psychological Implications of Television," which examines the semantic environment created by television and the effects of television on the values of young people; "The Role of the Media of the Republic of China"; "Impact and Meaning of Broadcasting in Japan"; "Prospects for Cable Television," which examines the uses and the possibilities of the coaxial cable in education, industry, and the home; and "Guidelines for Cross-Cultural Communication." Additional papers explore the challenges of international broadcasting in terms of political, economic, social, and educational effects. The twelve papers represent an initial step in the exchange of ideas, techniques, and content in the broadcast fields in the Pacific nations. A final section describes the current broadcasting facilities of the Pacific nations. (RB)

Descriptors—Creative Dramatics, Dance, \*Drama, Instructional Materials, \*Lesson Plans, \*Motion, Music, Pantomime, Secondary Education, \*Teaching Guides, \*Theater Arts

Designed as a practical guide for teachers, this handbook presents ways of introducing drama and movement into secondary school curricula. A basic program for a movement class is offered, based on three objectives: one's own movement,

secondary or underlying motives, and the balance of freedom and discipline. In the first section of the book, seven lesson plans are given which focus on establishing signals, exploring space, changing level and direction, speed and balance, mechanical movement, quality of movement, and sound and shape. The second section of the book deals with specific problems including environment, discipline, inhibitions, improvisations, ideas and age levels, psychodrama, moving to music, and the arena stage. The third section of the book deals with the development of hands, voice, mime, and daydreams. (TS)

Speech Communication and Values Clarification

Pub Date 15 Mar 75

Note—25p.; Paper presented at the Annual Meeting of the Eastern Communication Association (New York, N.Y., March 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Communication (Thought Transfer), Communication Skills, Human Relations, \*Interpersonal Relationship, Motivation, Secondary Education, \*Speech Instruction, \*Teaching Methods, \*Values  
Identifiers—\*Values Clarification

The purpose of this paper is to explore the relationship of one of the most celebrated areas of the humanistic education movement—values clarification—to some current emphases in secondary school speech communication education. Popular speech communication texts directly incorporate activities found in values clarification literature or encourage students to discover, develop, and act on their own values. Some of the humanistic goals, teaching methods, student learning activities, and evaluation procedures of both values clarification and interpersonal communication are examined. The major focus of this paper, then, is on a framework from which speech communication educators might consider the work of a related discipline, the impact of which is already noticeable in textbooks and teaching. It is concluded that in the speech communication classroom, values clarification activities can be used as motivational techniques and as methods for teaching interpersonal communication skills. A Partial List of Educational, Instructional, and Documentary Films Treating Women's Roles, Problems, and Communication Strategies.

Pub Date 75

Note—42p.; Paper presented at the Summer meeting of the Speech Communication Association (1975)

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Communication (Thought Transfer), \*Documentaries, \*Films, Film Study, Instructional Films, Role Perception, \*Sex Role, Sex Stereotypes, \*Womens Studies  
Identifiers—\*Filmographies

This document lists 189 educational, instructional, and documentary films treating women's roles, problems, and communication strategies. The films are classified by substance and topics: beauty ethic: presentations and examinations; birth control, unwanted pregnancy, and abortion; coping with a male oriented society; dating and marriage; direction for the women's movement; family life; history of the women's movement; literature and movie images of women; rape; roles of women in other societies; search for self-fulfillment; sex and communication; sex education; sex role stereotyping and reeducation; socialization of the young; traditional women's organizations; and working women: their opportunities and problems. Each entry contains the name of the film, date, length, type of audience, producer, commercial distributor, institutional distributor, and a brief description of the film. (TS)

Dialogue as a Mode of Health Communication in a Correctional Facility.

Pub Date 75

Note—20p.; Paper presented at the Annual Meeting of the International Communication Association (Chicago, April 23-26, 1975)

EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.

Descriptors—\*Communication (Thought Transfer), Correctional Rehabilitation, \*Corrective Institutions, \*Dialogue, \*Health Education, Health Programs, \*Human Relations, Institutionalized (Persons)

Identifiers—Communication Research, \*Health Communication

Historically, the study of health communication has been confined primarily to the field of medicine. Recently, however, it has increased in importance in other areas of human communication. Exploring a new approach to health communication is the purpose of this paper. Specifically, the thrust of this investigation is the use of dialogue as a mode of health communication in a correctional facility. In this regard, three general areas were examined: the components of the concept of dialogue, the nature of monologue as viewed by the advocates of dialogue, and some aspects concerning dialogue as a means of health communication in a correctional situation. The study is inconclusive, but there are indications that dialogue as a means of communication had favorable impact on the participants in this project. (Author/RB)

Drama/Theatre Framework for California Public Schools; A Process-Concept Framework for a Program in Theatre Arts for All Students, Kindergarten through Grade Twelve.

California State Dept. of Education, Sacramento.

Pub Date 74

Note—90p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Acting, Communication Skills, Creative Dramatics, \*Curriculum Guides, Dance, \*Drama, Elementary Secondary Education, \*Guidelines, Oral Communication, Pantomime, Playwriting, Production Techniques, \*Theater Arts

Identifiers—\*California

The material in this publication outlines ways in which drama/theatre may be used to help students develop their imagination and their communication skills. This framework presents a process-concept organization which spans the grade levels from kindergarten through twelfth grade and which provides guidelines for determining expectancies for student achievement, devising strategies for realizing expectancies, and implementing the program (information on teacher training, resources, and instructional materials). Chapters explore the following topics: drama/theatre as education; components of the curriculum; continuum of expectancies and strategies; sensory and emotional awareness; rhythm and movement; pantomime; oral communication; improvisation; playmaking/playwriting; formal acting; designing; directing; managing; executing technical elements; viewing; reviewing; and training; materials, and sources. Descriptors—\*Censorship, \*Communication (Thought Transfer), \*Federal Government, \*Freedom of Speech, Government Publications, Government Role, Higher Education, \*Information Dissemination

Identifiers—Freedom of Information

Many agencies of the Executive Branch of the federal government have at one time or another claimed an absolute right to withhold any information they chose from anyone they chose. These claims have produced the Freedom of Information Act, which imposes some limitations on this absolute power. Recently, some members of Congress have become concerned about the government's use of the courts to enforce various secrecy claims. The first article in this issue of "Free Speech" concerning government control of information was written by Representative

Jonathan Bingham of New York. This issue also contains remarks by Senator Muskie on secrecy, comments concerning Justice Black's position on public access, and a report of the ad hoc committee to evaluate the "Free Speech" newsletter. (TS)

Simulation Learning Experiences in Speech Communication.

Pub Date Apr 75

Note—24p.; Paper presented at the Annual Meeting of the International Communication Association Convention (Chicago, Illinois, April 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Class Activities, \*Communication (Thought Transfer), Educational Research, \*Games, Higher Education, Instructional Materials, \*Learning Activities, \*National Surveys, \*Simulation, Speech Instruction, Teaching Methods

This study, the first national survey of an academic discipline's use of simulation and game exercises, constitutes an attempt to determine the status, rationale, and effectiveness of such exercises. Specifically, members of the Speech Communication Association were surveyed regarding the courses in which simulations and games are employed, the types of exercises used, communication concepts demonstrated, selection criteria, evaluation techniques, and attitudes toward the utilization of communication games. Data were collected by means of a 17-item questionnaire. The responses indicated that the utilization of communication games is a popular teaching strategy within the discipline. With more than 70 percent of the respondents indicating utilization of communication games, the recent trend of including games in fundamentals, interpersonal communication, and small group textbooks, and the advent of a dozen or so books within the past year which include as their major emphasis "communication probes" or "communication vibrations" appear warranted. The results of the study are presented in both narrative and table format. (RB)

Intra-Audience Effects: A Field Test.

Pub Date Apr 75

Note—13p.; Paper presented at the Annual Meeting of the International Communication Association Convention (Chicago, Illinois, April 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Audiences, \*Behavior Patterns, \*Communication (Thought Transfer), Educational Research, \*Feedback, \*Field Studies, Group Behavior, Higher Education  
Identifiers—\*Communication Research

Designed to investigate intra-audience effects in a field setting, this study tested three hypotheses: (1) subjects who are exposed to favorable audience responses by confederates will display more favorable assessments than subjects

who are exposed to less favorable responses; (2) subjects who are exposed to favorable audience responses will remain longer than subjects who are exposed to less favorable responses; and (3) subjects who are exposed to favorable responses will indicate a greater desire to return than will subjects who are exposed to less favorable responses. Subjects for the study were 60 students enrolled in four basic communication courses during the summer term of 1974 at Michigan State University. The hypotheses were confirmed. The present study provides evidence for the existence and importance of intra-audience effects in a field setting, although there are some control problems in a field setting. (RB)

**Employer Images of Speech Communication Majors: A Question of Employability.**  
Pub Date 75

Note—12p.; Survey conducted by the Department of Speech at the University of Houston  
**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
Descriptors—\*College Graduates, College Majors, \*Communication Skills, Educational Research, \*Employment Patterns, \*Employment Potential, Employment Trends, Occupational Surveys, \*Speech

In order to understand the market climate for speech majors, the Department of Speech at the University of Houston conducted a survey to assess the marketability of speech communication graduates in the Greater Houston area. It further attempted to disclose the skills needed to increase employability. Seventy-one questionnaires, designed to focus upon some aspect of the total employment qualifications of the speech communication major, were completed and returned by fourteen different types of companies, national or international in size and extensiveness of operation. The results revealed that very few majors were hired from areas other than Business Administration and Engineering. Employers hire predominantly from areas where students are immediately qualified for a specific job. At least two observations can be made from these data: (1) speech majors will improve their employability by having courses which make them more qualified to perform a definite job; and (2) the type of job and the type of business concern should be decided upon early in each student's academic development. Speech communication majors were perceived as having high employment potential in departments or skill areas most dependent upon communication skills. (LL)

**Correcting the Visual Bias: Assessing the Functions of Music in Film and Television.**

Pub Date Aug 75

Note—25p.; Paper presented at the University Film Association Conference, August 18, 1975; Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

Descriptors—Analytical Criticism, \*Communication (Thought Transfer), \*Films, Higher Education, Media Research, \*Music, \*Research Needs, \*Television

This investigation was carried out for the purpose of encouraging speculation about and investigation into the important communicative functions of music in film and television. After examining the visual bias of media analysts, critics, and historians—a bias which tends to filter out serious exploration of music's role in film and television—the body of the paper is given over to a consideration of film and television music's five basic functions. These functions include: masking noise to neutralize disagreeable sounds emanating from sources within and outside of the viewing environment; neutralizing silence to fill the disturbing aural voids which result when there is an absence of other aural stimuli; providing continuity to impart an undergirding, cohesive bond for film's and television's sequencing of separate images; providing dramatic support to amplify and reinforce the film or television program's audience effect; and using music as a special feature to attract patronage and increase income. The study concludes with a discussion of the need for further research that will generate increased understanding and appreciation of music's integral role in film's and television's communicative process. **Philosophical Assumptions of Research on Gender Difference or: Two-By-Two and We'll Never Break Through.**

Pub Date Jul 75

Note—17p.; Paper presented at the Speech Communication Association Summer Conference (Chicago, July, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Females, \*Males, Physical Characteristics, \*Sex (Characteristics), \*Sex Differences, \*Sex Role, Sex Stereotypes

The philosophical proposition axiomatic in all gender difference research is examined in this paper. Research on gender differences is that which attempts to describe categorical differences between males and females, based on a designated potential for sexual reproduction. The

methodological problems raised by this assumption include the presumptions that masculinity and femininity are extreme opposites and that all persons in each group are more like the persons in their own gender identification group than they are like any one person in the other gender identification group. Anne Constantinople (1973) suggests that there is no rationale for believing that biological function is meaningful for understanding self-conception. This paper concludes by suggesting that the a priori assumption of two and only two genders has little to contribute beyond refinement of cultural prejudice and that the possibilities for use of such research by social planners is particularly treacherous. **Communication Policies in Hungary.**

United Nations Educational, Scientific, and Cultural Organization, Paris (France).

Pub Date 74

Note—58p.

Available from—Unipub, Box 433, Murray Hill Station, New York, New York 10016 (\$3.30 paper)

**Document Not Available from EDRS**

Descriptors—Communication (Thought Transfer), \*Communication Problems, \*Communications, \*Mass Media, Policy Formation, \*Public Policy, Social Environment, Social Structure

Identifiers—\*Hungary

This book is one of a series of studies—undertaken as part of the program adopted by the General Conference of UNESCO—related to the analysis of communication policies as they exist at the public, institutional, and professional levels in selected countries. Discussed in this book about Hungary's communication policies are such topics as mass communication and planning; historical development of mass communication systems; social structure and communication structure; national communication policies; policies of the mass media; relations between mass communication and its public; relations between mass communication and information sources; interrelation of mass media; communication policies and the professional organizations; systems of professional training; and ethics and traditions. It is concluded that mass communication is taking a more central place in Hungarian society because of the ongoing process of democratization, the increasing political activity of citizens, the differentiation of their cultural demands, the rising standard of living, and the integration of certain elements of the scientific-technical revolution in everyday life. Subject Attitudes Toward Research and Researchers: Deception vs. Role Playing.

Pub Date Apr 75

Note—10p.; Paper presented at the Annual Meeting of the International Communication Association (Chicago, Illinois, April 23-26, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—College Students, \*Research, Research Design, \*Researchers, \*Research Methodology, \*Response Mode, Role Perception, \*Role Playing, Student Attitudes, Student Reaction

Identifiers—\*Deception

In recent years data have begun to accumulate on the efficacy of role playing as an alternative to deception in research. The ethics of deception as a research technique are also being considered. The present study was designed to provide data describing subjects' post-participation attitudes toward research and researchers in comparable role playing and deception experimental conditions. Subjects were 214 students who were enrolled in eight introductory communication courses at Michigan State University, randomly assigned in intact classes to the experimental conditions, and who were participants in a communication experiment designed to determine the impact of a specific news event. One half of the students had been previously informed that this news event was to be a fabrication. All subjects were required to fill out two questionnaires, one which dealt with their response to the news and the other which concerned their response to having participated in the experiment. The study indicated that subjects in the deception condition were more favorable toward participation in the research and toward researchers than were subjects in the role playing conditions. (LL)

A Survey Investigation of Trends and Issues in Speech Communication Ph.D. Programs.

Pub Date 75

Note—11p.; Survey prepared at the University of Texas

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Communication (Thought Transfer), \*Doctoral Programs, \*Employment Patterns, Futures (of Society), Higher Education, Job Market, \*School Surveys, \*Speech Instruction, \*Trend Analysis

Prepared to determine the attitudes and beliefs of department chairpersons in speech communication about the future areas of academic concentration, this survey collected information on the kinds of nonacademic employment which Ph.D. graduates in speech communication obtained over the past two years. The investigators used the 1973-74 Speech Communication Association "Directory of Graduate Programs" to identify departments awarding the Ph.D. degree in speech communication. A fifteen-item, two-page questionnaire accompanied by a cover letter and a postage-paid return envelope were mailed to each of the chairpersons of 47 departments. Thirty-six questionnaires were returned, yielding a return rate of 77 percent. It is concluded that the strongest asset for job placement is versatility, the ability through academic training and experience to work in a variety of settings or to teach in a variety of academic areas. Furthermore, those graduates who will most likely obtain

academic positions will possess demonstrated teaching competence as well as proven research ability. (The results of the survey are presented in both narrative and table format, including data on nonacademic employment.) (RB)

Administrator Behavior in Crisis Management.

Pub Date May 75

Note—137p.; Ph.D. Dissertation, Walden University

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—\*Administrative Problems, Administrator Attitudes, \*Administrator Role, Conflict Resolution, \*Data Analysis, Educational Administration, Elementary Secondary Education, Hypothesis Testing, \*Occupational Surveys, Questionnaires, \*School Superintendents

Identifiers—Rhode Island

This study was intended to assess the response of educational administrators to crises by measuring the degree that school superintendents vary their responses according to the characteristics of a crisis. A questionnaire was developed, piloted, and revised, then sent to all 39 school superintendents in Rhode Island. The resulting data were analyzed and Pearson product-moment correlations were calculated for each set of responses. The analysis was intended to test the major hypothesis that there are significant relationships between the characteristics of a crisis and administrators' responses. Seven subhypotheses were investigated to test the validity of the major hypothesis. Since six of the seven subhypotheses were supported by the data at the .05 level or better, the author concludes that the major hypothesis was supported by the investigation. (JG)

Descriptors—Administrative Organization, \*Administrative Principles, \*Educational Administration, Educational Change, Educational Objectives, \*Educational Planning, Educational Policy, \*Management, \*Models

One of the main inadequacies in educational management is that planning is not firmly integrated within administration. Five basic processes may be distinguished in administration. The first is planning, or determining what shall be done. The second element of the administrative process is organizing, or defining the administrative structures and activities necessary to carry out the plan. The third is assembling the resources needed to execute the plan. The fourth process is supervising, the day-to-day guidance of operations. The fifth element is controlling, or seeing that operating results conform to the plan. There are different types of plans, including goals, single-use plans, standing plans, and policies. A clear recognition of goals is necessary if planning is to mean anything. Single-use plans design a course of action to fit a specific situation. A standing plan covers a continual action that can be used again and again. A policy is a general plan of action that guides the operation of an enterprise. The budget is an important instrument for coordinating purposeful and effective planning. Modernization of educational administration requires that adequate arrangements be made for the formulation, decision, and implementation of these different types of plans at appropriate levels within the educational system. Descriptors—Cost Effectiveness, Economic Development, Educational Demand, \*Educational Economics, \*Educational Planning, \*Human Capital, \*Investment, Manpower Development, Manpower Needs, \*Resource Allocations

If education is a form of investment, how much does it contribute to economic growth compared with other forms of investment? The first approach to answering this question was the correlation approach. But although simple correlation studies show a relationship between education and economic progress, they do not prove cause and effect. The residual approach tried unsuccessfully to show how much increase in national income was due to education. A third approach viewed education as an investment in human capital and tried to measure the economic rate of return on this investment. Recently research has shifted toward the search for strategies of educational planning and resource allocation. One such strategy is the social demand approach, which regards educational planning as the process of forecasting the demand for education. Another strategy is manpower forecasting, which tries to mold the educational system to meet the particular manpower needs of the economy. A third strategy uses cost-benefit analysis to decide how best to allocate resources among different types and levels of education. (Author/JG)

**Identifiers**—\*USSR

This paper discusses the relationship between economic development and education in developing countries, with major emphasis on the experience of the U.S.S.R. between 1917 and 1968. Separate sections of the paper examine the economic role of education in developing nations, the historical development of technical education in the U.S.S.R., the economic and educational planning process in the U.S.S.R., the training of research personnel in the U.S.S.R., the training of teachers in the U.S.S.R., and some practical considerations in planning technical education for developing nations. In addition, the appendix contains a series of statistical tables that summarize a variety of educational and economic data for the U.S.S.R. from 1913 through 1967. (JG)

**Descriptors**—Educational Needs, \*Educational Planning, Educational Policy, \*Educational Sociology, Social Factors, Social Structure, \*Social Systems, \*Socioeconomic Influences

Educational planning cannot succeed without attention to social factors. Basically, all authors agree that sociology of education deals with three categories of problems. First, it involves study of relations between educational systems and the rest of society, including the economy. The second category of problems is related to the educational system or school as a social system or organization in itself. Third, sociology of education deals with the social aspects of the learning process. Clearly, sociology of education is related in numerous ways to the various problems that educational planners have to face. To learn to look for social factors and social forces and their mutual interdependence and to view education as an integral part of a social whole is probably the most important component of sociological sensibility and of the sociological approach to educational planning. **Descriptors**—Capital, \*Developing Nations, Economic Climate, \*Economic Development, Educational Economics, \*Human Capital, \*Manpower Development, Manpower Needs, Migration Patterns, \*Planning

This paper consists of two major sections, an address on development planning in developing nations and a discussion of the issues raised in the address by the speaker and individuals from several developing nations. The address was given by Dr. Thorkil Kristensen, Secretary General of the Organisation for Economic Cooperation and Development and a former professor of economics. In his address, Dr. Kristensen examines the process of economic development and

discusses various steps developing nations can take to speed their development. He suggests that developing nations must attract both physical capital and knowledge to increase the productivity of their land and labor force. Knowledge is more desirable than physical capital, he argues, because it multiplies faster and because a knowledgeable labor force tends to attract physical capital. Therefore, developing nations should strive to import as much knowledge as possible from more developed countries and should take steps to prevent a "brain drain" caused by migration of their own knowledgeable people to richer, more developed countries. **Descriptors**—\*Economic Development, Educational Finance, \*Educational Improvement, \*Educational Needs, \*Educational Planning, \*Manpower Development, Nonformal Education, Productivity, Socioeconomic Influences, Teacher Supply and Demand

Educational planners will face ten central problems in the next decade. First, there will be a rising demand for education, spurred by continued rapid population growth. Second, educational development will face increasing financial constraints in many countries. Third, educational systems will have to respond to serious shortages of specialized manpower. Fourth and fifth, the role of education must be defined in relation to the need for agricultural and rural development, on the one hand, and the need for industrial development and government services, on the other. Sixth, opportunities for out-of-school education must be developed and coordinated with the formal educational system. Seventh, teacher supply and demand must be reconciled to meet changing economic and educational needs. Eighth, educational productivity and quality will have to be increased to get maximum results from limited educational resources. Ninth, educational systems must become better equipped for innovation and self-renewal. Tenth, there must be a better understanding of the social impact of education on society. To cope with these challenges, educational planning must make use of improved administrative planning and management analysis, better research and training, and increased help from all the social sciences. This paper discusses two current problems of concern to educational planners in the U.S.S.R. and describes the approaches being taken to address them. One major objective of Soviet educa-

tional planners is to greatly expand the percentage of students receiving a complete secondary education. This will require considerable expansion and restructuring of the secondary school system, with special attention to the role of technicums, or specialized secondary schools. A second major planning problem is the need to consolidate the large number of small rural schools into larger schools that are both more effective educationally and more efficient economically. Following the discussion of these planning objectives is a question-and-answer section, in which the author responds to specific questions about his discussion and about the process of educational planning in the U.S.S.R. In addition, a brief outline and diagram of the structure of the Soviet educational system are also included. (JG)

**Descriptors**—\*Educational Change, Educational Finance, Educational Needs, \*Educational Objectives, \*Educational Planning, \*Educational Policy, Elementary Education, Middle Schools, Post Secondary Education, Secondary Education

**Identifiers**—\*Netherlands

This publication summarizes a discussion memorandum published in June 1975 by the Dutch Minister of Education and Science and the two state secretaries of education and science (higher education and secondary education). The memorandum is an initial proposal for setting educational policy and shaping Dutch education over the next 20 to 25 years. As such, it is intended primarily to stimulate discussion and comment among Dutch educators. Main focus of the memorandum is on defining broad educational policy and restructuring the Dutch educational system to reflect changing social conditions and educational needs. Eventually, the Ministry of Education and Science intends to develop the discussion memorandum into a definite legislative proposal for presentation to the Dutch Parliament. (JG)

**Descriptors**—\*Administrative Personnel, Assistant Principals, Educational Finance, Elementary Secondary Education, National Surveys, \*Personnel Policy, \*Principals, \*Salaries, \*Salary Differentials, Tables (Data)

This publication describes various approaches used by school districts to determine salary schedules for principals and vice-principals and presents sample salary schedules and criteria illustrating eight different approaches. The information presented here was derived from data gathered during the 1974-75 National Survey of Salaries and Wages in Public Schools conducted by Educational Research Service. The eight approaches described are generally variations on five methods of setting principals' salary schedules: a separate salary schedule, unrelated to any other salary in the district; a salary schedule based on a percentage of the district superintendent's salary; a salary schedule based on a percentage of the salary of senior high school principals in the district; a salary schedule based on a percentage of some other reference figure (such as the average of superintendents' salaries in neighboring districts); and salaries set independently for each principal, either through individual negotiations or based on a subjective

decision by the superintendent or school board. (JG)

**Identifiers**—New Jersey

This booklet is intended to aid local school superintendents and other school administrators in preparing comprehensive contingency plans to meet various emergency situations. Although it was developed by the State of New Jersey Department of Education, most of the booklet is equally applicable to schools in other states as well. It is organized in three major sections, which discuss the responsibilities of different school personnel for preparedness planning, examine procedures for developing school emergency plans, and present planning checklists for several different types of emergencies. In addition, the appendix contains a sample local school board resolution for emergency planning, a sample organizational chart showing the responsibility of school district personnel in emergencies, and a list of resource agencies in the state of New Jersey that can aid local schools in preparing their emergency plans. **Descriptors**—\*Acoustical Environment, \*Bibliographies, \*Building Design, \*Computer Programs, Environmental Research, \*Facility Guidelines, Facility Requirements, Lighting Design, Mathematical Models, Performance Specifications, \*Simulation, Thermal Environment, Visual Environment

This bibliography has been produced as part of a research program attempting to develop a new approach to building environment and service systems design using computer-aided design techniques. As such it not only classifies available literature on the service systems themselves, but also contains sections on the application of computers and documentation of environmental research. There is also a selective list of computer applications to other related areas of building design and material intended to provide a background to the mathematical and analytical procedures involved. The literature is classified into the following categories: (1) mathematical methods and analytical techniques, (2) computer applications, (3) integrated models on building performance, (4) building environment and service systems, (5) thermal environment and air conditioning systems, (6) visual environment and lighting systems, (7) acoustic environment, and (8) vertical transportation. **Identifiers**—\*Nepal, School Mapping

The District of Kaski in central Nepal is analyzed as part of a series of case studies on the application of the school mapping technique. The District of Kaski is placed in the Nepalese context of location, economic and social development, and education. A retrospective analysis is made of the first- and second-level networks from 1966-67 to 1970-71. Enrollment growth, participation and flow rates, origin of pupils, characteristics of school buildings and costs are comparatively analyzed by area. A brief examination of the economic and social background of the district and regional strategy for development is undertaken and a demographic analysis and population forecast is also given. Two schemes for the development of the school network are prepared, compared, and illustrated on maps. An assessment of teacher requirements and a comparative costing of the proposals are also included. The main conclusions of the case study are summarized in the final chapter. (Author/MLF)

**Descriptors**—\*Economic Development, Educational Demand, \*Educational Economics, Educational Finance, \*Educational Planning, \*Educational Policy, Human Capital, \*Investment, Manpower Development, Productivity, Teacher Supply and Demand

This book is intended to provide a basic introduction to the economics of education for individuals with a minimal background in economics. The first half of the book deals primarily with theoretical aspects, such as the demand for education, rates of return to investment in education, and economic growth and education. The second half of the book mainly examines the economic aspects of various educational policy issues, such as educational planning, finance, manpower, and teacher supply and demand. Topics of the individual chapters include resources in education, the demand for education, private returns to investment in education, social returns to investment in education, further aspects of rate of return analysis, education and economic growth, educational policy and planning, education and manpower, education and the labor market, teacher supply and demand, educational finance, and educational efficiency and productivity. **Document Not Available from EDRS**

**Descriptors**—Decision Making, Educational Change, \*Educational Trends, \*Futures (of Society), \*Methods, Models, \*Prediction, \*Research Methodology, Social Change, Values

This book is one expression of the trend to achieve a more systematic study of the future within the specific context of educational futures and their environments. It is intended to bring to educational leaders in a practical manner many of the technological forecasting techniques previously familiar only to science, the military, and industry. The 14 methods and other topics discussed were chosen from among more than 100 that have been described in the available literature. The contributors have made a conscious effort to relate the methods to significant and substantive problem areas of education. Some methods are much more quantitative while others are more qualitative. Some have already had use in education while others have not. Some

enable scholars to exercise intuitive thinking; others are constrained by rigorously defined methods. (Author/MLF)

**Descriptors**—Administrator Responsibility, \*Administrator Role, Decision Making, Educational Administration, Elementary Secondary Education, \*Management Education, Management Games, \*Problem Solving, \*School Superintendents, \*Simulation

This booklet presents an extensive simulation exercise intended to give readers a greater understanding of the role and responsibilities of the local school district superintendent and to aid readers in improving their administrative, interpersonal, and problem-solving skills. The booklet is organized in two major parts. Part 1 contains background information on a fictitious community and its school system and is intended to provide the context for part 2, which consists of approximately 30 simulated letters, memos, and similar items that might accumulate in a school district superintendent's in-basket during a week's time. Readers are expected to indicate what action they would take on each in-basket item, based on the information given them. The simulated materials were selected to represent a wide range of administrative functions and may be used in a variety of ways, according to the background and needs of different readers. (JG)

**Descriptors**—\*Discipline Policy, Due Process, Educational Policy, Elementary Secondary Education, National Surveys, Racial Discrimination, \*School Statistics, Student Problems, \*Student School Relationship, \*Suspension, \*Tables (Data)

This book examines the incidence and impact of school suspension and discusses its effectiveness as a disciplinary measure. Basically, this publication is intended to follow up and expand on a 1974 report on the use of school suspension, "Children out of School in America." Data for this current study were drawn from suspension data submitted to the federal Office for Civil Rights by 2,862 school districts, from an independent survey of over 6,500 families in nine states and the District of Columbia, and from more than 300 additional interviews with school officials and community leaders. Individual chapters offer an overview of the use of school suspension, present various educational administrators' views on school discipline, examine why children are suspended and how suspension affects them, summarize statistical data on the incidence of suspension, discuss suspension as a form of racial discrimination, describe the legal requirements for due process in suspension cases and suggest how schools can meet those requirements, and examine various approaches that have been tried as alternatives to suspension. Numerous tables that summarize statistical data on the use of school suspension are presented throughout the book and in the appendix. (JG)

 Descriptors—\*Administrator Guides, Educational Administration, \*Educational Finance, Elementary Secondary Education, Glossaries, \*Management Systems, Manuals, \*Recordkeeping, Records (Forms), \*School Accounting  
 Identifiers—\*California

This edition of the California School Accounting Manual completely revises the previous school accounting system in California. It is intended to provide the procedures and methods necessary for school business officials to develop any kind of financial information that may be requested by local, county, or state education agencies. This manual establishes procedures and codes for accounting income and expenditures by object, rather than by function. This new system provides maximum flexibility, as the object accounts may be combined in any number of ways to illuminate many different kinds of programs. The manual is organized in eight parts. Parts 1, 2, 3, and 4 present account codes and required accounting and reporting procedures; parts 5 and 6 discuss recommended procedures for stores systems and general ledger accounting; and parts 7 and 8 present glossaries of accounting and data processing terminology. Although the manual was prepared specifically for use in California public schools, many of the financial reporting forms and procedures described may be useful in other states as well. (Author/JG)

 Identifiers—\*Ontario

The monograph grew out of the Critical Issues Conference sponsored by the Ontario Council for Leadership in Educational Administration (OCLEA). At the one-day conference, 57 researchers and practitioners discussed the ten major areas of research and development needs. These areas, identified in advance of the conference, were leadership and administrator development, the organization, staff development, curriculum/instruction, philosophy/objectives, community education, financing of education, labor relations, evaluation, and sociological and environmental factors. The problems in these areas and the questions asked by the researchers in an attempt to state the research issues growing out of the problems are presented. After the meeting, the attendees were polled to determine the most important issues. The four most important areas were determined to be leadership and administrator development, the organization, evaluation, and curriculum/instruction. (Author/IRT)

**School Security and Rights of Juveniles.**

Pub Date 15 Jul 75

Note—29p.; Paper presented at the Annual Meeting of the National Association of School Security Directors (6th, Seattle, Washington, July 15, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Civil Liberties, \*Court Litigation, Crime, Delinquency, \*Delinquents, Due Process, Elementary Secondary Education, \*Juvenile Courts, \*School Vandalism, \*Student Rights, Supreme Court Litigation

After introductory sections on the incidence of crime among juveniles and in the schools, the author concentrates on the rights of students in the schools and in the courts. He traces the historical development of juvenile courts from their original intentions up to the Supreme Court decisions that have granted substantial civil liberties to juveniles. It is noted that not every case of delinquency (based on criminal law violations) need be referred to juvenile court. It is possible that an administrative unit of a school could make appropriate disposition of school-related delinquent acts, provided that the requirements of due process and fundamental fairness are met. If a student is referred outside the school system, it is reasonable to expect that he would be first referred to the juvenile court. If a juvenile is referred to the court, the school must be willing to accept the jurisdiction of the court as controlling. (Author/IRT)

Descriptors—Administrative Agencies, \*Board of Education Role, \*Court Cases, \*Court Litigation, Educational Finance, \*Educational Legislation, Elementary Secondary Education, Federal Legislation, Legal Responsibility, \*School Law, State Legislation, Student Rights, Teacher Employment

This book provides a general survey of current law governing schools in the United States. Constitutional, statutory, and administrative provisions affecting the schools are examined at both the federal and state levels; however, primary emphasis of the discussion is on court decisions pertaining to educational issues. A total of 105 new cases that have been adjudicated since publication of the first edition in 1968 are cited in this edition. The various chapters focus on the following topics: the federal Constitution and the schools, Congress and the schools, the U.S. Office of Education and the schools, the federal courts and the schools, state constitutional provisions for schools, state legislatures and the schools, state courts and the schools, state boards of education, chief state school officers, the local school district, school district tort liability, the local school board, school board authority over school property, school board authority over school finance, school board authority over teachers, school board authority over pupils, and school board authority over curriculum. **Document Not Available from EDRS**

Descriptors—Academic Freedom, \*Court Cases, \*Court Litigation, Elementary Secondary Education, Higher Education, Leave of Absence, \*School Law, Teacher Dismissal, \*Teacher Employment, \*Teacher Responsibility, Teacher Strikes, Tenure

This book presents and analyzes approximately 110 court decisions on a number of issues pertaining to the legal rights and responsibilities of teachers. The author discusses the significant legal principles involved in each case in an attempt to provide useful guidelines for teachers and school administrators. Except in the final chapter, the author limits his discussion to an objective appraisal of the legal aspects of the various cases and refrains from personal judgments on their propriety or social implications. The individual chapters focus on the following topics: the right of tenure, termination of tenure by dismissal, the right of leave of absence, the right of association, the right to teach certain controversial matters, rights outside the classroom, the right to strike, liability for pupil injuries, and conclusions and implications. Descriptors—Civil Liberties, \*Constitutional Law, Court Cases, Elementary Secondary Education, Higher Education, \*Religion, Religious Education, \*School Law, \*State Church Separation, \*Supreme Court Litigation

Identifiers—\*Entanglement Test

The scope of this book is limited to a study of case law encompassing the major decisions of the United States Supreme Court involving religion and education. It is intended to aid readers in predicting the legal ramifications of various legislative enactments and administrative policies affecting the schools and in understanding the reasoning and procedures of the United States Supreme Court. The book is divided into six chapters. Chapter 1 is an introduction to the courts' involvement in educational decision-making; chapters 2 and 3 examine the major constitutional tests utilized by the Supreme Court in resolving cases involving the relationship of religion to education; chapters 4 and 5 discuss the emergence of the new "entanglement" test from the earlier test of "neutrality" and "child benefit"; and chapter 6 attempts to synthesize the material presented and aid readers in understanding future legal ramifications of the "entanglement" test. **The Civil Rights of Students. Critical Issues in Education Series.**

Pub Date 75

Note—347p.

Available from—Harper and Row, Publishers, 49 East 33rd Street, New York, New York 10016 (\$4.95, paperback)

**Document Not Available from EDRS**

Descriptors—\*Civil Liberties, Civil Rights, \*Court Cases, Court Litigation, Dress Codes, Due Process, Elementary Secondary Education, Freedom of Speech, Higher Education, Racial Discrimination, Religion, \*School Law, Sex Discrimination, \*Student Rights

This book is intended to help students, teachers, administrators, and parents become more aware of students' legal rights and more sensitive to arguments on both sides of current civil rights controversies. The authors attempt, whenever possible, to translate legal jargon into language more readily understood by laymen, and they rely primarily on the "case" approach to discussing legal questions. This approach first

describes the situation surrounding a legal controversy, then poses several questions that confront the major implications of the case, and finally summarizes the opinion of the court. Summaries at the end of each chapter integrate the rulings of the diverse cases presented in the chapter. Individual chapters examine provisions and applications of school law involving freedom of speech, freedom of the press, freedom of association, freedom of religion and conscience, personal appearance, racial and ethnic segregation, sex discrimination, and due process of law. **Students' Legal Rights and Responsibilities. American School Law Series.**

Pub Date 71

Note—241p.

Available from—W. H. Anderson Co., 646 Main Street, Cincinnati, Ohio 45201 (\$8.00)

**Document Not Available from EDRS**

**Descriptors**—\*Court Cases, Court Litigation, Dress Codes, Due Process, Freedom of Speech, \*High School Students, Married Students, \*School Law, Search and Seizure, Secondary Education, Student Organizations, \*Student Rights, \*Student School Relationship

This book examines the impact of a variety of court cases involving the legal rights and responsibilities of public secondary school students. Each chapter begins with a brief commentary that provides an overview of a broad area of student rights, followed by a number of short sections that focus on significant subtopics. The final section of each chapter presents edited reports of leading cases applicable to that area of school law. Editing has been minimized in an effort to retain the flavor of each case; a total of 27 cases are reported in this manner. The individual chapters focus on the following topics: dress and personal appearance, freedom of expression, rights of married students, secret organizations, search of students and their lockers, and procedural due process. **An Introduction to Systems for the Educational Administrator.**

Pub Date 73

Note—204p.

Available from—Addison-Wesley Publishing Company, Reading, Massachusetts 08167 (\$8.95)

**Document Not Available from EDRS**

**Descriptors**—\*Educational Administration, Elementary Secondary Education, Higher Education, \*Management Systems, Organization, Organizational Effectiveness, \*Organizational Theories, Organizations (Groups), \*Systems Approach, \*Systems Concepts, Systems Development

**Identifiers**—PERT, Planning Programming Budgeting System, PPBS, Program Evaluation and Review

A comprehensive introductory book on systems theory and practice in education, this text is designed for introductory graduate-level courses or for self-study. It presents an introduction to a wide variety of subjects, with references for more detailed study of individual topics. The emphasis is split between systems thought and systems procedures; the applications parts are derived from the authors' research and practical experience. The theoretical foundation developed by the authors is operationalized in terms of administrative problems and situations. Numerous examples are included to illustrate the relevance of the systems mode of thought. Practical applications are then developed in the light of heuristic and viable systems concepts. The authors believe systems theory offers a method of operating that squarely confronts the issues of organizational effectiveness and efficiency. (Author/IRT)

**Descriptors**—\*Administrator Role, \*Communication (Thought Transfer), Conferences, Decision Making, Elementary Secondary Education, Faculty, Group Activities, Higher Education, \*Leaders Guides, Manuals, Problem Solving, \*Student Role, Trustees, \*Weekend Programs, Workshops

The weekend retreat provides an opportunity for a mixed group of persons interested in the activities of a college or school to meet and discuss problems of mutual interest. In this manual, experiential exercises are emphasized to insure high participation while at the same time providing direction and structure. All the necessary exercise descriptions, forms, and questionnaires are included. The exercises, which focus on several areas of community life, emphasize organizational roles. A situation description is provided, and the outlines of the roles to be played by students, faculty, and trustees are presented. (Author/IRT)

**Descriptors**—\*Educational Assessment, \*Educational Needs, Elementary Secondary Education, \*Games, Management Games, Needs, Parent Participation, \*Principals, \*School Community Relationship, Student Participation

**Identifiers**—Needs Assessment, \*School Program Bonanza Game

The School Program Bonanza Game is an approach to conducting a needs assessment. It differs somewhat from other needs assessment packages in that it attempts to provide a needs assessment concerning the overall purposes or goals of the school. In essence, the game asks people to choose a mix of variables from a range of competing alternatives. The way respondents choose indicates the trade-off values of individual items. This handbook provides a copy of the game, a section on administration and use of the game, and a section on the game's background. The game is to be administered to students, parents, board of education members, and laymen. (Author/IRT)

**Identifiers**—\*California

To become a capable and successful board member, an individual must be willing to devote many hours to serving as a school trustee—attending board meetings, school functions, conferences, and workshops, and thoroughly studying issues and problems demanding decisions. This manual gives a comprehensive account of these areas of board responsibility and the specific "how to's" of procedure. This issue, which incorporates the significant points of the previous editions, has been aimed at updating information of importance to board members as well as at clarifying the role of today's board member. It is hoped that this manual will give the new board member a mini-course in California public school boardmanship and will refresh and update the knowledge of board members who have already served for a period of time. **Identifiers**—\*Texas (Dallas)

This report describes a practicum project that was intended to develop, implement, and supervise a building teacher aide training program and to determine its impact on the performance of forty building teacher aides in the Dallas Independent School District. The design of the training program was to improve the performance of teacher aides in management services, multimedia services, clerical services, library activities, classroom procedures, office routines, and communication with students, while also improving teacher/aide relationships and giving aides a better understanding of their roles and responsibilities. Pretests and posttests administered to teacher aides in seven experimental and seven control schools showed that aides who participated in the training program showed significant improvement in all areas compared with the control groups. Detailed test results are presented, and copies of the tests and of the ten behavior checklists completed periodically by principals of the experimental schools are also included. (Author/JG)

**Descriptors**—\*Decision Making, Decision Making Skills, \*Group Behavior, \*Group Dynamics, \*Interaction Process Analysis, \*Problem Solving, Tables (Data), T Groups

This paper describes a study that compared the use of consensual, nominal, and conventional decision-making techniques in established and ad hoc groups. The impact of the structural interventions on group decision quality and group attitudes is examined and the appropriateness of the techniques in various situations is discussed. Findings of the study indicate that the nominal technique is particularly well suited to situations in which time is a critical factor, while the consensual technique is apparently better suited to situations in which decision quality is critical. Both the nominal and consensual techniques appear to yield better results than conventional decision-making methods do. (Author/JG)

**Identifiers**—Connecticut (Newington)

This report describes a practicum project that attempted to develop a management by objectives (MBO) model appropriate for use in the Newington (Connecticut) public school system and to train selected Newington administrators in the use of this management system. The Newington MBO model was designed to cope with a number of existing problems in the district; since most of these problems involved the high school, initial use of the MBO system was limited mainly to high school administrators. Newington administrators who used the MBO model during the 1974-75 school year stated that the model was of great value to them. A number of administrators from other school districts who reviewed the Newington MBO model felt that it would be of value in their districts as well. (JG)

**Altering the Apathetic Parent-Community Attitudes Toward an Inner-City Secondary Community School.**

Pub Date Aug 75

Note—137p.; Submitted in partial fulfillment of requirements for Doctor of Education, Nova University; Portions of the Appendix may reproduce poorly

EDRS Price MF-\$0.76 HC-\$6.97 Plus Postage

Descriptors—Academic Failure, Attendance, Change Strategies, \*Experimental Programs, Junior High Schools, Parent School Relationship, Program Design, \*School Community Relationship, \*School Improvement, School Vandalism, \*Student Attitudes, \*Student Behavior

This report describes a practicum project that attempted to reduce apathy among students and parents of students at an inner-city junior high school. All seventh-grade students at the study school and some of their parents were selected as the target group. A support team composed of noninstructional school personnel and community representatives was formed to plan and coordinate anti-apaty efforts at the school. The support team was particularly concerned with reducing such manifestations of apathy as absenteeism, tardiness, class cutting, vandalism, and failing grades, as well as with increasing student participation in extracurricular activities and parent interest and involvement in school affairs. Data on the various indicators of apathy among seventh-grade students were gathered before and after the practicum project. Comparison of prepracticum and postpracticum data indicated improvement on all of the student-related objectives, but no improvement in parent involvement. (Author/JG)

Identifiers—\*Michigan

This publication presents the results of a statewide study of the meaning, purpose, and methods of educational accountability that was conducted in the state of Michigan in 1974. Part 1 of the report examines the results of a public opinion survey designed to determine how Michigan residents and Michigan public school teachers perceive the concept of educational accountability and how they feel increased accountability may be achieved. Part 2 is a report prepared by the Educational Accountability Hearings Panel that summarizes the views expressed by Michigan citizens during the course of 13 public hearings on educational accountability. Part 3 presents the findings and conclusions of the Michigan Superintendent of Public Instruction, based on his review of the data from the public opinion survey and public hearings. A variety of accountability proposals offered by different organizations and individuals during the public hearings are presented in the appendix. (Author/JG)

There are grounds for concern about testing's relationship to the law because where a constitutional issue is involved, the burden of proof of need for the test immediately shifts to educators. Throughout the history of testing in this country, the courts have often intervened to assure that students, while they are in school, are free from discrimination, either in word or act, by school officials. Upon a prima facie showing of discriminatory impact, those doing the testing must demonstrate the rationality of the testing procedures and the validity of the tests. In a case presenting the clearest summary of the requirements of proper validation, the court set up four hurdles that the defendant must clear. First, the test must have differential validity, that is, it must have separate validation scores for all minorities. Second, the level of confidence for the test must be at the .05 level. Third, the testing procedure must contain an adequate sample. Fourth, the test must have been administered to all under uniform conditions—the local use of the test must closely conform to the sample, purpose, and conditions used in the test's validation. Descriptors—\*Academic Achievement, Administrator Attitudes, Educational Economics, \*Educational Facilities, \*Educational Finance, Parent Attitudes, \*School Community Relationship, \*School Schedules, Secondary Education, Student Attitudes, Teacher Attitudes

Identifiers—Four Day Week Schedule

Overcrowded schools are still a problem to many superintendents and principals who must

devise ways of maintaining the quality of educational programs with little or no additional expenditure per pupil while accommodating more pupils in the same facilities. One approach tried by a few districts at the secondary level is the rescheduling of the school week whereby students attend classes four days a week, with or without a corresponding increase in the length of the school day. Six operating programs and one proposed but untried plan are presented here. Although four of the programs were originally instituted primarily to relieve overcrowded schools, each program reportedly realized one or more additional benefits (reduced costs, reduced pupil-teacher ratio, or expanded course offerings). Locally prepared descriptive materials cite these "fringe benefits" as the real strengths of the program rather than the fact that the four-day week relieves overcrowding. An overview of the research on the relationship between length of instructional time and student achievement and an extensive bibliography are included. (Author/IRT)

**Teacher-Board Relations in Connecticut: A Summary of the Law Regarding Scope of Negotiations, Good Faith Bargaining, and Unfair Labor Practices. Preliminary Draft.**

Pub Date Sep 75

Note—72p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Boards of Education, \*Collective Bargaining, Elementary Secondary Education, \*Employer Employee Relationship, Industrial Relations, \*Labor Legislation, Labor Problems, \*Teachers

Identifiers—\*Connecticut

This document is a discussion draft intended to lead to the formulation of a set of guidelines by the state board of education concerning three areas of teacher negotiations: scope, good faith bargaining, and prohibited practices. It has been prepared in the form of an organized data base that focuses on summarizing the present state of the law rather than on suggesting changes in the law. Although treated separately, scope, good faith bargaining, and unfair labor practices are interdependent. For example, a refusal to bargain on a subject within the mandatory scope of negotiations and a violation of good faith bargaining can both be treated as unfair labor practices. Appendixes present a summary of the scope of Connecticut contracts, tabular analyses of state statutes, footnotes, and a bibliography. (Author/IRT)

Descriptors—Academic Achievement, Educational Resources, Elementary Secondary Education, Learning, Learning Processes, \*Learning Theories, Policy Formation, \*Student Attitudes, \*Student Development, \*Teacher Attitudes

This project researched three questions related to the production of cognitive skills in formal elementary and secondary education. The first question dealt with the pattern of student learning over time. It was found that, generally, the elasticity of grade eight knowledge with respect to grade eight school inputs is higher than the elasticity of grade eight knowledge with respect to grade one students who, then, might benefit from increased resource allocations in the early grades. The second question examined the preferences of teachers with respect to the level and distribution of learning within the classroom and to their own geographic location. Teachers attempt to maximize the average level of learning and to minimize the variance in learning in the classroom, though they strongly prefer to maximize achievement. The third question examined the relationship between student work effort and learning. It was found that student labor is a strong determinant of student learning. A summary

ry of the findings and their possible policy implications are presented in the body of the report with the complete studies presented in appendices. (Author/IRT)

This position paper identifies the purposes and underlying rationale of the middle school, outlines what the middle school program should be—curricular, instructional, and organizational—administrative, and presents some leadership implications. It is assumed that if educators understand the root causes of transcendent behavior, they will deal more rationally and sanely with that behavior. The characteristics of transcendent physical, intellectual and mental, and personality growth are presented as the rationales for specific recommendations and program implications. These recommendations and implications are designed to improve teaching and learning. The recommendations are intended as general guidelines and, while most will have relevance for all school districts in the United States, their interpretation into more specific program implications may reflect certain factors or nuances indigenous to individual districts. The suggested implications that follow the recommendations are presented to illustrate various program alternatives. The problems that must be met by middle school leaders—administrators, supervisors, state departments, universities, and professional organizations—in order to accomplish the middle school outlined are also dealt with. **Descriptors**—Academic Achievement, Attendance, Attendance Patterns, Costs, \*Educational Assessment, \*Educational Environment, \*Flexible Schedules, \*Flexible Scheduling, Questionnaires, Schedule Modules, Senior High Schools, Student Opinion, Surveys, Teaching Experience

This report is a compilation abstracted from an exhaustive investigation into three senior high

schools. The areas of investigation cover the general learning environment, selected characteristics of a learning environment, achievement, cost, a summary of findings, and recommendations. Also included are a survey of student opinion, a study of senior high attendance, a survey of teacher experience at one school, and an assessment of advantages/disadvantages of the scheduling method. It is recommended that flexible-modular scheduling not be continued in its present form. Rather, undesirable features should be eliminated and highly valued features should be retained if possible. The resulting schedule will likely hold little flexibility in terms of unscheduled student time, but should provide capabilities to retain high priority characteristics of a good learning environment. **Identifiers**—\*45 15 Plan

A ten-member committee was established to identify and illustrate the factors that significantly affect the articulation and compatibility of elementary and secondary school programs resulting from year-round school operation. The committee authorized six projects to implement its purposes. These projects were to create a library of year-round school materials, to survey local year-round schools, and to study vocational education, air conditioning, summer school articulation, and high school patterns as they relate to year-round schedules. Reports of these projects are in another volume. This report is presented in a format that reflects the three basic areas identified for study: community scheduling (planning time, real and imagined difficulties of the extended calendar, compatibility of adult work schedules in the extended calendar, youth job opportunities with the extended calendar), curriculum and instruction (desirability of pilot programs versus total district involvement, scheduling flexibilities, advantages of intersessions, financing curricular changes), and legal and personnel (legal factors, personnel factors, program planning factors). **Descriptors**—\*Air Conditioning, \*Articulation (Program), Educational Facilities, Elementary Secondary Education, \*Extended School Year, Feasibility Studies, \*Summer Schools, \*Year Round Schools

**Identifiers**—\*45 15 Plan

This is a presentation of six research reports conducted for a year-round school articulation and compatibility study. Presented are the reports of the committees concerned with a year-round school research bibliography library, a student employer survey, a general air-conditioning survey, a review of selected year-round school surveys, a summer school articulation report, and a research report of the 44-17 and other methods of year-round secondary school operation. The student employer survey was carried out in order to sample the conditions under which high school students are employed and the effect that year-round school would have on youth employment and the general business operation. The general air-conditioning survey was to determine the factors existing in the area schools; no attempt was made to estimate the operation costs for increased air-conditioning. The stress of the survey of year-round schools was placed on the most recent studies and surveys accomplished in San Diego County that attempted to measure the attitudes and opinions of various populations toward the year-round concept. The concept of trust and its implications for people working at various levels within school systems are explored. The school administrator is alerted to the elements of bureaucracy that inhibit the development of trust—hierarchy of authority, impersonal relationships and isolation, rules and regulations, close supervision and control, and decision-making practices. Research is cited of the results of a climate of distrust and the effects of a climate of trust. Some specific actions that a leader may take to develop a high trust level in an organization are discussed. (Author/MLF)

**Identifiers**—Elementary Secondary Education Act Title V, ESEA Title V, Project Next Step

This handbook provides references to ideas and programs that touch every aspect of comprehensive educational planning. The first section, Planning Overview, explains the steps in a comprehensive planning process. The second section, Information Resources, describes the New Jersey library system and other New Jersey and national sources of information useful to educational planning. The last sections contain annotated references categorized as theory and models, community participation, goal development,

needs assessment, problem analysis, selection of alternatives, implementation, evaluation, technical reference, and bibliographies. Since the categories overlap and many articles contain information pertaining to several of the categories, a cross-referencing system is employed. (MLF)

**Descriptors**—Creative Development, \*Creative Thinking, Curriculum Guides, Educational Games, Elementary Education, \*Environmental Education, Flow Charts, Futures (of Society), \*Instructional Innovation, Interdisciplinary Approach, \*Problem Solving, Simulation

The program outlined in this manual is an interdisciplinary method of teaching required curriculum (plus additional skills) to elementary students within the framework of a series of activities that relate subject matter to real-life situations. The activities of the program are divided into four slightly overlapping phases or topic areas, each dealing with a different area of development. Each phase is introduced by a statement of purpose and a diagram of developmental sequence. The sequence diagram breaks down each phase into a system of games and simulations and indicates the relationships of all activities in that phase. Following each phase is a list of suggested support activities. The activities progress from simple ones, which can be solved by individual students working alone, to complex ones, which require group organization. Each activity in the program is documented by topic, activity, purpose, objectives, materials, duration, and procedure. (Author/MLF)

Year-round schools are not a new phenomenon in American education. During the 19th century, cities such as Chicago, Boston, Washington, Cleveland, Buffalo, and Detroit held school sessions of 48 or more weeks per year. The traditional calendar is a misnomer; it came about primarily as a compromise between urban and rural legislators. Renewed interest in year-round schools became evident about the turn of the century because of the space and financial problems facing many school districts. Since the early 1960s, a variety of factors have led communities and school boards to consider, and sometimes to implement, year-round school operation. This report examines several educational programs of year-round school and their implementation. The report describes various types of year-round schools and identifies the objectives, impacts, promises, and criticisms of each model. The second report is an exhaustive bibliography on year-round schools including a summary of evaluation studies conducted on year-round programs. (NTIS)

This booklet is designed to explore some of the major areas of concern for a principal, especially for new principals and for assistant principals who aspire to the principalship. Emphasis is on the practical application of alternative courses of action. The booklet is organized according to the following categories: the nature of the job, administrative theories, categorical considerations (scheduling, staff utilization, negotiations, communications, accountability, student discipline), awareness, planning, inservice and evaluation, morale, and legal factors. Ten specific tips on how to perform in the role of the principal are included. (Author/IRT)

The 15 museums featured demonstrate the convergence of two ideas—the development of new kinds of museum experience, especially for the young, and the ongoing search for significant out-of-school educational opportunities. These museums provide students with educational experiences typically not possible within the schoolhouse. The purpose of these case studies is to render more visible the museum-education idea, to show the variety of programs and facilities that have emerged from disparate beginnings and yet have similar purposes, and to suggest some issues, facility implications, and funding sources for those planning such facilities. **Descriptors**—\*Architectural Drafting, \*Architectural Programming, \*Building Plans, \*Computer Graphics, \*Computer Programs, Facility Planning, Facility Requirements, Spatial Relationship, Systems Approach

Many of the costs of design, construction, and building operation derive from the reliance on drawings as the description of record of the building. As a replacement, this paper outlines the design of a computer system useful for storing and manipulating design information at a detail allowing design, construction, and operational analysis. A building is considered as the spatial composition of a set of parts. The system, called Building Description System (BDS) has the following associated with it: (1) a means for easy graphic entering of arbitrarily complex element shapes; (2) an interactive graphic language for editing and composing element arrangements; (3) hardcopy graphic capabilities that can produce perspective or orthographic drawings of high quality; and (4) a sort and format capability al-

lowing sorting of the data base by attributes, for example, material type, supplier, or composing a data set for analysis. (Author)

**The Executive and Executive Behavior.**

Pub Date Dec 74

Note—41p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Administration, \*Administrative Principles, \*Administrator Education, Communication Problems, Human Relations, Leadership Styles, \*Leadership Training, \*Management, Management Development, Office Management, Personality Assessment, Personnel Management

This paper presents those functions of an executive that relate principally to his duty to and involvement with people. Subtopics indicate the executive as a leader, a person, a human relations agent, an employer, and a problem-solver. Leaders may be categorized by personality factors, by methods of selection, or the manner in which the leadership function is executed. One of the most critical areas in which the executive is involved is that of problem-solving. While no specific set of character traits or particular executive style can be established as the best, research does indicate that certain personality traits and qualities of leadership are exhibited in successful executives. Essential personal characteristics include faith in humanity, genuine concern for others, initiative and integrity, and a sense of purpose and direction. Quality of leadership is characterized by the degree of technical mastery of the executive, a level of intelligence higher than that of most subordinates, and a social awareness enabling him to communicate effectively with others. This is a collection of the major papers presented at the National Organization on Legal Problems of Education annual convention. The papers reflect the diversity and complexity of the legal issues that affect schools. Major articles include "Legal Literacy and Teacher Education," by Louis Fischer and David Schimmel; "School Finance Reform in a Post-Rodriguez World," by Betsy Levin; "Legal Aspects of Educating the Developmentally Disabled," by H. Rutherford Turnbull III; "Student Conduct: Recent Developments in Constitutional Law," by E. Edmund Reutter, Jr.; and "Sex Discrimination in Educational Institutions and the Law," by Bernice Sandler. Fifteen other articles range in subject matter from the legal problems of student records and publications to the search of students and their lockers. This book contains a discussion of nearly every major legal issue with which educational institutions must deal. (Author)

**Descriptors**—Arbitration, \*Collective Bargaining, Elementary Secondary Education, \*Federal

Legislation, \*Federal State Relationship, \*Government Employees, Grievance Procedures, Labor Unions, \*Public Officials, Public Policy, Strikes, Teacher Strikes

The issues presented by proposed federal laws covering collective bargaining for public employees are perhaps the most important issues confronting public officials and the general functioning of representative government in our society. HR 8677 (and to a lesser extent HR 9730) is unacceptable because (1) it provides for federal regulation of state and local government employees; (2) it includes supervisors in the coverage of the law, leaving the public employer and the public without adequate representation; (3) it establishes unrestricted bargaining, allowing unions to virtually control the quantity, quality, and the general form of public services; (4) it legalizes strikes and establishes binding arbitration of interest issues; (5) it subjects all management decisions to the grievance process; and (6) it locks into unions public employees who should have a free choice to belong, or not to belong, to unions. Collective bargaining is a process of labor relations, not a device to determine public policy. (Author/IRT)

Descriptors—\*Affirmative Action, \*Court Litigation, Elementary Secondary Education, \*Equal Opportunities (Jobs), Equal Protection, \*Federal Legislation, Higher Education, Personnel Selection, Promotion (Occupational), Recruitment, \*Sex Discrimination, Students, Working Women

The author reviews recent legislation concerning sex discrimination and examines the courts' views of discriminatory employment practices and discriminatory practices against students. The legislation covered includes the following: Executive Order 11246 as amended by Executive Order 11375; Title VII of the Civil Rights Act of 1964, as amended by the Equal Employment Opportunity Act of 1972; the Equal Pay Act of 1963, as amended by Title IX of the Education Amendments of 1972; the Comprehensive Manpower Act of 1971 and the Nurse Training Amendments Act of 1971; and Title IX of the Education Amendments of 1972 (Higher Education Act). The author expects the impact of antidiscrimination legislation to be enormous and many of the traditional practices and policies of the educational world to come under increasing fire for their sex discriminatory impact. Document Not Available from EDRS

Descriptors—Administrator Responsibility, Civil Liberties, \*Court Litigation, Elementary Secondary Education, Legal Responsibility, \*Police School Relationship, \*Search and Seizure, \*Student Rights, Supreme Court Litigation

The present state of litigation on search and seizure will permit the warrantless search of a school locker by a school official who has reasonable suspicion that it contains something illegal, if he acts without the intrusion of the police. From the first and last search cases cited herein, it is abundantly clear that school officials exceed their authority when they subject students to strip searches and that they will be held accountable under assault and battery and civil rights theories if they conduct or allow such searches. As Gault and Tinker made clear, minor children who are enrolled in the public schools are citizens who retain their constitutional rights, even within the confines of the school environment. Descriptors—Censorship, Civil Liberties, \*Court Litigation, \*Self Expression, Senior High Schools, \*Student Publications, \*Student Rights

While noting the restrictions on the generalizability of case law, the author conducts a case-by-case review of litigation concerning student publications in the senior high school. He answers four questions: (1) May the teachers and/or administrators of a school exercise "prior censorship" or control over the content of independent-underground and/or school-sponsored student publications? (2) May a school board adopt a student expression policy or rule that restricts obscenity and/or pornography in independent-underground and/or school-sponsored student publications? (3) May school administrators establish rules that prevent or regulate the printing, distribution, or circulation of independent-underground and/or school-sponsored student publications both in and outside the school? (4) May an administrator take harsh punitive action against a student involved in the production or distribution of independent-underground and/or school-sponsored student publications that are obscene, are pornographic, contain articles critical of the school's administration, or advocate violation of laws or school rules? (Author/IRT)

Descriptors—Court Litigation, Elementary Secondary Education, \*Injuries, \*Legal Responsibility, \*Principals, \*Student Records

Identifiers—\*Tort Liability

The three talks included here treat aspects of the law—tort liability, student records, and the age of majority—as they relate to the principal. Specifically, the talk on torts deals with the consequences of principal negligence in the event of injuries to students. Assurance is given that a reasonable and prudent principal will have a minimum of legal problems. The concern in the area of student records is over who has access and what should be included in the records. On the latter point, the speaker advises administrators to tell the truth, the whole truth, and nothing but the truth. Because the main problems relative to the age of majority have to be worked out in specific state and local legal contexts, the speaker advises principals to initiate public discussion about the topic, much like a legislative committee hearing, to develop a form letter for parents that delineates the school's philosophy regarding 18-year-olds, and to inform 18-year olds in the school that no changes in the school's operating procedures are planned. Identifiers—Michigan (Detroit), Milliken vs Bradley

EA 007 652

In Milliken the Court has held that desegregation stops just short of the school district line. To require that school districts be merged to effect a racial balance, one of two factors must exist: a showing that the school district lines have been deliberately drawn to separate the races, and evidence that discriminatory acts in one district produce segregation in another district. A major revelation was the Court's position that a state is not necessarily accountable for the actions of one of its local agencies, the school district. This holding may well have implications for future litigation, not only in the area of desegregation but in all of education. The immediate impact of the decision will be to slow down desegregation in both North and South. The decision does not, however, foreshadow a slowdown of desegregation within individual cities. It is likely that the strategy for the next few years will be to concentrate on desegregation in small or medium-sized cities where a case for a dual system can be easily made and where the task of converting to a unitary system will be considerably easier than in a very large city. Descriptors—\*Administrative Personnel, \*Administrator Education, Educational Administration, \*Graduate Study, Higher Education, \*Law Instruction, School Law

School law must be recognized as a prerequisite in training for good school administrators. What is really needed is awareness of the law, so that legal counsel will be called in when needed. Graduate courses should never be directed toward any other goal. In pursuing that goal, courses should cover both procedural and substantive law. The unique role of the courts must be understood so that a school can function as a governmental unit that can use the courts as a valuable resource. The emphasis of a graduate program should be placed on analysis of court decisions and reading and abstracting cases. A school administrator needs these skills when he is asked to implement a court decision. There are five questions a university must address in designing graduate courses in the law of education: (1) To whom should school law be taught? (2) When should it be taught? (3) What should be taught? (4) How should it be taught? (5) How does one evaluate the program? (Author/IRT)

**Descriptors**—Higher Education, \*Law Instruction, \*Preservice Education, \*Teacher Education, \*Teacher Education Curriculum, Teacher Role

The speakers describe how they have reorganized an introductory education class so that one of its goals is the heightened legal literacy of beginning teachers. The two courses that most readily lend themselves to this restructuring are commonly known as "Introduction to Education" and "Social Foundations of Education." This approach seeks to introduce cases related to the constitutional rights of public school teachers and students. All the cases arise from the ongoing activities of schooling in America. They represent real problems and capture the students' interest. The cases are used as springboards for study of the diversity of the American culture, particularly those aspects that relate directly to schools and education. Included is an outline illustrating the dovetailing of some important legal materials with material commonly found in a social foundations course. The course outline has seven topical headings: cultural diversity and the schools, freedom of expression, private life and personal appearance, patriotism and freedom of association, professionalism, due process for teachers and students, and education and equality. This presentation focuses on specific applications of the rule-making power of public school authorities. Many of the cases involving student-school board conflicts are decided without a holding on the merits of the rule involved. Obviously, if due process is not observed in meting out a punishment, the court will hold for the student without reaching the rule. Likewise, if the type or extent of punishment is successfully challenged, the validity of the rule may not be decided, although dicta may be relevant to the point. The following are minimum essentials for an enforceable rule of student conduct: (1) the rule must be publicized to the students; (2) the rule must have a legitimate educational purpose; (3) the rule must have a rational relationship to the achievement of the stated educational purpose; (4) the meaning of the rule must be reasonably clear; (5) the rule must be sufficiently narrow in scope so as not to encompass constitutionally protected activities along with those that constitutionally may be proscribed in the school setting; and (6) if the rule infringes on a fundamental constitutional right of students, a compelling interest of the school (state) in the enforcement of the rule must be shown. **Identifiers**—\*Rodriguez, Serrano vs Priest

This paper traces the arguments and effects of both the Serrano and Rodriguez decisions and ex-

amines the state litigation and legislation spawned by them. The author notes that while the pace of school finance reform litigation has slowed, it has not halted altogether. It is now more tailored to the characteristics of the individual states involved. One of the problems with the earlier litigation efforts was that the only theory relied on was that of "fiscal neutrality." No single legal theory can apply to the school finance system of every state, as the nature of the finance system and the problems created by it differ from state to state as do state constitutions and statutes. A review of the 1972-73 legislative reforms indicates that reliance on the local property tax as a major source of education revenues has been lessened. One result of the Serrano-type litigation and of the many research studies that Serrano triggered is that many states have developed a greater sophistication with regard to the problems involved in school finance reform. States now look at a number of district characteristics, such as average personal income of a district, price or wage differentials, and the concentration of high need students, to determine the equity of the distribution of wealth. **Descriptors**—Court Litigation, \*Due Process, Elementary Secondary Education, Emotionally Disturbed Children, \*Equal Protection, \*Exceptional Children, Handicapped Children, Physically Handicapped, Retarded Children, State Legislation

A major legal development in the 1970s has been the extension of the principle of egalitarianism to the developmentally disabled, particularly the mentally retarded. The principle that all persons, however unequal they may be in terms of their development, should be treated equally in the sense of being granted equal opportunities has been expressed by professional educators and the courts. Equal protection, the "access" theory, due process, and procedural requirements are involved. Typically, the courts have set forth detailed procedural requirements for implementing a judicially recognized right to education. These include notification of affected parties, evaluation and placement of children, periodic reexamination, and establishment of classification criteria. The case law on the right to education is also a state matter, as nearly all state constitutions provide for education for the children of the state. Most of the specific procedural and substantive changes in the law have taken the form of implementation of a "zero-reject policy," a policy that all children have a right to publicly supported education. **Descriptors**—Civil Liberties, \*Court Litigation, Due Process, Federal Legislation, \*Higher Education, \*Student Rights, \*Student School Relationship

During the past dozen years administrators in higher education have been faced with student action that took the form of protest and that many times became violent. Student action is somewhat quieter now and the battleground has shifted largely from the campus to the courtroom. Both procedural and substantive due process are recognized by the courts as rights applicable to the college setting. Students have also pressed for and received recognition that the First Amendment freedoms of speech and expression apply to them. The guidelines included here are offered to help institutions meet the standards of the courts and of applicable legal statutes. The guidelines

cover the implications of the new age of majority, the actions students have taken against student activity fees, and the implications of federal legislation, notably Title IX of the Education Amendments of 1972 and the General Education Provisions Act (with the "Buckley Amendment"). (Author/IRT)

There is evidence that under certain circumstances public school administrators and board members avoid complying with laws that conflict with their personal notions of the proper legal constraints that should circumscribe the performance of their official duties. Although school desegregation is the most dramatic area of non-compliance, it is not examined here because the role played by school officials has been equalled and often overwhelmed by the roles of political and social forces outside the control of the school officials. Only those variables over which school attorneys, board members, and administrators have some influence are relevant here. These variables are (1) the communication of the nature of known legal requirements by school officials to those employees responsible for behaving in accordance with the law; (2) the formal structure of the school district insofar as it can facilitate or inhibit compliance with the law; (3) the informal group processes within the school district that support norms of either compliance or noncompliance with the law; and (4) the personality of individuals who are in key positions to influence compliance or noncompliance. **Descriptors**—\*Child Abuse, Elementary Secondary Education, Federal Legislation, \*Noninstructional Responsibility, \*School Law, \*School Role, State Legislation

Recent state legislation aimed at dealing with the problem of child abuse has been confined to statutes affecting the reporting of abuse. The basic objective of these statutes is the identification of the abused child. The statutes all have two fundamental elements: a designated class of persons—teachers, doctors, social workers—who do the reporting, and oral and written reports that are made to officials so they may take action. Reporting statutes should have the following desira-

ble items: (1) language that makes reporting mandatory and penalizes those who neglect to make a report, (2) good faith immunity for all reporters, (3) alternatives to reporting to a law enforcement agency since to allow the report to go to a law enforcement agency would result in further resentment between parent and child, and (4) confidentiality of records and provision for expungement if allegations of abuse are unfounded. This year, under the Federal Child Abuse and Prevention Act, the federal government assumed the responsibility for providing more effective assistance to state, local, and voluntary agencies in order to strengthen services to the abused child and his family. Identifiers—\*Elementary Secondary Education Act Title I, ESEA Title I

After a brief synopsis of the 1974 legal activity centering on the church-state relationship, the speaker examines three particular cases: the United States Supreme Court decision in *Wheeler v. Barrera*, a Missouri district court decision in *Luetkemeyer v. Kaufmann*, and the Supreme Court decision in *Franchise Tax Board of California v. United Americans for Public Schools*. The first case is a complex one centering on three main issues: (1) Does Title I of the Elementary Secondary Education Act mandate public-supported teachers to provide remedial "on-the-premises" instruction during regular school hours in parochial school programs that are similar in substance to Title I programs in public schools? (2) Would a Title I funded teacher providing disadvantaged children with instruction in "on-the-premises" parochial schools violate the establishment clause of the First Amendment? (3) What type and limitation of "comparable" Title I services are parochial schools entitled to? In *Luetkemeyer* the court found that Missouri's statutes providing public bus transportation to public schools and disallowing public transportation to private and parochial schools are constitutional. In the third case, the Supreme Court affirmed that California's parochial aid "tax credit" statute is unconstitutional. (Author/IRT)

Descriptors—\*Board Administrator Relationship, \*Boards of Education, \*Contracts, Elementary Secondary Education, \*Employment Practices, Job Tenure, \*School Superintendents

Attempts to write definitely on public school administrators' rights to continuing employment are risky because states vary so widely in their statutes. There is not much litigation about administrators' rights because in most states administrators are not covered by the same tenure laws that protect teacher employment. Statutory law in some states allows local boards to reassign a principal back to classroom duty without the necessity of a hearing on the merits because persons may become eligible for tenure as teachers but not as principals. School administrators are considered to be district employees, not officials, and serve at the pleasure of the board; therefore, they are more likely to be controlled by the conditions of their contracts, which can contain a no-tenure clause and the 30-day termination provision as part of the conditions of employment. It is hoped that in the future the role of the superintendent can be made more legally specific

because he needs the protection the law can give. (Author/IRT)

**The PASS Model Project: Development, Evaluation and Dissemination of a Service Delivery System for Learning Disabilities.**

George Peabody Coll. for Teachers, Nashville, Tenn.

Spons Agency—Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.

Pub Date Jan 75

Contract—OEC-0-74-8726

Note—35p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Delivery Systems, \*Demonstration Projects, Diagnostic Teaching, Elementary Education, Exceptional Child Education, Information Dissemination, Inservice Teacher Education, \*Learning Disabilities, \*Program Descriptions, \*Psychoeducational Processes, Regular Class Placement, Special Classes, Student Characteristics

Identifiers—Project PASS Model, \*Psychoeducational Agency School System Model

Described is the Psychoeducational Agency/School System (PASS) Model Project which is providing full or partial services to approximately 152 learning disabled (LD) elementary school children. It is explained that the project involves planning, implementing, and evaluating a replicable delivery system of resource and special class services relating to children and their families, psychoeducational personnel, and research and development. Described are project objectives including revising the referral and assessment process within the school system, improving the self concepts of the PASS children, developing staff professionals to serve as better behavioral change agents, and offering a fully developed and evaluated model approach to LD applicable in a wide variety of communities. The project is seen to utilize the facilities of a community-oriented psychoeducational agency, a school system using diagnostic and prescriptive methods, and a coordination mechanism linking the two systems. Initial data are provided showing that LD children in the project perform lower in verbal than performance skills, function intellectually somewhat lower than the norm, possess a relatively normal self concept, and perform significantly higher in math than in reading. Also noted is a replication and dissemination strategy involving the production of educational products for administrators, psychoeducational personnel, and parents. (DB)

**Developmental Reinforcement and Education.**

Pub Date 75

Note—21p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Child Development, Conceptual Schemes, Early Childhood, Exceptional Child Education, \*Learning Disabilities, Models, \*Reinforcement, Sequential Learning, Stimulus Behavior

Using a developmental model, the author explains a hierarchy which describes how a young child learns to respond to various types of environmental stimuli and discusses some educational consequences of a reinforcement stimuli deficit. Development is seen to take place in succession beginning with the primary level, proceeding to the social, symbolic, and abstract levels with each level dependent upon learning to respond to reinforcing stimuli at the previous levels. It is suggested that learning problems such as hyperactivity may be due to the selection of reinforcers at the wrong developmental level. Educators are encouraged to emphasize a student's developmental level of responsiveness to reinforcing stimuli (such as teacher's reaction to child's behavior) as well as eliciting stimuli (such as instructional materials or activities). Descriptors—Exceptional Child Education, \*Identification, Kindergarten, \*Learning Characteristics, \*Learning Disabilities, Primary Education, \*Program Descriptions, Screening Tests, \*Testing

Described is a program to identify potential learning problems and learning styles in 131 kindergarten children through the assessment of global intelligence, gross and fine motor skills, visual perception skills, auditory perception skills, speech and language development, social skills, alphabet recognition, and number concepts. Standardized tests and informal assessment measures used in the screening program are described. Organization of the testing program involves eight testing stations; a professional staff of three social workers, two psychologists, three speech therapists, and one learning disabilities teacher; and 20 volunteer parents or graduate students. The program has distinguished five groups of children ranging from children needing gross motor or language experiences to children ready for the prereading program. (Author/DB)

**A Theoretical Context for Handicap in Learning.**

Pub Date 75

Note—13p.; Paper presented at the Conference of the International Scientific Federation of Learning Disabilities (2nd, Brussels, Belgium, January 3-7, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Child Development, \*Cognitive Development, Definitions, Exceptional Child Education, \*Learning Disabilities, \*Learning Theories, \*Remedial Instruction, \*Task Analysis

Identifiers—\*Dysymbolia

Presented is a theory of learning handicaps based on psychoeducational and developmental considerations. Identified are five of the author's biases about remediation such as the tendency for teachers to continue remediation beyond the point of usefulness. Proposed is the existence of five task requirements such as attending to the task, attaching labels to the task, and expressing the task activity. Discussed in terms of normal age ranges and remediation are the following developmental functions: sensory orientation (0-3 years), memory (3-7 years), re-cognition with a vocabulary emphasis (8 to 11 years), synthesis (11-13 years), and communication (14 years and up). The author suggests that remediation is most effective when the function disability is diagnosed within the critical age range. Also defined is a term, dysymbolia, to be used to describe a handicap in dealing with symbols. The condition is defined in terms of four criteria: deviance, the possibility of normal achievement, the presence of the handicap into maturity, and an etiology found within developmental dysfunctions. Descriptors—Exceptional Child Research, \*Identification, \*Learning Disabilities, Reading Ability, \*Sequential Learning, \*Student Characteristics

Compared were the characteristics of 60 learning disabled (LD) and 60 normal children (all between 8- and 11-years-old) participating in the Georgia Reading Research Program. The target group consisted of LD children who showed deficits in the psychological process of ordering/sequencing; while the LD reference group were average or above average in ordering/sequencing abilities. Instruments used to assess these deficits were the Wechsler Intelligence Scale for Children Sequencing Triad and the Wide Range Achievement Spelling Test. Other differences between the two groups were that the target group had instructional reading levels one or more years below their expected grade placement levels and were enrolled in special classes; while the LD reference children were enrolled in regular classes and were reading within six months of expected grade level. The program was to focus on an evaluation of specific curriculum treatments designed to facilitate reading achievement. (Author/DB)

Note—7p.; Paper presented at the Conference of the International Scientific Federation of Learning Disabilities (2nd, Brussels, Belgium, January 3-7, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Exceptional Child Research, Learning Disabilities, \*Perceptually Handicapped, \*Questioning Techniques, Regular Class Placement, Senior High Schools, Teacher Attitudes, \*Teachers

Examined were the number and type of questions asked by the teachers of six high school social studies classes, three of whom knew which children had been identified as perceptually handicapped. Observers noted whether questions were of a cognitive-memory, convergent, divergent, or evaluative nature. Results suggested that teachers ask children with learning problems questions at a different level than they ask non-perceptually handicapped children regardless of whether the teacher is aware of the children's problems. It also appeared that when regular classroom teachers know they have some children

with learning problems in their classes, not only do they change the level of questions they ask these children, but they change the level of questions they ask all children. Teachers who knew they had perceptually handicapped students in their classes asked significantly fewer questions of all their students than did teachers without this knowledge. (Author/DB)

Descriptors—\*Associative Learning, Exceptional Child Research, \*Learning, \*Learning Characteristics, \*Learning Disabilities, Reading Skills, \*Vocabulary

Summarized are four studies which compared the ability of learning disabled (LD) and normal students to learn the meanings of homonyms (words that sound alike but have different meanings) when presented in various modes. Homonyms were presented in either random order or in contiguous pairs, with the illustrative sentences presented after the word when in random order or after the pair, and in the presence of context cues or without context cues. Results indicated that normal students learned at a higher rate than LD students, that LD students needed to be provided with a pattern for organizing information, that context cues were a determiner of effective learning for both normals and LD pupils, that context served as immediate reinforcement for both groups of pupils, and that paired homonyms were learned more readily than homonyms presented in random sequence. Note—10p.; Paper presented at the Conference of the International Scientific Federation of Learning Disabilities (2nd, Brussels, Belgium, January 3-7, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Exceptional Child Research, \*Learning, \*Learning Disabilities, \*Reading Comprehension, Reading Skills, \*Sentence Structure

Summarized were eight studies comparing aspects of sentence comprehension skills in normal and learning disabled (LD) children. Questions such as the following were posed: Does the transformation of kernel sentences to passive negative questions affect sentence comprehension? Does the amount of feedback affect the level of sentence comprehension? Do visual phrasing cues affect comprehension of simple or complex sentences? Analysis of results suggested conclusions such as the following: Normal children score higher in sentence comprehension regardless of the type of reading task than do LD children. The rate of learning over the first trials is higher for normals than LD children, though the learning rate of LD children may continue to increase over trials after the normals' learning rate has leveled off. Passive negative questions are as easy to comprehend as kernel sentences for both LD and normal children. Visual phrasing cues do not affect sentence comprehension. (Author/DB)

Descriptors—\*Behavior Change, Elementary Secondary Education, Exceptional Child Education, \*Learning Disabilities, \*Operant Conditioning, \*Research Methodology, \*Teaching Methods

Reviewed are some of the most effective behavior modification techniques for use with learning disabled (LD) children. Compared are the medical, psychometric, and behavioral models of LD; and discussed are the criteria used for classifying LD. Principles of applying motivational techniques such as selecting an effective reinforcer are considered. An example of a successful behavior modification teaching program which increased on task time of LD students through use of teacher attention as a reinforcer is presented. Also examined are methodological considerations of the behavioral model including selection of research design and the application of statistical procedures such as the analysis of variance using multiple regression. Pub Date Jan 75

Note—12p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Cerebral Dominance, Definitions, \*Dyslexia, \*Etymology, Exceptional Child Education, \*Growth Patterns, \*Individual Differences, Learning Disabilities, Linguistics, Maturation, \*Psycholinguistics

The nature of dyslexia is defined and reviewed in the context of neurological and educational processes and the nature of a written language system. An illustrative case history of a typical dyslexic child is presented. The nature of a script system is examined in the light of current linguistic and psycholinguistic studies. Noted are characteristics of the rule governed written language system such as scriptphonetic relationships. Stressed is the interface between the language system and maturational factors including unidirectional sensory and motor modes of perceiving. The incidence of dyslexia is related to the probabilities of individual differences in lateralization of brain function. It is concluded that dyslexia can be regarded as a primary difficulty based on the incompatibility between the written language system itself and the intrinsic developmental skills of an individual's perceptual motor system. Pub Date Jan 75

Note—9p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Cerebral Dominance, \*Dyslexia, \*Electroencephalography, Elementary Education, Etymology, Exceptional Child Research, \*Genetics, Learning Disabilities, \*Neurology

Electroencephalographic studies were done on 25 dyslexic and 25 normal reading children (all between the ages of 8 and 13 years). Results indicated that, of dyslexic Ss showing evidence of unresolved dominance in the EEG recordings, 35 percent of cases were possibly genetically determined with a further 40 percent possibly neurologically impaired. Inter-group findings revealed differences in the amount of alpha activity in the two hemispheres with dyslexic Ss showing more activity on the dominant side or no difference at all, whereas controls showed more activity on the non-dominant side. Findings suggested the presence of lateral dominance and cortical organization in the control group on normal readers and no comparable resolution of dominance in both the genetically and neurologically determined cases of dyslexia. **Descriptors**—Elementary Education, Exceptional Child Education, \*Grouping (Instructional Purposes), \*Learning Disabilities, Models, Program Effectiveness, \*Regular Class Placement, Remedial Programs, \*Resource Centers, \*Tutoring

Described and evaluated are four alternative tutoring models for delivering supportive educational services to elementary grade learning disabled children in regular classes. Discussed are problems of individual programing and models such as the "Cascade of Services" to provide for differing educational needs. It is explained that the alternative models have all been used at a St. Paul, Minnesota elementary school within the context of a total school resource program which is outlined. Described are the following models: one-to-one tutoring model, rotating learning stations model (with a teacher-student ratio of 3-1), the open skills scheduling model (in which children rotate through individually assigned independent tasks or reading with teacher), and the high intensity learning system model (which involves correlating instructional needs with reading behaviors in a commercially published package). It is reported that in a 2-year study comparing the effectiveness of learning disabled high school tutors with adult tutors no significant differences were found; that in a study comparing the tutoring model with the rotated learning stations model no significant differences were found; and that a third study to determine the effectiveness of the entire resource program showed greater than expected gains in reading, spelling, and mathematics. **Prototypes for Teaching Word Meaning Skills--Synonyms-to Learning Disabled Children.**

Educational Testing Service, Atlanta, Ga.

Spons Agency—National Inst. of Education (DHEW), Washington, D.C.

**Pub Date 75**

**Grant**—OEG-0-71-4157(607)

**Note**—8p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Elementary Secondary Education, Exceptional Child Research, \*Learning Characteristics, \*Learning Disabilities, Performance Factors, \*Teaching Methods, \*Vocabulary

Evaluated in four studies comparing the learning of synonyms by learning disabled (LD) or normal children were the effects of four treatments: varying amounts of material to be learned, varying amounts of practice, varying stimulus familiarization, and varying association value. Results were inconclusive regarding optimal amount of material to be learned at one time. LD students required three times as many practice trials as normal Ss, thus stressing the importance of drill for LD Ss. Increasing the stimulus familiarization did not significantly improve the LD Ss' learning of synonyms. Finally, both normal and LD Ss learned more rapidly the high association synonyms, though this treatment was more effective for normal Ss than for LD Ss. (DB)

**Language Production Deficits in Learning Disabled Adolescents.**

**Pub Date 75**

**Note**—16p.; Paper presented at the International Federation of Learning Disabilities (Second International Scientific Conference, Brussels, Belgium, January 3-7, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Cognitive Development, Exceptional Child Research, \*Expressive Language, \*Language Ability, \*Learning Disabilities, Secondary Education, \*Speech Skills

Evaluated were language production deficits in 32 learning disabled (LD) adolescents. Ss were administered a battery of subtests containing tasks sensitive to language production difficulties in cognition, convergent and divergent production of semantic units, word retrieval, and retrieval of syntactic structures. Results indicated that speech characteristics of LD Ss were close to normal except that phrase length was short and the simple declarative grammatical form was dis-

proportionately used. Other findings showed that LDs were significantly deficient in the ability to retrieve accurate verbal opposites, to label pictorial presentations, to name foods, to formulate sentences, and to define words. Results suggested that oral language problems and productive language deficits in younger LD children may persist into adolescence. Findings also suggested a relationship between productive language deficits and delays in development of cognition and retrieval of verbal and syntactic elements. (DB)

Described is the Therapeutic Preschool, a community based program with university affiliations serving two classes of five emotionally disturbed preschool children and their families. Noted are diagnostic, research, and community service aspects of the program. Focused on is the role of the social worker in the parent education component. Included are a listing of tests and their purposes in the standard diagnostic procedure and a case study of a 5-year-old boy. Discussed is the program's demonstration aspect which is reported to include the training of day care center staff and plans to provide inservice training to pediatric residents, nursing students, and mental health agents. The role of the teacher in the preschool is examined in terms of assessment, therapy, intervention, and consultation. (DB)

Descriptors—\*Educational Methods, \*Educational Needs, Educational Programs, Effective Teaching, Elementary Secondary Education, Exceptional Child Education, Instructional Materials, Measurement, Program Design, \*Severely Handicapped, Task Analysis, Teaching Methods, Transfer of Training

Eight basic components of instructional programs for severely handicapped students are discussed. Components are seen to involve determination of content, rationale, method, materials, measurement and student performance. Emphasized is the need for a task analysis orientation to determine content and for developmentally sound longitudinal curriculum to justify teaching a specific skill. An eclectic approach to questions of methodology is advocated, basic principles of instructional measurement are reviewed, and the importance of students' rate of response is considered. Use of functional and nonfunctional tasks is one topic covered in a discussion of materials. A skill is said to be generalized when it is performed across persons, places, instructional materials, and language cues. The list of components concludes with the importance of arranging for students to be able to perform the task without directions to do so from an authority figure. (CL)

Described is the application of error-free learning to the education of severely retarded and multiply handicapped children (infancy through middle school years). It is explained that two projects at the University of Kentucky (Programmed Environments and Telecommunications for the Severely Handicapped) focus on a programed environment in which the children's interactions with automated learning devices and with adults are arranged to increase the probability of correct responses. Data in the form of graphs and tables are presented for selected children's performance on programs to establish stimulus control, build a simple response repertoire, select reinforcers, and improve basic reading and math skills. In each example, problems in the development of errorless programs and resulting modifications are noted. (CL)

In an on-going pilot study, training procedures previously found successful with moderately and severely retarded adolescents and adults have been adapted to teaching trainable retarded children (6-, 8-, and 10-years-old) to assemble a 14-piece container brake. Modifications in the carefully detailed task analysis approach have included the need for new formats and feedback strategies. Preliminary data indicates a slow but regular rate of progress in the Ss' skill acquisition. (CL)

**Spatial Orientation Ability in Learning Disabled Children: Effects of Plane and Relative Position.**

Note—21p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

**Descriptors**—Age Differences, Analysis of Variance, Elementary Education, Exceptional Child Research, \*Learning Disabilities, \*Space Orientation

To investigate the effect of mirror-image and aligned relative positions with learning disabled (LD) children, and to explore the development of orientation ability in both LD and normal children, 30 LD and 30 normal Ss (6- and 8-years old) were given a task in which they were required to match their "horseshoe" to that of the examiner. Twenty-four random presentations consisted of eight combinations of up-down or left-right orientations in mirror-image or aligned relative positions. Findings indicated that mirror-image relative position was significantly more difficult for all Ss than the aligned position, and that LD Ss made significantly more errors than normal Ss. No difference was found between 6-year-old LD and normal Ss, but 8-year-old LD Ss made significantly more errors than 8-year-old normal Ss. (Author/LS)

**Descriptors**—Conceptual Schemes, Exceptional Child Research, \*Language Development, Language Patterns, \*Language Research, Learning Characteristics, \*Mentally Handicapped, Models, \*Questioning Techniques, \*Research Reviews (Publications)

Summarized in terms of competence and performance models is the development of questioning behavior in the language repertoire of retarded children. The role of questions, particularly WH questions, is reviewed in adult language (semantics and pragmatics) and children's language (receptive and expressive abilities). Discussed is research dealing with the effects of questions on learning and early language development (including parent-infant interaction analyses). Studies of children's interrogative production in English and other languages are considered along with research on children's comprehension of interrogatives. Results of studies with retarded children are explained to indicate similar though delayed development when compared to normal acquisition. Suggested are implications for language intervention, including the use of appropriate types and levels of questions to promote recall or language stimulation. (CL)

**A Study of the Special Education Placement Procedures in Montgomery County. Maryland Public Schools.**

Montgomery County Public Schools, Rockville, Md.

Pub Date 14 Jul 75

Note—52p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—Administrative Policy, \*Disadvantaged Youth, Exceptional Child Research, \*Minority Groups, Parent Attitudes, Program Development, \*Program Evaluation, Questionnaires, \*Special Education, \*Student Placement, Teacher Attitudes

**Identifiers**—Maryland (Montgomery County)

Three outside consultants were asked to evaluate the validity of current special education placement procedures and policies in the Montgomery County, Maryland Public Schools (MCPS) to determine their effect on minority students. Procedures for obtaining information included mailing questionnaires to 396 families and observing in-service staffing conferences and area screening committee meetings. Major findings were that there was no evidence of racial or socio-economic class discrimination in MCPS written policy and placement procedures or in the MCPS 5-year Plan for Special Educational Services; that staff members needed to develop greater sensitivity to minority issues during the initial screening and classification process; that improvement was needed in the quality of placement conference data; that testing policies and the use of test results needed to be clarified; that the majority of parents surveyed were satisfied with the placement procedures and their children's program; and that MCPS personnel had a low tolerance for students who exhibited behavior or background different from established community norms. Evidence supported recommendations in 11 areas: communication, school-by-school needs assessment, pre-referral procedures, identification and classification procedures, staff development, testing and policy procedures, school medical advisors (SMA), parent concerns, programs, human relations, and public relations; and included that there be a review and classification of the role of SMAs in the placement process. (Provided are appendixes such as the MCPS questionnaire.) (SB)

**Identifiers**—Informal Assessment, Pennsylvania (Bucks County)

Bucks County, Pennsylvania intermediate unit (IU) programs for the gifted are discussed in terms of Pennsylvania standards for the gifted, pupil selection methods, and IU services for the gifted and talented. Among topics covered in a section on program standards are guidelines for selecting gifted pupils (from kindergarten through the grades); organizational patterns (such as independent study, tutoring, and small group instruction); special instructional materials; and personnel certification requirements. Briefly explained are methods for pupil selection such as observation of personal qualities, identification of superior readers, and criteria (including social or economic deprivation and learning disabilities) for granting exceptions to the minimum IQ requirement of 130. Descriptions of the IU services provided include seven types of pilot programs in such areas as humanities, special interest enrichment programs, philosophy, and mathematics; art scholarships for talented 10th and 11th grade pupils; and a resource center which houses media and curricular materials as well as a professional library on the gifted and talented. Appended are a worksheet to record multiple data for pupils and sample checklists to screen for giftedness, evaluate personal qualifications, and identify superior reading skills. (SB)

**Identifiers**—Project I CAN

Summarized are the proceedings from a special study institute on the I CAN Project which has developed individualized physical education curriculum materials for trainable retarded students. It is explained that the project cover instruction in aquatic skills, body management, fundamental skills (such as locomotion and object control), and health fitness skills. The diagnostic prescriptive model is recommended, and assessment procedures are reviewed. Discussed are principles of prescribing instruction, including such considerations as instructional grouping and skill sequencing. Techniques for individualizing instruction are suggested, and examples of lessons are provided with information on general directions, physical manipulation, environmental manipulation, modeling and materials. Continuous progress reporting is advocated to record student achievement for parents and students. Reactions of workshop participants to the individual sessions are summarized. (CL)

**Descriptors**—Administration, \*Consultants, Evaluation, Exceptional Child Research, Exceptional Child Services, \*Handicapped Children, \*Information Utilization, \*Institutions, Intervention, Program Effectiveness, Questionnaires, \*Residential Programs, Staff Role

The final report on facilitation of knowledge utilization by institutions for child development contains analyses of consultation-intervention in four different child care institutions (including psychiatric facilities and an orphanage), and a guide to providing individualized services in children's residential centers. Described in each case are actions taken by the consultants, interviews of staff members by an independent evaluator, and questionnaire data from institutional personnel. Also included are comments made by the project director and an analysis of overall results derived from two survey instruments (the Baseline Data Form and the Institution Self-Study Questionnaire). The guide for individualizing services considers such aspects as decentralization of decision making, staff roles in an interdisciplinary team, and the new role of management. Among four appendixes are suggestions for behavioral science consultants at children's residential centers. (CL)

**Identifiers**—Developmental Disabilities, Final Reports, Sharpe Health School

A 1-year demonstration project involving 24 developmentally disabled students (9- to 20-years-old) with severe physical limitations was conducted to increase their educational and vocational possibilities by using cost-effective bio-engineering techniques to modify their physical environment and develop improved adaptive devices. Phase I of the project consisted of student selection, parent education, and initial evaluation of individual functional abilities. The second phase included using specially designed or commercially available adaptive devices (such as contour seats and wheelchair ramps) to increase functional independence; developing recreational programs (such as a miniature golf course); measuring functional improvement in 50 areas of self-care (such as dressing and eating); providing vocational orientation programs (including training in microfilming and one-handed typing); evaluating each student's functional and vocational potentials and recommending environmental and orthotic (supportive device) adaptations; and meeting of project advisors, staff members, parents, and students. Plans for the project's final phase focus on a practical workshop to demonstrate how low-cost, simple designed, bio-engineering adaptations can be used to increase the physically disabled individual's functional level and work capacity. (Provided are descriptions and pictures of adaptive devices used with individual students and 14 appendixes including sample forms for evaluating physical functioning and recreational interests.) Lyall, J. *And Others*  
Manual for the Deaf-Blind Program and Ability Screening Test.

Elliaville State School, Miss. Mississippi Deaf-Blind Evaluation Center.

Pub Date 72

Note—28p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Ability Identification, Child Development, \*Deaf Blind, Educational Needs, Exceptional Child Education, \*Guidelines, \*Multiply Handicapped, Program Planning, \*Screening Tests, Student Evaluation, Test Construction, \*Test Interpretation

Presented are a manual and a screening test to assist teachers and professionals to determine the functional ability level and individual program needs of deaf blind and multiply handicapped children. It is noted that the individually administered 10-minute test, based on Gesell's developmental theory, consists of items in seven basic developmental areas: vision; hearing; gross motor, fine motor, and self-help skills; communication; and socialization. It is explained that the test can be used to place children at one of the following program levels: basic sensory stimulation for the profoundly disabled (multiply handicapped nonambulatory children confined to bed units); developmental task training for ambulatory children who have secondary handicaps to their deaf-blindness; and training in preacademic and daily living skills for visually and auditorially handicapped children who have greater functional ability. Included in the manual are instructions for test administration and scoring, a list of needed equipment, and brief discussions of special test factors to be considered (such as behavioral characteristics and medication) and the need to obtain further reliability/validity measures. Descriptors—Definitions, Exceptional Child Education, \*Handicapped Children, \*Motor Development, \*Perceptual Motor Coordination, \*Physical Development, Physical Education, Program Descriptions, Recreation, \*Teaching Methods

Intended for the educator and recreator working with normal and exceptional children, the book provides an overview of perceptual motor terminology, development, and resources in addition to a state of the art paper. Presented are definitions of such terms as motor development, sensory motor development, and perceptual motor development. Developmental motor patterns are reviewed and activities used in the motor development programs of Prince George's County, Maryland, Special Education Department are listed. Described is the University of Maryland's Children's Health Developmental Clinic which incorporates parent education with individualized motor instruction for children with developmental problems. Among the reference materials and resource information provided are sample behaviors and activities to develop such skills as mature social interaction, personal fulfillment, and enhanced amusement; an annotated list of 178 references; and examples of on-going program approaches. In a concluding paper, J. Stein reviews relevant research, including findings about the specificity of learning, and their implications for the field. Appended is an annotated bibliography with approximately 50 references related to movement and learning. (CL)

Described are 20 pieces of therapeutic playground equipment constructed by volunteers and fathers of children in the Early Learning Center for Exceptional Children (El Paso, Texas). It is noted that discarded and readily available materials (such as old tires) were used, and that no commercial playground equipment was purchased. Information on the construction of each piece and its contribution to perceptual and motor development is presented along with illustrations. (SB)

Descriptors—Administration, Child Advocacy,  
\*Conference Reports, Deaf Blind, Exceptional  
Child Education, Exceptional Child Services,  
Motor Development, \*Multiply Handicapped,  
\*Physical Activities, \*Program Descriptions,  
\*Recreation, Resource Guides, Student Evaluation

Presented are papers and proceedings of the  
National Institute on Program Development and  
Training in Recreation for Deaf-Blind Children,  
Youth and Adults (Iowa, 1974). Chapters 1-3  
summarize institute participants' views on topics  
such as normalization, needs, and advocacy for  
the deaf-blind (DB); report a consumer's, a  
parent's, a rehabilitation worker's, and a recreation  
worker's perspectives on recreation for the  
DB; and include overviews and a national survey  
of recreation services for the DB. Chapter 4  
focuses on programs and includes basic concepts  
and definitions, papers on residential programs  
and play facilities, and specific program descriptions  
in areas such as music, camping, and  
gardening. Activity areas such as swimming, arts  
and crafts and outdoor education, and the  
development and evaluation of motor skills for  
the DB are covered in Chapters 5 and 6. Examined  
in Chapter 7 are assessment, evaluation,  
and research in recreation for the DB. In chapters  
8-11 leisure education, special considerations,  
advocacy (including organizational and  
parent advocacy), and administration of recreation  
programs for the DB are explored. A final  
chapter identifies resources and includes features  
of 19 selected DB model program sites, a review  
of the literature, lists of materials, and a guide to  
information sources. Appended is information on  
institute personnel, materials, and instruments.

**Swimming for the Handicapped: A Manual for the  
Aide.**

Pub Date 74  
Note—38p.

Available from—The American National Red  
Cross, 17th and D Streets N.W., Washington,  
D.C.

Document Not Available from EDRS

Descriptors—Aurally Handicapped, Cerebral  
Palsy, Definitions, Exceptional Child Education,  
\*Handicapped Children, Learning Disabilities,  
Mentally Handicapped, Physically Handicapped,  
Recreation, Severely Handicapped,  
\*Swimming, \*Teaching Guides, Visually Handicapped,  
\*Volunteers

Identifiers—American National Red Cross

Presented is the American National Red Cross  
Swimming for the Handicapped Program manual  
designed for volunteer aides. The program's aims,  
scope, and value are described in the introduction.  
It is noted that the nonswimming aides can  
play a vital role in transportation, dressing room  
assistance, record keeping, and as safety  
assistants, while swimming aides function directly  
as instructional assistants. Listed are safety  
guidelines (such as not carrying a child across  
wet decks) and factors to consider in teaching  
the handicapped (such as treating handicapped  
children with dignity). Teaching suggestions are  
included for seven types of handicapping conditions:  
mental retardation, cerebral palsy,  
orthopedic disabilities, hearing disabilities, visual  
disabilities, learning disabilities, and multiple disabilities  
(mentally retarded-cerebral palsied,  
hyperactive-emotionally disturbed, rubella, and  
deaf-blind). Included in the appendix are signs  
for manual communication, the manual alphabet,  
a sample admission form and evaluation sheet,  
references, and a glossary of terms including  
definitions of some impairments not specifically  
covered in the disabilities section. (Author/SB)

**ED 113 902** EC 080 256  
**Recreation and Handicapped People: A National  
Forum on Meeting the Recreation and Park  
Needs of Handicapped People.**  
Pub Date [75]

Note—65p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

Descriptors—Architectural Barriers, Exceptional  
Child Services, Financial Policy, \*Handicapped  
Children, Legislation, \*Normalization (Handicapped),  
\*Parks, Public Opinion, \*Recreation,  
\*Recreational Facilities, Transportation

Identifiers—\*Needs Assessment

Summarized are recommendations made by  
handicapped people and recreation and park  
professionals at a 1974 forum on meeting the  
recreation and park needs of the handicapped. A  
statement of the issue and delegates' reactions  
are provided on 12 topics: segregation vs. integration;  
the role of the voluntary health agency and  
its effect on the responsibility of the community  
recreator; the importance of having specially  
trained personnel (therapeutic recreation professionals);  
the problem of architectural barriers;  
legislation; financing; the attitudes of nonhandicapped  
participants; insurance costs; recreation as  
a rehabilitation tool; the value of consumer  
input into recreation planning and design; employment  
of the handicapped in recreation and  
park occupations; and transportation. Where applicable,  
specific suggestions are given for national,  
state, local, or college level actions. Sample  
conclusions are that separate but equal facilities  
are never an acceptable objective, and that 5  
percent of all funds in public recreation projects  
should be used to insure and maintain their usability  
by handicapped people. Appended are four  
speeches and papers presented during the national  
forum which focus on topics such as  
financing recreation services for the ill and  
handicapped, and efforts of the National Park Service  
to meet the needs of handicapped persons.

Descriptors—\*Adapted Physical Education, Conceptual  
Schemes, Curriculum Guides, Educational Alternatives,  
Exceptional Child Education, \*Handicapped Children,  
Models, Program Development, \*Public Schools, \*Recreation,  
Regular Class Placement

Identifiers—\*Needs Assessment, Wisconsin (Madison)

Presented is the report of the Adaptive Education  
Task Force in Madison (Wisconsin) Public Schools  
which followed an investigation of the need to broaden  
the scope of physical education and recreation services  
to handicapped students. The work of the task force is  
reported in summary form in three parts: a position  
statement, assessment of needs, and program needs  
and recommendation; and Part 4 includes appendixes  
giving more detailed information about selected  
aspects of the report. Developed in Part 1 is a  
position statement defining the need for adaptive/  
alternative learning experiences as an integral part  
of the existing physical education program. Appraised  
in Part 2 is the extent to which adaptive/  
alternative experiences are being provided for  
students with special needs; and the unique needs  
that cannot be effectively dealt with in the regular  
physical education class are pointed out. Provided  
in outline form in Part 3 are recommendations  
along with objectives, planning and development  
needs, and funding components pertaining to the  
development of adaptive/alternative physical education  
and recreation programs. Included in the appendixes  
are program implementation plans for specific schools  
(providing programs for conditions such as visual  
handicaps, mental handicaps, and emotional disturbances,  
a proposal for assessing effectiveness of current  
programs, and a model for planning/development  
of adaptive and alternative programs. (Author/SB)

Camping, Exceptional Child Education, Handicrafts,  
Hobbies, \*National Organizations, \*Physically Handicapped,  
\*Program Planning, \*Recreation

Presented is a bibliography of 96 books and  
pamphlets concerned with the planning and  
modifying of recreational activities for physically  
handicapped children. Publications are listed  
alphabetically by author or distributor within four  
subject areas: recreation and recreational activities,  
residential and day camping, adapted physical  
education, and handicrafts and hobbies. Entries  
usually contain the title, author, a brief  
description of content, number of pages, distributor's  
address, and cost. Also provided are the addresses  
of 10 national associations and the title, cost,  
and content of recreational journals they publish.

Skills, \*Recreation, Research Reviews (Publications),  
Trend Analysis

Presented is a research bibliography (covering  
the years 1888 to 1975) which contains annotations  
of 439 studies and bibliographical citations of  
419 additional projects on physical education,  
recreation, and psychomotor function of mentally  
retarded persons. In addition to review and  
analyses of trends and major findings, unan-

swered questions that need to be proved in further studies, projects, and programs are delineated. Study entries are listed alphabetically and provide information on the author, title, source, date, and pages, annotations which translate research findings into practical instructional hints, teaching techniques, and related ideas that can be used by practitioners. All entries are indexed and cross-indexed in five indexes: condition, level, age, and sex of subjects; physical, psychomotor, cognitive, and affective characteristics of subjects; physical education, recreation, and psychomotor activities; tests, rating scales, evaluative instruments, and assessment devices; and miscellaneous descriptors. **Proceedings of a Workshop on the Preparation of Personnel in Education of Bilingual Hearing-Impaired Children Ages 0-4.**

Trinity Univ., San Antonio, Tex.

Spons Agency—Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.

Pub Date Nov 72

Grant—OEG-0-72-1239

Note—86p.

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—\*Aurally Handicapped, \*Bilingualism, Change Agents, Conference Reports, Educational Programs, Evaluation Methods, Exceptional Child Education, \*Intervention, \*Mexican Americans, Nonprofessional Personnel, \*Preschool Education, Staff Improvement, Staff Role

Identifiers—Paraprofessional Education

Presented are the proceedings of a workshop on preparing personnel to effectively intervene in the development and education of Mexican-American hearing-impaired children (0- to 4-years-old). Participants (who were professionals in such disciplines as psychology, medicine, and education) investigated four main topics (examples of conclusions are in parentheses): the knowledges, understandings, and competencies needed by the mediators to intervene effectively (the principle area in which the hearing-impaired child presents problems is communication); the responsibilities and level of preparation desired for the intervener (mothers or surrogate mothers need to function as identifier, coordinator, interpreter, and evaluator); personnel training programs (personnel must be recruited from the Mexican-American culture); and areas amenable to evaluation (complete evaluation requires assessment for every procedure and person who has contact with the hearing-impaired child). The final topic is a compilation of the findings and explores implications for change in interdisciplinary approaches, administration of service programs, legislation, funding, advisory committees and cooperative councils, research, and program schema. Five appendixes are provided including information on goal setting considerations. (SB)

**Frequency of Divorce Among Parents of Handicapped Children.**

Pub Date Jul 75

Note—52p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Demography, Exceptional Child Research, \*Family Problems, \*Handicapped Children, Incidence, \*One Parent Family, Parent Attitudes, Questionnaires, Research Reviews (Publications), \*Stress Variables

Identifiers—\*Divorce

Seventy-six parents of handicapped children were surveyed to compare the frequency of divorce in the sample population to that of the U.S. population. A research review revealed that the first-born child causes extensive to severe crises in the parents' marital relationship; that the presence of a child with a handicapping condition causes a certain degree of stress within the family; and that marital dissatisfaction is highest in families which have children. Ss completed questionnaires concerned with items such as the rating of their child's degree of handicap and of their marital satisfaction. Results showed that the frequency of divorce for the sample population was not significantly higher than that of the U.S. population, suggesting that the presence of a handicapped child in the family does not seriously affect marital stability. (Appendixes include the

questionnaire used and a table of sample population characteristics.) (SB)

**Visual Memory of Deaf Students in Comparison with Normally Hearing Students of Similar Ages.**

Pub Date Jul 75

Note—76p.; A project submitted in partial fulfillment of the requirements for the degree of Doctor of Education, Walden University

EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage

Descriptors—Aurally Handicapped, \*Deaf, Elementary Education, Exceptional Child Research, \*Memory, \*Visual Learning, Visual Perception

Compared was the visual memory of 18 deaf and 18 normal hearing children (7- to 12-years-old). Ss' visual discrimination and visual memory were tested with filmstrip materials from Project LIFE (Language Improvement to Facilitate Education). Time scores and error scores were used to measure the performances of both groups. Results showing that deaf Ss scored as well or better than the hearing Ss in all tested activities indicated that the memories of deaf children for visually significant stimuli may be at least as strong and persistent as the memories of hearing children, and that attention could be focused on more and better utilization of significant visual aids in the education of the deaf. **The Formative Evaluation Design of the Vocabulary Development Project. Occasional Paper 31.**

Minnesota Univ., Minneapolis. Research, Development, and Demonstration Center in Education of Handicapped Children.

Spons Agency—Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.

Report No.—332189

Pub Date Oct 74

Grant—OEG-09-332189-4533(032)

Note—43p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—\*Educable Mentally Handicapped, Elementary Secondary Education, Evaluation, \*Evaluation Methods, Exceptional Child Research, \*Instructional Materials, \*Material Development

Described are the formative evaluation procedures used to assess materials to teach educable mentally retarded children concepts and skills in the areas of money, measurement, and time. It is explained that "formative" evaluation refers to assessment of an instructional product during its development, in order to identify ways in which the materials can be modified. Four stages of the overall project evaluation plan are outlined. Aspects of the formative evaluation design focused on include the six instructional variables assessed, such as instructional effectiveness, the sources of input, such as a teacher review board. Appended is a sample evaluation form for teacher use. (LS)

Descriptors—Cultural Differences, Elementary Secondary Education, Exceptional Child Education, \*Handicapped Children, Inservice Education, \*Parent Education, Professional Education, \*Program Descriptions, Program Evaluation, \*Regular Class Placement, \*Teacher Education

Presented is the final report of a 6-year Teacher Instructional Program (TIP) to train regular classroom and other educational personnel to understand the emotional and educational needs of handicapped children (in grades K-6) and of a Parent Education Program (PEP) operated conjointly with TIP. Included in an overview of the project is information on its purpose, staff and organization, participant selection, and on dissemination of project activities and products. Description of TIP focuses on the following aspects: project goals (such as enhancing participants' skills in diagnosing learning problems), summer institutes, academic year seminars, and resource services provided participants (such as help in developing learning centers). Special project emphasis on cultural diversity is explained in two papers, and results of a program evaluation by participants are reported. Components of PEP covered include specific objectives of the self development training (such as increasing participants' knowledge of consumer economics), objectives of the teacher aide program, evaluation of the participants' self-concepts, and results of a program evaluation by participants. Also described is an Instructional Resource Center connected with the program. Appendixes include a pupil survey form and a list of project publications. (LS)

Token Economy at the Classroom Level.

Pub Date Apr 75

Note—49p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Academic Achievement, Attitudes, \*Behavior Change, \*Delinquency, Elementary Secondary Education, Exceptional Child Research, Money Management, \*Operant Conditioning, Performance Contracts, \*Program Descriptions, \*Residential Programs, Values

Identifiers—\*Token Economy

Evaluated was a pilot study on the use of behavior modification with 116 delinquent boys (8- to 15-years-old) committed to a residential treatment center. Upon assignment to classes, each S was placed on an individual contract which, when completed, was worth points redeemable for such things as candy and potato chips. Ss were administered the Wide Range Achievement Test, the Shipley Institute of Living Scales, and the Jesness Personality Inventory prior to and following the experimental program. Results showed that a token economy at the classroom level was effective in improving the quality and the quantity of learning skills, while raising achievement in reading and arithmetic; in affecting improved classroom behavior and positive changes in attitudes; in attaining increased skill in economics; and producing value systems oriented toward intangible and social reinforcers. From the study, a token economy handbook was devised which includes sections on purpose, daily scoring guidelines, tabulation process, reward system, and weekly system. Also included are appendixes on student-teacher contracts and the Jesness Inventory. (SB)

Note—46p.; For a related document see ED 107 001

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Aurally Handicapped, \*Deaf, Exceptional Child Research, Language Development, Language Patterns, \*Language Research, \*Linguistics, \*Sign Language

Presented are rules of sign language structure which have provided a framework for linguistic analysis in a project studying the acquisition of sign language by 10 deaf children of deaf parents. Two levels of rules are outlined: definition rules, which deal with definitions of terms used in the analysis and their relation to terms used in other language development studies; and translation rules, which establish principles for transcribing sign language using English glosses and for counting morpheme units in sign language. Rules are given for the following categories: basic components of sign language (such as signs, finger-spelling, and pointing), compound and complex signs, notation of diglossia, nonstandard constituents, utterance boundaries, and computational definitions. Descriptors—Admission Criteria, Child Advocacy, Educational Programs, Exceptional Child Education, Exceptional Child Services, Financial Support, \*Handicapped Children, \*Special Education, \*State Legislation, Teacher Certification, Transportation

Reported in the last of a series are summarized versions of approximately 110 bills relating to the education of exceptional children that were introduced in state legislatures in 1975. The report, produced by the Handicapped Children's Education Project of the Education Commission of the States, is said to make no attempt to present all bills introduced, but rather to provide an overview of major legislation related to handicapped individuals. Given for each bill is information regarding bill number and sponsor, basic provisions, and status as of August 1, 1975. Bills are listed alphabetically by state under the following subjects: census/registry/reporting; centers, commission, offices for special education services; certification of professional personnel; comprehensive special education services; early education services; enrollment limitations; expanded special education services; finance formulas/taxation; residency requirement for education services; rights; sanctions; state aid/categorical programs; state aid/general special education programs; state policy; and transportation aid. Descriptors—\*Annotated Bibliographies, \*Catalogs, Exceptional Child Education, \*Handicapped Children, \*Instructional Materials, \*Instructional Media

Identifiers—Florida

The annotated listing of instructional materials for use with exceptional children includes approximately 200 entries from various exceptional child education programs in Florida. Products are listed alphabetically by title and additionally indexed by area of exceptionality, program source, and sponsoring school district. Each entry in-

cludes a brief annotation of the product and designates the sponsor, areas of exceptionality to which it is applicable, potential use, media format, availability, and a source person who may be contacted for additional information. It is explained that all materials represented in the listing are available from the Education Clearinghouse/Information Center of the Department of Education. (SB)

Descriptors—\*Autism, Behavioral Objectives, Behavior Change, Class Management, \*Curriculum Guides, \*Emotionally Disturbed, Exceptional Child Education, Operant Conditioning, \*Program Descriptions, \*Student Evaluation, Teaching Methods

Identifiers—Elementary Secondary Education Act Title VI B, ESEA Title VI B, Florida (Orange County)

The teacher's guide presents some of the basic considerations necessary for classroom implementation of a public school program for autistic and seriously emotionally disturbed (ED) children. Included are descriptive information about typical ED student's behavior and management techniques for use in the classroom. Also given are basic ideas concerning classroom organization, scheduling, teaching procedures, and in-service training. The major portion of the guide is devoted to the Developmental Sequence Objectives and the Assessment Sheets, which provide behavioral objectives for six major skill areas: behavioral skills; social skills; motor skills; self-help; visual skills; and language skills (expressive and receptive). Replicable record-keeping devices are included for recording student progress in social and behavioral skills, as well as in curriculum-related to academic readiness skills. Appendixes include information such as a definition of autistic children, a behavior modification intervention model and a materials list. (Author/SB)

Identifiers—Elementary Secondary Education Act Title VI B, ESEA Title VI B, Florida (Orange County)

The handbook provides a guide for the development of a public school program for autistic and seriously emotionally disturbed (ED) children which reflects the experience and successful elements of the Orange County (Florida) School District program. Included are sections on program rationale and philosophy (providing equal education opportunities); program goals (increasing students' growth through a behavior modification program of developmental activities); eligibility of children for the program (examining criteria such as unusual reactions to perceptual stimuli); program organization (considering such conditions as core staff requirements, budget, and transportation needs); initial identification and placement of children in the program (using referral and assessment methods to place the child in a diagnostic category); and transition of children out of the program (determining readiness for regular or ED class placement). Information in the appendixes includes the definition of autistic children, a plan for remodeling and adapting an existing classroom, and guidelines for parent group leaders. (SB)

Keller-Cohen, Deborah  
Deictic Reference in Children's Speech.  
Pub Date 29 Dec 73

Note—18p.; Paper presented at the Winter Meeting of the Linguistic Society of America (48th, San Diego, California, December 1973)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—\*Child Language, \*Language Development, Language Patterns, Language Research, Linguistic Theory, Preschool Children, Psycholinguistics, Semantics, \*Verbal Development, \*Verbs, \*Vocabulary  
Identifiers—\*Deixis

The purpose of this paper is to examine the status of deictic reference in the speech of 19 three-year-old Black children. The deictic verbs of motion are examined with reference to other aspects of the deictic system. The data for this study are approximately eight hours of spontaneous speech collected in a pre-school classroom. The hypothesis to be investigated is that "go" and "take" are more frequent than "come" and "bring" in the speech of children at this age, due to two sets of feature constraints on "come" and "bring," which are discussed. Reasons for believing that the child first learns the core meaning of a lexical item within a semantic field and only later acquires the derived meaning are offered. Use is made of certain concepts from Piagetian psychology in describing how the deictic system functions for the child. A justification for the use of these concepts is provided. The importance of the study is two-fold: it explores the appropriateness of Fillmore's description of deictic verbs for child language, and attempts to establish certain characteristics of the deictic system in child language, an area that has been neglected in linguistic research to date. Descriptors—\*American Indian Languages, Bilingual Students, Contrastive Linguistics, \*Dictionaries, English, Form Classes (Languages), \*Morphology (Languages), Reference Materials, Syntax, \*Verbs, \*Vocabulary  
Identifiers—\*Tlingit

This verb dictionary is divided into two main sections. The English-Tlingit section is organized by means of English headings or key words, followed by English meanings which convey the main sense of the Tlingit verb expression in question. A representation of the given Tlingit verb expression is provided, along with one or more examples of it in context. Cross-referencing in the first section is of two sorts: to other English words in the dictionary and to other English expressions in general. The Tlingit-English section lists Tlingit verbs and verb expressions with their English meanings. Tlingit verbs generally consist of a bound root to which derivational affixes are attached, resulting in what is known as the theme. In the dictionary, the stems are arranged in accordance with the Tlingit alphabet, and under each stem, verb expressions are grouped by the theme they contain. Adverbials, locative particles, directionals and pronominals, as found in Tlingit verb expressions, are also discussed in the second section. The appendix provides a grammar sketch which concentrates on Tlingit verb morphology. (CLK)

Descriptors—\*American Culture, American English, Cultural Awareness, Cultural Differences, Daily Living Skills, Dictionaries, \*English (Second Language), Instructional Materials, \*Language Guides, Language Instruction, \*Refugees, Relocation, Second Language Learning, Social Adjustment, Social Characteristics, \*Vietnamese

This book is intended to help Vietnamese people who have recently arrived in this country. It provides phrases the refugees will need in their initial contacts with Americans. The subject matter provides some basic facts about the U.S. and the way Americans live, and covers as wide a range as possible of the situations that the Vietnamese will encounter. The book comprises the following twelve sections: (1) meeting people, (2) asking questions, (3) making conversation, (4) home and family, (5) food, (6) health, (7) the community, (8) traveling, (9) education, (10) government, (11) religion, and (12) how Americans spend their time. The guide begins with the most fundamental conversational problems and then progresses to more sophisticated information. Each phrase, sentence, or paragraph in the book is printed in both English and Vietnamese, with the exception of short statements in Vietnamese only that give instructions for using the book. However, the book was designed to be used by a Vietnamese person in conjunction with an English-speaking person. An appendix entitled "Useful Information" gives numbers, time, days of the week, seasons and months of the year, weights and measures, clothing sizes, and temperature measures. An English-Vietnamese dictionary and a Vietnamese-English dictionary conclude the publication. (TL)

Birkenmayer, Sigmund S.  
Recent Changes in the Spoken Polish Language.  
Pub Date 8 Nov 75

Note—13p.; Paper presented at the Annual Meeting of the Midwest Modern Language Association (Chicago, Illinois, November 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Idioms, Language Research, \*Language Usage, \*Language Variation, Morphology (Languages), Oral Communication, \*Polish, \*Sociocultural Patterns, Sociolinguistics, Syntax, Textbooks, Vocabulary, Written Language  
Both spoken and written Polish have undergone profound changes during the past twenty-eight years. The increasing urbanization of Polish culture and the forced change in Polish society are the main factors influencing the change in the language. Indirect evidence of changes which have occurred in the vocabulary and idioms of spoken Polish in the postwar period can be found in textbooks of Polish for foreigners, written by Polish authors and published in Poland. The new features of spoken Polish can be divided into the following groups: (1) new lexical features (including idiomatic constructions), (2) new syntactic structures, and (3) new morphological structures. The differences between the language of the young Polish generation and that of their parents are also discussed. (Author/CLK)

The Culver City Schools' Spanish Immersion Program: Low Cost - High Yield. CATESOL Occasional Papers, No. 2.

California Association of Teachers of English to Speakers of Other Languages.

Pub Date 75

Note—5p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Bilingual Education, Bilingual Schools, \*Bilingual Teachers, Cost Effectiveness, Elementary Education, \*Elementary School Curriculum, Language Instruction, Pro-

gram Costs, Program Descriptions, \*Program Effectiveness, Program Evaluation, Reading Instruction, Second Language Learning, \*Spanish, Teaching Methods  
Identifiers—\*California (Culver City), \*Immersion Programs

The Culver City (Calif.) Schools' Spanish Immersion Program (SIP) offers an innovative and highly successful approach to the development of proficiency in a foreign language in the elementary grades. This approach differs from most bilingual programs in that for the first two years the students are completely immersed in Spanish. When the students reach second grade, an hour a day of English instruction is added to the program. Additional instruction in English is added each year until, by sixth grade, instruction time in the two languages will be approximately equal. Begun in 1971, the program is aimed primarily at the native English-speaking child, although a few Spanish-speaking children are also involved. The program has been inexpensive to operate because no extra staff has been required. The regular elementary program is taught by teachers who are themselves bilingual. They just happen to be teaching in Spanish, enabling the students to absorb the language in a way that is natural, almost casual. Test scores indicate that students also do as well as or better than the students in the regular English-speaking classrooms in their mastery of basic skills. (Author)

The Junior College Foreign Language Teacher: A New Renaissance Person?

Pub Date Jun 75

Note—7p.; Paper prepared for Meeting of the Midwest Modern Language Association (Chicago, Illinois, November 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*College Language Programs, Community Colleges, Cross Cultural Studies, Disadvantaged Youth, Educational Strategies, \*Junior Colleges, Junior College Students, Language Enrollment, \*Language Instruction, \*Language Teachers, Low Ability Students, Modern Language Curriculum, \*Student Attitudes, Teacher Qualifications

Many junior college foreign language teachers work in schools which serve a large proportion of nontraditional students. A primary reason for low language program enrollments is that these students often believe that foreign language study is difficult, or uninteresting, or they actually fear participation; their cultural and travel experiences, too, may be limited. Instructors, on the other hand, feel that their cultural training is going to waste. The answer may lie in using a different kind of expertise. Some success has been shown with classroom studies of foreign language-based cultures in the western hemisphere, such as Chicano civilization. The teacher equipped with other skills and community interests that can be combined with proficiency in language instruction may be the most successful in coping with the pedagogical, sociological, and economic realities of junior college teaching. Joiner, Elizabeth G.

The Retraining of Humanists for Programs in International Business.

Pub Date 75

Note—10p.; Paper presented at the SCOLT Conference (New Orleans, Louisiana, October 1975)

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Business Education, Career Education, \*College Language Programs, French, Humanities Instruction, \*Language Instruction, \*Languages for Special Purposes, Liberal Arts, \*Teacher Attitudes

This paper discusses the relationship that traditionally has existed between the domains of business studies and the domain of humanities, of which foreign language study has always been a part. The implications for foreign language departments of instituting courses such as commercial French, of dealing with career education, or of expanding undergraduate language major programs to include the option of business-oriented courses, are discussed. A specific experience in working with the French language component of the Master of International Business Studies program at the University of South Carolina is described. The core of this description concerns

the breakdown of usual stereotypes of business students and teachers' changing attitudes towards participating in the language component of business programs. (CLK)

Identifiers—\*International Business

The University of South Carolina's Master's Program in International Business began in June 1974, with 43 students studying German and Spanish. The program began with a 9-week intensive language learning program, followed by a nine-month unified business program, with language instruction twice a week; six weeks of area study concentrating on the culture and society of the countries in which students will work; a second session of language instruction, lasting five weeks; and a six-month overseas work experience. Nine weeks of policy and strategy study at the University of South Carolina complete the course. The second class began in June of 1975 with 93 students from 20 states and 9 foreign countries. They studied German, Spanish, French, Portuguese and English as a foreign language. The paper also discusses the results of a study of the use of foreign languages in South Carolina industry. Forty-two percent of the original 774 questionnaires sent out were answered. Thirty-seven percent of the companies that answered use foreign languages on a daily basis; 84 percent engage in business abroad; 69 percent deal with non-English speakers; and 61 percent have employees competent in foreign languages. Discussion of the usefulness of foreign languages, not only in business operations but also in crossing cultural barriers, concludes the paper. (CLK)

Descriptors—American English, \*Bibliographies, Dialect Studies, \*English, Language Usage, \*Language Variation, Reference Materials, \*Regional Dialects, \*Resource Materials, Sociolinguistics

Identifiers—Australia, Canada, New Zealand

This bibliography is divided into five sections. The second, third, fourth, and fifth sections are each devoted to publications in one specified area, American, Canadian, Australian, and New Zealand English respectively. The first section lists bibliographies pertaining to all of these areas. Entries in all sections include both American and European publications, and most have been published since 1960. (CLK)

**ED 113 940** FL 007 201

Phrasal and Prepositional Verbs. Specialised Bibliography A14.

British Council, London (England). English Teaching Information Centre.

Pub Date Sep 73

Note—3p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Adverbs, \*Bibliographies, \*English, English (Second Language), Form Classes (Languages), Idioms, Language Instruction, Language Research, Morphology (Languages), \*Resource Materials, Syntax, \*Textbooks, \*Verbs

Identifiers—Phrasal Verbs, Prepositional Verbs

This bibliography, which deals with phrasal and prepositional verbs in English, consists of three sections. The first section cites linguistic studies, while the second lists relevant articles. The third section cites textbooks that deal with the problems of teaching English verbs. Entries in-

clude both American and European publications, and most have been published since 1960. (CLK)

**Descriptors**—Abstraction Levels, Abstraction Tests, Child Development, \*Child Language, Cognitive Development, Cognitive Tests, \*Concept Formation, \*Language Development, Language Learning Levels, Language Patterns, Language Proficiency, Language Tests, \*Psycholinguistics, Time Factors (Learning), \*Time Perspective

In order to investigate the hypothesis that the conceptualization of sequence precedes that of simultaneity in child development, and to explore the use of elicited imitation in studying lexical acquisition, 32 subjects between 3 and 5 years of age were asked to verbally imitate a list of sentences. The constructions combined simple and reverse sequentiality and simultaneity, and responses were ranked by their correctness. The data suggest that children acquire reference to time first by simple sequentiality, then by reversal of event order with the appropriate sentence construction, and last by simultaneity. The use of verbal imitation of some complexity may also be a valuable instrument in the study of child language. Further investigation into the child's use of meanings together with semantic strategies is indicated. (MSE)

**The Stability of Student Attitudes toward German Language and Culture Over an Academic Year.**

Pub Date May 75

Note—29p.; Paper presented at Meeting of the Canadian Association of Second Language Teachers (Edmonton, Alberta, Canada, May 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Achievement Rating, Changing Attitudes, Course Evaluation, Cultural Awareness, Cultural Education, \*German, \*Language Instruction, Learning Motivation, Learning Processes, \*Second Language Learning, \*Student Attitudes

A research project is described which, using Gardner and Lambert's scales plus 10 other instruction-related items, sought: (1) to examine the stability of attitudes, as changes might occur from the beginning of a course to its end; (2) subsequently, to draw inferences as to the impact that a German language and/or culture course might have on student perceptions; and (3) to relate attitudinal change and positivity and negativity of attitudes to achievement. Some of the conclusions were as follows. Attitudes remained essentially the same over the academic year;

although they had been quite positive at the beginning, the abundance of cultural material to which the students had been exposed had had no systematic impact on attitudes. A positive correlation between achievement and more positive attitudes was obtained on a number of scales for those students who had changed significantly. Students who held strongly positive attitudes toward German cultural traditions and the German speakers obtained higher marks than others, while students who felt insecure of their position in Canadian society, who felt Canadian culture was superior to German culture and were suspicious of foreigners, and who saw only utilitarian purposes in learning German had the lowest achievement. **Evaluating the Effectiveness and Efficiency of Instructional Strategies in Teaching German.**

Pub Date Feb 75

Note—25p.; Paper delivered at the Annual Meeting of the Greater Edmonton Teachers Association (Edmonton, Alberta, Canada, February 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Action Research, Audiolingual Methods, Classroom Research, Course Evaluation, Educational Objectives, \*Educational Strategies, Effective Teaching, \*Evaluation Criteria, \*German, \*Language Instruction, Methods Research, Second Language Learning, \*Teaching Methods

In the spirit of the new, sober eclecticism in foreign language teaching methodology, the effectiveness/efficiency dimensions become the criteria for decision-making in educational planning. The points are raised that: (1) there are no universally applicable methods; (2) teachers should not accept educational dogma without empirical evidence; (3) the classroom teacher is in a very good position to conduct research which is meaningful and, in all likelihood, more valid for his situation than that carried out in broad comparisons or artificial lab situations; and (4) the effectiveness-efficiency dimension provides a useful conceptual framework for such action research. The main argument is then applied to representative analyses of the effectiveness/efficiency of some major instructional strategies. (Author)

**Descriptors**—\*Attitudes, Cultural Awareness, \*Language Instruction, Language Teachers, \*Learning Motivation, Learning Processes, Parent Attitudes, Performance Factors, Psycholinguistics, \*Second Language Learning, Social Factors, Student Attitudes, Teacher Attitudes

The paper presents a comprehensive summary of recent research on attitudes in foreign language instruction, discusses it in the light of four functions generally thought of as being characteristic of attitudes, and comments on the usefulness of the attitude concept in foreign language education. Research on attitudes is presented on several dimensions, viz. parental and peer group relations with learner attitudes; student perceptions of the foreign language and culture, of himself as a learner, and of the learning environment (course, teacher, and classroom atmospheres). Attitudes are assigned four groups of functions, viz. the instrumental, adjunctive or utilitarian function, the ego-defensive function, the value-expressive function, and the knowledge function. **Document Not Available from EDRS**

**Descriptors**—Auditory Perception, Cerebral Dominance, \*Cognitive Processes, Language Research, \*Lateral Dominance, Linguistics,

Listening Tests, \*Neurolinguistics, Neurological Organization, \*Perception Tests, Perceptual Development, \*Psycholinguistics, Speech Identifiers—\*Decoding (Speech), Dichotic Listening

Morse code signals were presented dichotically to Morse code operators and to naive subjects with no knowledge of Morse code. The operators showed right ear superiority, indicating left hemisphere dominance for the perception of dichotically presented Morse code letters. Naive subjects showed the same right ear superiority when presented with a set of dot-dash patterns restricted to pairs of seven or fewer elements, counting dots and dashes each as elements. When presented with longer stimuli, naive subjects showed left ear superiority, indicating right hemisphere dominance, the opposite of their result with the shorter stimuli. This seems to indicate that pairs consisting of seven or fewer elements are perceived with reference to the subparts of which they are composed, but that longer stimuli force naive subjects to adopt strategies involving the holistic qualities of the stimuli. It would seem, therefore, that the left hemisphere is specialized for processing the sequential parts of which a stimulus is composed. This research, in conjunction with other work on the topic, suggests that language is lateralized to the left hemisphere because of its dependence on segmental subparts, and that this dependence characterizes language perception as distinct from most other human perception. **Descriptors—\*Basic Vocabulary, \*English (Second Language), \*French, Language Fluency, \*Language Instruction, Language Research, Language Skills, Native Speakers, Research Methodology, Second Language Learning, \*Vocabulary Development, Vocabulary Skills**

This research report is concerned with establishing a minimum vocabulary of English instruction for French students at the secondary level. The approach to the investigation is based on choosing vocabulary that corresponds to the current communication needs of the students, has functional content, and takes the spoken language into account. The need for limiting the volume of the vocabulary is stressed. Two basic criteria are defined for word selection. The criterion of function and distribution considers such things as word frequency, number and kinds of contexts a word appears in, grammatical function, cultural content, and the vocabulary needed for the language learning situation. The criterion of facility in language learning considers French cognates a word may have, and a word's regularity, simplicity and semantic precision. Four methods of choosing and classifying vocabulary items are described and compared. The first appendix lists the scientific works consulted, while the second appendix provides a sample index card used in the study. The third appendix lists the English function words to be included in the vocabulary. (CLK)

This paper discusses the background of the language situation in Guam, comparing the findings of a 1966 survey to the present situation. Apparent changes both in the language situation and in attitudes towards language and some of the causative factors involved in the changes are discussed. The study currently underway, which utilizes informal interviews and participant observation, shows that those who use English as a first language are essentially all of those 12 years old or younger. Noting this as a rough cut-off point, the paper considers whether one might predict that Chamorro, the indigenous language of Guam, will fade when these 12-year-olds are the oldest living generation. The paper further notes that the demise of the last Chamorro speaker on Guam is not likely to be the last trace of effect that the language has. Some of the characteristics of the English currently spoken there, which are now being investigated, are very likely to be retained. The present paper also considers what internal and external motivations have brought about the situation of Chamorro succumbing to English. (Author/CLK)

The hypothesis that the acquisition order of relational words directly reflects the complexity of these words in formal linguistic analysis was tested for the singular, non-neuter person pronouns of English. Data on the development of comprehension of these pronouns gathered in two conversational situations, child as person addressed and child as onlooker, from six children (about 2 years of age) in a five-month longitudinal study indicated that the acquisition order of these words does not directly reflect linguistic complexity but rather the complexity of the percepts underlying the semantic concepts involved. Additional data indicated that children's decentering in the speech event also plays a critical role in the discrimination of the relevant semantic concepts by allowing the child to appreciate the relational nature of person pronouns. These results are interpreted as evidence against the use of formal linguistic representation as an explanation of semantic development. (Author)

The initial chapter of this volume is concerned with determining the variables involved in language learning. The procedures and results of experiments conducted in order to formulate learning and teaching principles are described. Experiments include testing different approaches used to help students acquire sentence meaning, discovering the most favorable combinations of stimuli to produce results in imitation exercises, and determining the usefulness and effect of the printed word on oral reading and of written exercises in the language learning process. I.Q. and age were also accounted for. In the second chapter, different methods of foreign language

learning and teaching are described, including the direct (oral) method, the indirect (grammar) approach, and various eclectic methods. The bilingual method is then described in the third chapter. The eight major steps in this method are: (1) imitation, (2) interpretation, (3) substitution and extension, (4) independent speaking of sentences, (5) reverse interpretation (optional), (6) consolidation of question patterns, (7) questions and answers, and (8) normal FL conversation. The aims of bilingual education are fluency and accuracy in the spoken and written language. Its implementation and success at all levels in England, from primary schools to adult groups, is mentioned. The text concludes with a discussion of audiovisual aids for foreign language teaching, including the language laboratory. (CLK)

**Descriptors—\*Classical Languages, Classical Literature, College Language Programs, Educational Objectives, \*Educational Planning, Enrollment Trends, \*Greek, Higher Education, \*Language Programs, \*Latin, Secondary Education**

This paper attempts to show the need for Classicists currently in the field to begin long-range planning for the field of Classics. Classicists have been unable or unwilling to plan solid actions, waiting instead to react, or respond, to educational trends and problems. While the entire junior and community colleges movement was growing, Classicists ignored it and were ignored by it; more doctoral-level programs were begun, yet no one really stated the need or market for such programs and their degree recipients. These and similar actions and inactions have brought Classics to a critical stage; at the same time, other liberal arts fields are beginning to confront the same sorts of problems. With these allied fields, however, Classicists have not sought common bonds or paths of action. Thus, internally and externally, the discipline of Classics has done little to learn about its own goals and mission and to convince academicians and the general public that Classics is worth retaining at the secondary and collegiate levels. A call to commitment by Classicists on behalf of the Classics is followed by suggested steps which might be taken to establish machinery for planning. (Author/CLK)

This article discusses universal advantages and disadvantages of various audio systems which may be used for language learning. In order to encourage teachers and administrators to experiment with simpler systems than the conventional language laboratory, a list of several low-cost alternatives is given. The list gives the producer's name, a description of the equipment and the price in British pounds. Two sets of criteria are suggested for evaluating the utility and effectiveness of any audiovisual media within a given teaching situation: (1) operational criteria - including initial cost, cost of maintenance, and availability of software and of qualified personnel; and (2) pedagogic criteria - e.g., the validity of claims for a student responding; the effectiveness of monitoring large groups; the case for in-

Success or failure of a language laboratory is due to a complex set of reasons. An often neglected factor lies in teacher and student attitudes to learner-machine-materials interrelationships. This paper specifies significant factors affecting the establishment of positive attitudes in teachers and students through training. The paper has four parts: (1) negative attitudes in teachers, usually developed because of a teacher's feeling of inadequacy to deal with new technology and teaching methods; (2) elements of training programs and positive attitudes in teachers, showing that feelings of inadequacy can readily be eliminated through proper training and emphasizing the importance of materials preparation; (3) negative attitudes in students, some of which are due to age factors; and (4) training of students, stressing the need for proper orientation, which in turn depends on proper training of the teachers in laboratory functioning and course objectives. A student's self-image is his most precious possession. Yet this image is constantly threatened in a language class (or anywhere else). Some threats come from the foreignness of the language, others from the power imbalance between student and teacher, others from the student's failure to live up to what he expects of himself. All of these threats produce various kinds of defensive behavior, which interfere with the quality as well as with the quantity of learning. Teachers should try to run their courses in ways which will reduce these threats. A general strategy might include three elements: (1) trying to maximize student security; (2) arranging for students to study in ways that maximize their own self-investment in the enterprise; (3) allowing students, as much as possible, to learn from themselves and from one another, rather than directly from the teacher. These three elements are compatible with one another if the teacher concentrates on establishing and maintaining classroom routines and making necessary information available when needed, and if the teacher allows the students a large amount of responsibility for who says what to whom, and when. This report gives the number of engineering and technology degrees for the school year ending in June 1974. Tables appear in the following order: engineering degrees (bachelor's, master's, engineer's, doctor's) and technology degrees (associate, bachelor's, certificate, master's). The engineering tables include all 284 schools known to offer engineering degrees at the bachelor's level or higher. The data are essentially complete for the U.S. The technology degree tables include data from 423 schools. Summary tables are included at the end of the report showing the number of women, minorities, and foreign nationals included in the totals. The technology degree totals do not represent national totals because they include only those schools that have responded to the survey. (Author/PG)

Tutoring programs are viewed as being among the most successful of the several programs designed to provide academic support in postsecondary educational institutions for students who have weak formal educational backgrounds. Peer-tutoring programs designed specifically to serve students from educationally deficient backgrounds in postsecondary institutions are rather new and have been implemented in response to the relatively large number of students with weak educational backgrounds who now enter two- and four-year colleges and universities. This document was organized to provide information in the following areas about special peer-tutoring programs in postsecondary institutions: their development, goals and objectives, academic areas for tutoring, funding, selection of peer tutors, training programs for peer tutors, compensation of peer tutors, entry and exit criteria for tutees, tutee-tutor ratios, arrangements for the tutoring, and perceptions of program success. Using data of the above sort, the essential ingredients of peer-tutoring programs are discussed. A directory of tutoring programs for educationally deficient students surveyed in this study has been provided. (Author/KE)

This is a summary report on the total number of associate, baccalaureate, first-professional, master's and doctoral degrees conferred during the 1973-74 fiscal year by the 29 institutions of higher education in Kentucky accredited by the Southern Association of Colleges and Schools. (Associate degrees are awarded for the completion of programs requiring at least two years but less than four years of study beyond the high school level. First-professional degrees are those awarded in law, dentistry, and medicine.) Degrees conferred in 1973-74 total 19,227 including 1,676 associate degrees, 12,463 bachelor's (baccalaureate), 823 first-professional, 4,083 master's and 182 doctoral degrees. (Author)

Management planning is a body of concepts and techniques designed to facilitate the analytical and forecasting processes within a department, to increase the decision-making prerogatives of the department director within predetermined guidelines, and to encourage and reinforce communication both among the departments and between the departments and the faculties. Management planning was introduced at Harvard University as part of a comprehensive change in style of administration. The applications of the policies and procedures to the departments is predicated on an ability to identify objectives for each department, to track progress toward stated goals, and to evaluate relative achievements. The report details the Administrative Management Plan devised by Harvard and includes discussion of the preparation for the Plan, the narrative and financial elements of the Plan, the procedures followed in negotiating the departmental plans and the five-year vice presidential plan. During both

the planning and implementation phases of the Plan continuing communication channels were developed for exchange of ideas that foster increased flexibility and adaptability of the system. (Author/JMF)

The unrest of the 1960s brought the fields of law and higher education together in the courts. Although tranquility has returned to campus, the courts show no sign of withdrawing from the field of higher education. This paper is an examination of the role the courts will play in higher education in the decade ahead. Three broad areas of litigation are discussed: (1) the allocation of increasingly scarce resources spurred by disputes between the university and the state and by disputes between or among academic institutions; (2) access to the benefits and rewards of higher education brought on by discrimination on the basis of sex, geography, and political affiliation as well as race; and (3) participation in the making of key academic decisions by previously excluded groups and constituencies. Descriptors—\*Demography, Educational Administration, \*Educational Finance, \*Educational Planning, Employment Projections, Enrollment Influences, \*Enrollment Projections, Enrollment Trends, Financial Support, \*Higher Education, Planning

In past decades the planning process in higher education was based on certainties and assumptions about the source of funds, enrollments and enrollment distribution, levels of expenditures, and faculty. Today, none of these certainties remain. The uncertainties of today involve declining enrollments after 1980, society's capacity to effectively use the many college graduates projected between now and 1980, the future of private institutions, and even some recently established state and community colleges, and society's willingness to finance higher education. These uncertainties are examined in respect to their implications for the financing of higher education. The declining birth rate and the uncertain job market for college graduates have created a new demography and enrollment projections reflect this. This includes the shift in enrollment from private to public institutions. The ultimate victim of this uncertainty may be the diversity that has been the hallmark of the American higher education system in the past. (JMF)

The assumptions and the expectations of the budgeting systems in higher education are presented in an attempt to clarify the magnitude of the task of setting up a budgetary methodology. The assumptions of effective budgeting should be identical to the purposes of the institutions that are served. Developing a system around the acquisition, storage, and transmission of knowledge, however, involves translating qualitative variables into quantitative ones such as credit hours or learning opportunities, support of faculty research, and public service functions. Even more controversial are the expectations people have about college and university systems and budgeting methodologies. There are three categories of people involved: the users, the distributors, and the providers of education. Each has varying perspectives and conflicting expectations. Users expect sensitivity and flexibility; distributors expect equity and efficiency; providers expect austerity and accountability. The financial officer must set up systems that attempt to satisfy all of these. (JMF)

Economics, \*Educational Finance, \*Evaluation, Financial Policy, \*Higher Education, Management, Program Budgeting, Program Evaluation Identifiers—Minnesota

The financial crunch hit the University of Minnesota after the 1971 legislative session, which appropriated for the 1971-72 and 1972-73 fiscal years and began an attempt at a new kind of budget planning process. It was a unique process in the institutional review of programs and in the setting of priorities for future growth and direction. There was an extensive communication and consultation flow up and down the hierarchical ladder with input from the president, vice presidents' groups, as well as the provosts, deans, Senate committees, Office of Budget and Planning and Information Services, the Expanded Consultative Committee, the Regents' Committees on Educational Policy and Budget, Audit and Legislative Relationships, and the students. The time consuming and exhaustive process included a number of public meetings and working sessions in an attempt to dispel the suspicion that the process was a sham used to legitimize decisions already made. Although many questioned the value of this institutional self-evaluation, the consensus is that the evaluation process will yield proposals for more efficient and effective use of faculty and student time. Descriptors—\*Administrative Change, Administrative Personnel, \*Administrator Attitudes, \*Change Agents, Change Strategies, Educational Administration, \*Educational Change, \*Higher Education, Management

The conflict surrounding the administrator's attitude toward change arises from the paradoxical positions that change is inherently good and necessary to avoid stagnation and, at the same time, the individual resists it unless he perceives a gain from the change. The propositions are equally true and can be reconciled, or at least understood, and thus handled more effectively than, in the recent past, through an analysis of why administrators resist change. There is an examination of the fundamental factors from which resistance stems, including the basic needs and the sources of motivation, the role of perception, the role of communication, the role of participation, and the powerful influences of culture. Finally, there is a discussion of positive administrative attitudes toward change and some suggestions for achieving a moving equilibrium. (Author/JMF)

Business officers should function as members of institutional management teams whose responsibilities include devising more effective ways to collect, present, and evaluate business and financial information for governing boards and

academic administrators. The challenge is to find ways to encourage institutional administrations to consider the consequences of ignoring fiscal considerations and realities. It must be recognized that outside forces affect the management and that higher education is not a business where profit and loss can be measured in monetary terms. Nevertheless, the professional business manager should evaluate his place in the institutional environment and develop the attitude that he has something of value to offer, and he should not condone promulgations of accounting practices when they defy meaningful applications of cost systems and ignore relationships between costs, programs, and benefits. Descriptors—\*Accountability, \*Administration, Centralization, Decentralization, Educational Administration, Faculty, \*Governance, \*Higher Education, Institutional Administration, \*Power Structure, Staff Role, Student Participation

The style of management in higher education has changed significantly in recent decades. The groups that have demanded, and in most cases been given, a share in the governance of the institution are the administration, the faculty, the students, and the non-faculty staff. The problem arises in implementing the claims for a share of authority. Some recent trends toward a more effective system of governance within this context are examined. The first is decentralization, which may be approached by the development of autonomous small sub-units having authority to bring decisions to a concluding point or influencing decisions and policy formulation. The second trend is the establishment of a joint council or university senate, a move toward centralization. The third trend in governance is the strengthening of the executive role for prompt and decisive action, which requires administrative accountability and continuous evaluation. Shared authority does not necessitate a balance of power but an emphasis on sharing. The concern is not the problem of whether one should share but the problems of sharing. The attempt is to develop a system of governance that balances the emphases on decentralization, centralization, and executive authority. (JMF)

The business officer can contribute most to the managing of educational resources and can best

provide input to the academic world by performing four tasks. The first task is assessing the general financial setting of the world and the country in which the institution exists. Secondly, in assessing and describing the economics of the institution itself, he must point out the practical implications of concepts such as efficiency and productivity, and fixed variable costs for the operations of the individual institution. A third task is in facilitating decision making regarding pricing and resource allocation. Finally, the business officer can provide explanations of decisions to facilitate their understanding and acceptance. (JMF)

The National Association of College and University Business Officers has taken major strides toward meeting the responsibility for establishing accounting and public reporting standards within the field of higher education. The need for improvement in the reporting procedures has been generally agreed on. It is imperative that revision of the manual for financial reports and an audit guide seek common ground, and to this end the author has suggested some significant areas of controversy for discussion. The first area deals with the nonprofit nature of educational institutions; they cannot be viewed in terms of profit and loss, since they are primarily in the business of spending money as wisely and productively as possible. Secondly, colleges and universities generally approach financial management as an integrated function, dealing with the resources and needs of the total institution over a period of time. A third controversial topic deals with the setting aside of funds to meet anticipated needs and the alternative methods of disclosing these restricted and unrestricted funds. The prime vehicle for disclosure suggested is a separate funds statement to accompany a subsidiary operating statement. (JMF)

Descriptors—College Students, Conference Reports, \*Course Evaluation, Faculty Evaluation, \*Higher Education, Participant Satisfaction, Questionnaires, Student Attitudes, Student Evaluation, \*Student Opinion, Summative Evaluation, \*Teacher Rating, \*Teaching Quality, Teaching Techniques

Identifiers—\*Illinois Course Evaluation Questionnaire

Seven typical faculty concerns about the appropriateness of using ratings of instructor and instruction are examined. These are summarized in terms of common observations frequently expressed by faculty: (1) Students cannot make consistent judgments because of their immaturity, lack of experience, and capriciousness; and a widely held belief is that only colleagues with excellent publication records and experience are qualified to evaluate their peer's instruction. (2) Most student rating schemes are nothing more than a popularity contest. (3) Students are not able to make accurate judgments until they have been away from the course and possibly from the university for several years. (4) The student rating forms are unreliable and invalid. (5) There

are extraneous variables or conditions that can affect student ratings, including class size, schedule, term, student sex, major, and level. (6) The grade a student receives in the course is highly correlated with his rating of the course and the instructor. (7) A question frequently raised is how student evaluations can be used to improve instruction. Research addressing these problems is cited that makes use of the Illinois Course Evaluation Questionnaire (CEQ). (LBH)

Descriptors—\*Chief Administrators, \*College Administration, Cooperative Planning, Cost Effectiveness, Educational Economics, Educational Environment, \*Facility Planning, Financial Needs, Financial Problems, \*Higher Education, Money Management, Physical Environment, \*Physical Facilities

Stresses faced by higher education as a result of both student and social criticism are examined and related to the specific role the physical plant department plays in the changing environment. The interface between the physical plant administrator and the chief executive officer is explored, and consideration is given to what each expects of the other, and how this relationship supports the goals of the university. The goals are seen as teaching, service to the community, and research. Financial pressures facing the university are discussed, including the effects of inflation and public demands for efficiency, and methods by which the university president can deal with these pressures are considered. Maximum communication and contact is advocated, including use of the committee approach to problem solving. Qualities of a good administrator are outlined: loyalty, flexibility, and integrity. They are related to successful dealings with faculty, staff, students, the community at large, and to efficiency in the physical plant department. (LBH)

Descriptors—\*Accounting, \*Budgeting, Educational Administration, Educational Economics, Educational Finance, \*Financial Policy, Fiscal Capacity, \*Higher Education, \*Management, Management Systems, Money Management

Identifiers—\*Lykins Method

In 1973, Ronald G. Lykins presented a model for cash management and analysed its benefits for Ohio University. This paper attempts to expand on the previous method by providing answers to questions raised by the Lykins methods by a series of simple algebraic formulas. Both methods are based on two premises: (1) all cash over which the business officer has discretionary investment authority should be consolidated in one operating bank account; (2) balances shown on the books of the bank as credited to the institution's account should be kept at the minimum required or desired level, regardless of the amount of cash balances shown on the books of the institution. The model is designed to answer the following questions: (1) when should a short-term cash investment be initiated? (2) how much cash should be committed? (3) for what period of time should cash be committed? (JMF)

 ness, \*Evaluation Methods, Experimental  
 Schools, \*Higher Education, Institutional Ad-  
 ministration, Management, \*Management  
 Systems, \*Program Costs

The methods of management science have  
 been increasingly helpful to colleges and universi-  
 ties in evaluating alternatives, both instructional  
 and administrative, and in determining the most  
 efficient allocation of their resources. This article  
 discusses ways in which systems techniques can  
 be used to support the humanistic efforts so  
 highly valued in the existing educational system.  
 It examines one of these techniques, cost benefit  
 analysis, with particular emphasis on its useful-  
 ness in evaluating nontraditional education. A  
 cost benefit analysis is a quantitative, evaluative  
 technique that relates the total benefits of a pro-  
 gram to total costs of the program. It is an  
 analytic study designed to assist decision makers  
 by providing a criterion for identifying a  
 preferred choice among a number of competing  
 alternatives. It provides information on how to  
 maximize or optimize a desirable measure of out-  
 put, given a set of limited resources, including a  
 budget constraint. The two broad areas discussed  
 are the need for cost benefit analysis in nontradi-  
 tional education and practical suggestions and  
 steps necessary to carry it out. (Author/JMF)

 ment, School Accounting

Understanding the financial reports of colleges  
 and universities has long been a problem because  
 of the lack of comparability of the data  
 presented. Recently, there has been a move to  
 agree on uniform standards for financial account-  
 ing and reporting for the field of higher educa-  
 tion. In addition to comparable data, the efforts  
 to make financial reports more understandable  
 require the use of other kinds of statistical data  
 which, when related to financial data, make in-  
 terpretation, analysis, and understanding of finan-  
 cial data easier to achieve. It must, at all times,  
 be remembered that an educational institution  
 does not have the same characteristics as a busi-  
 ness enterprise. Financial statements must be  
 written in language understandable to the lay per-  
 son, and must take into account that the institu-  
 tions employ three major resources: money, peo-  
 ple, and facilities. These resources have meaning  
 in relation to the primary functions of the insti-  
 tution: instruction, research, and public service.  
 Finally, financial data should be reported in ab-  
 solute and relative terms, i.e., a year-end balance  
 sheet with the totals of revenues and expendi-  
 tures; and a comparison with a standard, norm,  
 guideline, forecast, prior year, or other point of  
 reference. The use of relationships in analysis and  
 interpretation of the data enables the reader to  
 judge the relative financial health of the institu-  
 tion. (JMF)

**Identifiers**—\*Sweden

Projects financed by the Office of the Chancel-  
 lor of the Swedish Universities are surveyed that  
 are either completed or still in progress. They are  
 categorized in three separate groups: (1) the  
 structure of higher education and its relationship  
 to society as a whole; (2) the organization of  
 teaching and learning; and (3) evaluation: func-  
 tion studies and result control. In general, it is  
 found that a change of direction has taken place  
 in this research work in the last few years, with  
 the result that more projects are now occupied  
 with organizational problems than with teaching  
 problems. Projects are described dealing with the  
 role of higher education in working life, as well  
 as in-depth studies of teaching-learning questions  
 and the concept of knowledge in higher educa-  
 tion. The projects are arranged by area in  
 chronological starting order. (LBH)

**Descriptors**—\*Consortia, \*Cooperative Planning,  
 \*Interinstitutional Cooperation, Junior Col-  
 leges, Planning Commissions, \*Post Secondary  
 Education, Private Colleges, Regional Planning,  
 State Colleges, State Programs, Statewide  
 Planning, \*Trend Analysis

With increased cooperation and coordination,  
 it now is appropriate to review major changes  
 that have led to an unprecedented level of inter-  
 dependency among institutions. The current  
 growth rate of interinstitutional cooperation is ap-  
 proximately 12 percent per year. This is in-  
 separably linked in many respects to increased  
 levels of statutory coordination and regulation by  
 state agencies and boards and "1202" commis-  
 sions. Examples of institutions and states leading  
 the way in cooperative planning is the New  
 Hampshire College and University Council, the  
 Northeastern Ohio Universities Colleges of  
 Medicine, the states of Virginia, New York,  
 Pennsylvania, and Illinois. Changes are also oc-  
 curring in types of institutions participating. Five  
 years ago over 75 percent of the members came  
 from private institutions, while less than 4 per-  
 cent came from junior colleges. Today more than  
 40 percent came from public institutions and 13  
 percent from junior colleges, as the membership  
 of private institutions still increases. The coopera-  
 tive movement is also becoming increasingly in-  
 ternational and new emphasis is being developed  
 in the areas of continuing education, military pro-  
 grams, and colleges of art. Title III has made a  
 positive contribution to consortia, but it does not  
 encourage continuing voluntary cooperative re-  
 lationships. Despite this fact and the little research  
 done on consortia, the growth of voluntary  
 cooperation has been phenomenal. (Author/KE)

 Finance, Educational Planning, Educational  
 Policy, Financial Needs, \*Financial Problems,  
 \*General Education, \*Higher Education, In-  
 stitutional Administration, \*Liberal Arts,  
 \*Private Colleges, State Aid, Tuition

Strategies and problems facing the small  
 private liberal arts colleges as a group are  
 described. Many of these schools have weathered  
 the financial emergencies of recent years by  
 cutting expenditures to the point where the qual-  
 ity of education is threatened. New measures have  
 been called for to reduce the tuition gap between  
 private and public institutions and to use public  
 resources to assist threatened private colleges.  
 There are, however, a limited number of in-  
 stances where the small liberal arts college has  
 remained financially and academically healthy.  
 This condition is usually accompanied by a self-  
 analysis program identifying a distinctive purpose  
 for the college to serve. Information on the state  
 of the college's operations and potential new  
 markets is obtained with the cooperation of facul-  
 ty and staff. Firm plans and decisions can then be  
 made about the future directions the college will  
 take. (Author/LBH)

Those who design educational policy, as well as those who plan to go to college, need to know what societal benefits derive from higher education, for whom the college experience is effective, and what aspects of the experience are valuable to what students. To investigate such concerns, a study was initiated in 1964: (1) to describe to faculty, administration, and other students the characteristics of SUNY/B students and their experience during and after college, and (2) to contribute to existing knowledge of personal, social, intellectual, and vocational development during the college years and early adult life. This document is a 1971 follow-up sample of 1966 freshmen. Generally, the respondents seemed optimistic about themselves and their futures, reporting satisfaction with jobs, education, and marital status, and having experienced a year that brought mostly positive changes in their lives. Some differences were noted in the experiences of men and women and residents and commuters. (Author/KE)

**Identifiers**—United States (South)

State governments need to be more innovative in providing various public services. Greatly increased state investment in public universities has strengthened university capabilities in many disciplines and research programs related to problems facing governments. But the real problems are involved in a university's efforts to provide more effective service to state governments. These problems include inappropriate organizational structures within universities, unfavorable past experiences in providing services, and widely varying perceptions of the university's total range of functions. While there is considerable consensus about the nature of state government university problems, there is much diversity in the manner of solution. Mississippi has established a single research and development center; Georgia, North Carolina, Tennessee, and Texas have established special centers or institutes; and Kentucky has often relied on faculty participation in task force efforts by state governments. After a comprehensive picture of the ways in which state government and university spokesmen view the public service responsibilities of higher education, it is concluded that a close and effective cooperation between a state agency and the universities can be a productive and continuing force. **Descriptors**—\*Activism, Administrative Policy, Administrator Attitudes, \*Higher Education, Institutional Role, Political Attitudes, \*Schematic Studies, Student Behavior, \*Student College Relationship, Student Participation

As part of a continuing examination of aspects of campus unrest, background, purpose and data information of the protest activity occurring during the academic year 1969-1970 was collected and used to analyze protest behavior and response. By recording all events in a single protest, as well as participants in each event, in sequential order, interrelationships between issues, participants, protest response, precipitation, and amplifying factors were examined. Some findings indicated racial protests resulted more than others because of nonresolution of previous protests; war-related protests were often precipitated by the arrival on campus of an industrial or governmental representative; racial protests made the greatest overall impact on the campus and war-related ones the least; black students led most racial protests, radical left students led most war-related protests, and unfiliated students led most of those on issues of academic and student life; administrators were most responsive in black protests and least so in war-related ones; violence and civil action appear to be amplifying factors in protest; campus police presence tends to precede violence but off campus police presence tends to follow the first violent act; administration negative or non-response also preceded and is highly associated with violence; disruption appears to be associated more with persons than with events. The purpose of this document is to establish the nation's overall need for biomedical and behavioral research personnel. Dealing with a limited analysis of the current situation rather than with projections, the document provides data, observations, statements of principle and recommendations. Chapter two described training programs -- their development, current levels and estimated levels in FY 1976, and what is known about the utilization of training by former fellows and trainees. Chapter three deals with a number of principles that have guided the Committee. A number of problems emerge when these principles are applied. These problems include; the costs of imbalance of supply and demand; market studies and their limitation; fellowships versus training grants; training grant funds to institutions and to trainees; and the postdoctoral pool. In

Chapter four, some significant trends concerning the development and utilization of biomedical and behavioral research personnel are presented, including: graduate enrollments and student support; Ph.D. output 1961-74; research and development expenditures; current number of active researchers. Chapter five provides a brief summary of important points. Appendices contain lists of committees and members; legislative and administrative history of training authorities; some data sources and studies; and a bibliography. (Author/KE)

Scholars trained to deal with the Soviet realm or more generally with the communist phenomenon have not typically included the DDR within their purview. A study of East German educational systems is of value since the decisions any society makes about its own educational system are revealing indicators both of where the society has been and where it is going and is of value to politicians, educators, and social scientists. This document covers East German postwar reconstruction and Soviet occupation; the higher education establishment, including routes to higher education, the worker's and peasants, faculties, teacher training, adult education, foreign students, religious education, military education, the state; the party and higher education, including, the constitutional basis, state and party apparatus, academic institutions of the Socialist Unity Party (SED), the Free German Trade Union Federation (FDGB), and the Free German Youth Research (FDJ); higher educational policy; the new reform movement; higher education and the economy; scholarship and research; and conclusions. Appendices contain a bibliography, academic credentials, statistical chronology and related documents. (Author/KE)

**Descriptors**—Admission Criteria, \*Equal Education, \*Higher Education, \*Minority Groups, Negro Colleges, Open Enrollment, Remedial Programs, \*School Holding Power, \*Student Placement, Universal Education

The extent and effectiveness of access to higher education requires careful assessment. Especially for students who have been previously excluded from higher education for noneducational reasons, the experience of dismissal or withdrawal can be cruelly frustrating. Because the benefits of a college education are not gained by getting into college but by getting through, an effort will be made to examine the sorting and routing processes that affect the academic progression of minority groups in a collegiate setting. Specific questions that need to be asked concern the placement and retention of minority groups and their retention-and-graduation from American colleges and universities. Closely tied to the questions of access, placement, retention, and graduation are policy issues involving educational barriers; role of black colleges, assessment programs and testing requirements, and programs for developmental studies. **Report of the Commission on Academic Governance.**

Victoria Univ. (British Columbia).

Pub Date 72

Note—100p.

**EDRS Price MF-\$0.76 HC-\$4.43 Plus Postage**

**Descriptors**—\*Administrative Organization, Chief Administrators, College Deans, College Faculty, Educational Accountability, \*Governance, Governing Boards, \*Higher Education, Institutional Role, Organization, Personnel Selection, Responsibility, Tenure, \*University Administration

**Identifiers**—British Columbia, \*Victoria University

The Commission on Academic Governance was charged by the president of the University of Victoria with the responsibility of making recommendations concerning the governance of the university for the immediate future. Suggestions were made for a number of organizational changes. The duties and responsibilities were set down from all persons concerned with academic decisionmaking. Issues covered were: the Universities Act, which provides the legal framework within which these recommendations were made; the nature of academic governance; responsibility and accountability in academic governance; the situation at the University of Victoria; duties, and responsibilities, term of office and procedures for selection of the department chairman; structure, duties, responsibilities, term of office, appointment procedures and role of deans and their faculties; composition, operation and role of the senate; the board of governors; and the appointment, promotion, tenure, the powers and duties of the president; the consultative process at the presidential level; the subdivision of the faculty of arts and sciences; the consolidation of the language departments, the status of professional librarians, and the role of students in academic governance. **Identifiers**—British Columbia, \*Victoria University

The Commission on Academic Development, which was established to examine the goals and development of the University of Victoria, was made up of a broad spectrum of people from the academic community who are appointed by the president. The commission focused on problems and issues of primary concern to the university, such as the academic goals of the undergraduate program, academic standards, an individual approach to teaching, graduate studies, continuing education, areas of specialization, research, physical education and athletics, summer session, academic services, and the reallocation of resources. The academic goals recommended by the commission may be summarized in two main concepts: (1) the University of Victoria should be a relatively small institution pursuing the highest standards and specializing in those fields in which it has particular advantages; (2) the academic offerings of the University of Victoria should be available for and be of service to the broadest possible spectrum of the whole community of which the university is a part. The commission goes on to make more specific recommendations. (Author/KE)

This document is the summary report of a study having as its main objectives: (1) an intensive study of organizational and group-structural factors influencing the research and teaching effectiveness of individual faculty members and their relations to the students; (2) research investigating the effect of academic area and technology on organizational structure and functions in effective and ineffective departments; (3) a cross-institutional study of academic institutions involving large and small, private and public colleges and universities, as well as community colleges. Data were collected from two major sources: the University of Washington and community colleges in the University of Washington area. Discussed are educational goals and trends, correlates of performance in community colleges, situational characteristics relevant to leadership, and research methods of the study. Tables include: (1) an analysis of faculty time spent; (2) correlations between satisfaction with the department atmosphere and satisfaction with particular facets of department functions; (3) correlation between satisfaction with the department administration and satisfaction with particular facets of department functions; (4) stepwise regression coefficients for college performance on liberal arts programs; (5) most and least preferred goals of faculty, administrators, and board members; correlations between community college divisions' performance and organizational characteristics. Appendixes contain a reprint of interim reports and of the questionnaire used to collect the data. (Author/KE)

**Identifiers**—\*Florida

Florida's decisionmakers need usable methods of obtaining information on the likely future demands their higher educational systems will have to meet. An analysis is made to provide the information and focuses on the problems of predicting freshman enrollment in the state's public colleges and universities, with particular attention given to the transition from high school to college. There is also an analysis of data sources available in Florida to identify the kinds and quality of data that can be obtained from each source as well as

the gaps in the available data and information required to establish enrollment rates and patterns not contained in any available source. A model for combining the data available is developed. Finally, ways in which policymakers can use these methods to assess the enrollment implications of alternative policies and to rapidly identify emerging problems in their higher education system is identified. Results are used to project 1972 freshmen enrollment by institution. Essentially, what is being predicted is how the development of a new institution would impact on the distribution of freshmen enrollment in Florida. The steps Florida would have to take to use these methods to anticipate the enrollment implication of changes in other policy variables are also discussed. (Author/KE)

**Identifiers**—\*New College

The status of any college's alumni is one measure of the success or failure of that college. Recognizing this rather widely accepted principle, New College conducted a survey of its graduates who completed their BA degree sometime between 1968 and 1974. A questionnaire was prepared asking the graduates for information about their current address, current employment, on-going or completed graduate training and space for additional comments. Of the 371 questionnaires sent, an additional 32 percent were available for analysis. Some findings are: (1) the majority or respondents live in the local area including Nassau and Suffolk counties and New York City, with 70 percent of them living in the tri-state (New York, New Jersey, Connecticut) area; (2) 63 percent of the respondents are currently pursuing or have completed post-baccalaureate education at 37 different institutions; (3) the proportion of undergraduates at the New College both past and present, pursuing the field of education is extremely small, while the number of students intending to pursue social service fields is extremely large. Yet these two fields are inversely represented among the alumni; (4) the number of New College alumni who have pursued additional training for education beyond the BA is high. (Author/KE)

**Descriptors**—\*Computer Assisted Instruction, \*Computers, \*Higher Education, Instructional Aids, Instructional Improvement, Instructional Innovation, Instructional Media, \*Learning, \*Learning Processes

How will the computer affect learning on the college campus? How should a faculty member go about selecting a mode of computer-based instruction for a particular course? These questions are the point of departure for this particular analysis of the use of the computer in instruction. The analysis begins with the construction of a model of the learning process. The second step is to attempt to match the stages of learning and the material to be learned with the capabilities of computer technology. The result is an assessment not only of what computers can do in contributing to learning but also of what they cannot do. One of the by-products of this interesting approach is the identification of noncomputer forms of instructional technology that appear to be most effective for certain learning purposes not served by computers. For example, textbooks and programmed tests seem to be the most effective

means of a student to acquire knowledge. But computers will be useful in embedding knowledge and in the integrating and testing phases of learning. The contribution of computerized instruction will be an enrichment of the learning process but not a substitution entirely or even substantially for traditional learning modes. (Author/KE)

**Emerging Financial Issues in Postsecondary Education: Shall We Take the Offensive?**

Western Interstate Commission for Higher Education, Boulder, Colo. National Center for Higher Education Management Systems.

Pub Date 28 Jan 75

Note—15p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Change Strategies, Costs, \*Economic Climate, Educational Demand, Educational Economics, \*Educational Finance, Educational Legislation, Educational Supply, \*Financial Policy, Government Role, \*Post Secondary Education, Program Planning, Proprietary Schools, State Federal Aid

Some financial issues in postsecondary education which, though more or less obscured by other concerns at present, may soon gain national attention. These issues are: our national policy of regarding postsecondary education as a discretionary spending item in either inflationary or recessionary times; the steady-state syndrome, a mind-set that leads to the dangerous assumption that funding levels should not change; the concept of entitlement, and the related issues of a lack of correspondence between federal student aid and state or regional plans; the demand that public institutions get rid of unviable or marginally efficient programs in combination with the high cost of phasing out or converting current programs; and the growing tendency for legislatures to link funding to productivity, quantitatively assessed. Along with these issues are some that seem to offer no offensive strategy: the emerging dominance of student aid as a delivery mechanism for financing postsecondary education; and the place of Voc/Tech and proprietary sectors on the funding picture of postsecondary education. "Postsecondary" education, that is, education beyond the 12th-grade level, includes vocational, technical, trade, and business schools as well as two- and four-year colleges. The institutions may be public, private, or proprietary. Emphasis on the wide spectrum stems from a national tenet—that there is honor and dignity in work whether it is solely intellectual, primarily physical, or a blend of the two, by the same token, the integrity of learning, of job preparation, can be as valid outside the traditional world of academe as it is within and from a belief in freedom of individual choice. In recent years, provision of postsecondary opportunity for all the nation's youth has been a national educational priority, and the largest single share of government support for higher learning has been used to reach this goal. Federal assistance to higher education began more than a hundred years ago with land grants for the establishment of colleges to teach the agricultural and mechanical arts. It continued with the G.I. Bill; the Education Act of 1958; the Higher Education Act of 1965, which established the Supplemental Education Opportunity Grant, the College-Work Study Program, Guaranteed Student Loan Program; and the 1972 Amendments to the Higher Education Act, establishing a new Basic Educational Opportunity Grant Program that reaffirms the principle of postsecondary education as a right, not a privilege, which must be accessible to all who qualify. Together, the various federal programs help several million needy students each year. (Author/KE)

**Report of the Faculty Curriculum Committee of Red Ink College on the Proposition of Adopting a Three-Year Baccalaureate.**

Pub Date 3 Sep 75

Note—35p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Bachelors Degrees, Curriculum Planning, \*Degree Requirements, Educational Finance, Educational Objectives, \*Higher Education, \*Private Colleges, \*Program Length, Time Factors (Learning)

Red Ink College is a hypothetical, private, coeducational institution located in the northeastern United States. The college is operating at a deficit that increases each year. A faculty curriculum committee is investigating the idea of introducing a time-shortened baccalaureate. Considerations involved in the decisionmaking are the history of early experiments with the three-year baccalaureate, the relevance of the time-shortened programs, the maturity of the students, college-level work offered at secondary schools, the economics of the time-shortened program, the concept of education for the whole man, general education, possible savings for the college, and the possible effects of the program on personnel. The faculty committee recommends that a three-year B.A. degree used solely to meet the financial needs of the Red Ink College is not a viable solution if it tends to devalue the competencies of the degree. However, as a means of making education more relevant to the changing times in this country, the three-year B.A. has tremendous possibilities at Red Ink College. A three-year baccalaureate could be established by the elimination of all professional courses from the undergraduate program. The current instructional staff could be retained by shifting of professors from what has traditionally been considered upper-level-type courses to those courses that would be incorporated into the time-shortened sequences, and by rethinking and justifying current courses and programs. Descriptions of 2,863 colleges make up the College Handbook. These are all the undergraduate institutions listed in the 1973-74 edition of Education Directory - Higher Education, published by the United States Office of Education, as well as some colleges that qualified early in the year for listing in the 1974-75 edition of that directory. Most of the descriptions are quite detailed. The descriptions follow a common outline to make it easy to find a particular item of information in any description and to compare one college with another in respect to a particular characteristic. Each statement begins with a few items of general information, followed by sections on curriculum admissions, student life, annual expenses, financial aid, and where to write for more information. The general information at the beginning makes it possible to classify the college quickly according to certain major characteristics—that is, whether it is a two-year or a four-year college, public or private, church-affiliated or not, and for men or women or both. In addition, this section gives the number of undergraduates enrolled in graduate study; information about its academic calendar, including the availability of summer session; and a description of the nature and location of its community. Colleges could, if they chose to, identify themselves as predominantly black, and they could also describe special features or other information not called for in other sections of the statement. Identifiers—Nichols (Robert)

It is posited that examination of the financial problems of private institutions must go beyond the readily available statistics on enrollment and surpluses or deficits into how private colleges compete and what is happening to their competitive position vis-a-vis the public institutions. Attention is directed toward: (1) the change in reputation of private colleges to prospective bright students; (2) the impact of a limited number of state policy variables on the altered preferences; and (3) the effect of institutional policies. Nichols' data collection in 1972-73 was replicated with "able students," defined as those high school juniors scoring among the top one-third of the students taking the National Merit Scholarship Qualifying Tests. Institutional analysis of the data shows that if a college wants to attract good students, it should: (1) charge low or no tuition; (2) hire the most highly qualified faculty available; (3) attract large amounts of research dollars; and (4) avoid general fiscal constraints. It is shown that public institutions are becoming more appealing to bright students in terms of absolute selections and more appealing even when selections are corrected for the size of the institutions. Methodological limitations of the study are noted. (LBH)

The establishment and growth of black colleges in the United States is traced from a catechizing school in New York City in 1704 to the present day. After a brief historical review, statistics are given in contemporary colleges, students, accreditation, and location. Problems facing the institutions and students are addressed and the future assessed. Positive forces operating to assist them in surviving are outlined, including federal support and scholarship programs. Some recommendations are offered for maintaining and strengthening existing institutions, dealing with library facilities, financial support, curricula changes, tuition fees, and admissions policy. Descriptors—Academic Standards, Achievement Rating, Curriculum Development, \*Evaluation Criteria, \*Grading, \*Higher Education, Learning Motivation, Pass Fail Grading, \*Predictive Measurement, Student Development, \*Student Evaluation, Undergraduate Students

That present grading practices are inadequate to their intended tasks, grading purposes as well as practices require examinations, and the social and educational effects of grading have been too long neglected are the basic axioms of educational reporters and academic professionals. This paper focuses on the problem of grade inflation, its causes and results. Included is a brief historical sketch of the evolution of grading systems in this country along with a discussion of current grading options, ways of measuring student achievement and the uses to which grades are put by the university and society. Whether the reinstatement of conventional (A-F) grading and the insistence on rigorous enforcement of standards by institution are possible or desirable are questioned. It is suggested that the growing belief that learning is independent of evaluation has profound consequences and could be the idea around which future grading systems will revolve. (Author)

Descriptors—Career Awareness, \*Career Planning, \*College Graduates, \*Employment Trends, \*Higher Education, Job Market, Labor Economics, Manpower Development, \*Manpower Needs, Manpower Utilization, Statistical Analysis

What is the current employment status of recent college graduates? Are the jobs graduates find satisfactory to them? Why are graduates having difficulty finding jobs? What can students and colleges do to prepare for future employment? Information about the job activity of college graduates is derived from samplings of recruiting activities of companies and organizations, from reports of individual college placement offices, and from Census and Labor surveys. The significant findings and meaning of these figures are relative. There is unemployment among college graduates and there are college graduates in jobs unrelated to their field of interest because they could get no other employment. While explanations for the declining vigor of the market for college graduates range from fairly simple to complex, research indicates that the most critical element in the employment situation for college graduates in the coming years appears to be the necessity for the absorption of some college educated persons into jobs which have not been traditionally filled by persons with a college education, and that the adaptive skills of liberal arts education, not the specific skills of vocational education, is needed for this type of job market. If colleges and universities are to help students in the career development process, they must expose students to the variables involved in career choice early in their college careers, and function as a link between students and a changing world of work. Descriptors—Collective Bargaining, Colleges, College Students, Costs, Court Cases, Decision Making, Governance, \*Higher Education,

\*Political Influences, \*Political Power, Student Participation, \*Student Rights, \*Students, Universities

While students have become more sophisticated in their modes of political influence, their interests since 1970 have become delimited to concerns that affect their lives the most—the cost of their education. They also remain concerned about issues of freedom and participation in campus decision making. While these newly emerging sources of influence are potentially quite effective, students have met with a number of barriers, both on and off the college campus. The sources of influence seem to have taken two routes: students organizing separately or students participating in already existing structures and processes. The evolution of sources of influence seems to be toward more student extra-institutional political activity where students may have an advantage at this time. Student extra-institutional political activity has been used directly to gain specific ends (like more financial aid appropriations) but, perhaps more importantly, indirectly to gain influence through permanent and legitimate participation in the ongoing institutional decision-making processes. Descriptors—Administration, College Students, \*Compensatory Education Programs, Curriculum Development, \*Educationally Disadvantaged, Educational Needs, \*Equal Education, Federal Programs, \*Higher Education, Institutional Role, Program Evaluation, Remedial Programs, State Programs, \*Student Needs, Student Personnel Services

Numerous federal, state, and institutional projects have been undertaken in the areas of current educational opportunity programs for the disadvantaged, but there is still a need to bring about significant changes in the areas of administration, curriculum, program evaluation, and financial assistance. The state of compensatory education at the college level and the equivocal status of evaluation efforts is confused, but some conclusions can still be drawn. Where programs have been implemented with full systems of student support services, special opportunity students showed equal or higher grade-point averages than regular students of comparable ability, equal or higher retention rates, and increased self-esteem and motivation. Where special opportunity students are selected on the basis of previously demonstrated talent, college completion rates exceed those of the traditional college population. Some student support services that show promise include: full systems of student support services, services that provide protection from an impersonal atmosphere, remedial courses based on specific needs, programs which give attention to the sociopolitical life of the students, behavior modification, course content that complements the nationalistic concerns of students, developmental programs in test taking and study habits, and programs that prepare adolescents in the transition from high school to college. Identifiers—New York (Oswego), State University College

Many factors influence the grades students earn. Without the intervention of institutional forces, it is reasonable to suspect that the mean semester index of successful students will remain constant with the passage of time. If, on the other hand, institutional variables exist that influence grading standards, then it is reasonable to suspect that the mean semester indices will reflect systematic change. The academic records of seventy-nine students who began their academic careers at the State University College at Oswego and remained in attendance and in good standing for seven consecutive semesters were selected for this study. The mean semester index of the subjects showed an increase between the freshmen and sophomore, sophomore and junior, junior and senior years. The semester indices of these students were below the general mean in the freshmen year and above the mean in the last semester of the senior year. Since there was no reason to suspect that these students experienced large relative gains in intelligence or talent, it must be concluded that the cause of these gains was external and probably institutionally based. Descriptors—Aptitude Tests, Colonialism, Disent, Educational Demand, \*Educational Development, \*Educational History, \*Educational Planning, Facility Expansion, \*Higher Education, Post Secondary Education, Teaching Load

Identifiers—\*Caribbean

Two important factors in the development of the Caribbean University are the cultural domination of the metropolitan countries to which they were attached, and the sharp divergence, in respect to financing, between the American model in Puerto Rico on the one hand and the British model in the University of the West Indies on the other. Against this background, some considerations that the Caribbean governments must face in the development of their university are: the level of entry into higher education; establishment of some form of postsecondary education; the development of new aptitude tests, reconsideration of faculty work loads; and the expansion

sion of graduate facilities. Also of importance are the problems of university autonomy, the brain drain, dissent, and Caribbean studies. (Author/KE)

Descriptors—Census Figures, Classification, \*Federal Aid, Federal Programs, \*Financial Support, \*Higher Education, \*Hospitals, \*Hospital Schools, \*Nursing, Statistical Data

This volume from the five-part report distributes Fiscal Year 1973 awards by hospital categories, DHEW agencies, census regions, state, and name of individual hospitals and hospital schools of nursing. The Department of Health, Education, and Welfare awarded \$339 million to nonprofit hospitals during Fiscal Year 1973, \$129 million to 175 teaching hospitals (exclusive of teaching hospitals owned by medical schools), \$198 million to 834 other nonprofit hospitals, and \$12 million to 327 hospital schools of nursing. The Health Services and Mental Health Administration and the National Institutes of Health awarded approximately 99 percent of the total funds awarded for nonprofit hospitals by the DHEW. The HSMHA awarded \$207 million, or 61 percent of the total, and NIH awarded \$128 million, or 38 percent. Rounding out the totals for DHEW, the Social and Rehabilitation Service awarded \$3.2 million, the Office of Education awarded a total of \$619 thousand, and the Food and Drug Administration awarded \$699 thousand. Descriptors—Delivery Systems, Educational Planning, Expenditures, \*Financial Support, \*Higher Education, Program Evaluation, \*State Aid, \*State Government, Statewide Planning, \*Student Needs

Identifiers—\*Michigan

Neither the abstract conceptualization nor the pragmatic reality of financial aid operates in a vacuum. Both are subject to, and indeed part of, the larger societal fabric with its overriding priorities and concerns. The relative paucity of universal truths in this field does not, however, in any way diminish the state's responsibility for thorough planning and evaluation in this area. Instead, it simply highlights the critical need for such action if the legitimate needs of Michigan residents are to be responsibly addressed. Before the planning process can be engaged in a meaningful manner, however, there must be information available as to: (1) a mutually acceptable definition regarding the concept of student financial aid; (2) an understanding of the background of the field and its current major programs; (3) a perspective regarding the relative adequacy of current expenditures in this field; (4) an overview of the present delivery system matrix; and (5) an idea of the nature of some of the central issues of present concerns in the field. Identifiers—\*Michigan

Attention has periodically been given to inequality of opportunity in higher education in Michigan by both the governor's office and the

state board of education. Activities to date have been based upon the premise that disadvantaged students have often been effectively excluded from participation in higher education, and that certain procedures must be adopted to rectify this situation. These procedures would lead to the establishment of a system of higher education that would provide equity in terms of: (1) individual selection and support services; (2) student financial assistance options; and (3) institutional and programmatic articulation. Recommendations take into consideration admissions criteria, admissions recruiting practices, student support services, information services, and student financial aid. (KE)

**Geography Controls GI Bill Opportunities.**

National League of Cities, Washington, D.C.

Pub Date 11 Nov 74

Note—34p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—\*Equal Education, \*Financial Support, Government Role, \*Higher Education, State Action, State Colleges, State Universities, Statistics, \*Student Costs, Tables (Data), Tuition, Tuition Grants, \*Veterans

Analyzing FY 74 GI Bill data seems to confirm that a Vietnam veteran's chances of using the GI Bill turn on what state he is from. Geography controls opportunities because the formula of today's GI Bill, unlike that of World War II's Bill, ignores state differences in educational costs. This legislative formula inadvertently minimizes veterans' use of their deferred compensation for military service in Eastern and Midwestern states. Under the formula of today's GI Bill, all veterans get the same flat monthly sum—\$220—to pay for education and living costs. The World War II GI Bill provided a sustenance payment of \$75 per month and a separate payment for tuition, books and supplies of up to \$500 per year directed to the educational institution. In addition, current benefits levels are interpreted by the Veterans Administration to show that veterans today have more adjusted dollars than did World War II veterans. However, this computation is based on Consumer Price Index data, which treated the 1948 dollars as being worth \$2.00 in October 1974 dollars. In actuality, figures like the minimum wage and average monthly earnings have increased three to five times their 1948 levels. Federal or state corrective action is needed to give all veterans equal educational buying power and to give them the needed income base. (Author/KE)

**The Outlook for Enrollments in Higher Education in Maryland Through the 1980's.**

Maryland Council for Higher Education, Annapolis.

Pub Date Feb 74

Note—39p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

Descriptors—Birth Rate, \*Census Figures, College Attendance, \*Enrollment Projections, \*Enrollment Rate, \*Higher Education, High School Graduates, Population Distribution, Population Growth, Population Trends, Student Characteristics, \*Trend Analysis

Identifiers—\*Maryland

The history of the growth of college enrollment in Maryland over the last twenty years has been marked by unprecedented increases in numbers of students, particularly in the 1960's, but the end of that period of rapid growth is approaching. This report highlights the past growth of higher education in Maryland, points out significant factors in the characteristics of students involved in higher education, and discusses the nature and extent of future growth of higher education enrollment for the coming years. Included are detailed enrollment trends of the last five years, the birth rate in Maryland over the last 35 years, the Maryland high school graduates, and the rates of college attendance based on age and sex; these data along with migration to and from Maryland, elementary-secondary enrollments, and other census data constitute the inputs for a computerized enrollment projection model for higher education that has been developed by the Maryland Council for Higher Education. The enrollment projections for higher education in Maryland to the year 1990 by segment and enrollment status are presented as those that are most reasonable in terms of past trends. (Author/KE)

Identifiers—\*Alaska

This is a survey of the postsecondary educational scene in the State of Alaska. The first segment of the report discusses the major institutions and agencies involved in the delivery of postsecondary education in the state, the second analyzes offerings, the third presents additional observations, and the fourth summarizes the findings. Finally, recommendations for further studies are made. Some findings are: (1) institutions from which information was available enrolled a total of 24,747 and granted a total of 3,022 certificates and degrees; (2) a wide variety of postsecondary courses and programs were offered; (3) the need for this report was occasioned by the lack of a single agency to which postsecondary education agencies and institutions regularly submit data about students, programs and finances; (4) current, accurate, and complete information for prospective students was not available in a consistent fashion. Recommendations include establishing: (1) an appropriate means of systematically and regularly collecting information; (2) an appropriate method to disseminate information; (3) a continuing study that would identify and rank problems; (4) a management information program; and (5) a criterion for judging the adequacy of program availability. **What Is an Urban University?**

Note—12p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—Doctoral Programs, \*Educational Responsibility, Graduate Study, \*Higher Education, Part Time Students, Professional Education, \*School Community Relationship, Student Characteristics, \*Urban Areas, Urban Population, \*Urban Universities

Today, the urban university is becoming the principal force in higher education. Although new to the American scene, it is educating thousands of students while also answering some of the community's basic needs. The growth of the

urban university has been and will continue to be rapid and tremendous. For the purpose of this study, a simple definition of the urban university will be on the basis of the clientele it serves. The specific criteria will include: (1) it enrolls 20 percent or more of its students on a part-time basis; (2) it is located in a city with a population of 250,000 or more; (3) it has graduate and professional schools; and (4) it grants the Ph.D. degree. Under this definition of an urban university there are 77 distinctly urban institutions, differing in style, offering, and philosophies. A list, which is included, gives a suggestion of the importance of an urban institution to consumers of education. (Author/KE)

Descriptors—\*Bibliographies, Educational Assessment, \*Educational Television, \*External Degree Programs, \*Higher Education, Independent Study, \*Open Education, \*Universities

Identifiers—Aspen University, \*Great Britain

After initial hostility and skepticism to Open Universities, the critical response became more favorable. From 1971 onwards there was a tremendous amount of writing about the Open University, not only in British journals and newspapers but also abroad. This bibliography incorporates over 130 entries dealing with the Open University in Great Britain. There are five sections to the bibliography: (1) national newspapers; (2) journals and magazines; (3) pamphlets, books and contributions to books; (4) overseas; (5) dissertations and theses. Each section is preceded by a brief explanation. Taken together the sections do not constitute a bibliography of everything that has been written about the Open University, but should provide a good starting point. (Author/KE)

Descriptors—Costs, \*Educational Finance, Expenditures, Federal Legislation, Federal Programs, \*Federal State Relationship, \*Higher Education, Incentive Systems, Institutional Role, \*Management Systems, \*State Standards

As background for the 1972 Education Amendments, the National Center for Higher Education Management Systems (NCHEMS) was asked to look at whether a method of federal institutional aid could be developed that would still preserve the incentives of the states to fund higher education. It was concluded that such a method of financing could be developed. The current proposal is reported in five main sections covering: (1) details of the current proposal; (2) the policy platform that underlies the current proposal; (3) attempts to determine the contribution that proposed methods of financing would make to the national objectives for higher education that were proposed by the National Commission on the Financing of Higher Education; (4) ancillary details of the current proposal; (5) some criticism and concerns that have been raised about the proposals. Appendixes follow. (Author/KE)

Descriptors—Disadvantaged Groups, Educational Assessment, \*Educational Development, Effective Teaching, Evaluation Methods, Instructional Innovation, Instructional Media, Leadership Training, Minority Groups, \*Models, \*Post Secondary Education, Professional Education, \*Program Descriptions, \*Program Guides

This document includes the descriptions of the 179 projects that received support from the Fund for the Improvement of Post-Secondary Education in 1975-76. The content represents resources for change, not capital resources, but those non-capital resources essential to improvement—people, institutions, and ideas. The Project Directors named are practitioners working each day to implement real improvements in their settings. And the institutions named are not just the major universities, although some of them are included. The projects represent, in their totality, the broad sweep of practitioners of organizations involved in American postsecondary education today. The ideas, although all may not be regarded as dramatically new, often are woven into new contexts and others evidence untried dimensions. The projects generally fall within certain categories: (1) expanding educational opportunity to populations poorly served; (2) new approaches to aid prospective educational consumers; (3) faculty development and new incentives for effective teaching; (4) improvement of instructional services; (5) leadership development; (6) institutional development and renewal; (7) integration and work and education; (8) development of assessment techniques for evaluation of program quality and individual learning. Identifiers—Goodwill Industries Of America, \*Uniform Socio Economic Reporting System, USERS

Goodwill Industries of America, Inc. developed a management information system designed to provide rehabilitation workshop managers with information needed to make sound administrative decisions, statistics to measure the outcome of these decisions in terms of service to the handicapped, and the financial resources needed to deliver the services. Called USERS (Uniform Socio-Economic Reporting System), it allowed agencies with similar functions to benefit by direct comparison of existing financial and statistical information. USERS has five specific purposes: (1) to establish uniform budgeting and forecasting techniques; (2) to establish uniform cost effectiveness techniques; (3) to establish fee-setting techniques; (4) to establish uniform service information techniques; (5) to establish recommended management control systems for voluntary health and welfare agencies. The appendix includes worksheets samples for developing and using USERS. (HB)

Faculty Status for Librarians in the State University of New York, A Short History.

State Univ. of New York, Albany. Univ. Libraries.

Pub Date Jan 75

Note—11p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Academic Rank (Professional), Collective Bargaining, Labor Unions, Legisla-

tion, \*Librarians, Professional Associations, \*University Libraries

Identifiers—Faculty Status, New York, \*State University of New York, SUNY

Since 1966 the librarians of the State University of New York (SUNY) have been working toward full faculty status for themselves on all 33 campuses. In that year the Chancellor's Advisory Committee on Libraries recommended: library titles equivalent to existing academic titles; a range of librarians' salaries equivalent to those in academic ranks; equivalent working months, with additional compensation for service beyond the academic year; full faculty voting power; and an appointments program and tenure equivalent to that of the faculty. The legislature approved only the voting and appointments measures, leaving the librarians in a "limbo" with academic rank but with salaries and titles in the existing administrative hierarchical structure. A SUNY librarians association was formed in 1969 to help promote the original recommendations to both the university and unions representing faculty. So far, however, the unions have been unable or unwilling to negotiate for the improvements desired by the librarians. (LS)

A Study of Microfiche as an Alternative to the Reserve Room Function.

Pub Date Jun 74

Note—72p.; Master's Thesis, University of Denver

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—College Libraries, Diaries, \*Feasibility Studies, Higher Education, Information Needs, Information Science, Library Collections, \*Library Education, \*Library Materials, Library Research, Library Services, \*Microfiche, Microform Readers, \*Microreproduction, Questionnaires, Reprography, Statistical Data, University Libraries, Use Studies

Identifiers—Colorado, University of Denver

A study was conducted at the University of Denver to compare the effectiveness of microfiche as opposed to textbooks, photocopying, or reserve room reading for a library science reading assignment. Assigned material was copied on microfiche and given to each student. The results were measured by analyzing data gathered using student diaries, questionnaires, and a time-sampling of the use of microfiche readers in the library. The results were positive. Students stated that they would be willing to pay for microfiche copies of assignments in other classes because of their experience with the equipment. Questionnaire forms, diary and survey sheets, and data summaries are appended. (Author/DS)

Realia are toys, articles and other three-dimensional objects that a child handles, manipulates or plays with to gain direct experience and information about his/her environment. Realia may include: models, toys, games, tools, puppets, costumes, and musical instruments. Children of all socioeconomic levels have the same developmental needs for play experiences and many of their parents need guidance in supplying toys appropriate to their child's specific stage of development. Toys can aid in perceptual development, release creativity, and provide an important bridge to reading, when prop boxes are used in conjunction with story books. By providing realia, the public library can extend its services to children too young to read and serve as a resource to parents and early childhood educators—alerting

them to a variety of new and useful materials. Using a variety of financial arrangements and program designs, a number of Connecticut public libraries have implemented realia programs. Along with a brief description of these programs, this guide lists criteria for the selection of realia and suggests methods for processing, circulating, and using realia in the library program. The State Library of Illinois presents the written testimony given at the regional hearings of the National Commission on Libraries and Information Science at Chicago, Illinois, September 27, 1972. Witnesses include librarians from academic, regional, public, special, state, school children's, and audiovisual libraries, as well as legislators, library school professors, commercial information suppliers, publishers, library trustees, educators, and officials of state governments and library associations. While financial needs are heavily emphasized in many of the written statements, the whole gamut of services and problems in the library and information areas are touched upon. These areas include cable television; public relations; cooperative programs; interlibrary loans; information needs and access; the role of the Commission and the federal government; information systems and networks; automation; library manpower; copyright; library education; media and audiovisual materials; facilities; standards; national and regional centers; library research; information and referral programs; and services to the unreached, the handicapped, senior citizens, minorities, rural populations, and children. The states of Illinois, Iowa, Wisconsin, Ohio, Minnesota, Michigan, Indiana, and Missouri are represented in the testimony. (LS)

Influence of Student Expectation and Student Sex on Predicting Academic Success.

Pub Date 75  
Note—17p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage  
Descriptors—\*Academic Achievement, Attitude Tests, Audiovisual Instruction, College Students, \*Expectation, Females, Higher Education, Independent Study, \*Predictive Validity, \*Sex Differences, \*Student Attitudes

Predicting student success in various academic situations has traditionally been via the use of cognitive pre-tests, or other non-attitudinal measures. A study grouped students, (approximately 75 percent female, primarily college sophomores enrolled in a semester-length audiovisual course), according to individual pro-instructional expectancy levels (low, average, high). Instructional formats used were: (1) self-instruction manual with supplementary, non-required large group sessions, (2) self-instruction manual with coordinated small group sessions, (3) self-instruction manual alone. Data obtained from an average of 159 students enrolled in 3 consecutive semesters indicated that high expectancy students were most successful, and low expectancy students were least successful. Female students were relatively more successful than males in the three instructional formats tested. (NR)

Descriptors—Attitudes, \*Computer Assisted Instruction, Computer Programs, Computers, \*Cost Effectiveness, \*Military Training, Performance Criteria, Program Evaluation, Programming Languages

Identifiers—Air Force Advanced Instructional System, \*Computer Managed Instruction, Navy, Plato IV, Sigma 9

The Navy computer-managed instruction system (Navy CMI) is a large, multi-site operation. Research findings show that it is yielding benefits in terms of cost savings. During fiscal year 1975, savings of over ten million dollars were realized, mostly due to course reductions ranging from 24 to 80 percent and reductions in on-board students. It has been found that CMI training yields better end-of-course performance levels while maintaining more positive attitudes among students. Attrition rates are lower with CMI, and a continuation of this trend is predicted as the system is expanded. Savings are projected in the potential for expanded capability and competitive procurement using the current system and hardware. Research has shown positive personnel attitudes associated with the integration of personnel and operational procedures using CMI. It is suggested that performance and cost benefits qualify Navy CMI for expansion. (Author/CH)

Document Not Available from EDRS

Descriptors—\*Aggression, Anti Social Behavior, Behavior, Behavior Problems, Behavior Theories, Broadcast Television, \*Children, \*Commercial Television, Literature Reviews, \*Programming (Broadcast), Social Behavior, Television, \*Television Viewing, Violence

Television programming has a high degree of credibility to the indiscriminating eyes of children. Programming on commercial television is composed of shows produced specifically for children and shows formerly made for adults but now shown as reruns. Observation and imitation of behavior viewed on television by children may be a link to aggressive behavior of children at school. Studies have shown that it is difficult for children to cope with the concept of aggression and death as it is presented in children's cartoons. The effect of television violence can be determined by monitoring local and national broadcasts during children's viewing times or conducting controlled studies to produce an objective method of measurement. However, input from the community could be the best method to convince broadcasters that it would be to their advantage to improve programming. Twenty-two references are cited. (Author/DS)

From birth to age 18, the average child spends more time watching television than in the classroom. During the developmental years when the boundaries between fantasy and reality are not clear, a child is exposed to massive doses of violence and killing. Sex roles and stereotypes are also given a lot of air time. By not placing the child in an interactive mode, television causes the child's responsiveness and imagination to become stagnant. Repetitive advertising can also have a deleterious effect on the child's consumption patterns. A brief bibliography of readings on children's television is included. (EMH)

Identifiers—BASIC, \*BASIC Instructional Program

The BASIC Instructional Program (BIP) is an interactive problem-solving laboratory that offers tutorial assistance to students solving introductory programming problems in the BASIC language. After a brief review of the rationale and origins of the BIP instructional system, the design and implementation of BIP's curriculum information network are described. The most recently developed features of the BIP system are briefly reviewed. An annotated student dialog illustrates a typical BIP session. The results of an experiment comparing BIP with a fixed linear path through the same curriculum are reported. (Author/EH)

In July of 1974, a conference of women librarians met at Rutgers University to discuss the present status of women in the profession and prospects for the future. The program focused on the history of discrimination against women, the librarian's self-image, and library career development. Emphasizing changes to be made, the group examined some possible tactics: regional organization, union organization, affirmative action, and changes in library education. Included in the conference summary are the texts of the speeches, resolutions sent to the American Library Association, and a bibliography relating to women in librarianship. (EMH)

Descriptors—Conference Reports, Costs, \*Delivery Systems, \*Library Circulation, \*Library Services, Public Libraries, Rural Areas, Urban Areas

Identifiers—\*Books By Mail

When representatives of public libraries with programs to deliver books to patrons by mail met in Las Vegas, Nevada, in June of 1973, the conference brought to a sharp focus the emergence of two different types of books by mail (BBM) programs. One is the urban or metropolitan program serving the four to six percent of the urban population who are homebound, elderly, or institutionbound or who find mail service more convenient. Another is the rural program serving from 8 to over 40 percent of a local population hitherto unserved by public libraries. The reading interests shown by BBM patrons reflect the general reading patterns of the local area. Staff cost is the largest cost factor in both urban and rural programs. In rural programs, maintenance of a separate paperback collection and creation of a catalog for the BBM program are the second and third ranking cost factors. In most areas, the BBM program complements rather than competing with or replacing the existing standard library services. The conference report includes an extensive summary and 13 presented papers. Thirteen short papers are presented which discuss various aspects of library acquisitions, programing, and evaluation of services. Among the papers are the reports of the American Library Association's Committees on copyright and on legislation. Media topics included a compilation of bibliographies, primarily of film sources; a study of media acquisition problems in 46 Michigan schools; a survey of the most requested features in a microfilm viewer. Public library services were examined in relation to non-sexist Young Adult (YA) programing; new evaluation techniques for kinds of services; library utilization by residents, patients and inmates of Los Angeles County institutions; specialized reference services offered to Pasadena, California economic community. Publishing information includes summarized needs and problems of the textbook market. Other topics dealt with recently introduced federal legislation of interest to librarians; aid available to libraries needing to meet criteria of the Occupational Safety and Health Act (OSHA); the collection and exchange of ephemeral material. Report on the "Proposed Library Reorganization".

North Carolina Univ., Charlotte. J. Murrey Atkins Library.

Pub Date Sep 75

Note—25p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Academic Rank (Professional), \*Administrative Organization, \*Library Administration, \*Library Planning, Organizational Development, University Libraries

Identifiers—\*Participative Management

A proposed reorganization plan for the J. Murrey Atkins Library of the University of North Carolina at Charlotte would organize the library in the collegial mold with two departments, Public Services and Technical Services. Within each department, librarians would form a faculty with emphasis on participatory management. Decisions involving the activities of particular library units would be made with the participation of the support staff working in that area. To implement this scheme, a three- to twelve-month period of analysis and experimentation would be conducted with staff members other than department heads acting as coordinators for reorganization. Through training sessions, staff members would develop needed skills in management techniques, communication, and decision-making. Detailed recommendations for implementing the scheme are included. Identifiers—AESP, \*Appalachian Education Satellite Project, Diagnostic and Prescriptive Reading Instruction

A course in diagnostic and prescriptive reading instruction was delivered by satellite to a group of educators, and cognitive, affective, and classroom practice changes were observed. Participants were kindergarten through third grade teachers in the Appalachian region. The course consisted of 12 half-hour color videotaped lessons, 12 pretaped audio review segments, laboratory activities, unit tests, related reading materials, and three 45-minute, live, televised seminar programs. Pre- and posttests were developed for each of the 12 units of the course. The participants demonstrated gains in performance on tests keyed to course objectives, and their attitudes toward concepts and principles presented in the course changed slightly in a positive direction. Statistical tables show the results of pre- and posttesting. A questionnaire, a teaching practice inventory, and the course outline are appended. (Author/DS)

Identifiers—Alaska, Applications Technology Satellite, \*Health Education Telecommunications Experiment

Communications satellite technology has for the first time given Alaska the capacity to deliver television broadcasts to the state's isolated regions. The ATS-6 Health/Education Telecommu-

nications Experiment has given the state an opportunity to: (1) acquire experience with new forms of technology; (2) involve the state's culturally diverse minorities in the selection of programing; and (3) provide educators with experience in developing materials for use in rural communities. All-weather ground terminals have been installed, and nearly 100 hours of original programs were created and broadcast. Because of the potentially dramatic impact the broadcasts could have on village life, care has been taken to involve community councils in all stages of decision making. A full external evaluation of the program will be forthcoming. (EMH)

Alaska is a state of geographic and cultural extremes. In order to improve the standard of health and to provide broader educational opportunity, especially in rural communities, the ATS-6 communications satellite has been used to compensate for remoteness and transportation difficulties. The Health/Education Telecommunications Experiment has given Alaska its first experience with a prototype operational satellite communications system for the transmission of television and multiple voice channels to low-cost earth terminals. Volume I of the three volume final report provides technical information regarding hardware, site selection, instructional programing, and community involvement in decision making. (EMH)

Identifiers—Freedom of the Press, \*Freedom to Read, Illinois (Peoria), \*Intellectual Freedom, Library Bill of Rights, Minnesota (Wrenshall), New York (New York), Report of Commission on Obscenity Pornography

David K. Berninghausen's writings on intellectual freedom in the library, the university, and the press are collected in this volume. These essays cover the education of librarians for intellectual freedom, the communications process, the threat to liberal values (intellectualism, objectivity) in the communications institutions, the erosion of academic freedom in recent years in the universities, theories of the press as bases for intellectual freedom, the social responsibilities concept of librarianship versus the Library Bill of Rights concept, and the American Library Association's defense program for defenders of intellectual freedom. One chapter contains four case histories of library censorship: the attempt to remove films from the Peoria, Illinois, public library; (2) the banning of the "Nation" in New York City school libraries; (3) the banning of Orwell's "1984" in Wrenshall, Minnesota; and (4) the United States government's rejection of the "Report of the Commission on Obscenity and Pornography." The emphasis is on maintaining a climate in which all views may be expressed and examined and all materials made available for those who seek information, without pressure for censorship from either the right or left. On June 3, and June 4, 1975, hearings were held before the House Subcommittee on Communications regarding the Telecommunications Facilities and Demonstration Act of 1975, H.R. 4564. The bill has been submitted by the administration to provide the authority for the support of demonstration projects in telecommunications concerning the distribution of health, education, and social service information. This report includes the text of the proposed bill; the report of the Department of Health, Education, and Welfare Office of Telecommunications; the transcripts of 19 individual statements; and copies of the supporting information that was entered into the record. R&D Funding Policies of the National Institute of Education: Review and Recommendations. Final Report of Consultants to the Director and the National Council on Educational Research.

National Inst. of Education (DHEW), Washington, D.C.

Pub Date Aug 75

Note—111p.

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—Consultants, Educational Development, \*Educational Researchers, \*Federal Programs, Financial Support, Government Role, National Programs, National Surveys, \*Policy Formation, Program Evaluation, \*Regional Laboratories, Research, \*Research and Development Centers, Research Needs, Research Projects, Research Reviews (Publications)

Identifiers—National Council on Educational Research, \*National Institute of Education

Ten consultants were employed by the National Institute of Education (NIE) to examine the state of educational research and development (R&D) with specific reference to the regional laboratories and the R&D centers established in the late 1960's. By conferring with NIE officials, surveying the directors of regional laboratories and R&D centers, and questioning other interested educators, the consulting team was able to examine: (1) the nation's capacity to do research in education; (2) the relationship of the style of funding to the quality of research; and (3) the potential effects of alternative methods of funding. The report concludes with an extensive list of recommendations for legislators, researchers, and educators. (EMH)

Information Sources on U. S. Radio Regulations in the Law Library.

Pub Date Sep 75

Note—19p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Annotated Bibliographies, Broadcast Industry, \*Federal Legislation, Governmental Structure, Government Publications, Government Role, \*Law Libraries, \*Legislation, Library Materials, Library Research, Programming (Broadcast), Public Libraries, \*Radio, \*Television, University Libraries

Identifiers—\*University of Michigan Law Library, University of Michigan Libraries

An annotated bibliography gives the radio regulations in the U.S., using sources available in the University of Michigan Law Library as well as

the University of Michigan Libraries. Information is applicable to other law, university and public libraries. Relevant material on television regulations is included. Listings cover federal agencies, card catalog subject headings, dictionaries, directories, encyclopedias, indexes, bibliographies, loose leaf services, legal form books, and statutory material. References are arranged from the general to the complex. An appendix contains additional pertinent titles. (NR)

Employers' Expectations of Recent Library School Graduates: A Review of the Recent Literature.

Pub Date 19 Aug 75

Note—21p.

EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Employers, \*Employment Qualifications, \*Expectation, Job Applicants, Job Market, Job Placement, \*Librarians, Library Education, Literature Reviews, Personnel Needs, \*Personnel Selection, Professional Personnel

In order to discover employers' expectations of recent library school graduates' qualifications, a study was made of the literature between 1970 (when the job slump made it an employers' market) and 1975. The accumulation of journal articles, letters to editors, editorials, ERIC documents, monographs, speeches, and dissertations added up to 150 citations, of which included both survey research and articles of opinion, revealed that: (1) there are usually a number of candidates who qualify for each position; (2) since the initial screening is a most important part of the process, a candidate needs to make himself stand out in a positive way; (3) an applicant must be able to move about not only for jobs, but for interviews as well; and (4) contacts and tips about openings are important. A bibliography is attached. (LS)

Data Processing Technician I&amp;C. Rate Training Manual and Nonresident Career Course. Revised Edition.

Naval Education and Training Command, Pensacola, Fla.

Report No.—NAVEDTRA-10265-C

Pub Date 75

Note—182p.

EDRS Price MF-\$0.76 HC-\$9.51 Plus Postage

Descriptors—Computer Programs, \*Computers, \*Computer Science Education, Computer Storage Devices, Data Processing, \*Data Processing Occupations, \*Electronic Data Processing, Instructional Materials, Management Development, Management Education, \*Military Training, Programmers, Programming, Supervisor Qualifications, Supervisory Training, Systems Approach, Systems Concepts

Identifiers—COBOL, Naval Personnel, Navy, \*Training Manuals

This training manual is intended as an individual study aid for Navy personnel who wish to prepare for advancement to the rate of Data Processing Technician First Class or Chief Data Processing Technician. Theoretical knowledge and operational skills are presented along with assignments designed to lead students through the manual. The manual first describes general computer documentation and the use of COBOL in data processing. COBOL in the data division and the procedure division is described and documented with examples. The kinds of systems used by the Navy are explained. Personnel organization and duties for Navy data processing technicians are detailed followed by an analysis of appropriate supervisory personnel requirements, procedures, and attitudes. (CH)

Instructional Program for Library/Media Centers. Cheltenham Township School District, Elkins

Park, Pa.

Pub Date 75

Note—49p.

EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage

Descriptors—Audiovisual Aids, Books, Catalogs, Curriculum Guides, Elementary Secondary Education, \*Instructional Materials Centers, Instructional Programs, \*Library Instruction, Library Programs, \*Library Skills, Pamphlets, Periodicals, Reference Materials, \*School Libraries

Identifiers—Pennsylvania (Cheltenham Township), Pennsylvania (Elkins Park)

The Cheltenham Township school district (Elkins Park, Pennsylvania) has compiled a guide for library instruction. Suggested learning objectives and activities are listed for each grade level K-9, while an elective mini-course is proposed for grades 10-12. Integration of library instruction with curriculum and classroom activities is emphasized at all levels. The library instruction plan is recapitulated in chart form with indications for each grade level as to when a topic should be presented, taught, and reviewed and expanded. Subjects include orientation, parts of books, audiovisual materials, alphabetizing, Dewey Decimal System, the card catalog, dictionaries, atlases and maps, research skills, periodicals, vertical files, reference works, and literature appreciation. A list of available lessons and a multimedia bibliography are appended. (LS)

An Individualized Program for Learning Resource Center Orientation.

Pub Date Jun 75

Note—66p.; Ed.D. Practicum, Nova University

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—Audiovisual Aids, \*Autoinstructional Aids, College Libraries, Individualized Programs, Instructional Design, \*Instructional Materials Centers, \*Library Instruction, Library Skills, \*Material Development, \*Multimedia Instruction, Program Evaluation, Student Attitudes

Identifiers—\*Thomas Nelson Community College

A completely individualized, self-contained, taped orientation tour of the Learning Resource Center of the Thomas Nelson Community College was developed by the library director. To generate the materials, the staff and director cooperated in an analysis of the items of information that were basic to the use of the learning resource center and in the development of questions which would test familiarity with this information. A script was written and produced on audio tape. The materials were evaluated by administering pre- and posttests to library patrons; the resulting degree of improvement was determined by statistical analysis. An interview procedure was also used with the college staff and students. It was concluded that the tour was well-received and contributed materially to the general orientation program of the college, to the improvement of the attitude of students to the learning resource center, and the improvement of their library skills. A discussion of the limitations of the study and suggestions for further refinements are included. The script of the audio tape and the test questions are appended. (Author/HB)

Identifiers—\*Office of Education

The United States Office of Education (USOE) policy in funding purposive television programming for children was investigated. Information and policy recommendations were gathered from existing sources in the general literature, USOE file materials, 10 single-topic commissioned papers, a 10-member advisory board, a Federal advisory

group, and interviews. Over 90 interviews were conducted in six locations, including Washington, D.C., with personnel directly involved in or knowledgeable about the dispensing or utilization of Federal dollars in support of children's television programming. This final report provides a descriptive map of the various components essential to an integrated system of broadcasting; gives a side-by-side comparison of USOE's two major investments in children's programming (Children's Television Workshop and series and spot announcements funded under the Emergency School Aid Act); and summarizes major policy issues, alternatives, and recommendations. Spons Agency—Office of Naval Research, Washington, D.C. Personnel and Training Research Programs Office.

Report No—BBN-R-3181

Pub Date Oct 75

Note—56p.

EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage

Descriptors—\*Computer Assisted Instruction, Computer Oriented Programs, Computer Programs, \*Educational Technology, Individualized Instruction, Programed Tutoring, State of the Art Reviews, Teaching Models, Tutorial Programs, \*Tutoring

Identifiers—\*Intelligent CAI Systems, Map SCHOLAR, Natural Language Programming, NLS SCHOLAR, SCHOLAR, SOPHIE, Tutor SCHOLAR

Intelligent computer assisted instruction (CAI) systems are exemplified by several tutorial systems including Tutor-SCHOLAR, Map-SCHOLAR, NLS-SCHOLAR and SOPHIE. The original SCHOLAR program structure made it possible to model the way human tutors interact with students. Further analyses of tutoring and teaching strategies led to the development of Tutor-SCHOLAR. Intelligent computer systems illustrate how a variety of techniques can be used for tutoring visual knowledge, procedural knowledge, and diagnostic skills using natural language. (Author/CH)

Identifiers—\*National Library of Medicine

In an attempt to compare the job activities of recent graduates from librarianship and internship programs supported by the National Library of Medicine (NLM) with a comparable group of graduates from non-NLM-supported programs in librarianship, detailed questionnaires were administered to graduates from both groups. They were asked to describe the tasks they performed on their present and last held jobs, the percentage of time spent on each task, the degree to which their training had prepared them to perform that activity, their professional activities, and their salary. Results showed that while all groups of graduates were heavily engaged in traditional library activities, graduates of NLM-supported internship programs were significantly more involved with activities related to application of automatic data processing, computers and computer programming, library administration, and design implementation/preparation activities. They were also earning higher average salaries, were more apt to be working in a medical library, and were more likely to be involved in research or development activities. The findings suggested also that many graduates of library programs were having difficulty finding a job in a medical library. Survey questionnaires and data tables are included in appendices. Communication Satellites and Social Services; Focus on Users and Evaluations. An Annotated Bibliography.

University of Southern California, Los Angeles.

Annenberg School of Communications.

Pub Date Nov 75

Note—70p.

Available from—Learning Systems Center, Administration 255, University of Southern California, Los Angeles, California 90007 (\$5.40)

Document Not Available from EDRS

Descriptors—\*Annotated Bibliographies, Bibliographies, Communications, \*Communication Satellites, \*Evaluation, Evaluation Methods, Information Networks, Information Sources, \*Media Technology, Social Characteristics, Social Factors, Telecommunication Identifiers—Applications Technology Satellite, ATS 6

The purpose of this bibliography is two fold: To review the 1970-75 literature on communication satellites with particular emphasis on social applications, experiments, and evaluation; and to provide future satellite planners and evaluators with a convenient overview of specific experiences. The review includes documents dealing with past, current, and planned applications, experiments, and evaluations of domestic and international satellite projects. Many of the sources give data on types of users, numbers of individuals involved, estimated cost per instruction hour, and program content. A section is provided wherein key words developed for each annotation are grouped by categories for reference. No attempt is made to include every published work in the annotated section, nor do the authors claim to have accessed all written material in this rapidly developing field. However, to assist the user who requires further investigation or information, a selected general bibliography is also provided. (Author/HB)

Computer Assisted Instruction for Management and Business Study: A Look to the Future.

Pub Date Sep 75

Note—125p.; Master's thesis, George Washington University

EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage

Descriptors—\*Business Education, Business Subjects, \*Computer Assisted Instruction, Computer Oriented Programs, Computers, Cost Effectiveness, Educational Technology, Equipment Utilization, Higher Education, Instructional Programs, \*Management Education, \*Public Administration Education, State of the Art Reviews

Business and management study programs are making increasing but still limited use of computer-assisted instruction (CAI) as an instructional tool. The cost of course development and design for business and management instruction is high, but declining hardware costs and increasing use will lower per student hour costs. CAI is now used primarily for drill and practice in mathematics, word usage, and technical skills. Only recently has it been used in complex situations involving education and business theory. Limitations in the successful application of CAI to curriculum development are due to distrust of and lack of confidence in the computer and skepticism regarding the instructional capability of any automated teaching technique. A survey of schools of business administration and management revealed that such programs now use CAI for about 5 percent of instruction. They are expected to increase their use in the next ten years to about 20 percent. (CH)

The library instruction program conducted at the University of Colorado consisted of classroom contact with students in the history and economics departments, and production of a slide tape. Evaluation instruments were developed for discovering present student and faculty library use and faculty attitudes toward the library, with the idea of comparing student use patterns before and after the library instruction program. The student questionnaire evaluated students' knowledge of systematic literature search techniques. Faculty were questioned on their own needs for information about library materials and

search techniques, their surmises about student library knowledge and skills, and any instruction they may have given students about using the resources in their fields. Tables of data and copies of the questionnaire are included. (LS)

**Identifiers**—Library Finance, \*National Commission Libraries Information Science

A study was made to develop a rationale for determining the economic justification for a national program of library and information services as described in the second draft of the National Commission on Libraries and Information Services Program Document. The economic rationale is based on improved cost effectiveness and improved utilization of capital resources. In finding formulas for assignment of financial responsibility to various levels of government and segments of society, several principles must be considered. Public, academic, special, and school libraries should continue to be funded by their constituencies with state and federal help where needed, while new public libraries should be funded by a mix of local, state, and federal funds. System, state, regional, and national resources should be supported by their constituencies, but should be given state and federal aid for services provided outside their constituencies. The federal government should fund the capital costs of the network, while the capital costs of resources should be born by the private sector or the constituency served. Research, development, and staff training should be funded by the responsible institutions, but the federal government should fund programs to meet the needs generated by the national network. **Identifiers**—National Commission Libraries Information Science

The economics of book publishing are described in this study completed for the National Commission on Libraries and Information Science. Segments of the book industry are compared by annual sales and titles published, as is profitability by categories of publishing. Operating statements of major categories are examined and capital requirements and returns on investment are compared by categories. Editorial and royalty costs; manufacturing costs and the economics of scale in hardbound and paperback publishing; sales and promotion costs; costs of mass sales and on-demand fulfillment; and general and administrative costs are discussed. Categories of income from secondary rights and risk factors in pricing in relation to unit costs and estimated sales are described. Special economic problems engendered by returns of unsold books and advances to authors are evaluated, along with advantages and costs of overseas distributors and pitfalls facing book publishers in periods of rapid technological change. A study requested by the National Commission on Libraries and Information Science surveys the relationship between government and the private sector and the use of the private sector information firms by government; examines examples of government agency activities in disseminating information themselves and through the use of private sector information firms; and discusses the need for development of and adherence to a coherent and positive national policy. The economic relationship between government and the private sector and the benefits accruing to society from the use of incentives in the competitive marketplace of ideas are discussed as a basis for national policies for exploiting these incentives in the development of the proposed national program. libraries' share of general revenue sharing funds. Statistical tables showing federal Commission on Libraries and Information Science. The status of federal categorical and non-categorical aid to libraries is described, along with formulation methods for federal library policies and the present government climate for library planning. The evolution of federal categorical aid programs since 1956 is recapitulated, and the results are analyzed for school library materials (Elementary and Secondary Education Act Title II), public library services (Library Services and Construction Act Title I), public library construction (LSCA Title II), academic library construction (Higher Education Facilities Act), and college library materials (Higher Education Act Title II). There is also a preliminary report for fiscal year 1973-74 on libraries' share of general revenue sharing funds. Statistical tables showing federal budget figures for the various categorical aid programs are appended. (LS)

vices, \*National Programs, Personnel, Site Selection, \*Urban Areas  
**Identifiers**—National Commission Libraries Information Science

The needs and services of urban community information centers are examined in a study commissioned by the National Commission on Libraries and Information Science (NCLIS). Following discussions of kinds of information and who needs it, there is a survey of current and recent community information proposals and programs. Major problems of these programs including organization and delivery of data, location of centers, staffing, and financing; the benefits derived from such centers; and the implications for NCLIS are also covered. Programs in Baltimore County, Brooklyn, and Philadelphia are described, and a bibliography is attached. (LS)

**The Impact of Machine-Readable Data Bases on Library and Information Services. National Program for Libraries and Information Services Related Paper No. 26.**

National Commission on Libraries and Information Science, Washington, D. C.

Pub Date Apr 75

Note—35p.; For related documents see ED 100 387-97; IR 002 728-34

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
**Descriptors**—Computers, \*Data Bases, \*Information Retrieval, Information Science, \*Information Services, Information Storage, Library Services, Library Technical Processes, National Programs, \*Networks, Telecommunication  
**Identifiers**—\*National Commission Libraries Information Science, NCLIS

The growth and proliferation of machine-readable data bases have created a need to consider the nature of recent developments, the impact of those developments on library and information services, and their relationship with the National Commission on Library and Information Science (NCLIS) program. Data bases may contain information in a variety of forms, may be produced by government or private business, and may be discipline, mission, or problem oriented, or inter- or multi-disciplinary. The availability of such data bases may cause changes in such library activities as journal acquisition and interlibrary loans; or libraries may provide search services, act as intermediaries in preparing searches, or refer people to appropriate information services. The role of NCLIS should be to support education, training, and research in the use of data bases, help expand service to new constituencies, encourage improvement of retrieval systems, promote the use of telecommunications, and provide a basis for networks and data base sharing in all sectors of the information community. **The Role of the United States Book Exchange in the Nationwide Library and Information Services Network. National Program for Libraries and Information Services Related Paper No. 27.**

National Commission on Libraries and Information Science, Washington, D. C.

Pub Date May 75

Note—32p.; For related documents see ED 100 387-397; IR 002 728-734

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
**Descriptors**—Books, \*Federal Programs, Interlibrary Loans, \*Library Cooperation, \*Library Materials, Library Networks, \*National Programs, Periodicals  
**Identifiers**—National Commission Libraries Information Science, \*United States Book Exchange, USBE

The National Commission on Libraries and Information Science's (NCLIS) nationwide information program is based in part on the sharing of resources. The United States Book Exchange (USBE) and its existing services may have a role in this program, since the USBE's major function is the preservation and maximum utilization of publications through maintaining and servicing a cooperatively developed clearinghouse for surplus library materials. Established in 1948, the USBE is a membership organization of U.S. and Canadian libraries, with services to foreign libraries provided by grants or fees. The exchange has also begun an interlibrary loan program, and has experimented with microform supply of certain kinds of materials and with brokerage of materi-

als for libraries. Given its cooperative structure and the large scope of materials with which it deals, USBE may serve as a model for NCLIS program components, as a network component itself, or as a resource for several components. Special areas of expertise which might be useful to NCLIS are contact with foreign libraries, disaster aid to libraries, copyright problems, handling fee patterns, and interlibrary loan services. **Identifiers**—Great Britain, \*Open University

Conceived by the British Labor Government in the 1960's the Open University was viewed as a way to extend higher education to Britain's working class, but enrollment figures in classes that represent traditional academic disciplines show that the student population is predominantly middle class. Bringing education into the home presents numerous pedagogical problems; among them are: (1) translating lectures into self-explanatory, auto-instructional packages that can be delivered through the mail; (2) coordinating the instructional presentation to coincide with the availability of public broadcast time; (3) the design and publication of reading materials, experimentation kits, and exams; and (4) the organization of regional tutorial offices. The resulting individualized approach is impressively economical compared with the cost of the traditional university. (EMH)

By providing the instructor with a nearly limitless surface to write on and the opportunity to simultaneously face students and project a graphic display on an overhead screen, the overhead projector has provided the teacher with an opportunity to improve the clarity of his instruction and to make class presentations more stylish and interesting. The use of the overhead projector is enhanced by mastering a few basic techniques and by preparing appropriate visual displays. Techniques for generating quality graphics are discussed. (EMH)

To appeal to a student's interest, to challenge him at his own level, and to approach him with a method that is consistent with his own style of learning, it is necessary for education to be a highly individualized experience. The increased use of individualized instruction and independent study have placed the librarian in a new role, assisting the teacher and the independent student to organize individual, multimedia learning experiences. To increase his impact as an educator, the media specialist should become acquainted with literature concerning individual learning packages and its supporting technology. A brief bibliography is included with some 60 entries concerning media and individualized instruction. (EMH)

**Identifiers**—NEGOPY, \*Network Analysis Program

Network Analysis is an observational system focusing on the relationships of individuals within a system—their subgroups, their leaders, and the frequency of their communications. The strength of relationships can be measured by examining the incidence and duration of intercommunications. Using data accumulated by questioning each member of the organization, the computer employs a prescribed set of algorithms, the Network Analysis Program (NEGOPY), to yield a topological interpretation of individuals, subgroups, and intercommunications. **Social Network Analysis: An Overview of Recent Developments.**

Pub Date 2 Nov 74

Note—25p.; Paper presented at the American Cybernetics Society Conference (Philadelphia, Pennsylvania, October 31-November 2, 1974)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Computer Programs, \*Information Theory, Intercommunication, \*Models, \*Networks, Social Structure, \*Social Systems  
**Identifiers**—NEGOPY, \*Network Analysis Program

Previous attempts to describe the "structure" of social systems have failed either because of the researcher's presuppositions about the system or because of his inability to deal with the massive amounts of data that a human system necessarily generates. Recent advances in computer software, Network Analysis Program (NEGOPY), have made it possible to gather data about the communications between people and to have the computer translate the results into a topological interpretation of their relationship. Once the computer has identified individuals as either isolates, group members, or liaisons agents, descriptive statistical techniques can be used to further explain the variety and intensity of relationships. The Friends of the San Francisco Public Library have compiled detailed information about its benefit book sales and presents it here as a guide for those who wish to organize sales in their own communities. The committees needed to operate the sale are listed, and the duties of the chairmen are described. Suggestions are given for collecting books, publicizing the need for books, sorting into categories, and pricing books and magazines. Information on staffing the sale includes lists of volunteers and paid staff needed, suggestions for volunteer recruitment, and sample recruitment and information documents. Suggestions for making arrangements are listed, as are needed supplies and instructions for cashiers. Publicity ideas, a special preview sale, and methods for counting the proceeds are also discussed. Financial summaries of the most recent San Francisco sales are attached. (LS)

**Identifiers**—College Level Examination Program, \*Dallas Public Library, Southern Methodist University, Texas (Dallas)

The Dallas Public Library reports on a two-year independent study project (ISP) developed in cooperation with Southern Methodist University and the College Level Examination Program (CLEP). Activities described include: provision of an information and materials distribution center for CLEP; making available information about area colleges and universities; advising and counseling adults in the furthering of their educational objectives; motivating business and industry to encourage their employees toward independent study; evaluating the effectiveness of the public library in ISP's; and providing information for the entire public library field in this educational area. Separate chapters cover the recruitment needs and characteristics of the independent students; the facilities, locations, equipment, and materials of the five participating branch libraries; the training and problems of the librarians, and the demands made upon them by the ISP; the study guides, reading lists, and other materials of the project; the participation and cooperation of local colleges and universities; and an evaluation of the project, including some possibilities for the future. Appendixes contain the proposal and two-year budget, publicity and recruitment items, a paper on how to study independently, and a study guide and reading list for one course in Afro-American history. This two part handbook introduces students to library sources in conjunction with their curriculum needs. Part 1, covering basic reference tools, is used in a library research skills unit of first semester freshman English classes. Students are introduced to the Dewey Decimal System; the card catalog; parts of a book and such reference sources as encyclopedias, dictionaries, almanacs, atlases, biographical dictionaries, The Reader's Guide, and audiovisual material. Part 2 covers specific subject reference works, briefly described, in the following major subject areas: Art and Music; History and Geography; Language, Rhetoric, and Speech; Literature; Drama and Shakespeare; Mass Media; Philosophy and Psychology; Religion, Mythology, and Folklore; Science and Technology; Social Sciences, Sport and Recreation. **Descriptors**—\*Educational Accountability, Evaluation, Futures (of Society), \*Instructional Materials Centers, Instructional Media, Library Education, Library Guides, Library Networks, \*Library Planning, \*Library Standards, Media Specialists, Regional Libraries, \*School Libraries

**Identifiers**—Illinois Plan, \*Media Programs District and School

The Institute on Futurism and School Media Development, held at Western Michigan University, August 1974, presented 20 papers to 104 state leaders in educational media. The principal focus of the convention was the 1975 national guidelines for school media programs, "Media Programs: District and School," and several papers addressed themselves to an explanation

and description of that document. There was an analysis of the Illinois library network system, the problems of networking, and its application to school media development. The principles of accountability in education were explored, and the failure of the new guidelines to provide for a means of ascertaining learning growth was examined. Other topics covered included the need for long range planning, establishment of future goals, the necessity for a restructuring of the library science curriculum, the expanding role of the media specialist, and techniques available for evaluation of media centers. **Identifiers—**\*Sweden

A three-year study of two-way communication in correspondence education was conducted at the University of Lund in Sweden. Data were collected for three experimental series concerning: (1) the assignment for submission, (2) systematic telephone tutoring, (3) correspondence study combined with group meetings. Series One was a study of the structure of postal two-way communication; answers were sent to the school, corrected, and returned to the student. Series Two investigated the possibility of reinforcing the postal two-way communication with the aid of telecommunication, so the tutor systematically called the student after the lesson had been corrected and returned. In an effort to avoid the isolation of home correspondence study, students in Series Three participated in group meetings. Final results from the project will be published at a later date. Twelve references are cited. (Author/DS)

**Identifiers—**\*VIDAC, Video Audio Compressed

Developed by the Westinghouse Electric Corporation, Video Audio Compressed (VIDAC) is a compressed time, variable rate, still picture television system. This technology made it possible for a centralized library of audiovisual materials to be transmitted over a television channel in very short periods of time. In order to establish specifications for equipment design, existing commercial audiovisual programming was evaluated to determine the length and the number of picture changes in a typical commercial program. Characteristics of 4,000 titles from 27 companies were surveyed and coded to grade level and subject area. Statistical tables and graphs show the distribution of surveyed programs by subject and grade level. Graphs and additional material relate the characteristics of the surveyed commercial filmstrips to the VIDAC technology. (Author/DS)

**Identifiers—**\*Advanced Simulator Undergraduate Pilot Training, ASUPT, CIG, Computer Image Generator, ICD, Interface Control Document

The Advanced Simulator for Undergraduate Pilot Training (ASUPT) was designed to investigate the role of simulation in the future Undergraduate Pilot Training (UPT) program. The problem addressed in this report was one of integrating two unlike components into one synchronized system. These two components were the Basic T-37 Simulators and their various subcomponents developed by Singer under another contract, and the Computer Image Generator (CIG), developed by General Electric. This integration included not only the physical mating of the CIG system with the basic simulator computer, instructor-operator stations, visual displays, and cockpits, but also the computer software integration to make the visual scene correlate with the flight instruments and the real world. The selected approach to integrating the CIG system was one of planned organization. An

Interface Control Document (ICD) was drafted early in the program which identified the hardware and the software interface between the two systems. The authors concluded that the success of this effort was in the organization and maintenance of the ICD and the advance planning for the integration of the computer systems. (Author/HB)

**Identifiers—**DAIS, Digital Avionics Information System

The results of a study to evaluate the potential life-cycle costs and cost savings that could be realized by applying the Digital Avionics Information System (DAIS) concept to future avionic systems were presented. The tasks evaluated included selection of program elements for costing, selection of DAIS installation potential, definition of a life-cycle-cost model, data collection and execution of the model. The results of the analysis indicated that the DAIS approach to avionics integration provided the potential for significant savings. The cost benefits that could be derived from the various DAIS-concept elements for the different life-cycle phases were described. Several tables of data, a bibliography, and a glossary of terms are appended. (Author/HB)

**Studying Instructional Television: What Should Be Evaluated.**

Stanford Univ., Calif. Inst. for Communication Research.

Pub Date Dec 73

Note—122p.

**EDRS Price MF-\$0.76 HC-\$5.70 Plus Postage**

**Descriptors—**Data Analysis, \*Educational Accountability, Educational Assessment, \*Educational Television, \*Evaluation, \*Evaluation Methods, Failure Factors, Information Dissemination, Questionnaires, Success Factors

The evaluation of instructional television (ITV) is a new field with evaluation methods largely borrowed from other disciplines. The evaluator is not apt to be trained specifically in this area but will learn "on the job" while defining his role for those with whom he works. The evaluator should consider the following recommendations: (1) Evaluation should be an integral part of the ITV project plan; (2) The evaluator should help project planners define their short and long term goals; (3) Unintended results may be a by-product of the project and should not be overlooked; (4) Improving the methods of cost analysis is a very important area for future evaluations; (5) The evaluator should balance those aspects of the program that require definite decisions and those that seem most critical for the program's survival; (6) A reasonable time frame should be observed and decision deadlines met; and (7) Results should be communicated in a clear and useful fashion to the right person. A five page bibliography is included together with a variety of sample guidelines and questionnaires used in other evaluation studies. (Author/NR)

**Identifiers**—\*VIDAC, Video Audio Compressed VIDAC (Video Audio Compressed), a new technology based upon non-real-time transmission of audiovisual information via conventional television systems, has been invented by the Westinghouse Electric Corporation. This system permits time compression, during storage and transmission of the audio component of a still visual-narrative audio presentation by a factor of 480:1. The Westinghouse Electric Corporation in close cooperation with the Veterans Administration and a number of other State and Federal agencies conceived and implemented a ten-week feasibility study of a central library medical information delivery system for rural users utilizing the Applied Technology Satellite (ATS-6) transmission facilities. Technically, the VIDAC prototype system proved feasible for further development, and viewer evaluation indicated that users were highly positive about VIDAC and felt that it filled a specific need for improving the delivery of educational materials. Three schematic drawings illustrate the method used for compression. A 16-item bibliography is included. (Author/DS)

**Identifiers**—\*Advanced Simulator Undergraduate Pilot Training, ASUPT, Automated Instructional System

The Advanced Simulator for Undergraduate Pilot Training (ASUPT) was designed to investigate the role of simulation in the future Undergraduate Pilot Training (UPT) program. The Automated Instructional System designed for the ASUPT simulator was described in this report. The development of the Automated Instructional System for ASUPT was based upon the research requirements for: (1) malfunction insertion, (2) variation of task difficulty, (3) performance feedback, (4) demonstration and replay, (5) data recording, (6) instructor feedback, and (7) maneuver sequencing. The system provided the instructor with the information necessary to exert simulator control and a variety of hardware and software instructional capability; as such, the system presented one of the most important elements of ASUPT. **Descriptors**—College Faculty, \*College Freshmen, Community Colleges, \*Enrollment, Enrollment Projections, \*Enrollment Trends, Females, Geographic Regions, \*Junior Colleges, Males, \*Part Time Students, Post Secondary Education, Private Colleges, Statistical Data, Technical Institutes, Vocational Education

This report compiles 1974-75 enrollment data for 923 American two-year post-secondary institutions. Comprehended in this report are post-secondary two-year junior and community colleges; multi-purpose technical and/or vocational schools and institutes; and university branch colleges, campuses, and centers. Total enrollment was 2,819,583, a rise of 11.9 percent from 1973-74. Part-time enrollment totaled 1,553,399, a rise of 17.7 percent. Full-time enrollment totaled 1,266,184, a rise of 5.8 percent. Six tables break the data down by type of institution (public, church-affiliated, proprietary, or independent), by geographical regions and states, by sex of students, and year in school. Data are also provided on the full-time and total teaching staffs of each of the 923 institutions. The six tables, which make up the bulk of this document, are discussed in a short introductory narrative in which trends are described, and projections are made. The report is intended to be of primary importance in post-secondary higher education planning. The slowing of the freshman flow in 1974-75 provides further evidence of the need for two-year institutions to continue their activity in providing increased educational opportunity for nontraditional and other continuing education students in part-time programs. **Identifiers**—\*Virginia Community College System

This document provides a means of improving and formalizing the communication of institutional research conducted at the 23 colleges in the Virginia Community College System. Over 160 reports are arranged in three sections. The first section annotates 44 of the studies, which were selected on the basis of anticipated interest, quality of study design, narrative sections on findings, and program innovation. Annotations are arranged by nine topics: follow-up studies, experimental studies, innovations, community, counseling and guidance, student profiles, instruction, administration, faculty and staff. The second section lists all studies by topic, and the third lists

all studies by college. The types of materials included vary considerably, from sophisticated experimental designs to casual descriptive studies, from routine reports to innovative proposals. Series of routine reports are compiled separately in the topical listing. Although some reports did not seem to be in the "research" category at all, for the most part the listing is inclusive, not exclusive. However, the file from which this document was prepared does not necessarily contain all of the reports conducted by the 23 colleges. (NHM)

**Identifiers**—\*Oregon

To evaluate the use of public tax dollars in the field of community college education in Oregon, five committees composed of business and professional leaders were established, each having responsibility for an area of emphasis: governance, finance, programs, community services, and students. In general, the comprehensive community college concept as defined by legislative statute is supported in this final study report. This concept includes: the three-part program classification of vocational/technical, lower division collegiate, and community education; the open admission policy; the present system of local autonomy within broad state policies and under the direction of a local district board; and the present general funding pattern of 50 percent from the state general fund, 30 percent from district property taxes, and 20 percent from student tuition. However, each committee makes a number of recommendations which can be implemented within present broad legislative guidelines: e.g., colleges should avoid or eliminate academic ranking of instructors; communication should be improved between the State Board of Education, the community colleges, the public, and legislators. Over half the document is devoted to appendices of data related to enrollment distribution and trends by program area, operating income and expenditures, and curriculum. (NHM)

**Descriptors**—\*Administrative Organization, Administrative Personnel, Budgets, Day Programs, Departments, \*Ethnic Studies, Evening Programs, Faculty Mobility, \*Junior Colleges, \*Mexican Americans, \*Part Time Teachers, Surveys

**Identifiers**—Cerritos College, \*Chicano Studies Program

The Chicano Studies (CS) Program at Cerritos College (California) is administratively recognized but instructionally dependent, with courses offered through four of the college's Divisions. Pressure has been brought to bear by the Citizens' Resource Committee to grant the program administrative autonomy, a separate instructional budget, and a full-time Coordinator. This study examines the reorganizational needs of the CS program in light of these demands and the college situation. Employment trends of part-time and full-time CS instructors and instructor turnover rates were analyzed. A comparison of part-time instructor attrition in regular and CS sections of the same courses revealed that both ex-

ceeded the 33 percent limit regarded as essential for program stability. A descriptive survey of 10 urban community colleges with CS programs in California was conducted; three programs were administratively autonomous, half had independent budgets, and all 10 reported that most classes were taught by full-time faculty. On the basis of the findings, employment of a full-time Coordinator, full-time faculty, and central budget coordination are recommended, but administrative autonomy is not recommended. A review of the literature is included. (BB)

**Conceptual Requirements for a Plan of Institutional Development: Answering the Unanswerable.**

Pub Date Nov 75

Note—35p.; Paper presented to the meeting of the Northeast Association for Institutional Research, November 1975

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
**Descriptors**—Data Analysis, Data Bases, Decision Making, \*Educational Development, Educational Needs, Educational Objectives, \*Educational Planning, \*Evaluation, Flow Charts, Input Output Analysis, Junior Colleges, Management by Objectives, \*Management Systems, \*Models, Social Influences

The creative management of change in a time of economic contraction requires planning reforms. Organizing for effective planning requires a total conceptual framework beginning with a stated mission and ending with a systematic approach to operations. Goals should be based on a market analysis of community educational needs and its translation into an operational plan describing staff functions. Since planning is only as effective as the quality and comprehensiveness of the data on which it is based, the development of a quality evaluation system is essential to the success of any long-range development plan. The conversion of evaluation data into planning concepts is the crux of this institutional development plan. Evaluation criteria must be identified that can be used to determine the extent to which alternative methods are successful in achieving planning objectives. Once data are in hand regarding program outcomes, management guidelines are necessary for their translation into planning alternatives. This involves system-wide priorities and requires that administrators maintain some form of decision making apparatus for the conversion of data into action. Thus, the community college is provided with alternatives for development that will help it to adjust to changing social conditions. The model is presented in flow charts, and a list of evaluation data components is appended. (Author/NHM)

**A Comparison of District and Statewide Faculty Loads, Fall 1973-Fall 1974. Research Report 75-07.**

Los Angeles Community Coll. District, Calif. Div. of Educational Planning and Development.

Report No—RR-75-07

Pub Date Sep 75

Note—54p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—Comparative Analysis, \*Comparative Statistics, Day Programs, Instructional Programs, \*Junior Colleges, \*Multicampus Districts, State Surveys, Tables (Data), \*Teaching Load, \*Working Hours

**Identifiers**—California, Los Angeles Community College District

This publication provides data on day faculty teaching loads in the Los Angeles Community College District (LACCD) for fall 1973 and fall 1974, and compares this data to statewide statistics. The overall LACCD teaching load in fall 1974 was 532 weekly student contact hours per full-time faculty member, compared to 531 for large community colleges statewide, 489 for small community colleges, and 521 for all community colleges. The 1974 LACCD faculty load represented a 4.9 percent increase over the 1973 figure of 507. Although faculty loads increased over the two years, the overall profiles for both LACCD and statewide institutions were similar in the various disciplines for the two years. The largest increases occurred in the fields of foreign languages, public affairs and services, architec-

ture and environmental design, and home economics. Decreases occurred in health professions, commerce, apprenticeship, communications, law, and mathematics. One reason for the increases in faculty load, both in the LACCD and statewide, was an unexpectedly large enrollment increase in fall 1974. Data are tabulated for the district as a whole and for each of the eight LACCD institutions by instructional program area, and the percentage differences are calculated between the LACCD averages and statewide averages for institutions of comparable size. **Descriptors**—Audiovisual Centers, Autoinstructional Laboratories, \*Basic Skills, College Curriculum, Diagnostic Tests, \*Health Occupations Education, Inservice Teacher Education, \*Junior Colleges, \*Learning Laboratories, \*Multimedia Instruction, Skill Development, Small Group Instruction, Tutoring, Vocational Counseling

**Identifiers**—Allied Health Learning Center, New York City Community College

This document reproduces a filmstrip and accompanying narrative describing the Allied Health Learning Center at New York City Community College. Using a team of content faculty, specialists in learning methodology, and a media production staff, the Center serves 1,800 students and 180 faculty members in seven career departments. The primary goal of the Center is to facilitate the mastery of necessary learning skills in order to support and advance the instructional objectives within the career curricula. Diagnostic testing is provided and a comprehensive student data system has been developed. A Professional Learning Systems course was implemented to apply basic skills to a target freshman science course. In order to provide supplementary support to individual courses, the Center provides modules of instruction, multi-media aids, study group sessions and peer assistance in an open lab learning environment. Seminars are given to increase student proficiency in skills specifically related to licensure and certification examinations, and career information is disseminated. Faculty workshops and seminars are conducted to promote professional development. The continuous increase in student contact hours over a three year period indicates the effectiveness of the Center in meeting the needs of the diverse student population. (NHM)

**Descriptors**—Community Colleges, Counseling, Dropout Rate, Educational Innovation, Educationally Disadvantaged, \*Individualized Instruction, Individual Power, \*Junior Colleges, \*Locus of Control, Low Achievement Factors, \*Low Achievers, Personality Change, \*Remedial Programs, School Holding Power, Success Factors

**Identifiers**—Nontraditional Students

National studies indicate that remedial or developmental programs in the community college have generally been unsuccessful, resulting in inordinately high attrition rates among non-traditional, low-achieving students. A more appropriate system is individual, learner-oriented instruction. The attempt is to shift the students' orientation from external (chance or other powerful individuals determine events) to internal (there is a direct relationship between an in-

dividual's behavior and its outcome). The keys to the success of individualized instruction are: (1) systematic design of the total learning environment, (2) provision for multiple levels of entry into carefully ordered instructional sequences, (3) staff involvement personally and professionally, and (4) openness to approaching specific problems (grades, dropouts) on a generalized, fundamental level (locus of control). A study is being made involving a sample of 1,200 students attending several community colleges. The basic research design examines the main effects of (1) instruction, either self-paced or traditional, and (2) counseling, either composite or traditional. Data for the first two years of the project indicate that individualized instruction does produce a shift toward internal locus of control in students, if a period of at least one semester is involved. (NHM)

**Descriptors**—College Students, Community Colleges, \*Educationally Disadvantaged, \*Individualized Instruction, \*Individual Power, \*Junior Colleges, \*Locus of Control, Low Achievers, Personality Change, Self Concept  
**Identifiers**—MacDonald Tseng Locus of Control Scale

In order to determine whether one semester of individualized instruction is enough time to cause a shift toward internal locus of control (a student's sense of the direct relationship between his behavior and its outcome), a sample of 126 educationally deficient first semester community college students were selected from 18 different sections of math, English, and history, and tested with the MacDonald-Tseng Locus of Control Scale at the beginning and end of the term. Students enrolled in 50 percent or more of individualized classes were considered to be in the treatment group; the other students were considered as the control group. Results, although not definitive, were positive. Students in the treatment group scored more homogeneously on the control expectancy scale than did students in the control group. The average increase in internality was in excess of three scale points indicating overall movement in the direction of internal control orientation. However, a slightly greater percentage of students in the treatment group made external shifts (chance or other powerful individuals determine events) than did students in the control group. Thus, a single semester of individualized courses, particularly to students unaccustomed to such instruction, may not provide enough impetus to cause a significant shift in locus of control. (NHM)

**A Follow-Up Study of Transfer Students from Southern West Virginia Community College to Marshall University: 1967-1972.**

Southern West Virginia Community Coll., Logan.

Pub Date 74

Note—33p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Academic Achievement, Bibliographies, Community Colleges, Followup Studies, Grade Point Average, \*Graduate Surveys, \*Junior Colleges, \*Literature Reviews, Rural Schools, Student Attitudes, \*Transfer Students, Urban Universities

**Identifiers**—Transfer Shock

In order to evaluate the efficacy of the college parallel program at Southern West Virginia Community College (SWVCC), a follow-up study was conducted of all students who had attended SWVCC between 1967 and 1972 and had subsequently transferred to Marshall University. Each of the 204 students in the sample had earned at least 30 semester credit hours at each institution. Grade point averages earned at each institution revealed that SWVCC transfers experienced some transfer shock in the initial semester, with an average drop of .26, but went on to perform better than they had at SWVCC. No significant differences were found between the achievement of the transfer students and lower division native students. A questionnaire survey of 109 current transfer students was con-

ducted to elicit subjective evaluations of their college experiences, with a 43 percent response rate. Personal interviews were then conducted with 35 of the respondents. Students expressed high satisfaction with SWVCC because of small classes and personal attention. Transfer shock was attributed to the more demanding course work of upper division classes; the change from the rural environment of SWVCC to the urban environment of Marshall was not felt to be a significant factor. A review of the literature is included, and an extensive bibliography is appended. (BB)

**ED 114 140** JC 750 572

**Selected Characteristics, Classified and Unclassified (Regular) Students: Community Colleges, Fall 1975.**

Hawaii Univ., Honolulu. Community Coll. System.

Report No—CC-IRP-83

Pub Date Oct 75

Note—27p.

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—Age, \*College Majors, Community Colleges, Enrollment Rate, \*Enrollment Trends, \*Junior Colleges, \*Junior College Students, Part Time Students, \*Student Characteristics, Student Enrollment

**Identifiers**—\*Hawaii

This document is comprised of charts and tables presenting enrollment data from fall 1971 through fall 1975 for the six community colleges in the Hawaii Community College System. The total fall 1975 enrollment figure of 30,476 compares to a 25,886 figure in fall 1974. Regular credit students comprise two-thirds of the registrants (20,617)—a 20 percent increase over fall 1974. Among the regular students, males continue to outnumber females; the margin widened to 57 percent in fall 1975. The mean age of regular students has risen from 24.3 to 25.0. The number of liberal arts majors increased from 8,059 to 9,810 (22 percent), and vocational majors from 6,825 to 8,764 (27 percent). Among vocational programs which greatly increased in number are: business, radiologic technology, human services, agriculture, and heavy equipment maintenance and repair. More students took fewer than 12 credits in fall 1975, and both full- and part-time students took lighter credit loads (11.0 average compared to 11.3 for fall 1974). The number of continuing students increased considerably on all campuses. Among the new students were 27 percent of the Hawaii 1975 high school graduates. The trends noted above, especially the increases in classified, continuing, and part-time students, have implications for planning. (NHM)

**Descriptors**—\*Collective Bargaining, \*College Faculty, Community Colleges, \*Contracts, Employment Practices, Faculty Organizations, \*Junior Colleges, \*Negotiation Agreements, Teaching Load, Unions

To acquaint the faculty and administrators with the scope and breadth of community college collective bargaining agreements, excerpts of selected topics are reproduced in this document without comment. On each topic two or three excerpts from different agreements are reproduced. The following topics are treated: (1) recognition of the employee bargaining unit and categories of employees covered; (2) rights of the employee bargaining unit; (3) management rights; (4) agency shop, check-off, and fair practices; and (5) workload. The references include the names of the employer and employee units, the number of colleges covered in the agreement, the years covered, and bibliographic citation. In addition, two tables are presented which show the number of college faculties choosing various units as exclusive bargaining agents and the states in which

colleges are operating under collective bargaining agreements. The Brief concludes with an index of a collective bargaining agreement. (Author/MJK)

**Identifiers**—Staff Development

Since its inception in 1974, the Staff Development Program at Oakton Community College (Illinois) has been responsible for over 44 seminars, workshops, mini-courses, and guest speakers. Initially, modules (as given workshops are called) were generated by and for faculty alone. In fall 1975, however, the Staff Development Program became operational for Oakton administrators and classified staff as well. At present, a faculty member coordinates the program, with the aid of a dean and a classified staff member. After suggestions for offerings are solicited from college employees, interest surveys are taken. Then, qualified leaders are sought, and schedules arranged and publicized. In addition, a Staff Development Committee comprised of representatives from each segment of the college meets to review proposals and evaluate completed modules. Though participation is voluntary, interest in the modules has been extensive. Four appendices to this report document the growth of the program: (1) the original proposal for the program; (2) figures for each module showing the total number of hours expended, number of sessions, and enrollment; (3) an idea solicitation memo, and program and evaluation sheets for the All College Workshop; and (4) an evaluation of the program for 1974-75. **Evaluative Comparison of Programmed System of Instruction and Traditional Lecture Approaches in a Basic Administration of Justice Class at Cerritos College.**

Pub Date 22 Jul 75

Note—31p.; Ed.D. Practicum, Nova University

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**

**Descriptors**—\*Classroom Research, Enrollment Rate, \*Individualized Instruction, Instructional Innovation, \*Junior Colleges, Learning Modalities, Lecture, Programed Instruction, Research Methodology, \*Research Problems, Success Factors, \*Teaching Methods

**Identifiers**—\*Cerritos College, Personalized System of Instruction, PSI

This study compares traditional lecture (TL) and personalized system of instruction (PSI) teaching methods for an introductory criminal evidence class at Cerritos College (California) during the 1974-75 academic year. The subjects were 189 lower division students, the vast majority of whom were declared law enforcement majors. Since both sections each semester were day offerings, most students were full-time and not currently employed in law enforcement agencies. Registration counts indicate that significantly more students were attracted to TL than to PSI sections, reflecting students' reluctance to attempt experimental curricula. Although significantly higher percentages of PSI students achieved A and B grades, the withdrawal rate was significantly higher in the PSI sections, and may correspond to the lower grades earned in the TL sections. PSI students were, however, able to complete course requirements sooner than TL students. Because the course has open enrollment and lacks the proper randomization, this study's internal validity is suspect. Even with proper control groups, the PSI group's performance relative to the TL group's must be questioned because PSI offers the advantage of clear goals and objectives in the study guide. A review of the literature is included, and the author recommends further study and implementation of PSI. (MJK)

**Identifiers**—\*Illinois

This document contains a compilation, in three separate sections, of policies, procedures, and guidelines adopted by the Illinois Community College Board (ICCB) from its establishment in 1965 through June 1975 for the administration, operation, and evaluation of the public community colleges of Illinois. Also included are a listing of official position papers adopted by the ICCB. The policies section covers requirements for state recognition, administrative policies, instructional offerings, public service programs, learning resources, student services, finance, local funding, sites and construction, and institutional studies. The procedures section covers requirements for state recognition, administration, instructional offerings, public service programs, student services, public service grants, site and construction, and deadlines for submission of required reports. The guidelines section covers administration, instructional offerings, non-traditional offerings, interstate reciprocal and cooperative agreements, and public service programs. The document is intended as a reference tool for community college administrators. Its provisions, taken as a whole, provide an overview of the internal operations of the Illinois Public Community College System. (NHM)

**Student Attitudes Regarding Harcum Learning Environment.**

Harcum Junior Coll., Bryn Mawr, Pa.

Report No—IRR-75-26

Pub Date Nov 75

Note—8p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*College Environment, \*Counseling Effectiveness, Curriculum Evaluation, \*Educational Resources, Institutional Research, Junior Colleges, \*Junior College Students, Private Colleges, Questionnaires, \*Student Attitudes

**Identifiers**—ASA, Assessment of Student Attitudes

In order to assess the attitudes of Harcum Junior College students in regard to education in general, the school curriculum, school resources, and school counseling, a questionnaire was administered to all Harcum students in the fall of 1975, with 258 anonymous respondents. Since respondents were enrolled in all programs except the pre-pharmacy curriculum, the sample was broadly representative of the attitudes prevalent among the current student body. The Assessment of Student Attitudes (ASA) was used as the measuring instrument. The instrument consists of 26 positive and negative statements to be rated on a five-point Likert scale (strongly agree to strongly disagree). Arrangement of the results by academic major of the respondents generates data which should be of interest to program directors. The composite responses for each of the four attitudinal subscales, assuming 100 percent as the ideal score, are: (1) Attitudes Toward Curriculum, 62 percent; (2) Attitudes Toward Education in General, 60 percent; (3) Attitudes Toward School Resources, 56 percent; (4) Attitudes Toward School Counseling, 48 percent. **Richardson, Richard C., Jr.**

**The Shape of Governance in the Future.**

Pub Date 75

Note—12p.; Paper presented at the Annual Meeting of the American Association of Community and Junior Colleges (Seattle, Washington, April 13-16, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—Administrative Change, \*Administrative Organization, Administrator Role, \*Collective Bargaining, \*College Faculty, Community Colleges, \*Governance, Instructional Staff, \*Junior Colleges, Teacher Administrator Relationship

Faculty members in most community colleges have occupied a less prestigious governing role than administrators. For the most part, instructional staff have had little say in personnel decisions, and only limited influence on curriculum and other academic matters. Compounding these problems has been the lack of professionally trained administrators. The future of governance in community colleges runs in at least two separate channels to a common future. First, faculty will become increasingly involved in formal collective bargaining. This is a healthy trend, since a fair contract, well administered, can provide a number of important advantages to administration and faculty alike. Second, since the steady state has produced a career faculty for community colleges, instructional staff will begin to exert increasing influence in decisions involving colleague selection; faculty retention, evaluation, and promotion; and academic reform. As a more professional faculty begins to assume greater responsibility for the educational program and for its implementation, professional administrators will be concerned more with defining their own contributions to the education process, and less with supervision and evaluation of their professional colleagues. **The Urban Design Implications of the Community College.**

Pub Date 75

Note—13p.

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**\*Campus Planning, College Buildings, Community Colleges, Community Role, Community Services, Design Preferences, \*Facility Planning, \*Junior Colleges, Nonresidential Schools, Outreach Programs, School Community Relationship, Site Development, \*Site Selection, Social Responsibility, \*Urban Environment

**Identifiers—**California (West Los Angeles), West Los Angeles College

The designer of a modern community college must concomitantly meet the needs of those who expect a college to fit their traditional perceptions of a suitable physical plan, and not repel the great numbers of nontraditional students the community college is expected to serve. Many community colleges have been built as an uneasy compromise between these two requirements. The selection of the site for West Los Angeles College took place between 1958 and 1967. Site development began in 1966 and is still going on. Only one plan was considered for site development, and underlying this plan were the following assumptions: a campus should look more like a campus than like the buildings in its vicinity; the campus will collect people from a commuting range of five miles or so, and everyone will drive to campus; stand-up live teaching of liberal arts courses will be the dominant pedagogical form. Planning a practical setting for a modern community college should be influenced by a philosophic commitment to offer direct community services, and programs to suit the needs of everyone in the community. Involvement of an urban design group as advisors to the Board prior to determination of college type, locale, emphasis, and site seems a minimal first step to meeting this philosophical commitment. (NHM)

**Descriptors—**\*Class Size, \*College Faculty, \*Credits, Enrollment Trends, General Education, Instructional Programs, Intellectual Disciplines, \*Junior Colleges, Student Enrollment, Tables (Data), \*Teaching Load, Vocational Education

**Identifiers—**\*Hawaii

This report organizes fall, 1975 registration data for the seven Hawaii community colleges in tabular form. The focus of the report is on faculty workload in terms of the classroom situation:

credits and classes taught, student credit hours generated, and class size. There was a general increase in the number of courses, classes, credit hours, registration and student credit hours at all campuses. The number and proportion of classes with 10 or fewer students have declined at most colleges, while average class sizes are slightly larger. As in the past, average class size in general education courses is larger (30 students) than in vocational education courses (26 students). Average class size varies by campus, from 24-31. Faculty workload figures indicate a generally lighter load at the colleges compared to fall, 1974 and fall, 1973, especially in terms of credit hours taught and faculty-student ratios. The productivity ratios, however, show a slight increase at most of the colleges. A comparison with fall, 1974 data shows increases in the number of instructors at all colleges. Tables break down the data by institution and instructional subject areas. (Author/NHM)

**Certain Strategies for Prison Classes Sponsored by Community Colleges.**

Pub Date 1 Oct 75

Note—49p.; Ed.D. Practicum, Nova University. Not available in hard copy due to marginal legibility of original document

**EDRS Price MF-\$0.76 Plus Postage. HC Not Available from EDRS.**

**Descriptors—**College Faculty, Community Colleges, \*Correctional Education, \*Junior Colleges, Learning Theories, Practicums, \*Prisoners, Questionnaires, Student Attitudes, \*Teaching Methods

In order to examine the success of various teaching methods on community college students currently incarcerated in Delaware County Prison, Kings County Prison, and Leesburg State Prison, a questionnaire was designed and administered to student inmates and their instructors, who were faculty members of three different community colleges in the Philadelphia area. Respondents were asked to indicate the frequency with which instructors used various teaching strategies and techniques representing either the behaviorist or the cognitive field theories of learning. Students were also asked to indicate which of the various strategies they felt would work well or poorly for themselves. There was a slight preference for the cognitive field approach, but the students were not clearly receptive to either approach, as both approaches received some favorable and some unfavorable reactions. Cognitive field techniques that received at least 60 percent favorable reaction include: concern with ideas, choice of activities, and emphasis on knowing reasons for misunderstood concepts. Behaviorist techniques that received favorable scores include: clarity of purpose and curriculum design, rewards, repetition, and short answer tests. A survey of the literature is included, and data are displayed in tables. The survey instrument is appended. (NHM)

**Descriptors—**Administrative Organization, \*Administrative Personnel, \*Administrator Guides, \*Administrator Responsibility, Departments, \*Junior Colleges, Questionnaires, Tables (Data), \*Task Analysis

**Identifiers—**Los Angeles Harbor College

The major goal of this project was to promote a process of self-evaluation and task reexamination for the 11 division chairmen and the dean of instruction at Los Angeles Harbor College. To identify needed procedures and to clarify responsibilities, chairmen responded to two questionnaires. The first was distributed to all members of the Curriculum and Instruction Committee of which the 11 division chairmen are the only voting members. Each member was asked to evaluate 61 selected college responsibilities on the basis of importance. The four responses were, in order of decreasing importance: (1) must recommend approval; (2) must be consulted; (3) may be consulted; (4) must be notified. A two-thirds

margin in the two highest categories established 20 of the 61 given responsibilities as proper functions of the committee. The second questionnaire asked division chairmen to indicate their comprehension of 53 major responsibilities and the procedural obligations relating to each. Of these, 33 were identified as requiring either clarification or written procedures. The preparation of a manual of procedures for divisional chairmen is the anticipated end product of this study. Questionnaires results are organized into tabular form throughout, and the survey instruments are appended. (NHM)

**The Journal Synthesizing Activity.**

Pub Date Nov 75

Note—9p.; Paper presented at the Annual Meeting of the Academic Study of Religion Section, American Academy of Religion, November 1975

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Activity Learning, \*Curriculum Guides, Diaries, Discovery Learning, Instructional Innovation, \*Judaism, Junior Colleges, Personal Values, \*Religious Education, Student Centered Curriculum, \*Student Projects, \*Teaching Methods

**Identifiers—**\*Jewish Studies

The journal synthesizing activity is intended to combine aspects of the formal essay with that of a diary. Activities associated with lecture topics are written up as short journal entries of approximately five typewritten pages and are turned in during the weekly class session at which the related topic is being discussed. The journal project encourages a direct encounter of student with material, breaking up the doldrum of a lecture-only method of presentations. This document provides a sample syllabus for a Jewish Religious Heritage class. Fifteen lecture topics are provided, with accompanying suggested journal activities. Activities are many and varied, providing an opportunity for the student to develop methodology and preserve or alter deep-seated commitments in his view of himself, society, nature, and history. The journal synthesizing activity enables the teacher to be less of a knowledge dispenser, and more of a knowledge facilitator, who leads the student to make discoveries and articulate values and conclusions. **Identifiers—**\*Virginia Community College System

This bibliography lists the reports of research studies conducted at the 23 colleges in the Virginia Community College System during the 1974-75 academic year. Over 124 studies are divided into three sections. The first section provides annotations for 61 of the studies, selected on the basis of anticipated interest, quality of study design, narrative sections on findings, and program innovation. Annotations are arranged by 12 topics: follow-up studies, experimental studies, innovations, community, counseling and guidance, student profiles, instruction, administration, routine reports, evaluation, enrollment trends, and other reports. The second section presents all studies by topics, and the third lists all studies by college. The types of materials included vary considerably, from sophisticated experimental designs to casual descriptive studies, from routine reports to innovative proposals. For the most part the listing is inclusive, not exclusive. However, the file from this document was prepared does not necessarily contain all of the reports conducted by the 23 colleges. Identifiers—\*Virginia

Of the 5,227 1973-74 graduates of the Virginia Community College System, the majority (61 percent) were men. Racial minorities comprised 11 percent of the graduates. Although the largest single age group was 21 years or younger, the majority of the graduates were at least 22 years old. Thirteen percent were older than 35, and the median age for all graduates was 23.3 years. The Associate of Applied Science degree, which is an occupational-technical award, was earned by nearly half of the graduates. Two-thirds of the graduates were in occupational-technical programs. College transfer graduates were two times more likely to be men than women. Of college transfer graduates, women more frequently chose the Associate of Arts degree, and men, the Associate of Science degree. Business was the most popular occupational-technical program, followed by engineering, health services, and public service. Although the percentage of white graduates predominated in all curricular groups, larger proportions of minorities were in business and engineering. About half of the graduates completed their programs in the traditional two-year period; about one-fourth took an extra year, and the remaining fourth took more than three years. Eleven tables of data are appended. (Author/NHM)

Identifiers—Experiential Learning

Within broad guidelines provided by the Community College of Vermont (CCV), associate degree students write their own individualized, competence-based contracts. Development of the contract includes both assessment of prior learning, and planning for sponsored learning: These are integrated through a "degree development sequence" which includes a variety of workshops; regular meetings with review committee made up of peers, community practitioners and faculty, and CCV staff; and intensive counseling support. The CAEL special project was designed to take a close look at the problems encountered by students in the degree development process, and to create a set of written materials to help students develop better learning contracts. This report summarizes the results of the CAEL project to date. The project and outcomes are described in detail, and directions for future development are suggested. Although the full set of student materials developed in the project is not included, a detailed evaluation report of CCV contracting and review procedures, a copy of the interim report for CAEL, and a summary of an independent research study evaluating some of the impact of the degree development workshops on student values and career aspirations are appended. This report compiles 1974-75 enrollment data for 179 American two-year post-secondary institutions. The report focuses on enrollment by academic program within four types of two-year institutions: community colleges; junior colleges; technical colleges, schools, and institutes; and technical/vocational colleges, schools, and institutes. The total enrollments by academic program area for all four institutional types were: trades and industrial—22,512 (8.5 percent); technical—29,403 (11.2 percent); natural sciences—8,404 (3.2 percent); health—25,768 (9.8 percent); arts and humanities—75,150 (28.5 percent); social science and public service—32,623 (12.4 percent); business contact and marketing—29,251 (11.1 percent); and business detail and office—40,410 (15.3 percent). Total enrollment was 263,521 for the 179 reporting institutions. Program enrollment data are further broken down by sex, and full-time or part-time status. Freshman full-time enrollments are separately presented. In comparison to the 1973-74 report, the data suggest that career education programs are still growing, and transfer programs are lagging slightly behind. Data are arranged into 12 tables which are discussed in a short introductory narrative section. (NHM)

 Descriptors—Age, College Majors, \*Colleges, Community Colleges, \*Enrollment, Followup Studies, \*Graduate Surveys, \*Junior Colleges, State Surveys, Student Characteristics, Tables (Data), Transfer Policy, \*Transfer Students

Identifiers—\*Pennsylvania

This document analyzes data on student transfers from Pennsylvania community colleges. The major sources of data are community college follow-up reports on graduates (3,132 transfers reported); the statistical reports of enrollments by receiving institutions (4,001 transfers reported); and the results of a Pennsylvania Association of Counselors for Transfer (PACT) follow-up survey of community college graduate transfers. The PACT survey analyzes data received from the 1,184 respondents by age, program, and receiving institution. Seven hundred forty were under 23; 271 were between the ages of 23 and 30; and 113 were over 30. The program areas most frequently chosen were education (282), business and management (259), and social services (154). Data from the PACT survey also reveals that 346, or 29 percent of the respondents, had some difficulty in the transfer process. In addition, the 369 transfers to Penn State Capitol Campus in 1974 are analyzed to determine how many students have a lapse of time between community college graduation and enrollment at a four-year institution. Data are organized into tabular form throughout, and 12 comprehensive charts are appended. (NHM)

Document Not Available from EDRS

Descriptors—\*Administrative Personnel, Arbitration, Chief Administrators, \*Collective Bargaining, \*Collective Negotiation, \*College Faculty, Community Colleges, Consultants, \*Junior Colleges, Statewide Planning, Trustees, Unions

The community college experience with collective bargaining is a source of valuable information about the effects of academic unionization. This sourcebook presents interpretations of collective bargaining by the major interest groups associated with the community college—faculty, college administrators, trustees, state-level administrators—and by full-time professionals who assist each of these interest groups. Discussions include: the status and probable expansion of collective bargaining among the community colleges; bargaining as a means of promoting the economic security and professional status of a faculty, and as a threat to the traditional character of the academic community; the role of college trustees, chief executive officers, department chairmen, faculty bargaining agents, management bargaining teams, and professional negotiations consultants in the collective bargaining process; statewide bargaining and an analysis of the many issues that must be considered when the adoption of collective bargaining is being contemplated. A bibliographic essay is also provided. Contributors include: Patsy Sumner, Joseph Hanklin, Daniel Schultz, Terence Florin, Fred Mathews, Curtis Murton, Jr., Stuart Steiner, James Freimuth, John Grede, Eric Rhodes, Philip Helland, Richard Ernst, and Elizabeth Rinnander. Identifiers—CIRP, Cooperative Institutional Research Program, \*Hostos Community College, Student Information Form

In fall 1974, Hostos Community College (HCC) participated in the national survey of college freshmen which is conducted annually by the Cooperative Institutional Research Program (CIRP) of the American Council on Education, and UCLA. The population served by Hostos Community College is, for the most part, comprised of economically disadvantaged, minority group members. The questionnaire was translated into Spanish by instructors at HCC, and 46.6 percent of the 523 HCC respondents completed the questionnaire in that language; the remaining 53.4 percent completed the questionnaire in English. The 523 participants represented 55.1 percent of the entering class. This document was compiled to compare the characteristics of HCC freshmen with the college freshman population generally. The survey results for HCC students are broken down into three categories: (1) first-time, full-time freshmen; (2) first-time, part-time freshmen; and (3) transfers. Information presented includes data on selected student characteristics (age, sex, high school background, marital status, financial status, ethnicity, religious preference, family background, and reasons for choosing HCC), aspirations and goals (academic and occupational), and concerns and attitudes. The Student Information Forms in English and Spanish are appended. (DC)

Descriptors—Age Differences, Child Rearing, \*Children, Demography, \*Family Environment, \*Family Life, Middle Class Culture, Parent Attitudes, \*Parent Child Relationship, Sex (Characteristics), Sex Differences, Social Development, \*Socialization

Identifiers—\*Privacy

This report presents descriptive data on developmental and situational factors related to children's use of privacy rules and privacy makers in their homes. Subjects were 112 children ranging in age from 2 to 17 years from 48 middle-class families. Data related to the use and regulation of bedrooms and bathrooms by specified family members was obtained by questionnaires and analyzed. Results show privacy to be a developmental variable, different for boys and girls and for situations involving different activities. The socialization of girls' privacy habits in regard to their fathers begins quite early, and socialization of boys' privacy habits occurs later and is less specific to the sex of their parent. Different rates of maturation may also play a role. As privacy behaviors increase with age, they become more discriminating in terms of the type of personal activity involved. These developmental patterns are viewed as a function of the ongoing socialization of children's privacy habits, the emergence of the more obvious secondary sex characteristics, and children's increasing awareness of other persons' awareness of them. Other factors found to be determinants of children's privacy were: size of the home, family density (family size within home size), and (3) maternal child rearing attitudes. (Author/BRT)

## Early Childhood: Link to the Future.

Pub Date 14 May 75

Note—15p.

## EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—Cognitive Development, Emotional Development, \*Ethical Values, \*Humanistic Education, Interpersonal Relationship, Moral Values, \*Parent Child Relationship, \*Social Development, Social Environment, \*Social Values

This paper notes a devaluation of children in American society and urges that more attention be paid to the emotional growth of children, who are subject to the same forces that create in adults feelings of powerlessness, attitudes of superficiality and nonreflection, intolerance for delayed gratification, and confusion about self and interpersonal relations. The importance of warm human interaction and the way in which social-emotional development is inseparably intertwined with cognitive development are stressed and illustrated with references to Skeel's orphanage study and to Piaget and Freud. It is shown that the societal value of integrity in relations with others is slowly being lost, and teachers are urged to regain a sense of humanness, to clarify their moral and ethical values, and to strengthen in themselves a love of people, pride in work, and pleasure in contributing to others. Since children look to adults for clues to what is acceptable or not, it is suggested that adults make a careful choice of those values that they wish to pass on to the next generation. (GO)

Descriptors—\*Expectation, Parent Attitudes, Parent Education, \*Parent Participation, Parent Reaction, Parent Role, Parent School Relationship, \*Parent Teacher Cooperation, \*Preschool Education, \*Teacher Role

Identifiers—\*Cooperative Preschools

This paper, written jointly by a teacher and a parent, discusses the effects of changing parent expectations on parent cooperative preschools. It is suggested that pressure on the parent cooperative comes from parents' diminished respect for the professional status of educators, from new demands for a strict academic approach to preschool, and from the changing status of women. The parent cooperative philosophy of shared responsibility requires that the teacher have the professional skill and responsiveness to direct meaningful and successful parent participation and also maintain consistency of philosophy and procedure in the face of frequently changing parent boards. One essential element in a parent cooperative preschool is good teacher planning which can help parents become effective teachers. Another essential element is program evaluation which prevents a build-up of parental dissatisfaction and makes the communication of new ideas routine. The changing expectations of parents necessitates a clear division of responsibility between teaching staff, the parent board and the parents. (GO)

Descriptors—Child Care, \*Day Care Programs, \*Early Childhood Education, \*Foreign Countries, \*Government Role, Infants, \*Parent Role, Parent Teacher Cooperation, Preschool Curriculum, Questionnaires, Special Services, Working Parents

Identifiers—\*Sweden

Data collected during a 1972 study of the Swedish child care program are presented. Government officials, day care personnel, child care professionals, medical personnel, and parents were interviewed, and nurseries in six towns were visited to obtain data. The major role of the state, country, and local governments in regulating, operating, and subsidizing Swedish

child care programs is discussed and illustrated with photographs. Included are details concerning nursery clientele, admissions and fee policies, staff, physical environment, grouping of children, curricula, and cost of operation, along with a description of the daily routine of a typical Swedish day nursery, and tables of physical specifications for nursery buildings. The role of Swedish parents in the day nursery program is examined. Results from an evaluative questionnaire given to government officials, day nursery staff, and parents about the nursery system are included, as well as a list of some of the other child-centered services offered in Sweden (e.g., boarding schools for handicapped children). ## The Emergence and Functions of Prosocial Behaviors in Young Children.

Pub Date Apr 75

Note—11p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

## EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Affective Behavior, Aggression, Altruism, \*Cognitive Development, Elementary School Students, Empathy, Infants, Interpersonal Relationship, \*Motivation, Preschool Children, \*Social Development, \*Social Relations

Identifiers—Perspective Taking, \*Prosocial Behavior

This paper describes three interrelated studies which investigated the cognitions, feelings, and motives involved in the emergence and progression of prosocial behaviors. The first study examined the child's emerging sensitivities to the affective events in his environment through data collected over a 9-month period from groups of 10-, 15-, and 20-month-old infants. The infants' responses to affective events were recorded daily by their mothers and at 3-week intervals by home visitors. The second and third studies investigated (1) the relationship between perspective-taking skills and prosocial behavior, (2) the frequency, circumstances, and generality with which prosocial behaviors occur, and (3) the relationship between prosocial and antisocial behavior. Standard experimental situations were used to test a group of 3- to 7-year-olds on their perspective-taking skills and prosocial interventions. Observations in the children's natural play settings were used to record prosocial and aggressive interchanges and to measure social activity level. The results indicated that even very young children were able to discriminate between affective events and be responsive to the needs of others. No overall relation was found between perspective-taking abilities and prosocial behaviors at any age level. The findings with regard to prosocial behaviors and aggression were mixed. (JMB)

Note—21p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

## EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage

Descriptors—\*Articulation (Speech), \*Auditory Perception, \*Child Language, Discrimination Learning, \*Infants, Phonemes, Phonetics, \*Phonology, Pronunciation, Word Lists

This study investigated the relationship between perception and production in children's phonological learning to determine whether perceptual confusions could account for the patterns of substitution and deletion found in 2-year-olds' speech. A total of 14 children were presented pairs of toy stimuli, with each pair composed of a familiar item and an unfamiliar nonsense toy. The names of the toys in each pair differed from each other by one or two phonological features. The children were asked individually to name the toys both imitatively and spontaneously and to perform a task that tested whether they could dis-

criminate the two names when the experimenter produced them. The methodology used is recommended in the study of developmental perceptual confusions of speech sounds in children at this age since it is easily administered and scored and can be presented by live-voice without substantial loss of data validity. The data suggest that some minimal pairs of phonemes are easily discriminated by most 24-month-old children, but others are more difficult. Elements which are substituted for each other in childhood speech production are not necessarily the most difficult contrasts to perceive; perceptual confusions probably play a substantial part in childhood speech errors but not all errors are related to perceptual difficulties. An experiment was performed to determine whether the mothers of 20 inner-city black preschoolers could successfully train their children in interpersonal problem-solving skills. The skills acquired by the mother-trained children were compared with those of 113 teacher-trained and 106 non-trained 4-year-olds, equated on initial IQ scores and school behavior. Mothers met in small groups weekly, for 10 weeks, to learn games and dialogues which focused on language and interpersonal thinking skills (e.g., "How is this girl feeling?"). For 15 minutes daily during this period each mother used the games and dialogues with her child. The teacher trained group of children was given similar instructions. The goal was to help the children cope with typical interpersonal problems, generate alternative solutions to a problem, and conceptualize potential consequences of a given act. Results showed that 19 of the 20 children trained by their mothers improved in interpersonal skills, as measured by pre- and posttests. There was no difference in skill improvement between mother-trained and teacher-trained groups, but children trained by either their teacher or mother improved significantly more than those never trained. Children trained by their mothers or teachers also improved in school behavior. (BRT)

This series of 200 simple learning activities parents can use with their children at home is printed on 6" x 8" index cards, and arranged in six sections: (1) "Helper" cards give hints on handling behaviors such as whining, jealousy and fighting; (2) "While Your Work" cards list activities a child can do as the parent does household jobs (weighing articles on the bathroom scale while the parent cleans the bathtub); (3) "Waiting Game" cards suggest activities for doctor's offices or long rides (guessing games, finger plays);

(4) "Outdoor" cards give ideas for yard or sidewalk (tin can bowling, camera walk); (5) "Making Things" cards suggest easy games and toys to make from scrap materials, and (5) "Special Time" cards describe such activities as flashlight games for the child who cries at bedtime, quiet games for non-sleepers at nap-time. Activities are explained in detail and illustrated. "Helper" cards, in a separate section as well as within other sections, offer special child rearing advice on such topics as discipline, sharing, fears, decision-making. (BRT)

**Descriptors—\*Age Differences, Infant Behavior, \*Infants, \*Overt Response, \*Visual Perception, \*Visual Stimuli**

**Identifiers—Facial Configuration, \*Stimulus Complexity, Trantz (Robert)**

Four experiments were conducted to investigate the extent to which infants of different ages respond to facelike drawings on the basis of stimulus complexity and/or resemblance to the human face. Infants' responses to stimulus patterns were assessed using the corneal reflection technique developed by Robert Trantz. In the first two experiments, 5-, 10-, 15-, and 20-week-old infants were shown four stimulus patterns differing in degree of resemblance to the face and degree of stimulus complexity. In the other two experiments, 10- and 15-week-old infants were shown six stimuli which represented three levels of complexity and two types of organization. The three stimulus patterns with nonfacial organization differed only in stimulus complexity. Those in the set with facial organization differed from each other in degree of facial resemblance as well as in complexity. The results of these four experiments indicated that there is a change between the ages of 10 and 15 weeks in the dimensions which underlie infants' response to facelike patterns. Older infants, 15 and 20 weeks, responded to both the degree of facial resemblance and the degree of complexity while younger infants, 5 and 10 weeks, responded only the complexity of facelike patterns. **Identifiers—\*Boston Children's Hospital**

This paper describes the goals and implementation of a program which trains pediatricians in child development at Boston Children's Hospital. The program emphasizes an understanding of "normal" child development, rather than the pathological model with which most pediatricians are familiar. Pediatricians are encouraged to use their awareness of a child's developmental progress to establish a cooperative relationship (rather than a dominating one) with the child's parents. Two-hour seminars are provided twice weekly for the doctors by an expert in child development. Each pediatrician is required to carry out a research study related to child development. To aid the doctors in their research efforts, weekly seminars in research methods are conducted by psychologists. Pediatricians are expected to learn to teach child development principles to other medical personnel during weekly

ward rounds, consultations, or clinic work. Through these trained pediatricians, the program aims to apply an understanding of child development to models for preventive and caregiving services in the community. It is anticipated that the program will establish a working liaison between pediatric and other fields concerned with early identification and intervention. (BRT)

**Identifiers—**\*New York City

This booklet discusses the need for a comprehensive family-centered approach to day care. A hypothetical family situation is used to illustrate that present approaches to day care are not optimally functional because of the dichotomy existing between day care and family life. Historical origins of day care centers and significant changes in the concept of day care are reviewed. It is suggested that federal legislation on day care (e.g., child care tax deductions) is rarely evaluated for potential impact on impact on families. Two elements are suggested as necessary for the development of comprehensive, family-centered child care programs: (1) a broad concept of the role of parents as predominant in child rearing, and (2) new institutional arrangements and structures which enable parents to assume such a role. (BRT)

**Identifiers—**Colorado (Denver), \*Project Child Care

The establishment and subsequent modification of a child care system for employees, faculty, and students of the University of Colorado Medical Center are discussed in detail. The project was partially funded by the Office of Child Development. Components of the project included three direct service programs: (1) day care for children ages 2 1/2 to 6, (2) care for older children after school and during the summers, and (3) training and support for day care mothers and development of day care homes as additional child care resources. Family counseling and referral were provided as a fourth component. An Advisory Board was established to allow Medical Center employees, students, parents, and project staff members to contribute opinions and information. Extensive evaluative sections in the report cite problems encountered in program implementation, including poor relations between caregivers and administrative staff, pressure to disseminate prematurely, diffusion of individual staff members over all components, repeated administrative restructuring, and the desire of Advisory Board members to determine policy. Recommendations are made based on experience with these problems. At the end of three years Office of Child Development funding expired, and services at the Medical Center were discontinued, but part of the program was absorbed by other community child care facilities. **Identifiers—**\*Prosocial Behavior, Sesame Street

This study investigated the influence of structured children's television programming on prosocial behavior. Subjects were 53 children ages 4-6, from two day care centers. Nine videotapes were produced (three for each of three experimental conditions) differing in their presentation of socially-valued behavior, socially-devalued behavior, consequences, and characters. Tapes were black and white and about 20-25 minutes in length. Prior to viewing the tapes, during viewing, and after viewing, the children were observed and/or tested in four different situations using three different measures: (1) an individual test on Piagetian tasks, (2) observation of social behavior in two structured tasks, (3) observation of social behavior occurring naturally in the child's day care center, and (4) observation of attention to the videotapes during viewing. Findings and implications are discussed. (BRT)

**Descriptors—**Anxiety, \*Cognitive Development, \*Emotional Development, Fear, \*Infants, Mongolism, Operant Conditioning, Reactive Behavior, \*Social Behavior, \*Social Development

**Identifiers—**\*Smiling

This paper presents an integrative perspective on infant development (based on a consideration of developmental data) which focuses on the function of the smile. From the earliest spontaneous smiles of the newborn period to mature smiling and laughter, a central role was revealed for an excitation (tension)-relaxation process in producing smiles. This notion is complementary to social and cognitive theories of smiling but is more basic in pointing to the function of the smile for the infant and in stressing continuity of smiles following mastery, and smiles following excitation. In unraveling the changing meaning of the smile, a number of developmental principles are revealed, including the following: (1) developmental sequences may be repeated, though in a transformed and elaborated manner; (2) the infant becomes increasingly active in producing and mastering his own experience; (3) social and individual functions of the smile converge in promoting accommodation to and assimilation of novel events; (4) fear and joy, and wariness and smiling have a close functional relationship with respect to novelty; and (5) cognitive and socioemotional aspects of development are inseparable. **Identifiers—**\*Philippines

The social orientation of 60 American and 60 Philippine mothers representing two levels of social class was assessed through the verbal regulatory appeal strategies which they employed in five hypothetical everyday situations involving their 4-year-old children. Social orientation was assessed through the mothers' responses to the Bearison and Cassel Questionnaire for Regulatory Appeal Strategies. Each of the mothers' regulatory phrases was classified as person-oriented (expressing the feelings, thoughts, needs, of a person affected by the child's behavior), or position-oriented (expressing a nonsituation-specific rule of behavior in terms of the position status, or role of the child). Society was found to have a significant effect on mother's use of person-oriented versus position-oriented statements, but its impact varied as a function of the mother's educational level. Situational variations also influenced the adoption of a person versus a position orientation. This effect of situational determinants was modified by the mothers' education. The results were interpreted within the framework of Bernstein's (1961) theory of social learning. (Author/BRT)

**A Developmental Study of Empathy: Egocentrism to Sociocentrism or Simple to Complex Reasoning?**

Pub Date Apr 75

Note—15p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors—**Cognitive Development, \*Cognitive Processes, \*Egocentrism, \*Elementary Education, Emotional Development, \*Empathy, Perception, \*Preschool Education

**Identifiers—**\*Social Reasoning

This study was designed to determine whether children's judgments of another's emotional state are based on egocentric or perspective reasoning processes. A total of 91 children, between the ages of 3 and 10, at three grade levels, were shown a series of photographs containing conflicting situational and expressive cues to the pictured child's emotional state. The children

between 3 and 7 years of age based 96 percent of their judgments on the expressive cues, while the correspondence between expressive cues and judgments decreased to 86 percent for the 9- to 10-year-olds. The subjects' own emotional responses to the photographs appeared to be independent from their judgments. It is argued that these results support the conclusion that children as young as 3 years of age judge the emotional states of others on the basis of perspectivist reasoning processes, and that the development of social reasoning proceeds along a continuum from simple to more complex reasoning processes. **Descriptors**—\*Affective Behavior, \*Affective Tests, Behavior Patterns, \*Expectation, \*Locus of Control, \*Performance Factors, \*Preschool Education, Psychometrics, Social Science Research

This study explored the relationship between young children's affective states and general expectancies for rewarding or punishing events. Subjects were 24 children, ages 4 and 5, from middle-class families. Positive, neutral, or negative affect was induced by having the children think happy, neutral, or sad thoughts for a short period. Two tasks were then given to the children (a maze and a matching problem) to determine if affect induction influenced expectancies for success or failure at a task. Following the tasks, psychometric instruments measuring children's expectancies for serendipitous positive or negative events and locus of control were administered to the subjects. Results indicated that outcome expectancies were independent of locus of control benefits or success anticipations. Positive affective states led to higher scores on the measure of expectancy for serendipitous positive or negative events, but negative states did not produce lower scores. (BRT)

**Descriptors**—\*Contingency Management, Discrimination Learning, Motivation, \*Positive Reinforcement, \*Preschool Education, Rewards, Self Evaluation, \*Self Reward, \*Social Reinforcement

Two studies were conducted to clarify the role of different minimum performance standards for contingent tangible reinforcement or self-dispensed evaluative reinforcement (in the absence of tangible rewards) in determining the rate and accuracy of learning. Preschool children were presented with a discrimination learning task. Their performance had to meet low (few correct), medium, or high (all correct) standards to be rewarded. In an accelerating standard condition their performance had to surpass that on the previous trial. In one experiment, rewards were externally dispensed tokens, while in the second, children self-administered verbal evaluations ("I'm doing real good!"). Learning was significantly more rapid in the high and accelerating standards, and the self-dispensation of evaluative reinforcement produced such rapid learning that by the end of the experiment, effects due to different standards had vanished. Results are discussed in terms of the incentive values of differing standards and the power of self-dispensed evaluative reinforcement. (Author/BRT)

**Egocentrism and Peer Interaction: Testing Piaget's Hypothesis.**

Pub Date 75

Note—12p.; Filmed from best available copy

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Cognitive Development, \*Communication Skills, \*Egocentrism, \*Peer Relationship, \*Primary Education, Role Playing, Sociometric Techniques

**Identifiers**—Piaget, Popularity

This experiment tested Piaget's hypothesis that peer interaction plays a crucial role in the reduction of childhood egocentrism. A sample of 46 second graders from a middle-class suburban public school were given a sociometric measure of popularity. Four tasks which assessed spatial, communicative, and role-taking egocentrism were then performed by each child. Intercorrelations among the four egocentrism tasks were computed by the Kendall Rank correlation method. Ability on the spatial egocentrism task correlated with ability in role-taking. The peer popularity measure was not found to be related to any of the measures of egocentrism. It is suggested that the use of popularity as a measure of peer interaction may be a weak test of Piaget's hypothesis. (BRT)

**Identifiers**—\*Special Supplemental Food Program Women Infants Child, WIC

This booklet examines the first 2 1/2 years of The Special Supplemental Food Program for Women, Infants, and Children (WIC), designed by Congress to provide food and nutrition information for low-income pregnant women, nursing mothers, and children up to age 4. Problems with the implementation and functioning of the nutrition program are discussed. Specific criticisms are made about the program administration by the Department of Agriculture and the States. Descriptions of some State WIC programs and recommendations for future WIC program operation are provided. Appendices include a bibliography of medical research on malnutrition, a list of government reports on WIC, WIC caseloads and budgets, a list of local WIC sponsors, and legislation authorizing WIC. **Identifiers**—\*Children's Foundation

This assessment of food service needs in children's residential institutions is based on data gathered from visits to more than 350 children's institutions in 20 states and the District of Columbia and from nearly 1,200 responses to a questionnaire sent to every residential institution in every state. Findings indicate that children in orphanages, homes for the mentally retarded, juvenile detention centers and other residential institutions eat starchier foods, have less staff assistance and fewer rehabilitative programs than

PS 008 139

are deemed adequate. It is asserted that states have not appropriated sufficient funds to provide adequate cost-of-care increases for state wards; in addition, many states have neither adequate nutrition standards nor frequent reviews in licensing regulations. It is suggested that these and other factors combine to make a strong case for the inclusion of children's residential institutions in federal child nutrition programs. (GO)

*Minimum Standards for Day Care Centers.*

Texas State Dept. of Public Welfare, Austin.

Report No.—DPW-10-74

Pub Date 74

Note—68p.

**EDRS Price MF-\$0.76 HC-\$3.32 Plus Postage**

**Descriptors**—Administrator Qualifications, Administrator Responsibility, \*Certification, \*Child Care Centers, Child Care Workers, \*Day Care Programs, Discipline, Equipment Standards, Fire Protection, Food Service, Nutrition, Safety, Sanitation, \*State Licensing Boards, \*State Standards, Student Teacher Ratio

**Identifiers**—\*Texas

This document describes the minimum standards that must be met and maintained by day care centers in the state of Texas. These standards were drawn up by the State Department of Public Welfare and are applicable to both non-profit and proprietary day care centers. The areas covered by the standards include: (1) organization and general administration, (2) enrollment, (3) director qualifications and responsibilities, (4) staff qualifications, (5) staff/child ratio, (6) space, (7) furnishings and equipment, (8) toileting arrangements, (9) fire, sanitation and safety, (10) physical health, (11) food service and nutrition, (12) program operation, (13) discipline, (14) infant care, (15) school-age care, and (16) transportation. To qualify for a license in Texas, a day care center must comply with the requirements contained in this document. (JMB)

**The Relationship Between Maternal Behavior and Representation in Young Children.**

Pub Date Apr 75

Note—14p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

**Descriptors**—\*Cognitive Processes, Communication Skills, \*Mothers, \*Parent Child Relationship, \*Preschool Children, Teaching Styles, \*Teaching Techniques

This research report is based on a study designed to explicitly test Sigel's "Distancing Hypothesis" by examining the relationship between a cluster of seven maternal behaviors related to "distancing" and representation in a total of 60, 3- and 4-year-old boys. The boys were administered three tasks (in their nursery school) which measured representational skills, and later, with their mothers, were observed interacting in a university laboratory setting. A significant relationship was found between certain maternal teaching strategies and influence techniques coded in the laboratory session and children's performance on the representational task. It is suggested that parental use of communication styles which restrict a child's attention to the immediate physical and concrete present may discourage the child from exercising his symbolic capacities in problem solving situations which require their utilization. This report describes and evaluates a system of day care for 659 children in seven southern states (75 percent of the children were preschoolers and infants in center programs, 12 percent were preschoolers in family day care homes, and 13 percent were school-age children, primarily in center programs). Most of the families served were low-income. Assessments of cognitive, social, emotional, motor, and hygiene/self-help development were obtained regularly for most of the children by observing their behavior on a series of developmental tasks. The programs in the system focused on maximizing children's total growth and development, increasing the involvement of the family and community, and providing families with supportive services. Parents were encouraged to help plan programs and become participants on advisory boards. Day care staff members were either inservice trained or had completed a two-year college curriculum. Included is a discussion of the project proposal for each of the seven states' demonstration day care projects, an account of how each project was implemented, and project goals and accomplishments. Identifiers—Southwest Educational Development Laboratory, \*Texas (Austin)

Progress made in the field of early childhood development during the past decade is examined to provide the background and rationale for tree programs funded by the National Institute of Education (NIE) in 1974: a parenting information center, a multimedia child care training package, and television spots related to child rearing principles. The evaluation consisted of four phases: (1) interviews of 11 nationally-recognized experts in child development who identified problems in research and development, (2) a literature search to identify research

findings, demonstration projects, position papers, and books in early childhood education, (3) a one-day conference of regional and state agencies to discuss delivery systems and product content, and (4) interviews of trainers of parents and paraprofessionals who identified successful and unsuccessful practices involved in working with low-income families. Each of these phases is described in detail. Also included is information concerning the progress of the three programs funded by NIE. (BRT)

 This paper describes an experimental Bachelor of Arts program at Kent State University which is tailored to recognize field accomplishments and, at the same time, to meet the special needs of experienced early childhood workers. The program is designed for individuals who have had minimal exposure to higher education due to economic hardship. The proposed program consists of three phases: (1) outstanding individuals will be awarded sophomore standing in the baccalaureate program on the basis of their demonstrated talent in the field; (2) two years of university-sponsored correspondence work will be completed by each student under the direction of a qualified supervisor already operating within the individual's locale; and (3) a residency of a year (or some portion of a year) will be completed on a university campus. The steps in the development of the program at Kent State are described and future plans for further implementation are discussed. (JMB)

**Person Perception and Verbal Labeling: The Development of Social Labels.**  
 Educational Testing Service, Princeton, N.J.  
 Spons Agency—National Inst. of Mental Health (DHEW), Rockville, Md.  
 Pub Date Apr 75

Note—14p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
 Descriptors—Age Differences, \*Cognitive Development, Fathers, Infancy, \*Infants, \*Language Development, Mothers, Pictorial Stimuli, Sex Differences, \*Social Behavior, \*Verbal Development

Identifiers—\*Social Labels

This study examined the social labels which are first used by infants, social differentiation on the basis of labeling behavior, and overgeneralization of social labels. Subjects were 81 infants from 9 to 36 months of age. The 9- to 24-month-olds were shown slides of themselves, their mothers, their fathers, and unfamiliar children, babies, and adults. The mother pointed to each slide and asked "Who is that?" The 30- and 36-month-olds were shown the same classes of persons but saw pictures mounted in a photograph album. The experimenter pointed to each picture and asked "Who is that?" Results indicated that infants were more likely to label their father's than their mother's picture and that they did so earlier and more accurately. The data also suggested that: (1) the child uses a word to represent several perceptual features of social objects; and (2) overgeneralization may occur when there are not enough labels available for all of the child's perceptual categories. Since the children in this study overgeneralized labels in an age- and sex-appropriate manner, their social labels appear to be a reflection of the way in which they categorize the social world. **EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
 Descriptors—\*Communication Skills, \*Infants, \*Interaction Process Analysis, \*Mothers, \*Parent Child Relationship, Perinatal Influences, Sex Differences  
 Identifiers—\*Brazelton Neonatal Assessment Scale

This study of 134 mothers and their newborn infants evaluated the relationships between neonatal style and mother-infant interaction. The procedure included a newborn assessment with the Brazelton Neonatal Assessment Scale and two mother-infant interaction observations, one carried out during feeding and the other during a semi-structured situation. The results indicated that there were consistent relationships between infant and maternal behaviors; more alert and responsive infants have more responsive and sensitive mothers. These consistencies were found for both infants and mothers across the different situations. Possible directional interpretations of the findings were proposed. (Author/GO)

**Mirror-Image Stimulation and Self Recognition in Infancy.**

Spons Agency—National Inst. of Mental Health (DHEW), Rockville, Md.

Pub Date Apr 75

Note—29p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.95 Plus Postage**  
 Descriptors—Behavior Change, \*Infant Behavior, \*Infants, \*Interaction Process Analysis, Role Perception, \*Self Concept, \*Self Evaluation  
 Identifiers—\*Mirror Behaviors, Self Recognition

This study explores the development of visual self-recognition by examining the effect of rouge application on the subsequent mirror behavior of 96 infants, ages 9-24 months. Each infant was observed in front of a mirror in four consecutive conditions: (1) with no rouge applied to infant's nose (baseline), (2) with a dot of rouge on infant's nose, (3) with mother, who has a dot of rouge on her nose, and (4) with infant (still rouged) alone. Behavioral responses were videotaped and coded according to six main categories: facial expressions, vocalizations, attention, mirror-directed behaviors, self-directed behaviors, and imitative behaviors. Results indicate that in the rouged condition, infants increased in nose-directed behaviors, interest and attention, some imitative behaviors, touching own image and body-directed behavior. These results are discussed in terms of self-awareness and stage theory. (GO)

**Infant Visual Memory: The Course of True Habituation Never Did Run Smooth.**

Pub Date Apr 75

Note—11p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (Denver, Colorado, April 10-13, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**  
 Descriptors—\*Attention Span, \*Infants, \*Memory, \*Pattern Recognition, \*Visual Stimuli  
 Identifiers—\*Habituation

This study addressed three major questions pertaining to habituation of visual attention in infants: (1) does habituation occur gradually? (2) how do fast and slow habituators compare in their response to discrepancy? and (3) does intervening stimulation produce interference with infants' visual recognition memory? The subjects were 36 17-week-old infants, half were male and half female. Each infant sat on his or her mother's lap facing a semi-circular screen while an observer watched the infant's head and eye movements on a television monitor located in an adjacent room. Each trial consisted of the infant's looking at a blinking light on the left, followed by one unlimited fixation of the stimulus on the right. Each infant saw the same pattern repeatedly until his or her fixation time reached the specified habituation criterion. Each infant was then presented with a pattern discrepant from the standard stimulus. The findings indicated that in-

fants do not gradually decrease their response to a repeated stimulus, but rather seem to habituate within one or two trials. Further, there were distinct, non-overlapping distributions of trials to criterion for the fast and slow habituators with both groups of infants showing the same degree of recovery to a novel stimulus. Finally, evidence of interference with infants' recognition memory was found and attributed to there being only a single, repeated intervening stimulus. (JMB)

**Prior Knowledge of Rules in Concept Learning.**

Pub Date Apr 75

Note—15p.; Paper presented at the Annual Convention of the American Educational Research Association (Washington, D.C., March 30-April 3, 1975)

**EDRS Price MF-\$0.76 HC-\$1.58 Plus Postage**

Descriptors—\*Cognitive Development, Compensation (Concept), \*Concept Formation, \*Conservation (Concept), \*Early Childhood Education, \*Learning Processes, Retention, Theoretical Criticism, Training Techniques, Transfer of Training

Identifiers—\*Piaget

This paper briefly reviews the literature concerning the Piaget-Burner debate over the roles of identity and reversibility rules in conservation acquisition, and describes an experiment designed to determine whether one group of rules is more closely related to conservation than the other. A group of children, aged 4-6 years, received tests of inversion, reciprocity, qualitative and quantitative identity, and conservation of liquid, weight, and length. A total of 75 of these children, who showed no evidence of conservation but exhibited considerable variability on the four rule tests, were selected for the experiment. Of these, 50 experimental subjects were trained to acquire liquid quantity conservation via an elementary feedback procedure. The 25 control subjects received the same liquid quantity problems during training trials, but feedback was omitted. In a posttest one week later, subjects were readministered the liquid, weight and length conservation tasks. Performance of the trained subjects in all areas was far superior to their controls. It was determined that prior knowledge of Piaget's inversion rule was an excellent predictor of conservation learning, and that neither Bruner's nor Piaget's analyses of conservation appears to be entirely correct. Identifiers—\*Day Care Licensing, Hawaii

This report focuses on the major similarities and differences of three sets of day care licensing standards (model, state, and federal) in order to provide an information base for isolating the problems, concerns, and issues involved in day care licensing. Sets of standards compared are: (1) "OCD Guides for Day Care Licensing," 1973 (model); (2) "Rules and Regulations Governing Group Day Care Centers" and "Rules and Regulations Governing Family Day Care Homes" used by the state of Hawaii since 1966; and (3) "Federal Interagency Day Care Requirements" (1968). Part 1 lists major issues and concerns (in question form) grouped under these major headings: (1) the act itself (title, purpose, and definition of terms), including application, development, and enforcement of rules and regulations; (2) administration, program, staffing, and parent participation requirements; (3) health and sanitation requirements; and (4) fire and safety requirements. A brief summary is included. Part 2 (comprising three-quarters of the report) con-

tains four charts grouped under the same headings. The charts present the provisions of each set of standards so that specific regulations may be compared across standards. Summaries follow each chart. (ED)
